Subject: Resolution Monitoring Plan
Date: Thursday, July 28, 2016 9:22:08 AM

Kami,

Pinal County Air Quality has reviewed the system design and proposed operational protocols related to the addition of the Hewitt Station site and updated information related to the Far West site. Based on our current, limited understanding of the actual configuration of the project, Pinal Air quality agrees that the system and operational protocols described in the Plan will provide relevant ambient data for both background pollutant concentrations and prevailing meteorological conditions.

Kale
