2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
EMPLOYMENT STATUS				
Population 16 years and over	5,207,123	+/-1,676	5,207,123	(X)
In labor force	3,106,324	+/-8,229	59.7%	+/-0.2
Civilian labor force	3,089,118	+/-8,256	59.3%	+/-0.2
Employed	2,813,406	+/-7,893	54.0%	+/-0.2
Unemployed	275,712	+/-3,860	5.3%	+/-0.1
Armed Forces	17,206	+/-938	0.3%	+/-0.1
Not in labor force	2,100,799	+/-8,647	40.3%	+/-0.2
Civilian labor force	3,089,118	+/-8,256	3,089,118	(X)
Unemployment Rate	(X)	(X)	8.9%	+/-0.1
Females 16 years and over				
In labor force	1,440,426	+/-5,728	54.6%	+/-0.2
Civilian labor force	1,438,097	+/-5,724	54.5%	+/-0.2
Employed	1,313,662	+/-5,025	49.8%	+/-0.2
Own children of the householder under 6 years				
All parents in family in labor force	302,591	+/-3,785	60.2%	+/-0.7
Own children of the householder 6 to 17 years				
All parents in family in labor force	682,943	+/-5,379	66.5%	+/-0.5
COMMUTING TO WORK				
Workers 16 years and over	2,777,754	+/-7,744	2,777,754	(X)
Car, truck, or van -- drove alone	2,125,151	+/-7,242	76.5%	+/-0.2
Car, truck, or van -- carpooled	307,132	+/-4,840	11.1%	+/-0.2
Public transportation (excluding taxicab)	58,024	+/-1,919	2.1%	+/-0.1
Walked	56,694	+/-1,945	2.0%	+/-0.1
Other means	76,649	+/-2,415	2.8%	+/-0.1
Worked at home	154,104	+/-3,367	5.5%	+/-0.1

Subject	Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Mean travel time to work (minutes)	24.8	+/-0.1	(X)	(X)
OCCUPATION				
Civilian employed population 16 years and over	2,813,406	+/-7,893	2,813,406	(X)
Management, business, science, and arts occupations	986,331	+/-6,979	35.1%	+/-0.2
Service occupations	559,290	+/-6,490	19.9%	+/-0.2
Sales and office occupations	737,817	+/-5,362	26.2%	+/-0.2
Natural resources, construction, and maintenance occupations	258,469	+/-3,447	9.2%	+/-0.1
Production, transportation, and material moving occupations	271,499	+/-3,854	9.7%	+/-0.1
INDUSTRY				
Civilian employed population 16 years and over	2,813,406	+/-7,893	2,813,406	(X)
Agriculture, forestry, fishing and hunting, and mining	44,908	+/-1,784	1.6%	+/-0.1
Construction	185,028	+/-3,053	6.6%	+/-0.1
Manufacturing	204,240	+/-2,876	7.3%	+/-0.1
Wholesale trade	67,492	+/-2,177	2.4%	+/-0.1
Retail trade	344,151	+/-3,994	12.2%	+/-0.1
Transportation and warehousing, and utilities	138,155	+/-2,938	4.9%	+/-0.1
Information	50,115	+/-1,700	1.8%	+/-0.1
Finance and insurance, and real estate and rental and leasing	228,065	+/-3,526	8.1%	+/-0.1
Professional, scientific, and management, and administrative and waste management services	334,219	+/-5,251	11.9%	+/-0.2
Educational services, and health care and social assistance	622,383	+/-5,917	22.1%	+/-0.2
Arts, entertainment, and recreation, and accommodation and food services	304,606	+/-5,324	10.8%	+/-0.2
Other services, except public administration	136,066	+/-3,228	4.8%	+/-0.1
Public administration	153,978	+/-3,406	5.5%	+/-0.1
CLASS OF WORKER				
Civilian employed population 16 years and over	2,813,406	+/-7,893	2,813,406	(X)
Private wage and salary workers	2,230,268	+/-7,765	79.3%	+/-0.2
Government workers	411,874	+/-5,570	14.6%	+/-0.2
Self-employed in own not incorporated business workers	166,671	+/-2,854	5.9%	+/-0.1
Unpaid family workers	4,593	+/-558	0.2%	+/-0.1
INCOME AND BENEFITS (IN 2015 INFLATION-ADJUSTED DOLLARS)				
Total households	2,412,212	+/-7,194	2,412,212	(X)
Less than \$10,000	185,629	+/-3,119	7.7%	+/-0.1
\$10,000 to \$14,999	125,386	+/-2,588	5.2%	+/-0.1
\$15,000 to \$24,999	268,065	+/-3,509	11.1%	+/-0.1
\$25,000 to \$34,999	267,669	+/-3,966	11.1%	+/-0.2
\$35,000 to \$49,999	352,984	+/-3,785	14.6%	+/-0.2
\$50,000 to \$74,999	446,513	+/-4,859	18.5%	+/-0.2
\$75,000 to \$99,999	285,636	+/-3,727	11.8%	+/-0.1
\$100,000 to \$149,999	288,720	+/-3,853	12.0%	+/-0.2
\$150,000 to \$199,999	99,975	+/-2,354	4.1%	+/-0.1
\$200,000 or more	91,635	+/-1,912	3.8%	+/-0.1
Median household income (dollars)	50,255	+/-211	(X)	(X)
Mean household income (dollars)	68,297	+/-291	(X)	(X)
With earnings				
Mean earnings (dollars)	1,804,676	+/-6,876	74.8%	+/-0.2
Mean Social Security income (dollars)	68,904	+/-312	(X)	(X)
With Social Security	771,485	+/-3,788	32.0%	+/-0.1
Mean retirement income (dollars)	18,862	+/-75	(X)	(X)
With retirement income	480,074	+/-4,149	19.9%	+/-0.1
Mean retirement income (dollars)	24,807	+/-274	(X)	(X)

Subject	Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
With Supplemental Security Income	102,392	+/-2,271	4.2%	+/-0.1
Mean Supplemental Security Income (dollars)	9,698	+/-127	(X)	(X)
With cash public assistance income	56,036	+/-1,519	2.3%	+/-0.1
Mean cash public assistance income (dollars)	3,188	+/-129	(X)	(X)
With Food Stamp/SNAP benefits in the past 12 months	325,831	+/-3,646	13.5%	+/-0.2
Families	1,581,380	+/-7,010	1,581,380	(X)
Less than \$10,000	87,683	+/-2,123	5.5%	+/-0.1

Mean family income (dollars)	78,365	+/-425	(X)	(X)
Per capita income (dollars)	25,848	+/-124	(X)	(X)
Nonfamily households	830,832	+/-4,718	830,832	(X)
Median nonfamily income (dollars)	32,283	+/-223	(X)	(X)
Mean nonfamily income (dollars)	45,752	+/-383	(X)	(X)
Median earnings for workers (dollars)	29,627	+/-222	(X)	(X)
Median earnings for male full-time, year-round workers (dollars)	45,090	+/-275	(X)	(X)
Median earnings for female full-time, year-round workers (dollars)	37,264	+/-203	(X)	(X)
HEALTH INSURANCE COVERAGE				
Civilian noninstitutionalized population	6,533,509	+/-929	6,533,509	(X)
With health insurance coverage	5,551,125	+/-10,256	85.0%	+/-0.2
With private health insurance	3,977,054	+/-18,531	60.9%	+/-0.3
With public coverage	2,324,123	+/-13,307	35.6%	+/-0.2
No health insurance coverage	982,384	+/-10,380	15.0%	+/-0.2
Civilian noninstitutionalized population under 18 years	1,615,216	+/-379	1,615,216	(X)
No health insurance coverage	178,507	+/-4,618	11.1%	+/-0.3
Civilian noninstitutionalized population 18 to 64 years	3,910,423	+/-1,165	3,910,423	(X)
In labor force:	2,906,399	+/-7,914	2,906,399	(X)
Employed:	2,652,462	+/-7,776	2,652,462	(X)
With health insurance coverage	2,173,947	+/-8,970	82.0%	+/-0.2
With private health insurance	1,965,236	+/-10,211	74.1%	+/-0.3
With public coverage	273,111	+/-4,156	10.3%	+/-0.2
No health insurance coverage	478,515	+/-6,344	18.0%	+/-0.2
Unemployed:	253,937	+/-3,803	253,937	(X)
With health insurance coverage	156,576	+/-3,198	61.7%	+/-0.8
With private health insurance	76,727	+/-2,411	30.2%	+/-0.8
With public coverage	86,485	+/-2,286	34.1%	+/-0.8
No health insurance coverage	97,361	+/-2,446	38.3%	+/-0.8
Not in labor force:	1,004,024	+/-7,941	1,004,024	(X)
With health insurance coverage	787,012	+/-6,758	78.4%	+/-0.4
With private health insurance	464,329	+/-5,829	46.2%	+/-0.5

Subject	Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
With public coverage	382,587	+/-4,982	38.1%	+/-0.4
No health insurance coverage	217,012	+/-4,452	21.6%	+/-0.4
PERCENTAGE OF FAMILIES AND PEOPLE WHOSE INCOME IN THE PAST 12 MONTHS IS BELOW THE POVERTY LEVEL				
All families	(X)	(X)	13.3%	+/-0.2
With related children of the householder under 18 years	(X)	(X)	21.2%	+/-0.4
With related children of the householder under 5 years only	(X)	(X)	20.2%	+/-0.9
Married couple families	(X)	(X)	7.6%	+/-0.2
With related children of the householder under 18 years	(X)	(X)	12.0%	+/-0.4
With related children of the householder under 5 years only	(X)	(X)	10.0%	+/-0.8
Families with female householder, no husband present	(X)	(X)	31.7%	+/-0.6
With related children of the householder under 18 years	(X)	(X)	40.3%	+/-0.8
With related children of the householder under 5 years only	(X)	(X)	42.2%	+/-2.2
All people	(X)	(X)	18.2%	+/-0.2
Under 18 years	(X)	(X)	26.0%	+/-0.4
Related children of the householder under 18 years	(X)	(X)	25.6%	+/-0.4
Related children of the householder under 5 years	(X)	(X)	28.7%	+/-0.7
Related children of the householder 5 to 17 years	(X)	(X)	24.5%	+/-0.4
18 years and over	(X)	(X)	15.7%	+/-0.2
18 to 64 years	(X)	(X)	17.5%	+/-0.2
65 years and over	(X)	(X)	8.8%	+/-0.2
People in families	(X)	(X)	16.0%	+/-0.3
Unrelated individuals 15 years and over	(X)	(X)	27.4%	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Unrelated individuals 15 years and over	(X)	(X)	25.0%	+/-0.4

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Unrelated individuals 15 years and over	(X)	(X)	35.2%	+/-8.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Unrelated individuals 15 years and over	(X)	(X)	30.8%	+/-1.9

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Winkelman town, Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
EMPLOYMENT STATUS				
Population 16 years and over	288	+/-100	288	(X)
In labor force	136	+/-56	47.2%	+/-13.1
Civilian labor force	136	+/-56	47.2%	+/-13.1
Employed	120	+/-54	41.7%	+/-13.5
Unemployed	16	+/-15	5.6%	+/-5.1
Armed Forces	0	+/-12	0.0%	+/-11.4
Not in labor force	152	+/-69	52.8%	+/-13.1
Civilian labor force	136	+/-56	136	(X)
Unemployment Rate	(X)	(X)	11.8%	+/-10.9
Females 16 years and over				
In labor force	66	+/-35	39.8%	+/-18.5
Civilian labor force	66	+/-35	39.8%	+/-18.5
Employed	50	+/-31	30.1%	+/-17.5
Own children of the householder under 6 years				
All parents in family in labor force	13	+/-15	100.0%	+/-85.4
Own children of the householder 6 to 17 years				
All parents in family in labor force	7	+/-8	26.9%	+/-35.4
COMMUTING TO WORK				
Workers 16 years and over	120	+/-54	120	(X)
Car, truck, or van -- drove alone	73	+/-33	60.8%	+/-17.5
Car, truck, or van -- carpooled	20	+/-17	16.7%	+/-12.1
Public transportation (excluding taxicab)	0	+/-12	0.0%	+/-24.9
Walked	27	+/-29	22.5%	+/-20.6
Other means	0	+/-12	0.0%	+/-24.9
Worked at home	0	+/-12	0.0%	+/-24.9

Subject	Winkelman town, Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Mean travel time to work (minutes)	19.0	+/-6.3	(X)	(X)
OCCUPATION				
Civilian employed population 16 years and over	120	+/-54	120	(X)
Management, business, science, and arts occupations	22	+/-18	18.3%	+/-13.5
Service occupations	26	+/-26	21.7%	+/-18.6
Sales and office occupations	27	+/-25	22.5%	+/-17.4
Natural resources, construction, and maintenance occupations	38	+/-23	31.7%	+/-15.1
Production, transportation, and material moving occupations	7	+/-8	5.8%	+/-6.8
INDUSTRY				
Civilian employed population 16 years and over	120	+/-54	120	(X)
Agriculture, forestry, fishing and hunting, and mining	33	+/-22	27.5%	+/-15.9
Construction	18	+/-13	15.0%	+/-10.4
Manufacturing	4	+/-7	3.3%	+/-6.0
Wholesale trade	0	+/-12	0.0%	+/-24.9
Retail trade	14	+/-21	11.7%	+/-16.2
Transportation and warehousing, and utilities	0	+/-12	0.0%	+/-24.9
Information	0	+/-12	0.0%	+/-24.9
Finance and insurance, and real estate and rental and leasing	5	+/-4	4.2%	+/-4.0
Professional, scientific, and management, and administrative and waste management services	9	+/-10	7.5%	+/-7.4
Educational services, and health care and social assistance	14	+/-13	11.7%	+/-9.9
Arts, entertainment, and recreation, and accommodation and food services	18	+/-22	15.0%	+/-16.5
Other services, except public administration	0	+/-12	0.0%	+/-24.9
Public administration	5	+/-9	4.2%	+/-7.0
CLASS OF WORKER				
Civilian employed population 16 years and over	120	+/-54	120	(X)
Private wage and salary workers	95	+/-45	79.2%	+/-12.7
Government workers	15	+/-16	12.5%	+/-11.5
Self-employed in own not incorporated business workers	10	+/-9	8.3%	+/-6.8
Unpaid family workers	0	+/-12	0.0%	+/-24.9
INCOME AND BENEFITS (IN 2015 INFLATION-ADJUSTED DOLLARS)				
Total households	113	+/-33	113	(X)
Less than \$10,000	9	+/-8	8.0%	+/-7.0
\$10,000 to \$14,999	4	+/-5	3.5%	+/-4.1
\$15,000 to \$24,999	10	+/-10	8.8%	+/-8.5
\$25,000 to \$34,999	11	+/-10	9.7%	+/-8.7
\$35,000 to \$49,999	36	+/-17	31.9%	+/-13.7
\$50,000 to \$74,999	9	+/-11	8.0%	+/-9.4
\$75,000 to \$99,999	17	+/-14	15.0%	+/-11.8
\$100,000 to \$149,999	17	+/-17	15.0%	+/-12.6
\$150,000 to \$199,999	0	+/-12	0.0%	+/-26.1
\$200,000 or more	0	+/-12	0.0%	+/-26.1
Median household income (dollars)	41,250	+/-7,806	(X)	(X)
Mean household income (dollars)	55,498	+/-10,863	(X)	(X)
With earnings				
Mean earnings (dollars)	61,307	+/-16,608	(X)	(X)
With Social Security				
Mean Social Security income (dollars)	19,162	+/-4,913	(X)	(X)
With retirement income				
Mean retirement income (dollars)	13,578	+/-6,415	(X)	(X)

Subject	Winkelman town, Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
With Supplemental Security Income	4	+/-4	3.5%	+/-3.8
Mean Supplemental Security Income (dollars)	N	N	N	N
With cash public assistance income	0	+/-12	0.0%	+/-26.1
Mean cash public assistance income (dollars)	-	**	(X)	(X)
With Food Stamp/SNAP benefits in the past 12 months	20	+/-16	17.7%	+/-12.3

Median earnings for female full-time, year-round workers (dollars)	(X)	(X)	(X)	(X)
HEALTH INSURANCE COVERAGE				
Civilian noninstitutionalized population	327	+/-113	327	(X)
With health insurance coverage	283	+/-97	86.5%	+/-7.6
With private health insurance	204	+/-86	62.4%	+/-13.9
With public coverage	132	+/-48	40.4%	+/-12.6
No health insurance coverage	44	+/-32	13.5%	+/-7.6
Civilian noninstitutionalized population under 18 years	39	+/-25	39	(X)
No health insurance coverage	4	+/-6	10.3%	+/-17.4
Civilian noninstitutionalized population 18 to 64 years	213	+/-87	213	(X)
In labor force:	131	+/-54	131	(X)
Employed:	115	+/-51	115	(X)
With health insurance coverage	94	+/-44	81.7%	+/-17.5
With private health insurance	86	+/-40	74.8%	+/-17.3
With public coverage	8	+/-11	7.0%	+/-8.6
No health insurance coverage	21	+/-23	18.3%	+/-17.5
Unemployed:	16	+/-15	16	(X)
With health insurance coverage	9	+/-11	56.3%	+/-49.5
With private health insurance	0	+/-12	0.0%	+/-76.9
With public coverage	9	+/-11	56.3%	+/-49.5
No health insurance coverage	7	+/-10	43.8%	+/-49.5
Not in labor force:	82	+/-59	82	(X)
With health insurance coverage	70	+/-54	85.4%	+/-14.7
With private health insurance	49	+/-44	59.8%	+/-28.8

Subject	Winkelman town, Arizona			
	Estimate	Margin of Error	Percent	Percent Margin of Error
With public coverage	21	+/-29	25.6%	+/-31.2
No health insurance coverage	12	+/-14	14.6%	+/-14.7
PERCENTAGE OF FAMILIES AND PEOPLE WHOSE INCOME IN THE PAST 12 MONTHS IS BELOW THE POVERTY LEVEL				
All families	(X)	(X)	11.8%	+/-10.8
With related children of the householder under 18 years	(X)	(X)	8.7%	+/-14.8
With related children of the householder under 5 years only	(X)	(X)	0.0%	+/-100.0
Married couple families	(X)	(X)	4.7%	+/-7.8
With related children of the householder under 18 years	(X)	(X)	22.2%	+/-42.5
With related children of the householder under 5 years only	(X)	(X)	-	**
Families with female householder, no husband present	(X)	(X)	22.2%	+/-35.7
With related children of the householder under 18 years	(X)	(X)	0.0%	+/-100.0
With related children of the householder under 5 years only	(X)	(X)	-	**
All people	(X)	(X)	11.6%	+/-8.1
Under 18 years	(X)	(X)	10.3%	+/-17.6
Related children of the householder under 18 years	(X)	(X)	10.3%	+/-17.6
Related children of the householder under 5 years	(X)	(X)	0.0%	+/-85.4
Related children of the householder 5 to 17 years	(X)	(X)	15.4%	+/-27.4
18 years and over	(X)	(X)	11.8%	+/-8.2
18 to 64 years	(X)	(X)	9.4%	+/-6.6
65 years and over	(X)	(X)	18.7%	+/-16.5
People in families	(X)	(X)	10.5%	+/-8.8
Unrelated individuals 15 years and over	(X)	(X)	22.6%	+/-18.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
