

TECHNICAL MEMORANDUM

DATE:	May 7, 2018	PROJECT # : 605.8302
TO :	Heather Gluski, Resolution Copper	
FROM:	Janis Fleming, Colin Kikuchi, and Tim Bayley	
PROJECT:	Peg Leg Investigations	
SUBJECT:	Results of Site Reconnaissance	

Introduction

In accordance with a request from Resolution Copper (RC), Montgomery & Associates (M&A) has prepared this summary of reconnaissance investigations at the Peg Leg site, an alternative site for a future tailings storage facility (TSF).

Location

The Peg Leg proposed TSF is located approximately 17 miles east of Florence and 10 miles west of Kearny in Pinal County, Arizona. The site is located approximately 4 miles south of the Gila River, and is accessible from the Florence-Kelvin Highway. The project study area, proposed Peg Leg TSF footprint, and sites visited during field reconnaissance are shown on **Figure 1**. The proposed Peg Leg TSF is located on Arizona State Trust, U.S. Bureau of Land Management, and private land in T. 4 S., R.12 E., Sec. 25, 26, 27, 34, 35, and 36; T. 4 S., R. 13 E., Sec. 30 and 31; T. 5 S., R. 12 E., Sec. 1, 2, 3, 10, 11, and 12; and T. 5 S., R. 13 E., Sec. 6 and 7 as shown on **Figure 2**.

The eastern portion of the proposed TSF lies on Precambrian and Paleocene granitic bedrock and the western portion lies on Quaternary alluvial deposits and Tertiary conglomerate within the Donnelly Wash basin (**Figure 3**).

Field Reconnaissance and Preliminary Investigations

Reconnaissance investigations were conducted by M&A, WestLand Resources, Inc. (WRI), and hydroGEOPHYSICS, Inc. (HGI) in September and October 2017. M&A focused on hydrogeologic features, WRI focused on biological features, and HGI

conducted a series of geophysical surveys to determine depth to bedrock in the Donnelly Wash basin.

Montgomery & Associates

M&A conducted preliminary hydrogeologic investigations on September 26-27, and October 13, 2017. Prior to mobilizing to the site, M&A reviewed published U.S. Geological Survey and Arizona Geological Survey maps and reports, and Arizona Department of Water Resources (ADWR) well records. M&A contacted Mr. Rick Bader, lessee of the Tea Cup Ranch, to obtain permission to visit wells on the lands leased from the Arizona State Land Department. M&A and RC personnel met with Mr. Bader on September 27, 2017 to review well conditions and access.

During the field investigations, ten wells were visited. Where accessible, water levels were measured, and where permissible, water samples were collected. Results are discussed later in this memorandum.

WestLand Resources, Inc.

WRI conducted a preliminary reconnaissance of the biological resources in the area. The vegetation in the Peg Leg area was assessed and found to be primarily upland vegetation. No areas with riparian or wetland vegetation were observed within the Peg Leg area (WRI, 2017).

Several areas of critical habitat for the Endangered Species Act (ESA) listed species Acuna cactus are present in the eastern portion of the Peg Leg area. The Gila River near the Cochran site is potential habitat for two ESA listed bird species – the southwestern willow flycatcher and the yellow-billed cuckoo. There is potential habitat for the Sonoran desert tortoise, which is considered a Species of Greatest Conservation Need by the Arizona Game and Fish Department (WRI, 2017).

HydroGeophysics, Inc.

HGI conducted electrical resistivity, refraction seismic, and gravity surveys during the period September 10-17, 2017. The purpose of the surveys was to determine depth to bedrock and character of the basin –fill materials. Results are discussed later in this memorandum.

Hydrogeologic Framework

Geology

The Peg Leg reconnaissance area lies within the Grayback and North Butte quadrangles; the proposed TSF lies entirely within the Grayback quadrangle. The geology of the Grayback quadrangle was described by Cornwall and Krieger (1975), and the North Butte quadrangle by Richard and Spencer (1997). Surficial deposits were described by Huckleberry (1993). The evolution of the Tea Cup granodiorite porphyry system and faulting in the area were described by Nickerson (2009).

Principal Geologic Units

The hydrogeologic features in the Peg Leg area are shown on **Figure 3**. The principal geologic units, from oldest to youngest, within the study area include Precambrian Ruin Granite (Yr) and associated aplite dikes (Yra) in the eastern part of the area, north trending, steeply dipping Precambrian diabase sills or dikes (Ydb) within the Ruin Granite, Laramide Tea Cup Granodiorite (Ttc) and associated aplite to pegmatite dikes (Ttca) in the west central part of the area, Tertiary rhyolite and andesite dikes and sills (Tr, Tr2, Tah) that intrude the Ruin Granite and Tea Cup Granodiorite, Tertiary Gila Group conglomerate (Tc, Tcv, Tcur) and interbedded volcanic units (Tt, Tts, Ttf, Tbd) extending from the Gila River on the north to 1 to 2 miles south of the river, and Quaternary deposits including older gravel (Qog, Qo, QTs), pediment veneer (Qp), travertine (Qtr, Qc), and active stream channel alluvium and low terraces (Qal, Qsy) in the western part of the area from the edge of the Gila Group units and continuing to the south (Cornwall and Krieger, 1975; Richard and Spencer, 1997; and Ferguson and Trapp, 2001).

Structural Geology

A series of Tertiary age normal faults occur north of the proposed TSF. The Cochran fault bounds the eastern side of the Donnelly Wash basin south from Cochran. Springs occur along the fault and pedogenic carbonate covers the fault zone suggesting groundwater moves along the fault. North of the Gila River, the fault is intruded by felsic igneous units (Richard and Spencer, 1997).

The Walnut Canyon fault, a major normal fault, outcrops on the north side of the Gila River east of Cochran and dips gently to the north-northwest. As the fault crosses into the North Butte quadrangle, it bends abruptly south, is intruded by a felsic igneous unit, and truncates against the Cochran fault (Richard and Spencer, 1997). The Walnut Canyon fault is inferred to lie beneath the alluvial cover in Donnelly Wash basin (Nickerson, 2009).

The Walnut Canyon fault again outcrops west of the Donnelly Wash basin (Richard and Spencer, 1997).

East-northeast trending fissures with associated limonite and quartz occur in the vicinity of and east from Peg Leg Ranch. The fissures cut both the Ruin Granite and the Tea Cup Granodiorite and generally follow the same trends as the sills and dikes.

Depth to Bedrock

The easternmost portion of the proposed TSF lies on granitic bedrock. The central and western portion lies on Tertiary to Quaternary alluvial deposits (Qal, Qsy, Qp, Qog, QTs, Tc) (**Figure 3**). The Arizona Geological Survey shows an estimated depth to bedrock of less than 400 feet for the Donnelly Wash basin (Richard and others, 2007). Richard and Spencer (1997) show Tertiary Gila Group conglomerate and interbedded volcanic units (Tc, Tcv, Tb, Tt) more than 2,000 feet thick at the north end of the Donnelly Wash basin adjacent to the Gila River. Huckleberry (1993) described relative ages of surficial deposits without speculation regarding thicknesses of the deposits.

HGI conducted a multi-method electrical resistivity, refraction seismic, and gravity geophysical survey at the Peg Leg site to determine approximate depths to bedrock and character of the basin fill in support of a geotechnical feasibility study for the proposed TSF. The initial refraction seismic and electrical resistivity surveys yielded depths to bedrock greater than 300 feet and 400 feet, respectively, exceeding the limitations of the equipment used for the surveys. A basin-wide gravity survey was incorporated to image down to bedrock (HGI, 2017).

HGI modeled the results of the gravity surveys using two basin-fill models that included basin-fill densities of 2.0 grams/cubic centimeter (g/cc) and 2.35 g/cc based on a standard basin-fill density and the basin-fill density observed at Far West in 2012 which included interbedded volcanic rocks. Results indicate that depths to bedrock within the Donnelly Wash basin, for three profiles shown on **Figure 4**, are about 700 feet in the northern part of the basin and 550 to 570 feet in central part of the basin and 1,250 to 1,300 feet in the central part of the basin and 1,250 to 1,300 feet in the central part of the basin and 1,250 to 1,300 feet in the central part of the basin using an assumed basin-fill density of 2.35 g/cc. These estimates include the thickness of both the Quaternary alluvial deposits and the Tertiary Gila Group units.

Groundwater Occurrence

Wells

A review of records in the ADWR 55 well registry data base yielded 23 registered wells in the area of interest. Information for the wells is provided in **Table 1** and locations are shown on **Figure 1**. Photographs of the wells that were visited during reconnaissance investigations are provided in **Appendix A**, and available ADWR imaged records are provided in **Appendix B**. Four of the entries are believed to be duplicate registrations and registration for two wells cannot be verified (**Table 1**).

A well was located adjacent to the Donnelly Ranch well (55-631442). Registration of a duplicate well at this location could not be verified (**Figure 1, Table 1**).

Another well, believed to be GWSI 330618111092201, was located in the Gila River floodplain near Cochran; registration of this well could not be verified. The North Butte 7.5-minute topographic map shows a well in a location which is close to the location of the GWSI well. The ADWR 55 well registry database shows registered well 55-635862 in approximately the same location; however, it is uncertain if they are the same well (**Figure 1, Table 1**).

During field reconnaissance, ten wells were visited and are indicated on the figures. The remaining wells were not visited because they are outside the area of the proposed tailings footprint, are located on private land, or were not located during reconnaissance.

Groundwater Elevation

During reconnaissance, water levels were measured at six wells; one well was flowing (second well at Donnelly Ranch) and well 55-803306 (base of Grayback) was dry (**Figure 5**). Depths to water level ranged from artesian conditions in the Donnelly Ranch area (well completed in Precambrian granite and diabase) to about 149 feet below land surface (bls) at well 55-631448 (well collared in alluvium). Well 55-221504 (collared in Precambrian granite) reportedly had a static water level of 200 feet bls in 2013 when a pump was installed. RC personnel attempted to measure a pumping water level in August 2017, but encountered an obstruction above water level at 465 feet bls. A summary of groundwater level measurements is provided in **Table 2.**

A groundwater elevation contour map was prepared using groundwater elevations reported in **Table 2**, and several control points reflecting assumptions about basin hydrogeology. Specifically:

- Groundwater flow through the basin is driven partly by underflow at the southeastern margin; a control point with a groundwater level of 2,950 feet above mean sea level (ft amsl) was inserted to the southeast of the basin boundary.
- The southwestern margin of the basin is defined by the contact between a complex of volcanic and intrusive rocks southwest of Donnelly Wash; this contact is assumed to act as a no-flow boundary for the basin.
- Artesian flow was observed at the well adjacent to 55-631442; including this datum in the groundwater level contours would bring water levels above land surface in adjacent portions of Donnelly Wash. It is assumed that groundwater conditions reflected at this well are not representative of conditions in the basin, and this datum was consequently not used in preparing the groundwater elevation contour map.
- It is assumed that depth to water beneath Donnelly Wash is 10 feet.

The resulting groundwater elevation contours are shown on **Figure 5**. Beneath the proposed TSF, depth to water level is approximately 30 feet bls (**Table 2**).

Direction of Groundwater Movement

Based on a limited number of water level measurements, direction of groundwater movement in the basin-fill aquifer is from the southeast toward the northwest (**Figure 5**). The lateral hydraulic gradient, calculated based on water levels from wells 55-631448 and 55-631447, is 0.04 feet per foot.

Estimated Volume of Groundwater in Storage

To estimate the volume of groundwater in storage, an analysis was conducted using the HGI gravity profiles to estimate thickness of the basin fill, and groundwater elevation contours based on water levels measured during reconnaissance. A porosity of 0.1 was used as an estimate for the basin fill (Driscoll, 1986).

Basin Extent

The basin extent was defined based primarily as reported by HGI (**Figure 4**), with one modification. The northwestern margin of the basin was extended to the Gila River to include the Gila conglomerate (Tc) mapped by Richard and Spencer (1997) (**Figure 3**). To the southeast, the basin extent used by HGI follows the Florence- Kelvin Highway. Tertiary basin fill and Quaternary alluvial deposits continue across the highway to the southeast (Skotnicki, 1999), representing a continuation of the basin. However, this portion of the basin lies upgradient of the TSF footprint and would consequently be

impacted to a lesser degree than the downgradient portion. Therefore, the basin has not been extended to the southeast. **Figures 6 through 9** show the basin extent used for estimating the volume of groundwater in storage.

Bedrock Thickness and Elevation

HGI calculated bedrock elevations based on the basin-fill thickness from gravity modeling along three sections (**Figure 4**) and land-surface elevation derived from the Digital Elevation Model (DEM) of the study area. Contour maps were then prepared based on bedrock elevations along the three sections and control points at the basin margin and at several points internal to the basin. Control points were developed to ensure that bedrock elevation contours would be consistent with the hydrogeologic framework. Specifically:

- Bedrock elevation is set to land surface at the margins of the basin
- Tertiary Gila conglomerate spans both banks of the Gila River, pinching out against volcanic and intrusive rocks north of the river. A basin-fill thickness of 150 feet is assumed north of the Gila River.
- Depth to water at GWSI Well 330618111092201 is 22 ft; it is assumed that the basin-fill thickness is 100 feet at this location.
- Huckleberry (1993) identifies several outcrops of Tea Cup Granodiorite at the southwestern margin of the basin. Control points with bedrock elevation at land surface were inserted to reflect these features.
- Tertiary basin-fill deposits and Quaternary alluvial deposits extend to the southeast of the Florence-Kelvin Highway; a thickness of 100 feet is assumed for these sediments.

Figures 6 and 7 show interpolated bedrock elevation of the basin based on the 2.0 grams per cubic centimeter (g/cm^3) and 2.35 g/cm^3 HGI gravity models, respectively.

Saturated Thickness

Contour maps of basin saturated thickness were prepared by subtracting the bedrock elevation surfaces shown on **Figures 6 and 7** from the interpolated groundwater level elevation shown on **Figure 5**. Basin saturated thickness under the two gravity models are shown on **Figures 8 and 9**.

The total volume of groundwater in storage was calculated by multiplying the saturated thickness by the assumed aquifer porosity of 0.1 (Driscoll, 1986):

- Assuming a basin-fill density of 2.0 g/cm³, there is an estimated 294,000 acre-feet (AF) of groundwater in storage.
- Assuming a basin-fill density of 2.35 g/cm³, there is an estimated 680,000 AF of groundwater in storage.

Aquifer Parameter Estimates

There are no test data for any of the wells completed in Quaternary alluvium in the Peg Leg area. During characterization of the Near West site, Golder conducted bottomless bucket and constant-head tests in excavated pits. Based on results of 28 bottomless bucket tests and one constant-head test in alluvial sediments, the geometric mean field saturated hydraulic conductivity value was 1×10^{-3} centimeters per second (cm/sec) (Golder, 2017). Results for a constant-rate pumping test at test well DS17-17, completed in alluvial sediments at Near West, indicate a hydraulic conductivity of 6×10^{-1} cm/sec (M&A, 2017b).

Hydraulic conductivity for the Gila conglomerate was estimated based on 14 hydrologic tests conducted at monitor wells in the West Plant area. Estimates of hydraulic conductivity of the conglomerate (excluding one test for a mudstone unit within the Gila Group), range from 1×10^{-7} to 6×10^{-9} cm/sec; arithmetic mean is 3×10^{-6} cm/sec and geometric mean is 5×10^{-7} cm/sec. Estimated hydraulic conductivity of the sandstone/mudstone unit (one test) within the Gila Group is 1.3×10^{-9} cm/sec (M&A, 2012b).

An 18-hour pumping test at a well completed in the sandstone facies of the Gila Group at Far West yielded a hydraulic conductivity of 4×10^{-6} cm/sec (M&A, 2012a).

The geometric mean hydraulic conductivity value for Gila Group sedimentary units at the Near West area was 1×10^{-6} cm/sec (Golder, 2017). Results for a constant-rate pumping test at a well completed in Gila conglomerate at Near West indicate a hydraulic conductivity of 9×10^{-4} cm/sec (M&A, 2017a).

Well 55-221504, completed in granitic bedrock, had a specific capacity of about 0.05 at the time a pump was installed in 2013 (**Appendix B**).

Groundwater Quality

Groundwater samples were collected at the Donnelly Ranch well, 55-631442, and the Tea Cup Ranch well, 55-631444, on September 27, 2017. The samples were analyzed for common, trace, and radiological constituents. SVL Analytical, Inc. of Coeur d'Alene,

Idaho conducted the analyses for common and trace constituents, and ACZ Laboratories, Inc. of Steamboat Springs, Colorado conducted the analyses for radiological constituents. Laboratory chemical results are summarized in **Tables 3 through 6**. Results indicate that the water types are very different at the two wells.

The Donnelly Ranch well (55-631442) which is completed in Ruin Granite and diabase (**Figure 3**) has sodium bicarbonate sulfate-type water. Total dissolved solids (TDS) concentration is 349 milligrams per liter (mg/L) and pH is 8.9 (**Table 3**). The Arizona Aquifer Water Quality Standard (AWQS) of 4.0 mg/L for fluoride was exceeded at this well; the concentration of fluoride was 10.7 mg/L (**Table 3**).

The Tea Cup Ranch well (55-631444) which is completed in Quaternary alluvium and Tea Cup Granodiorite (**Figure 3**) has calcium bicarbonate-type water. TDS concentration is 523 mg/L and pH is 7.0 (**Table 3**). The AWQS of 10 mg/L for nitrate plus nitrite was exceeded at this well; the concentration of nitrate plus nitrite was 15.2 mg/L (**Table 3**).

Water quality parameters were measured at well 55-221504, completed in Ruin Granite and Tea Cup Granodiorite (**Figure 3**), but a sample was not collected pending request for permission to sample from the owner. Water quality parameters for wells that were accessible are summarized in the table below.

Identifier	Temperature (degrees C)	Specific Electrical Conductance (µS/cm)	рН	ORP (millivolts)
55-631442 Donnelly Ranch	23.8	589	8.90	265
55-221504 A Diamond Ranch	24.4	2,385	7.53	267
55-631444 Tea Cup Ranch	24.8	831	7.04	270

Surface Water

During reconnaissance investigations, two springs were located in the Peg Leg area. Neither spring is within the TSF footprint. Photographs of the springs that were visited during reconnaissance are provided in **Appendix C**.

Donnelly Ranch Spring

A spring complex in Precambrian granite and diabase was located in the vicinity of the Donnelly Ranch wells in September 2017 (**Figure 1**). Three locations with flowing water

were observed in an area that appears to have been excavated. Water quality parameters for the three locations are summarized below.

Location	Temperature (degrees C)	Specific Electrical Conductance (µS/cm)	рН	ORP (millivolts)
80 feet SE of windmill	17.9	520	8.05	322
Hillslope E of bee plant field	19.1	1,170	7.31	338
Downhill next to road	18.0	551	7.56	308

Spring West of Grayback Windmill

A dry spring in older Quaternary units in the SW ¼ of Sec. 16, T. 4 S., R. 12 E. was located on October 13, 2017 (**Figure 1**). The spring is developed with a 36-inch culvert spring box and was once plumbed into a nearby tank. The spring is located in a large stand of willow trees with travertine downstream from the spring.

vell with GWSI 330618111092201. Stock/domestic well transferred to ASARCO in th a 600 gpm pump in 1982; no pump in 1996.	35-45015
11092201; TD = 27.18 on 9/26/2017; 16-inch casing set in 3.5 ft diameter concrete ots. Possible duplicate with 55-635862. Collared in floodplain alluvium.	none
II. Hand dug. 4 ft x 4 ft concrete vault. Rancher uses this well in the wet years when ter; TD 19' on 10/13/2017. Collared in alluvium.	none
ormation on file. Transfer of ower from Fitch Plastering Corporation to Rick Bader II; rods detached; possibly the same as 55-642330. Also GWSI 330423111093501.	78-115434
rs to be a windmill. May be able to tag a water level. Possibly the same as 55-631448. . Fitch Plastering #1123 in 1982.	
ially owned by the Tea Cup Ranch and the Fitch Plastering Corporation. Probably a a potentially open well with a water level. No well construction details found. hip from Fitch Plastering Corporation to Rick Bader 10/15/85.	78-115431
ne above? Perhaps a mistake by ADWR. There are two separate well images on file sfering ownership though, implying two wells may actually exist. Transferred ownershi g Corporation to Rick Bader 10/15/85.	78-115432
lly Ranch well. Windmill, defunct, with 2-inch column. TD = 28.25 on 10/13/2017. hip from Fitch Plastering Corporation to Rick Bader 10/15/85. Collared in Precambrian	78-115428
nelly Ranch corral. Artesian. Root encircled 8-inch casing. 3/2017.	
II. West of stock tank; equipped with gasoline powered jack. Could potentially sample n rancher. Transferred ownership from Fitch Plastering Corporation to Rick Bader	78-115433
npany the purhcase of the Timious Prodromas Ecclesiastical Retreat. No hydro data	
Crowder, T.J. grazing lease 05-3391 on record; RC visits site on 8/30/2017 but cannol ank is cracked and empty; M&A could not locate well on 10/13/2017.	none
II. Duplicate registration with 55-615338. Windmill abandoned in 2006.	none
GWSI map and registry. Deepened in October 2000? Duplicate registration with onment report for windmill 2006; grazing lease 05-3391.	none
pump in well; solar powered; but tank is dry; pump probably off for quite some time; sing is 8.75-inch OD. 50' south is grouted in (55-645881). Red tank above well is full and overflowing. TD or	
'. Water level difficult to measure; seems like cascading water.	
ploration borehole. Well located on ASLD land but leased to G&H Cattle. Well pumped pump for 50 minutes from 200' static WL at 20 gpm and saw a 440' drawdown in the WL of 640'. Pump installed in 2013. Detailed geologic logs for this well found in	none
solar pump in well; probably runs intermittently; NE trough a mile or two to the NE is ful n Grundfos controls is on; water level meter got hung up at 465' and well was still dry; nt beeps on the meter and a wet meter tape on retrieval indicates that water is trickling ow in well from shallow to deep zones?	
Il as 55-221504, according to ASLD letter in 55-221504 file - was drilled as exploration inted to stock well. This is a permitting mistake for well 55-221504. This seems to be mit? No substantial evidence of this being an actual well. Permitting for 4 exploration in Associates in 2012. Possibly abandoned some?. Ownership given to ASLD. No hydro il was converted to a stock well. Land is leased by Aven Associates.	none
	none
tempts visit on 8/30/2017 but there is a gate.	none
edly 40' of drawdown during pumping test.	none

Comments

te with GWSI well 330618111092201.

18111092201; possible duplicate with 55-635862.

well. Rancher uses this well in the wet years when the well gathers 10/13/2017.

information on file. Windmill; rods detached.

ne as 55-631448?

well. Windmill defunct, with 2-inch column pipe.

0/13/2017.

Donnelly Ranch corral. Artesian. Root encircled 8-inch casing with 2.8-foot .74' bls on 10/13/2017.

stock tank; equipped with gasoline powered jack. Could potentially stance from rancher.

well. Well abandoned in 2006.

on GWSI map and registry. No owner listed. Could it be the same well as ar powered pump in well; 8/30/2017 tank is dry; pump probably off for pond is dry; casing is 8.75-inch OD. Old windmill about 50' south is was pumping on 10/13/2017; WL = 90 feet; red tank above well is full TD or obstruction at 99.39'. Water level difficult to measure; seems like

exploration borehole. Well located on state land but leased to G&H ped with a submersible pump for 50 minutes from 200' static WL at a 440' drawdown in the well with a pumping WL of 640'. Pump installed I geologic log for this well found in imaged record. Attempted water level RC; solar pump in well; probably runs intermittently; NE trough a mile or full of water; red light on Grundfos controls is on; water level meter got and well was still dry; however, intermittent beeps on the meter and a wet trieval indicates that water is trickling into well; possible flow in well from zones.

same well as 55-221504, according to ASLD letter in 55-221504 file ploration well and then converted to stock well. Likely a permitting 55-221504. This seems to be an abandonment permit? No substantional being an actual well. Permitting for 4 exploration wells drilled by Aven 12. Possibly abandoned some?. Ownership given to AZ State Land hydro information. The well was converted to a stock well. Land is leased tes.

stock well; Crowder, T.J. Grazing Lease 05-3391.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12,
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well",

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- a. Fill in the Section Founship and Range in all cases if it is available.
 b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

Comments On 3/28/07, the Arizona State Land Dept. (ASLD) notified Rick Bader (lessee) of 46485 Teacup Ranch Road in Florence that an open well exists on State Trust Land under Lease/Permit No. 05-1230. Mr. Bader was advised that he needed to either install a cap on the well or to have the well abandoned in accordance with AAC R12-15-816. According to ASLD, the legal description where the well is located is at D(4-12)16ddb and is registered with ADWR under 55-803306. In 1979, Teacup Ranch submitted a drillers report and a pump installation report for a well that was located at that same location with ASLD. The forms indicated that the well was "dug" to a depth of 45-ft (no diameter of borehole given) and the hole was not cased. Depth to water was at 15-ft and the well was completed sometime prior to 6/12/19. The pump installation report indicated that the well was equipped with an eight-foot Dempster windmill. In 1982, ASLD late registered this "stock" well with ADWR and 55-803306 was assigned. File update conducted 4/2/07. mib

Re: Well Registration No. 55-803306, File No. D(4-12)16DDB

Dear Lessee/Permittee:

An open well exists in the NE1/4, SE 1/4, SE1/4, Section 16, T4S, R12E. It is on State Trust land under your Lease/Permit No. 05-1441. According to the Arizona Administrative Code (AAC) R12-15-822), "open well" means a well that is not equipped with a pump or capped.

To date our records do not indicate that you have taken any action to bring this well into compliance with the Arizona Revised Statutes (ARS) § 45-594 and AAC R12-15-822. As indicated in previous letters sent to you, the Arizona State Land Department (ASLD) is concerned with the potential hazards that this open well represents to human and/or animal safety. Therefore, there is an urgency in bringing these open wells into compliance with the Arizona Administrative Code.

l urge you to contact me at (602) 542-2672 as soon as you receive this letter to let us know of the steps you intend to take to bring these wells into compliance.

Sincerely,

Im Sicard Water Resource Specialist Water Rights and Agriculture Section

Re: Well Registration No. 55-803306, File No. D(4-12)16DDB

Dear Lessee/Permittee:

On March 28, 2007, the Arizona State Land Department informed you that the referenced open well is on State Trust land under your Lease/Permit No. 05-1230. The well is located in the NW 1/4 of the SE1/4 of the SE1/4 of Section 16, T4S, R12E.

The well has been inspected and was shown to pose a physical hazard to humans and animals, as well as a possible contamination route directly to the groundwater supply. Therefore, it needs to be brought into compliance with ARS § 45-594 and AAC R12-15-816. As stated in the March 28, 2007 letter, this can be done by any of three methods: capping or abandoning the well properly, or putting the well back in production, ensuring that it is in compliance with the above statutes.

As of this date, we have not received a response from you. Whichever option you choose to exercise, please complete the appropriate form and mail back to this agency in the self-addressed envelope.

If you have any questions or if you did not receive our original letter, please call me at (602) 542-3500.

Sincerely. ucard

October 25, 2007

Mike Ball, Senior Compliance-Enforcement Officer Arizona Department of Water Resources, NOI Unit 3550 North Central Avenue Phoenix, AZ 85012

Dear Mike:

Re: Open Cased well 55-803306, D(04-12)16DDB

I recently copied you with letters I have sent to Rick Bader, the current grazing lessee and user of the referenced well, regarding his open cased well.

Enclosed please find documents submitted by Mr. Bader, which are intended to serve as notice of compliance as required by Arizona Revised Statute 45-594 and the Arizona Administrative Code R12-15-822.

If you have any questions, please call me at (602) 542-2672.

Sincerely, Jun Sicard Water Resource Specialist Water Rights and Agriculture Section

Comments	Contamination Site: NO - NOT IN ANY WQARF SITE Comments On 3/28/07, the Arizona State Land Dept. (ASLD) notified Rick Bader (lessee) of 46485 Teacup Ranch Road in Florence that an open well exists on State Trust Land under Lease/Permit No. 05-1230. Mr. Bader was advised that he needed to either install a cap on the well or to have the well abandoned in accordance with AAC R12-15-816. According to ASLD, the legal description where the well is located is at D(4-12)16ddb and is registered with ADWR under 55-803306. In 1979, Teacup Ranch submitted a drillers report and a pump installation report for a well that was located at that same location with ASLD. The forms indicated that the well was "dug" to a depth of 45-ft (no diameter of borehole given) and the hole was not cased. Depth to water was at 15-ft and the well was completed sometime prior to 6/12/19. The pump installation report indicated that the well was equipped with an eight-foot Dempster windmill. In 1982, ASLD late registered this "stock"

RECEIVED MAR 3 0 2007 WATER MGMT

Re: Well Registration No. 55-803306, File No. D(4-12)16DDB

Dear Lessee/Permittee:

An open well exists in the NW 1/4, SE 1/4, SE 1/4, Sec. 16, T4S, R12E. It is on State Trust land under Lease/Permit No. 05-1230. According to the Arizona Administrative Code (AAC) R12-15-822), "open well" means a well that is not equipped with a pump or capped.

The well as described above, is in violation of Arizona Revised Statute (ARS) §45-594 and AAC R12-15-822 and poses a physical hazard to humans and animals, as well as a possible contamination route directly to the groundwater supply. Please take immediate action to bring this well into compliance within 15 days of receipt of this letter. If you are aware of any other open wells on your lease/permit, action should be taken to bring them into compliance also.

For your reference, I have enclosed a computer printout of the well registration, a copy of a map showing the location of the well, and copies of photos of the well site (if available).

There are three options which you may consider to correct this matter:

- The well may be capped in accordance with ARS §45-594 and AAC R12-15-822 (enclosed). If so, complete the enclosed "Notice of Well Capping" form and return it to me within 5 days of the well capping. Capping the well consists of welding a 1/4" steel plate equipped with a 1/2" inspection plug to the exposed casing to attain a water tight seal. See enclosed "Examples of Typical Wells and Capping Methods Preferred by the State Land Department."
- 2. The well may be abandoned in accordance with ARS §45-594 and AAC R12-15-816 (enclosed). If so, complete the enclosed "Notice of Intent to Abandon a Well" form. Return the completed form to me within 15 days of receipt of this letter. Abandoning the well consists of filling and sealing the well including the annular space, by a licensed driller, to prevent the vertical movement of water. The well driller must receive well abandonment authorization from ADWR prior to starting the actual abandonment procedure.

March 28, 2007 Page 2

3. If it is at all possible and you prefer to put the well back into production, please return the "Completion Report" within 30 days of placing a pump in the well.

Whichever option you choose, return the completed form to the Land Department in the envelope provided. After we update our records, we will forward your original form to the Arizona Department of Water Resources.

The Arizona State Land Department is concerned about the hazards of open wells. Thank you for your cooperation in making this well safe.

If I can be of assistance or if you have any questions, please call me at (602) 542-3500.

Sincerely,

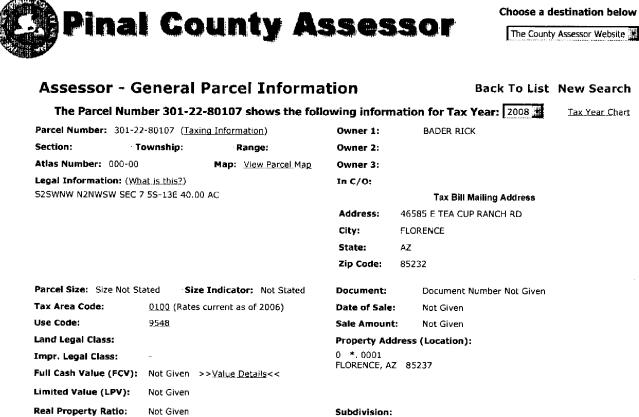

Illisicand.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of desal than two (2) acres of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well". <u>INSTRUCTIONS FOR REGISTRATION QUESTIONS</u>
- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- 2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnesship, firm, etc., fill in the appropriate title.

ARIZONA

- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

November 13, 1985

Operation Division Department of Water Resources 99 East Virginia Avenue Suite 100 Phoenix, Arizona 85004

Dear Sirs:

Regarding the transfer of water rights on the Teacup Ranch from the Fitch Corporation to Rick Bader, attached please find:

- 1. \$80.00 assignment fee
- 2. Sixteen signed and notorized assignment forms for the following rights:
 - a. 1 registration of stock pond (#38's)
 - b. 8 water rights registration (#36's)
 - c. 7 certificates of water right

(3.) Eight signed change of well ownership forms for well registrations (#55's)

Should you have any questions or need additional information please don't hesitate to call.

Sincerely,

Tom A. Rolston Doane Western Company

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- 1. The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- 2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- 1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in duplicate with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is 2. not abandoned or sealed, or {2} a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany regis-3. tration forms for all Non-Exempt Wells.
- An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 4. gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- A "Non-Exempt Well" means a well that is not an "Exempt Well". 5.

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or 2. after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- Fill in the Section, Township and Range in all cases if it is available. 3. a.
 - If the well is in a subdivision and you have this information, give the subdivision name, Lot h Number, and Address.
- Show all purposes for which the water seed of a 4.
- If the well is used for irrigation, give the number of acres irrigated in 1980 from the well. 5.

If the owner of the land is an individual, give the last name, first name, middle initial. If the owner 6 of the land is a corporation, partnership, firm, etc., fill in the appropriate title.

VEISON

- Complete the section on Well Data with the most accurate information available to you. If the data 7. is not available, write N/A in the blanks.
- Give the legal description of the place of use of the water. If place of use is in a subdivision and 8. legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

.

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.

RESOURCES

- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, gives he manufact of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

December 29, 2014

TIMIOUS PRODROMAS ECCLESIASTICAL RETREAT 46558 E PEG LEG RD KEARNEY, AZ 85137

Registration No. 55- 224221 File Number: D(4-12) 36 AAB

Dear Well Applicant:

JANICE K. BREWER Governor

MICHAEL J. LACEY Director

Enclosed is a copy of the Notice of Intention to Drill (NOI) a well which you or your driller recently filed with the Department of Water Resources. This letter is to inform you that the Department has approved the NOI and has mailed, or made available for download, a drilling authorization card to your designated well drilling contractor. The driller may not begin drilling until he/she has received the authorization, and must keep it in their possession at the well site during drilling.

Well drilling activities must be completed within one year after the date the NOI was filed with the Department. If drilling is not completed within one year, a new NOI must be filed and authorization from this Department received before proceeding with drilling. If the well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the well must be properly abandoned and a Well Abandonment Completion Report must be filed by your driller [as required by A.A.C. R12-15-816(F)].

If you change drillers, you must notify the Department of the new driller's identity on a Request to Change Well Information (form 55-71A). Please ensure that the new driller is licensed by the Department to drill the type of well you require. A new driller may not begin drilling until he/she receives a new drilling authorization card from the Department.

If you find it necessary to change the location of the proposed well(s), you may not proceed with drilling until you file an amended NOI with the Department. An amended drilling authorization card will then be issued to the well drilling contractor, which must be in their possession before drilling begins.

Arizona statute [A.R.S. § 45-600] requires registered well owners to file a Pump Installation Completion Report (form 55-56) with the Department within 30 days after the installation of pumping equipment, if authorized. A blank report is enclosed for your convenience. State statute also requires the driller to file a complete and accurate Well Drillers Report and Well Log (form 55-55) within 30 days after completion of drilling. A blank report form was provided to your driller with the drilling authorization card. You should insist and ensure that all of the required reports are accurately completed and timely filed with the Department.

Please be advised that Arizona statute [A.R.S. § 45-593(C)] requires a registered well owner to notify the Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. Any change in well information or a request to change well driller must be filed on a Request to Change Well Information form (form 55-71A) that may be downloaded from the ADWR Internet website at www.azwater.gov.

Sincerely,

Groundwater Permitting and Wells Section

* ADWR well construction standards require a surface seal consisting of a minimum of 20 feet of stael cesing. Cement grout must be used to fill the annular space between the surface cesing and the borehole. (A.A.C. R12-15-8:11(B))

The Department's issuance of an authorization to drill a well is not a determination of whither witter withdrawn from the well is legally stofact woter or growthwater. The legal nature of the water withdrawn from the well-may be the subject of court action in the fature as part of a determination of surface water rights in your area. If there are court proceedings that could affect your well, you will be notified and be given the opportunity to participate. If you have questions regarding the legal nature of the water to be withdrawn from your proposed well, please consult with an experienced civil engineer, hydrologin or water rights attorney.

For the preposes of determining appropriate fees outside AMAs or INAs, "domestic purposes" is defined as "sees related to the supply, service and activities of households and private residences and includes the application of water to less than 2 acres of land to produce plants or parts of plants for sale or human consumption, or for use as feed for livestock, range livestock or pository, as such terms are defined in A.R.S. § 3-1201."

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

Registration No. 55-615338 File No. D(4-13) 30 ABA

Dear Applicant:

Enclosed is a copy of the Notice of Intent (NOI) to Abandon a Well. This NOI, which was recently filed with this Department is being returned to you as evidence of your compliance with ARS § 45-594; R12-15-816. The enclosed Well Owners Notification of Abandonment is to be submitted when the well has been properly abandoned. The well abandonment card and Abandonment Completion Report forms have been sent to your driller. He may not begin abandonment until he has received the well abandonment card. If you change drillers, you must supply this Department with the new driller's identity. Well abandonments shall be performed only by alicensed well drilling contractor or single well licensee.

ARS §45-594; R12-15-816(K) requires the registered well owner to submit a Well Owners Notification of Abandonment form within thirty (30) days after the abandonment of the well. It also requires the driller to furnish this Department a complete and accurate Well Abandonment Report within thirty (30) days after completion of abandonment. You should insist, and ensure, that both of these are done.

Sincerely,

famy Hancock

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- 1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- 2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- 2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

Re: Denial of Notice of Intention to Drill Well Number 55-615338

Dear APPLICANT:

The Department of Water Resources notified you by letter on AUGUST 8, 2000 that your application to drill Well Number 55-615338 was incomplete. Pursuant to Arizona Revised Statutes (A.R.S.) § 41-1074(B), a list of the specific deficiencies preventing your application from being complete was provided to you in that letter. The completeness review time frame was suspended by the AUGUST 8, 2000 incomplete letter, and you were given sixty (60) days within which to provide the requested information. Our records indicate that you did not do so.

Therefore, pursuant to Arizona Administrative Code R12-15-401, the Department hereby denies your application.

The Departments decision to deny your application is an appealable agency action. In order to appeal this decision, you must request an appeal within thirty (30) days from receipt of this letter. A summary of the appeals process and appeal form is enclosed should you wish to pursue this option.

Alternatively, you may submit a new Notice of Intention for authority to drill at this particular location. To expedite the process, please include the information missing in your original Notice of Intention to Drill.

Should you have any questions, please contact the Department of Water Resources at (602) 417-2470.

Sincerely,

guilas

RE: Well Registration 55-615338

Well File D (4-13) 30 ABA

Dear Mr. Morrow:

Your application to deepen an exempt well was received again on August 2, 2000. The Department has determined that it is still incomplete and incorrect. Because the land on which you wish to construct/deepen the well is owned by the Arizona State Land Department, you must provide a letter from that agency authorizing construction of the well. To date, the Arizona State Land Department is unaware of any application from a lessee to deepen a well on Section 30. They consider deepening a well to constitute construction of an improvement, and they must be notified.

According to our records, the well, 55-615338, is owned by the Arizona State Land Department. If you wish to change ownership of this improvement, you should file a Change of Ownership form (attached) and get their permission.

We still need to know what kind of casing you will be using in the well. You have indicated on your application that you propose to place PVC casing in the well below the surface to an apparent total depth of 300 feet. Even if you are deepening a well, the well construction standards specify steel casing to at least 20 feet below the surface. If you wish to construct the well with materials different from the standards, you must request a variance in writing. Your driller can help you with the variance request.

In accordance with A.R.S. § 45-596.D, this application is being returned to you requesting information necessary to make it complete and correct. If the necessary information is not received by the Department within sixty (60) days, the application may be denied. You would then have to re-initiate the Notice of Intent to Drill process to receive a drilling authority for this location.

1

If you have any questions, please call the Groundwater Management Support Section at 602-417-2470. Thank you for your cooperation.

Sincerely,

i

RE: Well File D (4-13) 30 ABA

Dear Mr. Morrow:

Your application to drill an exempt well was received again on June 15, 2000. The Department has determined that it is incomplete and incorrect. First, you did not enclose the required \$10.00 fee. If the land on which you wish to construct the well is owned by the Arizona State Land Department, which it appears to be, you must provide a letter from that agency authorizing construction of the well. To date, the Arizona State Land Department is unaware of any application from a lessee to construct a well on Section 30. If the land on which you wish to construct the well is privately owned by another person, the landowner must sign the application. Also, if the land is in private ownership, you must provide the book map and parcel number from the Pinal County Tax Assessor's Office where the proposed well is to be located, plus the exact size of that parcel. If the parcel is 20 acres or less in size, and any of the water is to be used for domestic purposes, you must provide a site plan drawing to scale showing the locations of the proposed well, the septic system, all other structures, and the lot lines, and the drawing must demonstrate at least 100 feet of separation between the well and the septic system, and Pinal County must endorse the application.

We need to know what kind of casing you will be using in the well. You have indicated on your application that you propose to place PVC casing in the well below the surface to an apparent total depth of 300 feet. The well construction standards specify steel casing to at least 20 feet below the surface. If you wish to construct the well with materials different from the standards, you must request a variance in writing. Your driller can help you with the variance request.

In item 2 you have indicated that this will be a new well, but you have also shown two wells that you want to replace. In our records you are not listed as the well owner of either well. One well, 55-645881, is owned by a Jesse Aldridge. The other well, 55-615338, is owned by the Arizona State Land Department. We strongly recommend that you abandon the older wells near the proposed wells in order to keep contamination from entering the aquifer through those older wells. I have enclosed abandonment forms in case you would like to abandon the two older wells.

In accordance with A.R.S. § 45-596.D, this application is being returned to you requesting information necessary to make it complete and correct. If the necessary information is not received by the Department within sixty (60) days, the application may be denied. You would then have to re-initiate the Notice of Intent to Drill process to receive a drilling authority for this location.

If you have any questions, please call the Groundwater Management Support Section at 602-417-2470. Thank you for your cooperation.

Sincerely,

R Inlow Na

In accordance with A.R.S § 45-596; Paragraph D, this application is being returned as a "statement of determination", requesting information necessary to make it correct and complete. If the necessary information is not received by the Department within sixty (60) days, the application may be denied. You would then have to re-initiate the N.O.I. process to receive a drilling authority for this location. If you have any questions, please contact the Groundwater Management Support Section at (602) 417-2470. ATTACH THIS CHECK LIST WHEN RESUBMITTING THE COMPLETED NOTICE OF INTENT AND RETURN TO BOX 458, PHOENIX, ARIZONA 85004-3003. YOU MAY ALSO CONTACT YOUR DRILLER OR COUNTY ASSESSORS OFFICE FOR ASSISTANCE PERTAINING TO THE NECESSARY INFORMATION THAT IS **REOUIRED TO COMPLETE YOUR APPLICATION.**

PLEASE RETURN **ALL PAPERS**

JANE DEE HULL Governor

RITA PEARSON MAGUIRE Director

A.J. Donelson Morrow Box 666 Kearny, AZ 85237

RE: Well File D (4-13) 30 ABA

Dear Mr. Morrow:

Your application to drill an exempt well was received again on June 15, 2000. The Department has determined that it is incomplete and incorrect. First, you did not enclose the required \$10.00 fee. If the land on which you wish to construct the well is owned by the Arizona State Land Department, which it appears to be, you must provide a letter from that agency authorizing construction of the well. To date, the Arizona State Land Department is unaware of any application from a lessee to construct a well on Section 30. If the land on which you wish to construct the well is privately owned by another person, the landowner must sign the application. Also, if the land is in private ownership, you must provide the book map and parcel number from the Pinal County Tax Assessor's Office where the proposed well is to be located, plus the exact size of that parcel. If the parcel is 20 acres or less in size, and any of the water is to be used for domestic purposes, you must provide a site plan drawing to scale showing the locations of the proposed well, the septic system, all other structures, and the lot lines, and the drawing must demonstrate at least 100 feet of separation between the well and the septic system, and Pinal County must endorse the application.

We need to know what kind of casing you will be using in the well. You have indicated on your application that you propose to place PVC casing in the well below the surface to an apparent total depth of 300 feet. The well construction standards specify steel casing to at least 20 feet below the surface. If you wish to construct the well with materials different from the standards, you must request a variance in writing. Your driller can help you with the variance request.

In item 2 you have indicated that this will be a new well, but you have also shown two wells that you want to replace. In our records you are not listed as the well owner of either well. One well, 55-645881, is owned by a Jesse Aldridge. The other well, 55-615338, is owned by the Arizona State Land Department. We strongly recommend that you abandon the older wells near the proposed wells in order to keep contamination from entering the aquifer through those older wells. I have enclosed abandonment forms in case you would like to abandon the two older wells.

In accordance with A.R.S. § 45-596.D, this application is being returned to you requesting information necessary to make it complete and correct. If the necessary information is not received by the Department within sixty (60) days, the application may be denied. You would then have to re-initiate the Notice of Intent to Drill process to receive a drilling authority for this location.

If you have any questions, please call the Groundwater Management Support Section at 602-417-2470. Thank you for your cooperation.

Sincerely,

Ala Randoney

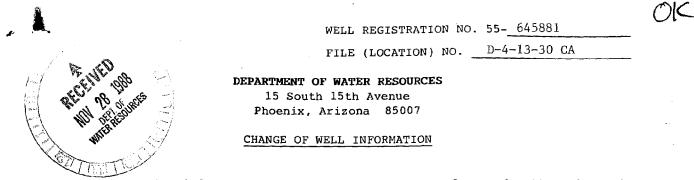

Alan R. Dulaney

Stella A. Murillo

From: Sent: To: Cc: Subject: Attachments: John Bodenchuk <JBodenchuk@azland.gov> Thursday, June 20, 2013 9:52 AM Stella A. Murillo Robert Harding I found another one 55-221504 55-221504 ASLD.pdf

Stella:

I'm working on another confusing one. The lessee listed well 55-914122 (Aven Associates) (exploration well) which last year was applied to convert to stock well with new registration number given (55-221504) (Aven Associates). Aven Associates didn't have a lease but did have a Special Land Use Permit (SLUP)23-116168. The grazing lessee is G&H Cattle Co. lease number 05-3391.

Again, the well is located on State Land and is noted in the comments in the well registry but the registered owner is Aven Associates. If you could change ownership to ASLD and send me a screen print I'd appreciate it.

Thanks

John Bodenchuk Water Resource Specialist Arizona State Land Department Water Rights Section 1616 West Adams Street Phoenix, AZ 85007 602-542-2670 602-542-3507 (Fax) jbodenchuk@azland.gov

STATE LAND DEPARTMENT STATE OF ARIZONA

GRAZING LEASE

Lease No. 05-3391

THIS GRAZING LEASE is entered into by and between the State of Arizona "Lessor" by and through the Arizona State Land Department and

GREGG A. VINSON and HELEN B. VINSON, husband and wife, dba G & H LAND and CATTLE CO.

as "Lessee". In consideration of the payment of rent and of performance by the parties of each of the provisions set forth herein, the parties agree as follows:

ARTICLE 1 SUBJECT LAND

1.1 Lessor hereby leases to Lessee for the term, at the rent, and in accordance with the provisions set forth herein, the Subject Land described in Appendix A attached hereto ("Subject Land") for the uses and purposes specified in Article 4.

1.2 Lessee makes use of Subject Land "as is" and Lessor makes no express or implied warranties as to the physical condition of the Subject Land.

ARTICLE 2 <u>TERM</u>

2.1 The term of this Lease commences on <u>June 1, 2012</u>, and ends on <u>May 31, 2022</u>, unless terminated earlier as provided in this Lease.

ARTICLE 3 RENT

3.1 Lessee shall pay rent to Lessor for the use and occupancy of the Subject Land during the term of this Lease without offset or deduction and without notice or demand, as established, on an annual basis.

3.2 The annual base rent shall be set by Lessor in the manner established by law and paid in advance each year.

05-GRAZ 5/93 (REV. 8/2010)

JANICE K. BREWER Governor

SANDRA A. FABRITZ-WHITNEY Director

AVEN ASSOCIATES, LLC. 7400 N. ORACLE ROAD #131 TUCSON, AZ 85704

Registration No. 55-221504 File No. D(4-13) 30 CAB

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to Drill a well that you recently filed with this Department pursuant to A.R.S. § 45-596. This is to inform you that the Department has approved the NOI and has mailed or otherwise provided a drilling card authorizing the drilling of the well to the well driller identified in the NOI. The driller may not begin drilling until he has received the drilling card, which must be displayed on the drill rig during drilling. **PLEASE NOTE:** The Authorization to drill this well **DOES NOT constitute or guarantee an approval to use the well for the purpose of withdrawing groundwater for transportation to an Active Management Area (AMA) pursuant to A.R.S. § 45-552, 45-553, 45-554 or 45-555(A). Groundwater may not be withdrawn from this well for these transportation purposes without official prior approval from the Department.** Please contact the office in the AMA where the groundwater is to be transported to determine what additional forms are needed and for more information on this process.

Well drilling activities must be completed within one year after the date the NOI was filed with the Department. If drilling is not completed within one year, you must file a new NOI before proceeding with further drilling. If in the course of drilling the well, it is determined that the well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the well must be properly abandoned and a Well Abandonment Completion Report must be filed as required by A.A.C. R12-15-816(F).

If you change drillers, you must notify the Department of the new driller's identity. Please ensure that the new driller is licensed by the Department to drill the type of well you require. A new driller may not begin drilling until he receives a new drilling card from the Department. If you are drilling a new or replacement well and it is necessary to change the location of the proposed well, you may not proceed with drilling until you file an amended NOI with the Department and the Department issues an amended drilling card to the driller. If county approval was required for the original well site plan (this applies to domestic wells on parcels that are five acres or less), you must submit a new well site plan with the new well location to your local county health authority for approval prior to filing the amended NOI with the Department.

A.R.S. § 45-600 requires the registered well owner to complete and file a Pump Installation Completion Report form (DWR form 55-56) within 30 days after the installation of pumping equipment. A form is enclosed for your use. Also enclosed is a well owner's guide that provides useful information and advice concerning your upcoming well construction project. A.R.S.§ 45-600 also requires the driller to file a complete and accurate Well Drillers Report and Well Log (DWR form 55-55) within 30 days after completion of drilling. That form was mailed to your driller with the drilling card. You should insist and ensure that all of the required forms are accurately completed and timely filed with the Department.

Please be advised that A.R.S. § 45-593(C) requires the person to whom a well is registered to notify the Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. Any change in well information or a request to change well driller must be filed on a Request to Change Well Information form (DWR form 55-71A) that may be downloaded from the ADWR Internet website at ">http://www.water.az.gov/adwr/content/forms/default.htm#NOI>.

Sincerely, huu

* ADWR well construction standards require a surface seal consisting of a minimum of 20 feet of steel casing. Cement grout must be used to fill the annular space between the surface casing and the borehole. (A.A.C. R12-15-811(B))

The Department's issuance of an authorization to drill a well is not a determination of whether water withdrawn from the well is legally surface water or groundwater. The legal nature of the water withdrawn from the well may be the subject of court action in the future as part of a determination of surface water rights in your area. If there are court proceedings that could affect your well, you will be notified and be given the opportunity to participate. If you have questions regarding the legal nature of the water to be withdrawn from your proposed well, please consult with an experienced civil engineer. hydrologist or water rights attorney.

For the purposes of determining appropriate fees outside AMAs or INAs, "domestic purposes" is defined as "uses related to the supply, service and activities of households and private residences and includes the application of water to less than 2 acres of land to produce plants or parts of plants for sale or human consumption, or for use as feed for livestock, range livestock or poultry, as such terms are defined in A.R.S. § 3-1201."

I state that this notice is filed in compliance with A.R.S. § 45-596 and is complete and correct to the	ne best of my knowledge and belief.

April 10, 2012

Mary Darling, CEO Darling Environmental & Surveying, Ltd. University of Arizona Technology Park 9040 South Rita Road, Ste #2350 Tucson, AZ 85747

Re: Special Land Use Permit No. 23-116168

Dear Ms. Darling:

The Arizona State Land Department (ASLD) has reviewed the information provided by Darling Environmental & Surveying, Ltd. on behalf of Aven Associates LLC to install a water well on split estate land (U.S. Bureau of Land Management minerals and Arizona State Trust land surface) within Section 30, Township 4 South, Range 13 East. The surface area of this parcel is permitted by the ASLD under Special Land Use Permit No. 23-116168. The details of the proposed well, as provided in your April 5, 2012 e-mail, are as follows:

- Aven Associates' Peg Leg Project, Drill Hole C shall be converted from a mineral ٠ exploration well to a water well.
- The proposed hole diameter is 6^{1/8} inches.
- The proposed depth of the well is approximately 1,700 feet.
- The drill hole coordinates (UTM in NAD27) are: Easting 494844 & Northing 3656940.

Approval of the proposed well is granted, contingent upon the return of the attached conditions (signed and dated).

Thank you for your cooperation. I may be contacted at the address below, by e-mail at Imeier@land.az.gov, or by phone at (602) 542-2642 if you should have any questions or concerns.

Sincerely,

Ineier

Larry Meier, Geologist Minerals Section, Natural Resources Division Arizona State Land Department 1616 W. Adams Phoenix, AZ 85007 www.land.state.az.us

Copy: Cynthia Stefanovic, Manager, Water Rights and Ag Section Minerals Section, Natural Resources Division File No. 23-116168

55-221504

Conditions for Approval of Installation of a Water Well Special Land Use Permit No. 23-116168

APR 162012

Ingress and Egress:

- All reasonable attempts shall be made to avoid conducting exploration activities during inclement weather, so as to avoid excessive damage to the land surface and roads.
- Any gates or other improvements belonging to grazing lessees are to be repaired or replaced if damaged during the course of the mineral exploration.
- All disturbed land surface including any pre-existing ranch roads utilized to access the Mineral Lease area will either be maintained or properly abandoned as deemed appropriate by the Arizona State Land Department (ASLD).

Cultural and Plant Resources:

- All travel and exploration activities shall be restricted to the area for which the archaeological survey has been completed. Should access to any of the remaining permitted land be required for further mineral exploration that requires additional surface disturbance, archaeological and plant surveys shall be completed those areas and reports submitted to the ASLD for review and approval.
- All work completed will comply with the provisions of the Arizona Native Plant Law (A.R.S. §3-901 et seq., or any successor statutes) and with Arizona laws relating to archaeological discoveries (A.R.S. §41-841 et seq., or any successor statutes). Lessee shall not disturb any cacti or other protected native plants nor disturb any ruins, burial grounds or other archaeological sites except as may be permitted by these laws.

Water Well

- The Lessee/Permitee is required to follow all applicable Arizona Department of Water Resources (ADWR) rules and regulations related to well drilling beginning with the filing of a "Notice of Intention to Drill, Deepen, Replace or Modify a Well" (ADWR Form 55-40). This should be filed on behalf of the Arizona State Land Department (ASLD) as land owner. ADWR will, upon approval, issue a drilling card, which must be in possession of the well driller during the drilling of the well. The owner is also required to submit a completion report to ADWR when the drilling is completed. A copy should also be provided to ASLD's Water Rights and Agriculture Section.
- All water is required to be utilized on State trust land unless approved by ASLD.
- The Permittee is required to meter all water pumped and report water use to ASLD on an annual basis on forms provided by the ASLD.
- The Mineral Lessee may be assessed the ASLD each year for groundwater used in conjunction with this Permit. The charges shall include \$100.00 for the first acre-foot of ground water used and \$85.00 per acre foot of water use thereafter on an annual basis, subject to periodic re-appraisal of groundwater value.

55-221504

Exploration/Specialty Wells

• The Permitee is required to follow all applicable ADWR rules and regulations related to the drilling of Exploration wells beginning with the filing of a "Notice of Intent to Drill and Abandon an Exploration/Specialty Well" (ADWR Form 55-43B). ADWR will, upon approval issue a drilling card, which must be in the possession of a licensed well driller. Upon completion of drilling and abandonment activities the Lessee must file a Project Completion Report (Form No. DWR 55-57). A copy should also be provided to ASLD's Water Rights and Agriculture Section.

Transfer of Well Ownership

 Before the Permittee can transfer ownership of a well to the Grazing Lessee, the Grazing Lessee must file an "Application to Make Improvement to State Land" and obtain approval from ASLD to accept ownership of the well. Should ASLD deny approval, the Permittee shall abandon the well, constructed pursuant to the mineral lease, in accordance with ADWR regulations.

Program Completion:

- The ASLD will be notified within 10 working days of the completion of the drilling program.
- A report providing a detailed description of completed reclamation accompanied by (pre and post drilling) photo documentation will be submitted upon completion of the drilling program.

cknowledged and Agreed

Janice K. Brewer Governor

Sandra A. Fabritz-Whitney Director

AVEN ASSOCIATES, LLC 7400 N. ORACLE RD STE 131 TUCSON, AZ 85704

Registration No. 55-914122 File No. D(4-13)30 000

Dear Applicant:

Enclosed is a copy of the Notice of Intent to Drill and Abandon an Exploration/Specialty Well ("NOI") which you recently filed with this Department pursuant to A.R.S. §45-596. This is to inform you that the Department has approved the NOI and has mailed (or otherwise provided) a drilling card authorizing the drilling and abandonment of the well to the well driller identified in the NOI. The driller may not begin drilling until he has received the drilling card which he must keep in his possession at the well site during drilling. Because the Department is not authorizing this well to be drilled for water production purposes, no pump equipment may be installed (except for heat pump wells).

Well drilling activities must be completed within one year after the date the NOI was filed with the Department. If drilling is not completed within one year, you must file a new NOI before proceeding with further drilling. If it is necessary to change the location of the proposed well, you may not proceed with drilling until you file a new NOI with the Department and the Department issues an amended drilling card to the driller. If you change drillers, you must notify the Department of the new driller's identity. A new driller may not begin drilling until he receives a new drilling card from the Department.

If applicable, a Mineral Exploration Project Completion Report (DWR form 55-57) must be filed within 30 days after the completion of drilling and abandonment of mineral exploration boreholes. A Well Driller Report and Well Log form (DWR form 55-55) must be filed within 30 days after the completion of geotechnical boreholes or specialty wells. A Well Abandonment Completion Report (DWR form 55-58) must be filed within 30 days after the abandonment of geotechnical or specialty wells. Copies of the applicable forms were mailed to your driller with the drilling card.

Please be advised that A.R.S. § 45-593(C) requires the person to whom a well is registered to notify the Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate.

Any change in well information or a request to change well driller must be filed on a Request to Change Well Information form (DWR form 55-71A) that may be downloaded from the ADWR Internet website at http://www.azwater.gov/dwr/Content/Find_by_Category/Permits_Forms_Applications/default.htm.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

Thomas Fletcher 16 E. Kaler Drive Phoenix, AZ 85020

November 23, 1999

Arizona Department of Water Resources 500 North Third Street Phoenix, Arizona 85004

To Whom it may concern:

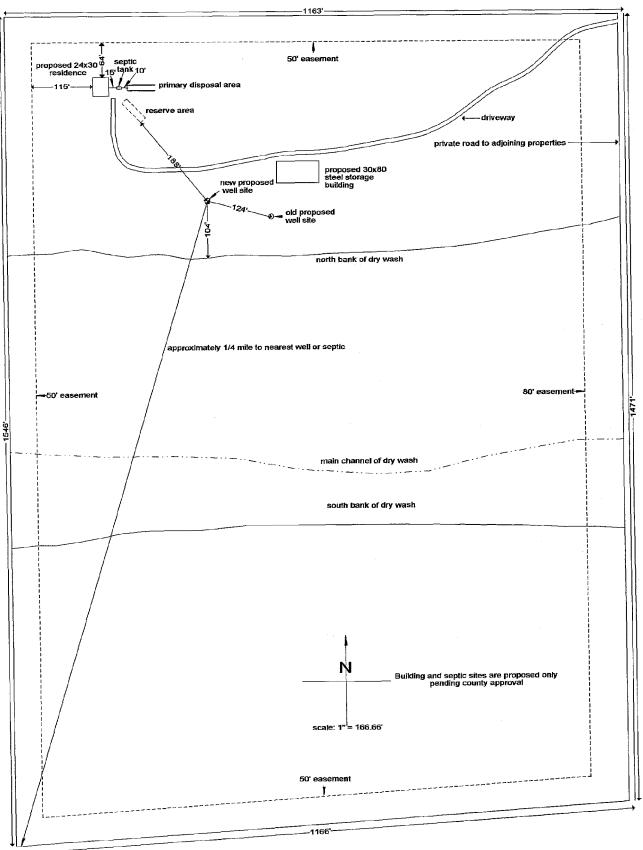

Subject: Registration No. 55-577652

Per my telephone call to your office last week, I'm enclosing an updated plot plan for this proposed well. I have changed the proposed location as indicated on the new plot plan. The new proposed site will be located in the same 10 acre quarter as the old proposed well. As of this date no drilling has taken place. Let me know if anything further is needed in this regard.

Sincerely, an.

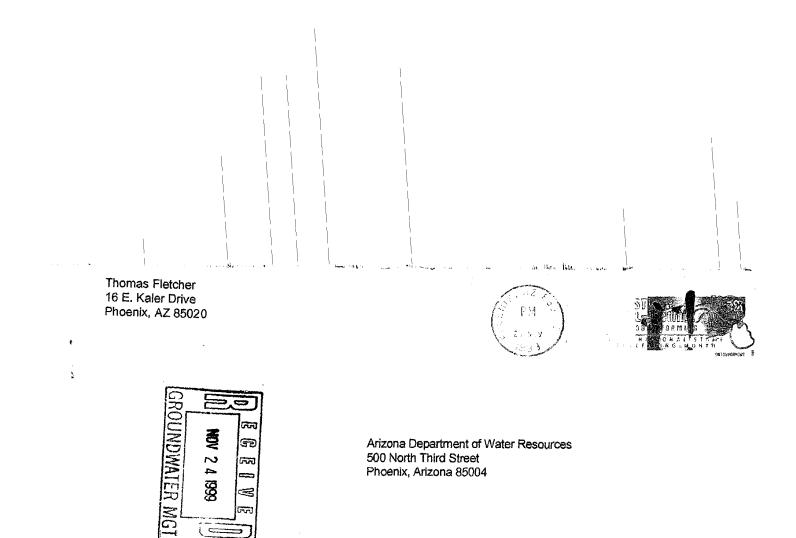

Thomas C. Fletcher

APPLICATION GUIDELINES

In accordance with Arizona Revise Statutes ("A.R.S.") §§ 41-1008 and 1079. the Department of Water Resources (Department) provides the following information regarding the application review process for authority to drill.

NECESSARY STEPS & INSTRUCTIONS TO OBTAIN DRILLING AUTHORITY

- 1. Pursuant to A.R.S. § 45-596. a person may not drill, cause to be drilled, deepen or modify any well for which a permit is not required without first filing a Notice of Intent to Drill with the Department. Only a well drilling contractor licensed in the State of Arizona or a single well licensee (a person licensed to drill or modify one exempt well on his or her own property) is authorized to drill, deepen or modify a well. Drilling may not begin until the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, and which authorizes the drilling of the specific well in a specific location. To assist you in understanding the requirements for this application, copies of A.R.S. § 45-596 and Arizona Administrative Code ("A.A.C.") R12-15-810 are available at the Department bookstore (602-417-2450 x7127).
- 2. If replacing, deepening or modifying an existing well, provide the registration number of the existing well in item 2. A replacement well is one located no more than 660 feet from the original well and that is not expected to annually withdraw more groundwater than historically withdrawn from the original well.
- 3. Information to complete items 3, 4, 5 and 14 may be available from your driller.
- 4. Information to complete items 10 and 13 may be available from your County Assessor's Office.
- 5. An exempt well, referred to in Item 11, means a well with a pump with a maximum capacity of not more than thirty-five gallons per minute used primarily for domestic purposes, including the noncommercial irrigation of less than two acres of land.
- 6. If any water from a proposed well on a parcel of twenty or fewer acres will be used for domestic purposes, as defined in § 45-454, the applicant must submit a well side plan of the property. The plan must be on an 8½" x 11" piece of plain paper with representation of the locations of all structures and proximity of adjacent lot lines, to scale. It must include the county assessor's parcel identification number. The plan must show the proposed well location and the location of any septic tank or sewer system that is either located on the property or within one hundred feet of the proposed well site, as well as indicating the measured shortest distance between the proposed well and existing septic tank system. The plan must demonstrate that the well will not be drilled within one hundred feet of any septic or sewer system.
- 7. The site plan must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Endorsement by the county/local authority is based solely on the best available judgement that the proposed well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. In areas where there is no local or county authority that controls installation of septic tanks or sewer systems, or if the health authority is unable to determine whether the proposed well location complies with state and local requirements, the applicant must apply for approval directly to the Department of Water Resources.
- 8. If an individual other than the land owner or lessee signs this notice, an original letter of authorization from the land owner/lessee, stating that the individual has permission to sign this specific notice on his or her behalf, must accompany the notice.
- 9. Please mail two original Notices with original signatures and two site plans and, in accordance with A.R.S. § 45-113, a check or money order (no cash) in the amount of \$10.00 to P. O. Box 458. Phoenix Arizona. 85001-0458, or hand deliver to 500 North Third Street, Phoenix, Arizona.
- 10. Arizona Revised Statute § 45-596(D) provides that the Director of the Department is to determine whether or not all information required on this form has been submitted. If not, the person filing the Notice will be notified, and the drilling or modification of the well may not proceed.
- 11. This form is not applicable for non-exempt wells (those yielding more than thirty-five gallons per minute) within an Active Management Area. Contact Groundwater Management for further information regarding the appropriate notice to file with the Department.

TIME FRAME FOR REVIEW OF YOUR APPLICATION

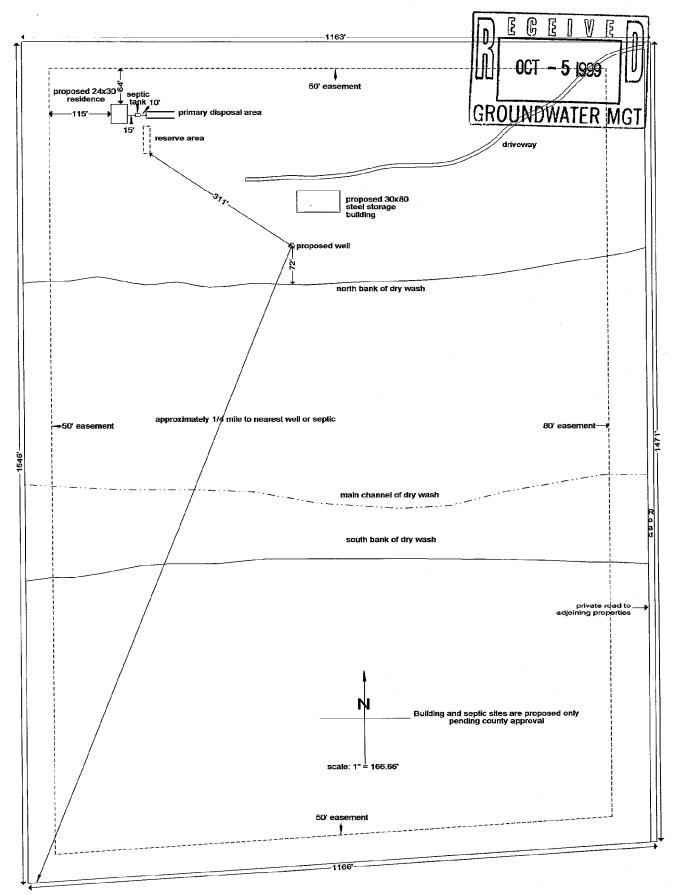

Within 15 days after receipt of your Notice of Intention, the Arizona Department of Water Resources ("Department") will determine whether your application should be granted or denied, unless this time is extended for lack of a complete application. If your application is incomplete, the Department will notify you in writing and will specify what information is necessary to make the application complete. Until the missing information is received, the time frame for review of your application will be suspended. Your application will not be complete until all of the requested information is received. If you do not supply the missing information within sixty (60) days, the Department may deem your application withdrawn and close the file.

At the end of its review, the Department will send you written notice either granting or denying your application for drilling authority. If your application is approved, the Drill Card will be mailed directly to the drilling company. If denied, the Department's notice will state justification for the denial and an explanation of your right to appeal.

CONSTRUCTION AND FOLLOW UP REQUIREMENTS

- 1. Construction and abandonment standards for wells, including abandonment, must be in accordance with Department Regulations. A.R.S. § 45-594 and Arizona Administrative Code R12-15-811 require the well to be constructed with a twenty foot steel surface seal casing, including a one foot steel stickup and one and one-half inches of grout seal, unless a variance is granted (see A.R.S. § 45-596 (G) for procedure to follow in requesting a variance).
- 2. Pursuant to § 45-596(E), the drilling, deepening or modification of the well must be completed within one year of the date of the Notice of Intent. If the well is not completed within one year, a new Notice of Intent must be filed before proceeding with further construction.
- 3. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use is later proposed to be converted to use for domestic purposes as defined in § 45-454, the well owner must file a Notice of Intention to Drill and comply with the requirements of § 45-596 before the well is converted and any water from that well is used for domestic purposes.
- 4. Within thirty days after installation of pumping equipment, the registered well owner must file a Completion Report with the Department. The person to whom a well is registered also must notify the Department of a change in ownership or a change in data relating to this well.

RITA P. PEARSON Director

THOMAS C FLETCHER 16 E KALER DR PHOENIX, AZ 85020

Registration No. 55-577652 File No.D(5-12) 13 DAB

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to drill a well. This NOI, which was recently filed with this Department, is being returned to you as evidence of your compliance with ARS §45-596. The enclosed Completion Report is to be submitted when pump equipment is installed. The Drilling Card and Well Drilling Report form have been sent to your driller. He may not begin drilling until he has received the Drilling Card and it must be displayed on the rig during drilling. If you change drillers, you must supply this Department with the new driller's identity. Please ensure that the driller you select is licensed to drill the type of well you require. All well drillers must pass an examination proving they understand the drilling methods for that particular license, and are familiar with the laws and regulations which govern well construction in Arizona.

If it is necessary to change the location of the proposed well, immediately contact the Department of Water Resources to obtain written permission before proceeding with the drilling. A properly signed, amended Drilling Card <u>must</u> be in the possession of the driller before drilling commences at a different location than originally authorized.

ARS §45-600 requires the registered well owner to submit a completion report within thirty (30) days after the installation of pumping equipment. It also requires the driller to furnish this Department a complete and accurate log of the well within thirty (30) days after completion of drilling. You should insist, and ensure, that both of these are done.

If in the course of drilling a new well, it is determined that the new well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the new well must be properly abandoned and a Well Abandonment Completion Report submitted per R12-15-816.F.

Per ARS §45-593 (C), the person to whom a well is registered shall notify this Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. We have enclosed a Change of Well Information Form should it be needed in the future. Sincerely.

Carthy Dogo

Dorothy Boggs Water Resource Technician Groundwater Management Support Section

7/24/98 17. DATE

SPECIFIC INSTRUCTIONS, LIMITATIONS, AND CONDITIONS

- 1 Pursuant to Section §45-596, Arizona Revised Statutes, provides: a person may not drill, deepen, or modify any well, without first filing a <u>Notice of Intention to Drill</u> with the Department.
- 2. If any water from a proposed well on a parcel of land of twenty or fewer acres will be used for domestic purposes, as defined in §45-454, the applicant shall submit a site plan to scale of the property with the county assessor's parcel identification number. The site plan:
 - a. Will be on a $8\frac{1}{2}$ × 11" piece of plain paper with representation of the locations of all structures, septic tank or sewer systems and proximity of adjacent lot lines, to scale.
 - b. Must show the proposed well location and the location of any septic tank or sewer system that is either located on the property or within one hundred feet of the proposed well site. Must give the measured shortest distance between well & septic tank system.
 - c. Shall demonstrate to the Director's satisfaction that the well will not be drilled within one hundred feet of any septic or sewer system.
 - d. Must be approved by the county health authority, or by a local health authority in areas where the county health authority has delegated authority to approve septic or sewer systems. Before approval, the health authority shall review the plan and determine whether the proposed well location complies with applicable state and local laws regarding the placement of wells. If so, the health authority shall endorse the site plan and the proposed well placement.
- 3. Endorsement by the county/local authority is based solely on the best available judgement that this well, as shown on the site plan submitted, is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. Information brought to light at a future date may render this determination invalid.
- 4. If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use is later proposed to be converted to use for domestic purposes, as defined in § 45-454, the well owner shall file a notice of intention to drill and comply with the requirements prescribed pursuant to this section before the well is converted and any water from that well used for domestic purposes.
- 5. Only a well driller licensed in the State of Arizona is authorized to drill, deepen, or modify a well. A well driller may commence drilling a well only if the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, authorizing the drilling of the specific well in the specific location.
- 6. An exempt well means a well having a pump with a maximum capacity of not more than thirty-five gallons per minute and may include the application of water to less than two acres of land in an Irrigation Non-Expansion Area or Active Management Area to produce plants or parts of plants for sale, human consumption or for use as feed for livestock, range livestock or poultry.
- 7. This form is not applicable for a non-exempt well, ie., those yielding more than thirty-five gallons per minute, in an Active Management Area. Contact Groundwater Management for further information regarding the appropriate notice to fill out.
- 8. The drilling, deepening, or modification of this well shall be completed within one year of the date of the notice (§ 45-596.E).
- 9. Within thirty days after the installation of pumping equipment on this well, the registered well owner shall file the prescribed Completion Report. A form for this purpose will be furnished to the registered owner with the return of an annotated copy of this notice.
- 10. The person to whom a well is registered shall notify the Department of a change in ownership or a change in data relating to this well. The prescribed form for these purposes will be furnished to the registered owner with the return of an annotated copy of this notice.
- 11. If an individual other than the land owner or lessee signs this notice, an original letter of authorization from the land owner/lessee, stating that the individual has permission to sign this specific notice on their behalf, shall accompany the notice.

RITA P. PEARSON Director

VICTORIA OLIVER P O BOX 792 FLORENCE, AZ 85232

Registration No. 55-570198 File No.D(5-12) 13 DBB

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to drill a well. This NOI, which was recently filed with this Department, is being returned to you as evidence of your compliance with ARS §45-596. The enclosed Completion Report is to be submitted when pump equipment is installed. The Drilling Card and Well Drilling Report form have been sent to your driller. He may not begin drilling until he has received the Drilling Card and it must be displayed on the rig during drilling. If you change drillers, you must supply this Department with the new driller's identity. Please ensure that the driller you select is licensed to drill the type of well you require. All well drillers must pass an examination proving they understand the drilling methods for that particular license, and are familiar with the laws and regulations which govern well construction in Arizona.

If it is necessary to change the location of the proposed well, immediately contact the Department of Water Resources to obtain written permission before proceeding with the drilling. A properly signed, amended Drilling Card <u>must</u> be in the possession of the driller before drilling commences at a different location than originally authorized.

ARS §45-600 requires the registered well owner to submit a completion report within thirty (30) days after the installation of pumping equipment. It also requires the driller to furnish this Department a complete and accurate log of the well within thirty (30) days after completion of drilling. You should insist, and ensure, that both of these are done.

If in the course of drilling a new well, it is determined that the new well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the new well must be properly abandoned and a Well Abandonment Completion Report submitted per R12-15-816.F.

Per ARS §45-593 (C), the person to whom a well is registered shall notify this Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. We have enclosed a Change of Well Information Form should it be needed in the future.

Barbaca Simo Sincerely.

Barbara Sims Water Resource Technician Groundwater Management Support Section

SPECIFIC INSTRUCTIONS, LIMITATIONS AND CONDITIONS

1

- Pursuant to Section §45-596, Arizona Revised Statutes, provides: a person may not drill, deepen, or modify any well, without first filing a Notice of Intention to Drill with the Department.
- If any water from a proposed well on a parcel of land of twenty or fewer acres will be used for domestic purposes, as defined in §45-454, 2. the applicant shall submit a site plan to scale of the property with the county assessor's parcel identification number. The site plan:
 - Will be on a 8½"x11" piece of plain paper with representation of the locations of all structures, septic tank or sewer systems and а. proximity of adjacent lot lines to scale.
 - The container and attended a specific the Must show the proposed well location and the location of any septic or sewer system that is either located on the property or within ħ. one hundred feet of the proposed well site. and a set of the set o
 - Shall demonstrate to the Director's satisfaction that the well will not be drilled within one hundred feet of any septic or sewer system. Ċ.
 - Must be approved by the county health authority, or by a local health authority in areas where the county health authority has d. detegated authority to approve septic or sewer systems. Before approval, the health authority shall review the plan and determine whether the proposed well location complies with applicable state and local laws regarding the placement of wells. If so, the health authority shall endorse the site plan and the proposed well placement.
- Endorsement by the county/local authority is based on the best available judgement that this well, as shown on the site plan submitted, 3. is 100 feet or more from all known and visually identifiable sewage treatment systems. It is not a representation that a well placed at this site will be guaranteed as to quantity or quality. Information brought to light at a future date may render this determination invalid.
- If a well which was originally drilled as an exploration well, a monitor well, a piezometer well or for any use other than domestic use and 4 is later proposed to be converted to use for domestic purposes, as defined in section §45-454, the well owner shall file a notice of intention to drill and comply with the requirements prescribed pursuant to this section before the well is converted and any water from that well used for demestic purposes.
- 5 Only a well driller licensed in the State of Arizona is authorized to drill, deepen or modify a well. A well driller may commence drilling a well only if the well drilling contractor or licensee has possession of a drilling card at the well site, issued by the Director in the name of the well drilling contractor or licensee, authorizing the drilling of the specific well in the specific location.
- An exempt well means a well having a pump with a maximum capacity of not more than thirty-five (35) gallons per minute and may include 6. the application of water to less than two (2) acres of land in an Imigation Non-Expansion Area or Active Management Area to produce plants or parts of plants for sale, human consumption or for use as feed for livestock, range livestock or poultry."
- 7. The drilling, deepening, or modification of this well shall be completed within one (1) year of the date of the notice (§45-596.E.).
- 8 Within thirty (30) days after the installation of pumping equipment on this well, the registered well owner shall file the prescribed Completion Report. A form for this purpose will be furnished to the registered owner with the return of an annotated copy of this notice.
- 9. The person to whom a well is registered shall notify the Department of a change in ownership or a change in data relating to this well. The prescribed form for these purposes will be furnished to the registered owner with the raturn of an annotated copy of this Notice.

MCLEAN FARMS LLC 914 N COBBLESTONE ST GILBERT, AZ 85234

Registration No. 55-565774 File No.D(5-12) 15 ACA

Dear Well Owner:

Enclosed is a copy of the Notice of Intention (NOI) to drill a well. This NOI, which was recently filed with this Department, is being returned to you as evidence of your compliance with ARS §45-596. The enclosed Completion Report is to be submitted when pump equipment is installed. The Drilling Card and Well Drilling Report form have been sent to your driller. He may not begin drilling until he has received the Drilling Card and it must be displayed on the rig during drilling. If you change drillers, you must supply this Department with the new driller's identity. Please ensure that the driller you select is licensed to drill the type of well you require. All well drillers must pass an examination proving they understand the drilling methods for that particular license, and are familiar with the laws and regulations which govern well construction in Arizona.

If it is necessary to change the location of the proposed well, immediately contact the Department of Water Resources to obtain written permission before proceeding with the drilling. A properly signed, amended Drilling Card <u>must</u> be in the possession of the driller before drilling commences at a different location than originally authorized.

ARS §45-600 requires the registered well owner to submit a completion report within thirty (30) days after the installation of pumping equipment. It also requires the driller to furnish this Department a complete and accurate log of the well within thirty (30) days after completion of drilling. You should insist, and ensure, that both of these are done.

If in the course of drilling a new well, it is determined that the new well cannot be successfully completed as initially intended (dry hole, cave in, lost tools, etc.), the new well must be properly abandoned and a Well Abandonment Completion Report submitted per R12-15-816.F.

Per ARS §45-593 (C), the person to whom a well is registered shall notify this Department of a change in ownership of the well and/or information pertaining to the physical characteristics of the well in order to keep this well registration file current and accurate. We have enclosed a Change of Well Information Form should it be needed in the future.

Sincerely,

Sylvia Valdez Water Resource Technician Groundwater Management Support Section

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- 1. A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is keed, and a
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. If the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.

49120MV

- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.

INSTRUCTIONS FOR COMPLETING REGISTRATION FORM

General Instructions

- A person who owns an "Existing Well" shall register the well, pursuant to A.R.S. 45-593, by filing this form in <u>duplicate</u> with the Department of Water Resources not later than midnight June 14, 1982. The form must be completed and signed. Failure to do so will constitute a violation of A.R.S. 45-593, and may subject the well owner to injunction and/or civil penalties, pursuant to A.R.S. Title 45, Article 12.
- 2. An "Existing Well" means, (1) a well which was drilled on or before June 12, 1980 and which is not abandoned or sealed, or (2) a well which was not completed on or before June 12, 1980, but for which a Notice of Intention to Drill was on file with the Arizona Water Commission on or before June 12, 1980.
- 3. No registration fee is required for Exempt Wells. A \$10.00 registration fee must accompany registration forms for all Non-Exempt Wells.
- 4. An "Exempt Well" means a well having a pump with a maximum capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An Exempt Well may include the non-commercial irrigation of not more than 1 acre of land.
- 5. A "Non-Exempt Well" means a well that is not an "Exempt Well".

INSTRUCTIONS FOR REGISTRATION QUESTIONS

- The Registrant must be the owner of the well and may be an individual, public or private corporation, company, partnership, firm, association, society, estate, trust, any other private organization or enterprise, the United States, any state, territory or country or a governmental entity, political subdivision or municipal corporation organized under or subject to the constitution and laws of this State.
- 2. If you own an existing irrigation well drilled at any time, or any other type of well drilled on or after June 20, 1968, you should have an assigned control and/or file number. Write these numbers in item 2. If you do not know the number, please explain the reason on the form or on an attached sheet.
- 3. a. Fill in the Section, Township and Range in all cases if it is available.
 - b. If the well is in a subdivision and you have this information, give the subdivision name, Lot Number, and Address.
- 4. Show all purposes for which the water is used.
- 5. If the well is used for irrigation, give the number of acres irrigated in 1980 from the well.
- 6. If the owner of the land is an individual, give the last name, first name, middle initial. In the owner of the land is a corporation, partnership, firm, etc., fill in the appropriate title.
- 7. Complete the section on Well Data with the most accurate information available to you. If the data is not available, write N/A in the blanks.
- 8. Give the legal description of the place of use of the water. If place of use is in a subdivision and legal description is not available, give the subdivision name, Lot Number and/or address on the blank line.
- 9. The person in whose name a well is registered shall notify the Department of any change in ownership and shall keep all information on the registration record current and accurate. A form entitled "Change of Well Information/Ownership" is available for this purpose. A blank form will be furnished with the returned duplicate copy of the registration form.
