EXECUTIVE SUMMARY

WestLand Resources, Inc. (WestLand), was contracted by Resolution Copper Mining, LLC (Resolution; the “User”) to perform a Phase I Environmental Site Assessment (ESA) for approximately 147 acres referred to as the Turkey Creek parcel (also known as the JX Bar Ranch or J Slash X Ranch) (“the Property”). The Property is presently under non-federal ownership (Resolution) but proposed as part of a land exchange with the U.S. Forest Service (USFS) under the Southeast Arizona Land Exchange and Conservation Act of 2013. The Property is located in Sections 3 and 4 of Township 7 North, Range 12 East, relative to the Gila and Salt River Meridian, in Gila County, Arizona (**Figure 1**). The Gila County Assessor’s Parcel Number (APN) for the Property is 201-05-001.

An aerial photograph showing the Property boundaries is included as **Figure 2**. **Figure 3** shows surface management (land ownership) of the Property and vicinity. Photographs depicting the site and vicinity are provided in **Appendix A** and located in **Figure 4**.

This Phase I ESA has been completed in accordance with the guidelines provided in the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property* (ASTM E 2247-16). The purpose of this work was to identify the presence or potential presence of recognized environmental conditions (RECs) resulting from past or present activities. According to ASTM guidelines, a REC is defined as “...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.”

Findings

Environmental Liens/Activity and Use Limitations

On June 18, 2020, WestLand engaged Environmental Record Search (ERS), to conduct a search of available land title records for environmental liens and activity and use limitations (AULs) for the Property. A search was completed for Gila County APN 201-05-001 and no records of environmental liens or AULs associated with the Property were identified. No title records reviewed indicated a REC in connection to the Property.

Records Review

Environmental Records—WestLand contracted with ERS to conduct an electronic search of regulatory agency databases for references to the Property and surrounding lands. The database search was conducted on June 18, 2020 by conducting a search from the boundaries of the Property to the minimum search distance recommended by the ASTM standard. The Property did not appear on any of the databases searched and there were not any database records within the ASTM-recommended

distance of the Property boundaries. No RECs were identified in connection to known government records in the vicinity of the Property.

Prior Environmental Report—Prior Phase I ESAs for the Property were conducted by WestLand in 2004 (WestLand 2004b) and 2016 (WestLand 2016). The results of both Phase I ESAs indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. No RECs were identified on the Property or on adjoining land.

Physical Setting

The Property is located on the east side of the crest of the Sierra Ancha mountain range in a rugged landscape of narrow canyons and mesas. The most notable landform features of the Property are the perennial streams (Turkey and Rock creeks) and the canyon slopes and cliffs cut by these streams. Turkey Creek passes through the southern portion of the Property and joins Bear Head Canyon at the southeastern corner. At their confluence, Rock Creek begins, extending to the northeastern corner of the Property. The elevation ranges from about 5,580 feet above mean sea level (amsl) at the top of the west slope near the western extreme of the Property to just under 5,200 feet amsl at the bottom of Rock Creek near the northeastern corner (WestLand 2004a).

Historical Use

The Property was homesteaded starting in the 1880s, initially associated with Elmer D. Boody, until the latter part of the 1900s, later known as the J Slash X Ranch. Development reportedly included a series of buildings and property improvements at the southern portion of the Property, including a house, barn, kitchen, storehouse, tool house, shop, well, and cultivated area, many of which were destroyed by fire in the late 1900s. The site currently includes no signs of the homestead structure, but has signs of recent camping and hiking (i.e. firepits, minor amounts of trash, trails) and a well; some apple orchard trees remain.

Site Reconnaissance

On July 28, 2020, WestLand visited the site to assess existing environmental conditions for the Property. Field observations were consistent with WestLand's prior findings, reports, historical review, and interviews regarding the Property and vicinity. Currently, the Property is not used for any focused purpose but is used for dispersed recreation such as hunting, camping, hiking, and off-highway vehicle use. The Property is characterized as mostly vacant, open space that appears to have been used in the past for homesteading and grazing. Natural vegetation at the Property is re-establishing where it was previously disturbed. Developed features at the Property are limited. A dry-laid masonry well at the former homestead location was observed and appears to have been filled in with sediment or possibly trash with two rusted drums placed over it. Some of the apple orchard trees remain. There is scattered trash in small quantities throughout the site, associated with hiking and camping.

Interviews

Interviews were conducted with several individuals as part of this assessment:

- The report User and Property owner: Sterling Hundley, representative for Resolution and
- Two former Property owners: George Randall and Linda Ewing, interviewed in 2004 (WestLand 2004b).

No information provided through the interviews indicate the potential for a REC in connection to the Property.

Recognized Environmental Conditions

WestLand has performed this Phase I ESA in conformance with the scope and limitation of ASTM E 2247-16 for the Property. This assessment has revealed no evidence of RECs in connection with the Property.

I. INTRODUCTION

WestLand Resources, Inc. (WestLand), was contracted by Resolution Copper Mining, LLC (Resolution; the “User”) to perform a Phase I Environmental Site Assessment (ESA) for approximately 147 acres referred to as the Turkey Creek parcel (also known as the JX Bar Ranch or J Slash X Ranch; “the Property”). The Property is presently under non-federal ownership (Resolution), but proposed as part of a land exchange with the U.S. Forest Service (USFS) under the Southeast Arizona Land Exchange and Conservation Act of 2013. The Property is located in Sections 3 and 4 of Township 7 North, Range 12 East, relative to the Gila and Salt River Meridian, in Gila County, Arizona (**Figure 1**).

I.1. PURPOSE

The purpose of this investigation was to conduct an assessment of the Property and surrounding areas to identify Recognized Environmental Conditions (RECs) potentially resulting in environmental impacts to the Property. According to the American Society for Testing and Materials (ASTM) E 2247-16 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property*, a recognized environmental condition is defined as: “...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.” This term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be *de minimis* are not RECs.

The results of an investigation may be used as part of the due diligence investigation for prospective property owners promulgated pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a. Superfund), the Superfund Amendments and Reauthorization Act of 1986 (SARA), and the Small Business Liability Relief and Brownfield’s Revitalization Act of 2002 (the Brownfield Amendments). This Phase I ESA is intended to assist the User in satisfying the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations of CERCLA. The Property owner has continuing obligations, if applicable, to receive liability protections in addition to the All Appropriate Inquiry (40 CFR Part 312). The continuing obligations include: 1) compliance with land use restrictions; 2) not impeding the effectiveness or integrity of institutional controls; 3) taking reasonable steps to prevent releases; 4) providing assistance and access to the U.S. Environmental Protection Agency (EPA), state, or other parties conducting response or restoration actions; 5) complying with CERCLA information requests and subpoenas; and 6) providing legally required notices.

I.2. SCOPE OF SERVICES

This Phase I ESA has been completed in accordance with the guidelines provided in the ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property* (ASTM E 2247-16). This standard satisfies the requirements of the EPA All Appropriate Inquiry provisions, which became effective November 1, 2006 (40 CFR Part 312). This protocol requires the review of readily available environmental records, historical and current land use, interviews with persons knowledgeable about the Property, and a site reconnaissance to observe on-site conditions and adjoining properties.

The User of this report has responsibilities for addressing some of the mandatory provisions of the standard. ASTM E 2247-16 Section 6 (User's Responsibilities) describes tasks that will help identify the possibility of RECs in connection with the Property that do not require the expertise of an environmental professional, including checking title records for environmental liens and activity and use limitations (AULs). The User provided certain title records to WestLand. WestLand also commissioned a search for environmental liens and AULs by a title professional on behalf of the User; see **Section 3** of this report.

This Phase I ESA does not assess ASTM non-scope considerations, including asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality (including vapor intrusion), biological agents, mold, or other nuisances.

I.3. LIMITATIONS AND EXCEPTIONS

This Phase I ESA evaluates potential sources of hazardous substances or petroleum products that could be considered a REC and a liability due to their presence in significant concentrations, or the potential for contamination migration through exposure pathways. Unless otherwise noted, this assessment did not include any testing or sampling of materials. Hazardous substances occurring naturally are not typically considered. This report is intended to provide further recommendations regarding potential RECs related to the Property; conclusive identification of hazardous substances and petroleum products can be accomplished only through sampling and laboratory analysis.

Site reconnaissance does not provide information regarding potential sources of contamination below the ground surface. However, in cases of subsurface contamination, aboveground indicators such as obvious stress to plant life or staining are noted. All findings are based on observations, information collected, and conditions during the site visit. A change in those conditions may alter the findings and conclusions of this report.

A Phase I ESA cannot, within its scope of assessment, wholly eliminate uncertainty regarding the potential presence of RECs. WestLand believes that the information in this report is reliable; however,

WestLand cannot guarantee that the information provided by all the sources contained in this report is complete and accurate. This report is intended to decrease, but not eliminate, uncertainty regarding the potential for RECs in connection with a property given reasonable limits of cost and time, and in a manner consistent with the customary practices of the environmental consulting industry, under similar circumstances at the time services were performed and in similar localities. It should be noted that the conditions at the Property could change as a result of natural processes or be altered by human activities at the Property and/or nearby sites.

I.4. SPECIAL TERMS AND CONDITIONS

No special terms or conditions are associated with this report.

I.5. USER RELIANCE

This Phase I ESA has been prepared for use by Resolution and the U.S. Forest Service (USFS). It may not be relied upon by any other person or entity without the written consent of WestLand.

I.6. CONTINUED VIABILITY

ASTM E 2247-16 guidelines require that certain components of a Phase I ESA be completed less than 180 days prior to the date of acquisition or the intended transaction if no acquisition is involved; therefore, its useful life is limited. The following components of the Phase I ESA are presumed valid only within 180 days prior to the date of acquisition or other intended transaction:

- Interviews
- Searches for environmental liens
- Government records review
- Site reconnaissance
- Declaration by the environmental professional

Other components of the Phase I ESA are valid for 1 year. The above-listed components can be updated separately in order to eliminate redundant environmental due diligence efforts within 1 year. After 1 year has passed, all Phase I ESA components should be redone. The prior Phase I ESA report may be used as a reference during completion of the new investigation and analysis.

2. SITE DESCRIPTION

This section describes the location, general characteristics, and current uses of the Property. The current uses of adjoining properties are also described.

2.1. LOCATION AND LEGAL DESCRIPTION

The Property is situated approximately 20 miles southeast of Payson, Arizona. It is within a private landholding surrounded by USFS, Tonto National Forest lands. The Property is located in Sections 3 and 4 of Township 7 North, Range 12 East, Gila, and Salt River Meridian, in Gila County, Arizona. The western portion of the Property extends minimally into Section 4 (**Figure 1**). The Gila County Assessor's Parcel Number (APN) for the Property is 201-05-001.

2.2. SITE AND VICINITY GENERAL CHARACTERISTICS

The Property is located in the highlands of the Sierra Ancha Mountains, on the eastern side of the crest of the range in Turkey and Rock Creek canyons, principally on the northern and western slopes but extending to the canyon floor. The Property is located within the streambed and adjacent upland areas along Turkey Creek, which follows the southern and eastern parcel boundaries. The Property is accessible by multiple forest roads that reach the western corner of the parcel and a primitive "jeep trail" that crosses the Property. There are no developed campgrounds in the vicinity of the Property, but nature viewing, hiking, camping, and picnicking likely occur at the Property and are available recreational opportunities on public lands surrounding the Property. Since WestLand's last visit in 2016, a forest fire has burned within the vicinity of the Property. While no fire impacts were seen directly on the Property, evidence of the fire was visible while driving into the site.

2.3. CURRENT USE OF THE PROPERTY

The Property is generally undeveloped open space. While there is no evidence of current human occupation or significant recreational use, there is, however, indication that some camping occurs (i.e., trespassing on private land).

2.4. DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

Developed features at the Property are limited. Roads and trails are currently the only improvements at the Property. The access road to the Property was rugged and not well maintained. The remains of a well, a trail, a small apple orchard, and a scatter of historical artifacts are all that currently exist from the former homestead.

2.5. CURRENT USES OF ADJOINING PROPERTIES

Land use in all directions surrounding the Property is characterized by undeveloped forestland that is used for dispersed recreation purposes. Designated hiking and pack trails are on the Tonto National Forest land to the south and east of the Property, as well as on- and off-road vehicle trails. A small, vacant, tin shack was observed on adjoining land at the southwest portion of the Property in 2016 but was not seen during the 2020 site reconnaissance.

3. USER-PROVIDED INFORMATION

The report User and landowner is Resolution who provided relevant information about the Property on August 6, 2020. The User and Owner representative is Sterling Hundley. A copy of the User and Owner Questionnaires are provided as **Appendix B**.

On August 6, 2020, WestLand contacted representatives for the USFS and requested that the User Questionnaire be completed for the Property in support of the Southeastern Land Exchange and Conservation Act of 2013. As of the date of this report, a returned questionnaire has not yet been received. If the User Questionnaire is received after this report is finalized, it may be incorporated into the Phase I ESA report as an addendum to assist the USFS in qualifying for landowner liability protections.

3.1. TITLE RECORDS

The report User previously provided copies of title information in connection to the Property which was transmitted from the title company to Swift Current Land and Cattle LLC on February 15, 2006. This included an ALTA Owners title policy dated February 8, 2004 and amended December 15, 2005 (**Appendix C**). The policy also includes accompanying title insurance requirements and exceptions that typically list known land encumbrances (i.e., taxes, deed restrictions, easements, liens) and may provide an indication of the potential for contamination at the Property. Based on WestLand's review, the listed standard and specific encumbrances do not indicate the release or threat of a release of a hazardous material or petroleum product at the Property.

3.2. ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The User is not aware of any environmental liens or AULs for the Property.

WestLand engaged Environmental Record Search (ERS), to conduct a search of available land title records for environmental liens and AULs on the Property on behalf of the User. A search for environmental liens and AULs was completed on June 18, 2020; no records of environmental liens or AULs associated with the Property were identified (**Appendix D**). Copies for the deeds associated with the Property are included in the environmental lien and AULs report.

The Special Warranty Deed for the Property was executed on March 24, 2020 and recorded the following month, conveying ownership from Swift Current Land & Cattle LLC to Resolution (a Delaware limited liability company). The previous deed was dated November 28, 2005, and recorded the following month, conveying ownership from Fred M. Randall and Karen Randall to Swift Current Land & Cattle LLC. A copy of the deed is included with **Appendix D**.

3.3. SPECIALIZED KNOWLEDGE

The User reported that the Property was used as residence and for limited cattle grazing, with regular use into latter half of the 20th century. The Property is currently vacant and used for unauthorized dispersed recreational activities by persons accessing the site from adjacent public lands. Approximately 95 percent of the Property is undeveloped.

3.4. COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User is not aware of the use of any chemicals or releases or environmental cleanups at the Property. No other commonly known or reasonably ascertainable information relevant to potential RECs was provided by the User.

3.5. VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User reports there is no information indicating the value of the Property has been reduced as a result of environmental issues.

3.6. REASON FOR PERFORMING PHASE I ESA

The User states that the Phase I ESA was being performed to identify RECs requiring additional investigation relating to a land exchange property transaction with the USFS under the Southeast Arizona Land Exchange and Conservation Act of 2013.

3.7. OTHER

Based on the User's knowledge of, and experience related to the Property, no obvious indicators point to the presence or likely presence of contamination on the Property of which the User is aware. No other information relevant to potential RECs was provided by the User.

4. RECORDS REVIEW

WestLand reviewed a variety of regulatory records to determine if any past uses of the Property or uses within adjoining areas may have led to RECs on the Property.

4.1. ENVIRONMENTAL RECORD SOURCES

WestLand contracted with ERS to conduct an electronic search of regulatory agency databases for references to the Property and surrounding lands. The database search (RecCheck Area Report Results) was conducted on June 18, 2020, and included standard and additional federal, tribal, state, local, and supplemental database records, as well as ERS proprietary database records. The regulatory agency databases were queried by conducting a search from the boundaries of the Property to the minimum search distance recommended by the ASTM standard. A copy of the ERS environmental reports that describes the databases searched, search distances, record details for the search results, and the dates the databases were last updated are provided in Appendix E.

The Property did not appear on any of the databases searched and there were not any database records for other properties within the ASTM-recommended distances of the Property boundaries.

4.2. PRIOR ENVIRONMENTAL REPORTS

Prior Phase I ESAs for the Property were conducted by WestLand in 2004 (WestLand 2004b) and 2016 (WestLand 2016). The results of both Phase I ESAs indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. No RECs were identified on the Property or on adjoining land.

4.3. PHYSICAL SETTING

The Property's physical setting was evaluated by WestLand to gain a comprehensive understanding of the Property's geophysical characteristics. These geophysical characteristics, including surface topography, soils, geology, hydrology, and hydrogeology, may relate to the potential migration of hazardous substances and petroleum products.

4.3.1. Topography

Regionally, the Property lies within the Central Highlands physiographic province, a transitional zone between the Basin and Range and Colorado Plateau provinces in central Arizona. It is situated on the east side of the crest of the Sierra Ancha Mountains, in a rugged landscape of narrow canyons and mesas. Surrounding mountain peaks rise to over 6,000 feet in elevation (WestLand 2004a).

The Property itself is located within the streambed and adjacent upland areas along Turkey Creek and Rock Creek. Turkey Creek passes through the southern portion of the Property and joins Bear Head

Canyon at the southeastern corner. At their confluence, Rock Creek begins, extending to the northeastern corner of the Property. The Property includes gently sloping areas within and along the stream, moderate to steep slopes along the northern canyon side, and vertical cliffs in selected areas of exposed bedrock along Rock Creek (WestLand 2004a, c). Elevations range from approximately 5,580 feet above mean sea level (amsl) at the western extreme down to approximately 5,160 feet amsl along the northern Property boundary in the stream bed.

4.3.2. Soils

The National Cooperative Soil Survey through Web Soil Survey (Soil Survey Staff 2020)¹ had no available digital data for the Property. Soils at the Property were previously mapped for the 2016 Phase I ESA using the Arizona Land Resource Information System General Soils Map² which indicates that the Property is located within the Roundtop-Tortugas-Jacks soil association (WestLand 2016). Soils of this association are described as well-drained and occur on limestone and sandstone mountains just south of the Mogollon Rim. Roundtop soils make up about 35 percent, Tortugas soils 35 percent, Jacks soils 15 percent, and minor areas of rock outcrop and associated soils 15 percent. Soils of this association have good potential for woodland and rangeland wildlife habitat and are characterized as having shallow and moderate depths to bedrock, low permeability in the Roundtop and Jacks soils, and steep slopes in some areas of all soils (Hendricks 1985).

4.3.3. Geology

The surface geology of the Property includes early to middle Tertiary conglomerate (Tco) on the canyon's upper slopes, middle Proterozoic Dripping Springs Quartzite (Ydu) adjacent to the stream bed in the northeastern portion (i.e., exposed cliff faces), and Quaternary (Holocene) alluvium (Qy) within the canyon bottom (Skotnicki 1999). The majority of the Property is covered with Tertiary conglomerate, in the form of highly weathered, rounded ridges. This unit contains medium-bedded, moderately consolidated conglomerate interbedded with moderately sorted sandstone, pebble, and cobble layers. The cliffs along the west side of Rock Creek on the Property are exposures of the upper member of Dripping Springs Quartzite. The quartzite forms a regional plateau that dips very gently to the north-northeast; in some places, this plateau is horizontal (WestLand 2004a). This unit is composed of thinly bedded light tan-yellow argillite and fine-grained quartzite. Aged erosion and accretion is evident through the active stream channel within the Property (WestLand 2004b).

Bedrock within the Property is covered with a thin veneer of soil on uplands, with a limited amount of alluvium in the channel bottom and talus or colluvium on the slopes. The JX Ranch homestead site is on the largest span of alluvium on the Property, on the inside of a bend of Turkey Creek near the southern boundary. The height of the alluvial surface in this area is about 3 to 5 feet above the channel

¹ Accessed online on July 30, 2020.

² Arizona Land Resource Information System (ALRIS). 1975. Regional Soils: GIS Cover. Online data retrieved at <http://www.azland.gov/alris/layers.html>. Accessed March 13, 2015. This tool is no longer available online.

bottom. Another large span of alluvium is present on the west side of the Rock Creek channel near the northeastern corner of the Property

One fault is located in just south of the Property and crosses both Bear Head Canyon and Turkey Creek (Skotnicki 1999). Additional faults in the vicinity occur west of the Property near Pine and Chalk mountains and east and southeast of the Property near Copper Mountain.

4.3.4. Hydrology

Regionally, the Property lies in the Rock Creek sub-basin of the Tonto Creek Basin within the greater Salt River watershed that ultimately discharges into Roosevelt Lake. Turkey Creek originates on the north slopes of Picture Mountain at 6,439 feet amsl approximately 3 miles southwest of the Property and descends to just below 5,200 feet amsl at its confluence with Bear Head Canyon (ADWR 2009). From the confluence of Turkey Creek and Bear Head Canyon, the channel bed of Rock Creek is relatively level, dropping less than 40 feet during the next 0.5-mile stretch within the Property.

The Property extends north and west from the perennial Turkey Creek onto the northern side of the Turkey Creek canyon; several un-named ephemeral tributaries to the stream cross this slope. From the south, the stream in Bear Head Canyon reaches a confluence with Turkey Creek near the southeastern corner of the Property; this stream appears to be intermittent. Downstream of this confluence, and continuing along the eastern Property boundary, the stream is identified as Rock Creek, which flows north and west to Spring Creek before discharging into Tonto Creek.

Water quality in this reach of Turkey Creek is not assessed by the Arizona Department of Environmental Quality (ADEQ), and there is no designated use or known water quality conditions at the Property (ADEQ 2015).

The National Wetlands Inventory map identifies approximately 16.71 acres of riverine wetlands within the Property, along Turkey Creek and its tributaries (USFWS 2020)³. Mesoriparian habitat is present along the Turkey Creek stream channel (WestLand 2004c). Facultative wetland species were present, but minimal obligate wetland species (i.e., a few introduced willows) and no hydric soils were observed.

Major drainages in the area have been mapped by the Federal Emergency Management Agency as Flood Zone D, an area of undetermined flood hazards.

4.3.5. Hydrogeology

The Property is located in the Salt River Lakes sub-basin within the larger Salt River groundwater basin (ADWR 2009). This basin covers approximately 200 square miles within Gila County. The region is bounded on the west and southwest by the Sierra Ancha and Superstition mountains.

³ Accessed online on July 31, 2020.

Groundwater flow direction has not been characterized in the Salt River Lakes sub-basin; however, the potentiometric surface of shallow groundwater typically mimics surface topography at a diminished scale. At the Property, shallow groundwater likely flows to the northeast, generally following the course of Turkey Creek.

The Salt River Lakes sub-basin contains mostly igneous granitic, metamorphic, and sedimentary rocks. Basin-fill materials that accumulated in the larger valleys comprise the unconsolidated sediments. Groundwater occurs in all of these rock units. The groundwater basin is predominately drained by Turkey Creek and other perennial tributaries. Unconsolidated sands and gravels within the floodplains of these streams and washes form an alluvial aquifer that is generally quite productive. Recharge to the aquifer occurs primarily along mountain fronts and from streams and lake infiltration (ADWR 2009).

The Arizona Department of Water Resources (ADWR) Well Registry spatial database was queried to review any data for wells within the boundaries of the Property. There are no registered groundwater wells on the Property (ADWR 2020)⁴. The search area was expanded to a 5-mile radius of the Property and six registered wells were identified. Records for these show water levels in this area are relatively shallow, at less than 200 feet below the surface. The median well yield from large wells (greater than 10-inch in diameter) is 170 gallons per minute (gpm).

There is one open, hand-dug well to the northeast of the homestead site on the Property (WestLand 2004a). It has dry-stacked, loose rock casement and the original depth of the well could not be ascertained during site visits. The well was likely completed in unconsolidated materials (alluvium rather than bedrock) and accesses shallow groundwater in a saturated alluvial aquifer adjacent to Turkey Creek (WestLand 2004a). The well appears to have been completely filled in with sediment or possibly trash with two rusted drums placed over it as of 2015 (WestLand 2016); the well was observed in the same condition in 2020.

No groundwater quality data for the Property or vicinity was identified during the course of this inquiry.

4.4. HISTORICAL USE INFORMATION ON THE PROPERTY AND ADJOINING PROPERTIES

The purpose of reviewing historical sources is to develop a history of the previous uses of a property and surrounding area in order to help identify past uses that may have led to RECs in connection with the Property. According to the ASTM standard, obvious uses of a property shall be identified from the present back to the property's first developed use, or back to 1940, whichever is earlier. This requires reviewing only as many standard historical sources as are reasonably ascertainable and likely to be useful.

⁴ Accessed online July 31, 2020.

4.4.1. Historical Topographic Maps

WestLand reviewed U.S. Geological Survey (USGS) topographic maps of the Property and its vicinity dated 1907, 1964, 1994, 2004, and 2014 (**Appendix F**). USGS topographic map coverage for the Property is provided on the Roosevelt, Copper Mountain, and Theodore Roosevelt Lake quadrangles, at various scales. Topographic maps depict both natural and developed features, including wells, structures, and other indications of historical use. The following summary presents WestLand's review of the identified mapped features on or near the Property in chronological sequence.

The 1907 Roosevelt 15-minute quadrangle (1:125,000 scale) depicts much of the Property as undeveloped land with a wash passing through the southern and eastern portions of the Property. There is a trail along the east boundary of the Property. Developed features surrounding the Property are generally limited to trails or dirt roads and three structures, one on adjoining land southwest of the Property and the other two north of the Property along the wash.

The 1964 Copper Mountain 7.5-minute quadrangle (1:24,000 scale) depicts the Property in the same conditions as the 1907 map with the exception of the addition of a new structure at "J Slash X Ranch" and the addition of a trail that leads to the J Slash X Ranch from the south. The trail toward the southwestern portion of the Property that accesses the structure on the Property is depicted as an unimproved road. A structure is shown to the southwest of the Property (apparent on the 1907 map) and is connected to the J Slash X Ranch by an improved roadway. New unimproved roadways and pack trails are shown traveling northwest and northeast of the Property. An aircraft landing strip is identified northwest of the Property. The two structures north of the Property that were shown in the 1907 map are not depicted in the 1964 map but may be farther north than this map covers.

The 1994 Theodore Roosevelt Lake 30-minute by 60-minute quadrangle (1:100,000 scale) provides less detail than the prior maps. The structure on the Property is not depicted, nor are some of the trails and roads surrounding the Property. The landing strip is still shown northwest of the Property.

The 2004 Copper Mountain 7.5-minute quadrangle (1:24,000 scale) provides more detail than the 1994 quadrangle. The J Slash X Ranch, including a structure, is depicted, and there are unimproved roads through the southern portion of the Property. The unimproved road and structure southwest of the Property are depicted. The landing strip is no longer depicted, nor are the trails that were shown to the northeast of the Property in the 1964 map.

The 2014 Copper Mountain 7.5-minute quadrangle (1:24,000 scale) provides an aerial view along with topographic information. The roadways on the Property and to the south, west, and northwest are depicted. No structures are depicted on this quadrangle.

4.4.2. Historical Aerial Photographs

WestLand obtained nine historical aerial photographs depicting the Property and vicinity dating from 1947, 1953, 1962, 1971, 1980, 1992, 2003, 2009, and 2016 (**Appendix G**). WestLand reviewed the maps for evidence of anthropomorphic disturbance and to identify any historical land uses that might have involved the use, treatment, storage, disposal, or generation of hazardous substances, or petroleum products.

Development at the Property depicted in the aerial photographs is extremely limited. None of the aerial photographs definitively display developed features at the Property, though a cleared area toward the northeastern corner and a cleared area at the southern end of the Property are visible. A feature that could be a dirt roadway enters the Property from the southwest corner. Dirt roadways can be seen in all photographs on land surrounding the Property. The locations of these roads correspond to those depicted in the quadrangle maps. Beginning with the 1962 aerial photograph, the landing strip is depicted in the location corresponding to that shown in the quadrangle maps.

4.4.3. Property Tax Files & Land Records

WestLand obtained the property profile for the Property and adjoining areas from the Gila County Assessor. The Property profile and assessor parcel details are included in **Appendix H**. This report provides the parcel number (APN 201-05-001). The parcel details provide the property sales history and indicate that the Property is vacant land with no assessed buildings or other improvements. The legal description indicates the parcel was originally created with farming and grazing activities intended at the Property. The assessor parcel data refers to a registered patent #627759 (HES 151); this was registered to a prior landowner, Elmer D. Boody.

Based on Bureau of Land Management (BLM) data researched by WestLand archeologists (Charest and Huntington 2016), the Property coincides with a historical land patent on file. In 1918, Mr. Boody applied for a Serial Patent for 146.95 acres of land in Sections 3 and 4 of Township 7 North, Range 12 East, under the Homestead Act of May 20, 1862, “To Secure Homesteads to Actual Settlers on the Public Domain”.

4.4.4. Local Street Directories

Based on the lack of development in the immediate vicinity of the Property, WestLand did not conduct a city directory search.

4.4.5. Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps typically cover development in the first half of the 20th century. Considering the lack of development at the Property, WestLand did not commission a search for these maps.

4.4.6. Other Historical Sources

WestLand reviewed a cultural resources inventory report for the Property that includes archaeological research and results of prior records searches (WestLand 2016). The report notes that a 1916 Homestead plat depicts a series of buildings and property improvements in the southern end of the Property, including a house, barn, kitchen, storehouse, tool house, shop, well, and cultivated area. This plat depicts the homestead of Elmer D. Boody. The Boody homestead later became known as the J Slash X Ranch. This ranch is depicted in the same location as the Boody homestead on the 1964 Copper Mountain topographic map.

5. SITE RECONNAISSANCE

On July 28, 2020, WestLand engineer, Patrick Mette and environmental specialist, Samantha Blonder, performed a site reconnaissance to assess existing environmental conditions for the Property. Photographs documenting pertinent features are provided in **Appendix A** with photo point locations indicated in **Figure 4**.

5.1. METHODOLOGY AND LIMITING CONDITIONS

Prior to conducting the site reconnaissance, WestLand reviewed current and historical aerial photographs and topographic maps (as described in **Section 4**) to identify the location of any suspect areas, including roadways, cleared areas, disturbed soils, and structures. Areas of known concentrated human activity were assessed in greater detail because these areas presented the most potential for impacts by hazardous materials and petroleum products.

During the site reconnaissance, WestLand evaluated the suspect areas of site disturbance through pedestrian surveys. WestLand's reconnaissance included the Property, as well as observations of the adjoining properties from publicly accessible areas. Field observations were consistent with the findings of WestLand's historical review of the Property and vicinity.

Site reconnaissance does not provide information regarding potential sources of contamination below the ground surface. However, in cases of subsurface contamination, aboveground indicators such as obvious stress to plant life or staining are noted. All findings are based on observations, information collected, and conditions during the site visit. A change in those conditions may alter the findings and conclusions of this report.

5.2. INDICATIONS OF PAST USES OF THE PROPERTY

The Property has historically been used for homesteading and currently includes the remains of a well, a trail, a small apple orchard, and a scatter of historical artifacts. There has been no recent use of the Property by the current owner, but there is evidence of dispersed recreational activities (i.e., camping) occurring on the Property by trespassers. Overviews of the Property are shown in **Appendix A, Photos 1 and 9**. Remnants of the former homestead are shown in **Appendix A, Photos 2, 3, 5, and 8**. Photo point locations are shown in **Figure 4**.

5.3. EXTERIOR OBSERVATIONS

5.3.1. Hazardous Substances and Petroleum Product Containers in Connection with Identified Uses

No hazardous substances and petroleum product containers in connection with identified uses were observed at the Property or on land immediately adjoining the Property.

5.3.2. Hazardous Substance and Petroleum Product Containers Not in Connection with Identified Uses

No hazardous substances and petroleum product containers not in connection with identified uses were observed at the Property or on land immediately adjoining the Property.

5.3.3. Storage Tanks (Aboveground and Underground)

No indications of above- or underground storage tanks potentially used for hazardous substances or petroleum products were observed on the Property or on adjoining properties.

5.3.4. Unidentified Substance Containers

No unidentified substance containers were observed on the Property or on adjoining properties.

5.3.5. Drums

Two rusted drums were observed at the Property on top of the hand-dug well and were being informally used as trash receptacles, likely by campers (**Appendix A, Photo 3**). There was no indication that hazardous material or petroleum product had leaked from these drums.

5.3.6. Odors

No strong, pungent, or noxious odors were detected on the Property or on adjoining properties.

5.3.7. Pools of Liquid, Pits, Ponds, or Lagoons

No pools of liquid, pits, ponds, or lagoons were observed on the Property or on adjoining properties.

5.3.8. Wastewater

No features associated with wastewater storage and disposal were observed.

5.3.9. Septic Systems

There is no indication that septic systems are present on the Property.

5.3.10. Wells

A dry-laid masonry well on the former homestead location was observed. The well appears to have been almost completely filled in with sediment or possibly trash with two rusted drums placed on it (**Appendix A, Photo 5**).

5.3.11. Stained Soil or Pavement

No stained soil or pavement was noted.

5.3.12. Stressed Vegetation

Vegetation across the Property appeared to be in good health. There was no indication of stressed vegetation on the Property or adjoining properties likely attributed to hazardous substances, or petroleum products.

5.3.13. Solid Waste Disposal

The Resource Conservation Recovery Act (RCRA) was enacted by Congress in 1976 and amended in 1984. RCRA's primary goal is to protect human health and the environment from the potential hazards of waste disposal. Unauthorized solid waste disposal provides the potential for hazardous and regulated substances to impact a property in the absence of waste-generating activities.

While minor amounts of scattered trash were observed on the Property, the Property appears to be generally clean of solid waste (**Appendix A, Photo 6**).

5.3.14. PCB Equipment

Concern over the toxicity and persistence in the environment of polychlorinated biphenyls (PCBs) led Congress in 1976 to enact §6(e) of the Toxic Substances Control Act (TSCA), which included prohibitions on the manufacture, processing, and distribution in commerce of PCBs. Historically, electrical transformers contained a cooling liquid that had PCBs. If present, electrical transformers or hydraulic equipment could provide the potential for release of PCBs onto the Property. In 1984, manufacturers began producing non-PCB transformers that contain less than 50 parts per million of PCBs.

No PCB equipment was observed at the Property.

5.4. INTERIOR OBSERVATIONS

Not applicable.

6. INTERVIEWS

6.1. INTERVIEWS WITH OWNER

On August 6, 2020, Sterling Hundley of Resolution completed the User Questionnaire and a project-specific Owner Questionnaire generated by WestLand (**Appendix B**). To his knowledge, the Property has been vacant in recent years and used for unauthorized recreational use. He states that 95 percent of the land at the Property is undeveloped, but the site was used in the past as a residence and limited cattle grazing occurred historically. He reported that prior ownership was George Randall for 3 years and prior to that, the Ewing family owned the Property.

He is not aware of any indication of above- or underground storage tanks, PCB equipment, wastewater treatment facilities, septic systems, contaminated dirt fill, or drains. He also is not aware of any indications of a petroleum or chemical releases at the Property. He is not aware of any information potentially pointing to a REC for the Property.

6.2. INTERVIEWS WITH OCCUPANTS

See Interview with Owner (**Section 6.1**).

6.3. INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

WestLand attempted to interview a representative from the Payson Fire Department at (928) 474-5242 on August 20, 2020 to inquire whether or not they have responded to fuel/chemical spills or if they were aware of any chemical or petroleum product storage at the Property or vicinity. In prior interviews with the department regarding the Property, the representative at the Payson Fire Department responded that the department has no knowledge of any such spills or storage at the Property or on land in the immediate vicinity (WestLand 2004b, 2016). The representative also stated that their departments would likely not respond to the Property based on their district boundaries. At the time this report was finalized, WestLand had not received a response from the Payson Fire Department to update this inquiry.

WestLand also made an inquiry to the Tonto National Forest, Southwestern Regional Office of the USFS at (480) 610-3300 on August 20, 2020. As of the date of this report, a response from the appropriate personnel has not yet been received to conduct an interview.

6.4. INTERVIEWS WITH OTHERS

The prior Phase I ESA included interviews with past Property owners: Mr. George Randall and Ms. Linda Ewing (WestLand 2004b). At that time, Mr. Randall stated that he had purchased the Property from the Ewing family for speculation purposes and had not used the Property for any purpose.

In 2004, Ms. Ewing stated that her husband's grandfather, George Kline, was born on the Property in 1886, and the grandmother had lived on the Property for some 80 years. Her husband had used the Property for general outings, but they owned another private inholding (ZT Ranch) several miles downstream that had more significant use. Neither prior landowner reported any on-site or adjoining activity potentially resulting in environmental liability to the Property.

No other individuals were interviewed as part of this investigation.

7. FINDINGS AND OPINIONS

Based on the findings of the environmental records search, historical review, physical setting of the Property, site reconnaissance of the Property, prior reports, and interviews, WestLand provides the following findings and opinions pertaining to the Property:

- On June 18, 2020, WestLand engaged ERS, to conduct a search of available land title records for environmental liens and AULs on the Property. That search identified no records of environmental liens or AULs associated with the Property. No title records reviewed indicated a REC in connection to the Property.
- WestLand contracted with ERS to conduct an electronic search of regulatory agency databases for references to the Property and surrounding lands. The database search was conducted on June 18, 2020, from the boundaries of the Property to the minimum search distance recommended by the ASTM standard. The Property did not appear on any of the databases searched and there were not any database records within the ASTM-recommended distance of the Property boundaries. No RECs were identified in connection to known government records in the vicinity of the Property.
- Prior Phase I ESAs for the Property were conducted by WestLand in 2004 (WestLand 2004b) and 2016 (WestLand 2016). The results of both Phase I ESAs indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. No RECs were identified on the Property or on adjoining land.
- The Property was formerly homesteaded, initially associated with Elmer D. Boody, and development reportedly included a series of buildings and property improvements in the southern end of the Property, including a house, barn, kitchen, storehouse, tool house, shop, well, and cultivated area. The Boody homestead later became known as the J Slash X Ranch. The site currently includes the remains of a well, a trail, a small apple orchard, and a scatter of historical artifacts.
- On July 28, 2020, WestLand visited the site to assess existing environmental conditions for the Property. Field observations were consistent with the findings of WestLand's prior reports and historical review of and interviews about the Property and surrounding properties. Currently, the Property is not used for any focused purpose, but appears to be used for recreational hiking, camping, and off-highway vehicle use by trespassers. It is generally undisturbed land that appears to have been used in the past for historical homesteading and grazing. The Property now has natural vegetation growing in areas of previous disturbance. Developed features at the Property are limited. A dry-laid masonry well on the former homestead location was observed. The well appears to have been almost completely filled in with sediment or possibly trash and two rusted drums have been placed on it.

- The report User is also the landowner, Resolution. Sterling Hundley completed the User Questionnaire and provided responses to a separate Owner Questionnaire, as representative of Resolution. He is not aware of any information potentially pointing to a REC for the Property.
- WestLand did not observe any evidence of agricultural chemical (i.e., pesticide, herbicide, or fertilizer) storage or use on the Property, and historical records and interviews did not indicate any such specific use. Given the agricultural history of the Property into the late 20th century, it is possible that agricultural chemicals were stored or used on the Property. If past farmers applied pesticides at the Property, potential impacts could include environmentally persistent chlorinated pesticides and arsenic (used as a defoliant). However, given the remote location of the Property and evidence of limited agricultural use, this potential chemical storage or use is not likely, and if it occurred, would likely be *de minimis*, and is not considered a REC for the Property.

WestLand did not observe any septic systems or evidence of such a system on the Property. A septic system may have been located at the former homestead; however it is more likely a privy was used (WestLand 2016). There is no reason to suspect that hazardous material or petroleum products would have been disposed of through a septic system at the ranch; therefore, the presence of a septic system on adjoining land (if present) would not indicate a REC for the Property.

- The prior Phase I ESA included interviews with past Property owners: George Randall and Linda Ewing (WestLand 2004b). Neither prior landowner reported any on-site or adjoining activity potentially resulting in environmental liability to the Property.

8. CONCLUSION

WestLand has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 2247-16 for the Property (**Figure 1**). Any exceptions to, or deletions from, this practice are described in **Section 9** of this report.

WestLand's assessment has revealed no evidence of a potential REC in connection with the Property. WestLand also did not identify any historical recognized environmental conditions or controlled recognized environmental conditions for the Property.

9. DEVIATIONS

The purpose of reviewing historical sources is to develop a history of the previous uses of a property and surrounding area in order to help identify past uses that may have led to RECs in connection with the Property. According to the ASTM standard, obvious uses of a property shall be identified from the present back to the property's first developed use, or back to 1940, whichever is earlier. This requires reviewing only as many standard historical sources as are reasonably ascertainable and likely to be useful.

Considering that use of the Property is limited, it is located in a relatively remote area, and there is no documented or suspected use of the Property indicating a REC, WestLand did not conduct a city directory search, Sanborn fire insurance map search, building department record search or other similar historical record searches likely to provide relevant information in an urban setting. WestLand did review cultural resources data available for the Property.

On August 6, 2020, WestLand contacted representatives for the USFS and requested that the User Questionnaire be completed for the Property in support of the Southeastern Land Exchange and Conservation Act of 2013. As of the date of this report, a returned questionnaire has not yet been received. If the User Questionnaire is received after this report is finalized, it may be incorporated into the Phase I ESA report as an addendum to assist the USFS in qualifying for landowner liability protections. WestLand was also not able to interview the fire department or other local government official.

No other site access limitations, physical obstructions to observations, outstanding information requests, or historical data failure, etc. would potentially affect the conclusions regarding the identification of RECs for the Property. Considering the known history of the Property and results of our site reconnaissance, coupled with the prior Phase I ESA, and other completed research, this assessment is considered complete.

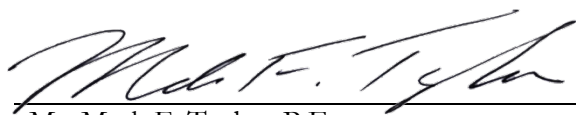

10. ADDITIONAL SERVICES

No additional services beyond the standard ASTM scope were considered as part of this assessment.

II. QUALIFICATIONS AND SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

Mark F. Taylor, P.E. believes that, to the best of his professional knowledge, he meets the definition of “environmental professional” as defined in §312.10 of 40 CFR 312. Mark Taylor possesses the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Property. He has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mark Taylor is the leading environmental professional assigned to perform project oversight for this Phase I ESA. Patrick Mette and Samantha Blonder conducted the site reconnaissance under the direction of Mark Taylor. Diana Sandoval conducted the interviews, regulatory inquiries, and historical research. Christopher Rife reviewed the findings in this report. Their work was conducted under the supervision of the above-named environmental professional. Mark Taylor reviewed, interpreted, and declared the information included in this report as complete. Resumes for the key individuals participating in the preparation of this report are provided in **Appendix I**.

Mr. Mark F. Taylor, P.E.

APPENDIX B

User and Owner Questionnaires

PHASE I ENVIRONMENTAL SITE ASSESSMENT (ASTM E 1527-13 & 2247-08)

USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

(1). Environmental cleanup liens that are filed or recorded against the *property* (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

No

(2). Activity and land use limitations that are in place on the *Property* or that have been filed or recorded against the *property* (40 CFR 312.26). Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No

(3). Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes; see additional information on #5 below

(4). Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price/lease being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

No information indicating that the value of the property had been reduced as a result of environmental issues.

(5). Commonly known or reasonably ascertainable information about the *property* (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:

(a.) Do you know the past uses of the *property*?

Used as residence and limited cattle grazing, with regular use into latter half of the 20th century. Currently vacant and used for unauthorized dispersed recreational activities by persons accessing the site from adjacent public lands. 95% of land is undeveloped.

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

No

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

No

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

No

(6). The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this *ESA*, based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

No

In addition, certain information should be collected, if available, and provided to the environmental professional selected to conduct the Phase I. This information is intended to assist the environmental professional but is not necessarily required to qualify for one of the LLPs. The information includes:

(a) The reason why the Phase I is required

Support of the land exchange between the US and Resolution Copper Mining

(b) The type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.

Exchange

(c) The complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful).

Not required. See map below

(d) The scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527/2247 are to be considered).

Standard

(e) Identification of all parties who will rely on the Phase I report.

Resolution Copper Mining LLC and Bureau of Land Management

(f) Identification of the site contact and how the contact can be reached. - Are there previous site contacts that should be interviewed?

Sterling Hundley - see below

(g) Any special terms and conditions which must be agreed upon by the environmental professional.

No

(h) Any other knowledge or experience with the *property* that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the *property* and its environmental condition).

No

LAWYERS TITLE INSURANCE CORPORATION

Commitment For
Title Insurance

LAWYERS TITLE INSURANCE CORPORATION, a Virginia corporation, herein called the Company, for valuable consideration, hereby commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the proposed Insured named in Schedule A, as owner or mortgagee of the estate or interest covered hereby in the land described or referred to in Schedule A, upon payment of the premiums and charges therefor; all subject to the provisions of Schedules A and B and to the Conditions and Stipulations hereof.

This Commitment shall be effective only when the identity of the proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A hereof by the Company, either at the time of the issuance of this Commitment or by subsequent endorsement.

This Commitment is preliminary to the issuance of such policy or policies of title insurance and all liability and obligations hereunder shall cease and terminate six (6) months after the effective date hereof or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue such policy or policies is not the fault of the Company.

IN WITNESS WHEREOF, **LAWYERS TITLE INSURANCE CORPORATION** has caused its corporate name and seal to be hereunto affixed by its duly authorized officers, the Commitment to become valid when countersigned by an authorized officer or agent of the Company.

DISCLOSURE NOTICES

GOOD FUNDS LAW

Effective August 22, 2002, Arizona Revised Statutes Section 6-843 regulates the disbursement of escrow funds by an escrow agent. The law requires that funds be deposited in the escrow agent's escrow account and available for withdrawal prior to disbursement. Funds deposited with the Company by wire transfer may be disbursed upon receipt. Funds deposited with the Company in the form of cashier's checks, certified checks or teller's checks may be disbursed the next business day after the day of deposit. If funds are deposited with the Company by other methods, recording and/or disbursement may be delayed.

Privacy Notice (15 U.S.C. 6801 and 16 CFR Part 313):

We collect nonpublic personal information about you from information you provide on forms and documents and from other people such as your lender, real estate agent, attorney, escrow, etc. We do not disclose any nonpublic personal information about our customers or former customers to anyone, except as permitted by law. We restrict access to nonpublic personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

PURCHASER DWELLING ACTIONS NOTICE

Pursuant to Arizona Revised Statutes Section 12-1363.N, notice is hereby provided to the purchaser of a dwelling of the provisions of Arizona Revised Statutes Sections 12-1361, 1362 and 1363. These statutory sections set forth the requirements to be met by a purchaser prior to bringing an action against the seller of a dwelling arising out of or related to the design, construction, condition or sale of the dwelling. "Dwelling" means a single or multifamily unit designed for residential use and common areas and improvements owned or maintained by an association or its members. "Seller" means any person, firm, partnership, corporation, association or other organization engaged in the business of designing, constructing or selling dwellings. The complete statutory sections can be viewed on the Arizona State Legislature's web site: www.azleg.state.az.us/ars/ars.htm.

NOTICE:

Pursuant to Arizona Revised Statutes 11-480, effective January 1, 1991, the County Recorder may not accept documents for recording that do not comply with the following:

- a Print must be ten-point type (pica) or larger.
- b Margins of at least one-half inch along the left and right sides one-half inch across the bottom and at least two inches on top for recording and return address information.
- c Each instrument shall be no larger than 8 ½ inches in width and 14 inches in length.

COMMITMENT FOR TITLE INSURANCE

First Half	: \$ 12.12 Paid
Second Half	: \$ 12.12 Paid

Privacy Notice (15 U.S.C. 6801 and 16 CFR Part 313): We collect nonpublic personal information about you from information you provide on forms and documents and from other people such as your lender, real estate agent, attorney, escrow, etc. We do not disclose any nonpublic personal information about our customers or former customers to anyone, except as permitted by law. We restrict access to nonpublic personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

END OF SCHEDULE B – SECTION I

SCHEDULE B – SECTION II EXCEPTIONS

Schedule B of policy or policies to be issued will contain exceptions to the following matters unless the same are disposed of to the satisfaction of the Company:

- A. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the proposed Insured acquires for value of record the estate or interest or mortgage thereon covered by this commitment.
1. Taxes and assessments collectible by the County Treasurer not yet due and payable for the following year:

Year : 2004
2. The lack of a legal right of access recorded in insurable form to and from said land to a public street.

Notwithstanding the affirmative assurance of paragraph 4, the Company is unwilling to insure access.

END OF SCHEDULE B – SECTION II

SOS

COMMITMENT CONDITIONS AND STIPULATIONS

1. The term mortgage, when used herein, shall include deed of trust, trust deed, or other security instrument.
2. If the proposed insured has or acquires actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act or reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed insured shall disclose such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions and Stipulations.
3. Liability of the Company under this Commitment shall be only to the named proposed insured and such parties included under the definition of insured in the form of policy or policies committed for and only for actual loss incurred in reliance hereon in undertaking in good faith, (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions, the Conditions and Stipulations, and the Exclusions from Coverage of the form of policy or policies committed for in favor of the proposed insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.
4. Any action or actions or rights of action that the proposed insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage thereon covered by this Commitment must be based on and are subject to the provisions of this Commitment.

AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (10-17-92) WITH ALTA ENDORSEMENT-FORM 1 COVERAGE

and

AMERICAN LAND TITLE ASSOCIATION LEASEHOLD LOAN POLICY (10-17-92) WITH ALTA ENDORSEMENT-FORM 1 COVERAGE EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material) or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim which arises out of the transaction creating the interest of the mortgagee insured by this Policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
 - (a) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer, or
 - (b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
 - (c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
 - (i) to timely record the instrument of transfer; or
 - (ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

The above policy forms may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following General Exceptions:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
- Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claim which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (10-17-92)

And

AMERICAN LAND TITLE ASSOCIATION LEASEHOLD OWNER'S POLICY (10-17-92) EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material) or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by the policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
 - (a) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
 - (b) the transaction creating the estate or interest insured by the policy being deemed a preferential transfer except where the preferential transfer results from the failure:
 - (i) to timely record the instrument of transfer; or
 - (ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

The above policy forms may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage Policy will also include the following General Exceptions:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
- Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claim which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

**AMERICAN LAND TITLE ASSOCIATION
HOMEOWNER'S POLICY OF TITLE INSURANCE (10/17/98)
EXCLUSIONS**

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
 - a. building
 - b. zoning
 - c. land use
 - d. improvements on the Land
 - e. land division
 - f. environmental protection

This Exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.

This Exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.

3. The right to take the Land by condemning it, unless:

- a. a notice of exercising the right appears in the Public Records at the Policy Date; or
- b. the taking happened before the Policy date and is binding on You if You bought the Land without knowing of the taking.

4. Risks:

- a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
- b. that are known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
- c. that result in no loss to You; or
- d. that first occur after the Policy Date – this does not limit the coverage described in Covered Risk 7, 8d, 22, 23, 24 or 25.

5. Failure to pay value for Your Title.

5. Lack of a right:

- a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
- b. in streets, alleys, or waterways that touch the land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 18.

**AMERICAN LAND TITLE ASSOCIATION
RESIDENTIAL TITLE INSURANCE POLICY (6-2-87)
EXCLUSIONS**

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
 - Land use
 - Improvements on the land
 - Land division
 - Environmental protection

This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.

This exclusion does not limit the zoning coverage described in items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless;

- A notice of exercising the right appears in the public records on the Policy Date
- The taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking

3. Title Risks:

- That are created, allowed, or agreed to by you
- That are known to you, but not to us, on the Policy Date – unless they appeared in the Public Records
- That result in no loss to you
- That first affect your title after the Policy Date – this does not limit the labor and material lien coverage in Item B of Covered Title Risks

4. Failure to pay value for your title.

5. Lack of a right:

- To any land outside the area specifically described and referred to in Item 3 of Schedule A
- OR
- In streets, alleys, or waterways that touch your land

This exclusion does not limit the access coverage in Item 5 of Covered Title Risks

SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees, or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, and agreements, covenants, conditions or rights incident thereto, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Lack of a legal right of access in insurable form to and from said land to a public street.

Issued by **Lawyers Title Insurance Corporation**

Lawyers Title Insurance Corporation is a member of the LandAmerica family of title insurance underwriters.

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE EXCEPTIONS FROM COVERAGE CONTAINED IN SCHEDULE B AND THE CONDITIONS AND STIPULATIONS, LAWYERS TITLE INSURANCE CORPORATION, a Virginia corporation, herein called the Company, insures, as of Date of Policy shown in Schedule A, against loss or damage, not exceeding the Amount of Insurance stated in Schedule A, sustained or incurred by the insured by reason of:

1. Title to the estate or interest described in Schedule A being vested other than as stated therein;
2. Any defect in or lien or encumbrance on the title;
3. Unmarketability of the title;
4. Lack of a right of access to and from the land.

The Company will also pay the costs, attorneys' fees and expenses incurred in defense of the title, as insured, but only to the extent provided in the Conditions and Stipulations.

IN WITNESS WHEREOF, LAWYERS TITLE INSURANCE CORPORATION has caused its corporate name and seal to be hereunto affixed by its duly authorized officers, the Policy to become valid when countersigned by an authorized officer or agent of the Company.

LAWYERS TITLE INSURANCE CORPORATION

Attest:

Secretary

By:

President

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the Insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(a) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
(b) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
(i) to timely record the instrument of transfer; or
(ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

CONDITIONS AND STIPULATIONS

1. DEFINITION OF TERMS.

The following terms when used in this policy mean:

(a) "insured": the insured named in Schedule A, and, subject to any rights or defenses the Company would have had against the named insured, those who succeed to the interest of the named insured by operation of law as distinguished from purchase including, but not limited to, heirs, distributees, devisees, survivors, personal representatives, next of kin, or corporate or fiduciary successors.

(b) "insured claimant": an insured claiming loss or damage.

(c) "knowledge" or "known": actual knowledge, not constructive knowledge or notice which may be imputed to an insured by reason of the public records as defined in this policy or any other records which impart constructive notice of matters affecting the land.

(d) "land": the land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways, but nothing herein shall modify or limit the extent to which a right of access to and from the land is insured by this policy.

(e) "mortgage": mortgage, deed of trust, trust deed, or other security instrument.

(f) "public records": records established under state statutes at Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge. With respect to Section 1(a)(iv) of the Exclusions From Coverage, "public records" shall also include environmental protection liens filed in the records of the clerk of the United States district court for the district in which the land is located.

(g) "unmarketability of the title": an alleged or apparent matter affecting the title to the land, not excluded or excepted from coverage, which would entitle a purchaser of the estate or interest described in Schedule A to be released from the obligation to purchase by virtue of a contractual condition requiring the delivery of marketable title.

2. CONTINUATION OF INSURANCE AFTER CONVEYANCE OF TITLE.

The coverage of this policy shall continue in force as of Date of Policy in favor of an insured only so long as the insured retains an estate or interest in the land, or holds an indebtedness secured by a purchase money mortgage given by a purchaser from the insured, or only so long as the insured shall have liability by reason of covenants of warranty made by the insured in any transfer or conveyance of the estate or interest. This policy shall not continue in force in favor of any purchaser from the insured of either (i) an estate or interest in the land, or (ii) an indebtedness secured by a purchase money mortgage given to the insured.

3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT.

The insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in Section 4(a) below, (ii) in case knowledge shall come to an insured hereunder of any claim of title or interest which is adverse to the title to the estate or interest, as insured, and which might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if title to the estate or interest, as insured, is rejected as unmarketable. If prompt notice shall not be given to the Company, then as to the insured all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of any insured under this policy unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

4. DEFENSE AND PROSECUTION OF ACTIONS; DUTY OF INSURED CLAIMANT TO COOPERATE.

(a) Upon written request by the insured and subject to the options contained in Section 6 of these Conditions and Stipulations, the Company, at its own cost and without unreasonable delay, shall provide for the defense of an insured in litigation in which any third party asserts a claim adverse to the title or interest as insured, but only as to those stated causes of action alleging a defect, lien or encumbrance or other matter insured against by this policy. The Company shall have the right to select counsel of its choice (subject to the right of the insured to object for reasonable cause) to represent the insured as to those stated causes of action and shall not be liable for and will not pay the fees of any other counsel. The Company will not pay any fees, costs or expenses incurred by the insured in the defense of those causes of action which allege matters not insured by this policy.

(b) The Company shall have the right, at its own cost, to institute and prosecute any action or proceeding or to do any other act which in its opinion may be necessary or desirable to establish the title to the estate or interest, as insured, or to prevent or reduce loss or damage to the insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this policy. If the Company shall exercise its rights under this paragraph, it shall do so diligently.

(c) Whenever the Company shall have brought an action or interposed a defense as required or permitted by the provisions of this policy, the Company may pursue any litigation to final determination by a court of competent jurisdiction

and expressly reserves the right, in its sole discretion, to appeal from any adverse judgment or order.

(d) In all cases where this policy permits or requires the Company to prosecute or provide for the defense of any action or proceeding, the insured shall secure to the Company the right to so prosecute or provide defense in the action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of the insured for this purpose. Whenever requested by the Company, the insured, at the Company's expense, shall give the Company all reasonable aid (i) in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or proceeding, or effecting settlement, and (ii) in any other lawful act which in the opinion of the Company may be necessary or desirable to establish the title to the estate or interest as insured. If the Company is prejudiced by the failure of the insured to furnish the required cooperation, the Company's obligations to the insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such cooperation.

5. PROOF OF LOSS OR DAMAGE.

In addition to and after the notices required under Section 3 of these Conditions and Stipulations have been provided the Company, a proof of loss or damage signed and sworn to by the insured claimant shall be furnished to the Company within 90 days after the insured claimant shall ascertain the facts giving rise to the loss or damage. The proof of loss or damage shall describe the defect in, or lien or encumbrance on the title, or other matter insured against by this policy which constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage. If the Company is prejudiced by the failure of the insured claimant to provide the required proof of loss or damage, the Company's obligations to the insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such proof of loss or damage.

In addition, the insured claimant may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Policy, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the insured claimant shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the insured claimant provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the insured claimant to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in this paragraph shall terminate any liability of the Company under this policy as to that claim.

6. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS; TERMINATION OF LIABILITY.

In case of a claim under this policy, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Insurance.

To pay or tender payment of the amount of insurance under this policy together with any costs, attorneys' fees and expenses incurred by the insured claimant, which were authorized by the Company, up to the time of payment or tender of payment and which the Company is obligated to pay.

Upon the exercise by the Company of this option, all liability and obligations to the insured under this policy, other than to make the payment required, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, and the policy shall be surrendered to the Company for cancellation.

(b) To Pay or Otherwise Settle With Parties Other than the Insured or With the Insured Claimant.

(i) to pay or otherwise settle with other parties for or in the name of an insured claimant any claim insured against under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay; or

(ii) to pay or otherwise settle with the insured claimant the loss or damage provided for under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in paragraphs (b)(i) or (ii), the Company's obligations to the insured under this policy for the claimed loss or damage, other than the payments required to be made, shall terminate, including any liability or obligation to defend, prosecute or continue any litigation.

CONTROL NUMBER 827-0151012

CONDITIONS AND STIPULATIONS

(Continued)

7. DETERMINATION, EXTENT OF LIABILITY AND COINSURANCE.

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the insured claimant who has suffered loss or damage by reason of matters insured against by this policy and only to the extent herein described.

(a) The liability of the Company under this policy shall not exceed the least of:

- (i) the Amount of Insurance stated in Schedule A; or,
- (ii) the difference between the value of the insured estate or interest as insured and the value of the insured estate or interest subject to the defect, lien or encumbrance insured against by this policy.

(b) In the event the Amount of Insurance stated in Schedule A at the Date of Policy is less than 80 percent of the value of the insured estate or interest or the full consideration paid for the land, whichever is less, or if subsequent to the Date of Policy an improvement is erected on the land which increases the value of the insured estate or interest by at least 20 percent over the Amount of Insurance stated in Schedule A, then this Policy is subject to the following:

- (i) where no subsequent improvement has been made, as to any partial loss, the Company shall only pay the loss pro rata in the proportion that the amount of insurance at Date of Policy bears to the total value of the insured estate or interest at Date of Policy; or
- (ii) where a subsequent improvement has been made, as to any partial loss, the Company shall only pay the loss pro rata in the proportion that 120 percent of the Amount of Insurance stated in Schedule A bears to the sum of the Amount of Insurance stated in Schedule A and the amount expended for the improvement.

The provisions of this paragraph shall not apply to costs, attorneys' fees and expenses for which the Company is liable under this policy, and shall only apply to that portion of any loss which exceeds, in the aggregate, 10 percent of the Amount of Insurance stated in Schedule A.

(c) The Company will pay only those costs, attorneys' fees and expenses incurred in accordance with Section 4 of these Conditions and Stipulations.

8. APPORTIONMENT.

If the land described in Schedule A consists of two or more parcels which are not used as a single site, and a loss is established affecting one or more of the parcels but not all, the loss shall be computed and settled on a pro rata basis as if the amount of insurance under this policy was divided pro rata as to the value on Date of Policy of each separate parcel to the whole, exclusive of any improvements made subsequent to Date of Policy, unless a liability or value has otherwise been agreed upon as to each parcel by the Company and the insured at the time of the issuance of this policy and shown by an express statement or by an endorsement attached to this policy.

9. LIMITATION OF LIABILITY.

(a) If the Company establishes the title, or removes the alleged defect, lien or encumbrance, or cures the lack of a right of access to or from the land, or cures the claim of unmarketability of title, all as insured, in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

(b) In the event of any litigation, including litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom, adverse to the title as insured.

(c) The Company shall not be liable for loss or damage to any insured for liability voluntarily assumed by the insured in settling any claim or suit without the prior written consent of the Company.

10. REDUCTION OF INSURANCE; REDUCTION OR TERMINATION OF LIABILITY.

All payments under this policy, except payments made for costs, attorneys' fees and expenses, shall reduce the amount of the insurance pro tanto.

11. LIABILITY NONCUMULATIVE.

It is expressly understood that the amount of insurance under this policy shall be reduced by any amount the Company may pay under any policy insuring a mortgage to which exception is taken in Schedule B or to which the insured has agreed, assumed, or taken subject, or which is hereafter executed by an insured and which is a charge or lien on the estate or interest described or referred to in Schedule A, and the amount so paid shall be deemed a payment under this policy to the insured owner.

12. PAYMENT OF LOSS.

(a) No payment shall be made without producing this policy for endorsement of the payment unless the policy has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

(b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions and Stipulations, the loss or damage shall be payable within 30 days thereafter.

13. SUBROGATION UPON PAYMENT OR SETTLEMENT.

(a) The Company's Right of Subrogation.

Whenever the Company shall have settled and paid a claim under this policy, all right of subrogation shall vest in the Company unaffected by any act of the insured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the insured claimant would have had against any person or property in respect to the claim had this policy not been issued. If requested by the Company, the insured claimant shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The insured claimant shall permit the Company to sue, compromise or settle in the name of the insured claimant and to use the name of the insured claimant in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the insured claimant, the Company shall be subrogated to these rights and remedies in the proportion which the Company's payment bears to the whole amount of the loss.

If loss should result from any act of the insured claimant, as stated above, that act shall not void this policy, but the Company, in that event, shall be required to pay only that part of any losses insured against by this policy which shall exceed the amount, if any, lost to the Company by reason of the impairment by the insured claimant of the Company's right of subrogation.

(b) The Company's Rights Against Non-Insured Obligors.

The Company's right of subrogation against non-insured obligors shall exist and shall include, without limitation, the rights of the insured to indemnities, guaranties, other policies of insurance or bonds, notwithstanding any terms or conditions contained in those instruments which provide for subrogation rights by reason of this policy.

14. ARBITRATION.

Unless prohibited by applicable law, either the Company or the insured may demand arbitration pursuant to the Title Insurance Arbitration Rules of the American Arbitration Association. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. All arbitrable matters when the Amount of insurance is \$1,000,000 or less shall be arbitrated at the option of either the Company or the insured. All arbitrable matters when the Amount of Insurance is in excess of \$1,000,000 shall be arbitrated only when agreed to by both the Company and the insured. Arbitration pursuant to this policy and under the Rules in effect on the date the demand for arbitration is made or, at the option of the insured, the Rules in effect at Date of Policy shall be binding upon the parties. The award may include attorneys' fees only if the laws of the state in which the land is located permit a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.

A copy of the Rules may be obtained from the Company upon request.

15. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT.

(a) This policy together with all endorsements, if any, attached hereto by the Company is the entire policy and contract between the insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.

(b) Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the title to the estate or interest covered hereby or by any action asserting such claim, shall be restricted to this policy.

(c) No amendment of or endorsement to this policy can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

16. SEVERABILITY.

In the event any provision of the policy is held invalid or unenforceable under applicable law, the policy shall be deemed not to include that provision and all other provisions shall remain in full force and effect.

17. NOTICES, WHERE SENT.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this policy and shall be addressed to: Consumer Affairs Department, P.O. Box 27567, Richmond, Virginia 23261-7567.

The Environmental Lien Search Report Update provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' office, registries of deed, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

EXECUTIVE SUMMARY

INFORMATION ON THE REQUESTED LOCATION

Site Address:	Fr 416 And Fr 2768 Turkey Creek, AZ 85553
Client Project Name/Number:	Turkey Creek 807.211
Coordinates:	N 33-58-41, W 111-6-56 (NAD 83) 33.9781607325261, -111.115535313982
Date of Report	June 18, 2020
ERS Project Number:	2104724023
Subject Site Listed on the following lists:	Not Listed
Subject Site Listed as Map ID#:	N/A
USGS 7.5 Minute Quad Map:	Copper Mountain (2014-11-20)
Subject Site Located within a Potential Area of Concern:	No
Township, Section and Range:	Township: 07N Range: 12E Section: 003
Site Elevation: (feet above or below (-) mean sea level)	Approximately 5401 ft near the center of the area.
Flood Zone: (FEMA Q3 Digital Data)	Panel: 04007C0975D, Effective Date: 12/4/2007 Zone D - Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.
Fire Insurance Map Coverage:	No
Radon Information:	EPA Radon Zone: 2 (Predicted avg for county: 2 to 4 pCi/L)
Search Radius Expansion Size: (In Miles)	0
Soil Type: (USDA Soil Survey Geographic Database) (SSURGO)	SPUDROCK 40% to 65% slopes, 40% of total ROMBO 40% to 60% slopes, 30% of total ROCK OUTCROP 80% to 99% slopes, 30% of total

Zip Codes Searched for "Un-Mappable" Sites:	Not Researched
Occurrence Count:	0

1-MILE RADIUS STREET MAP W/OCCURRENCES (MAP1)

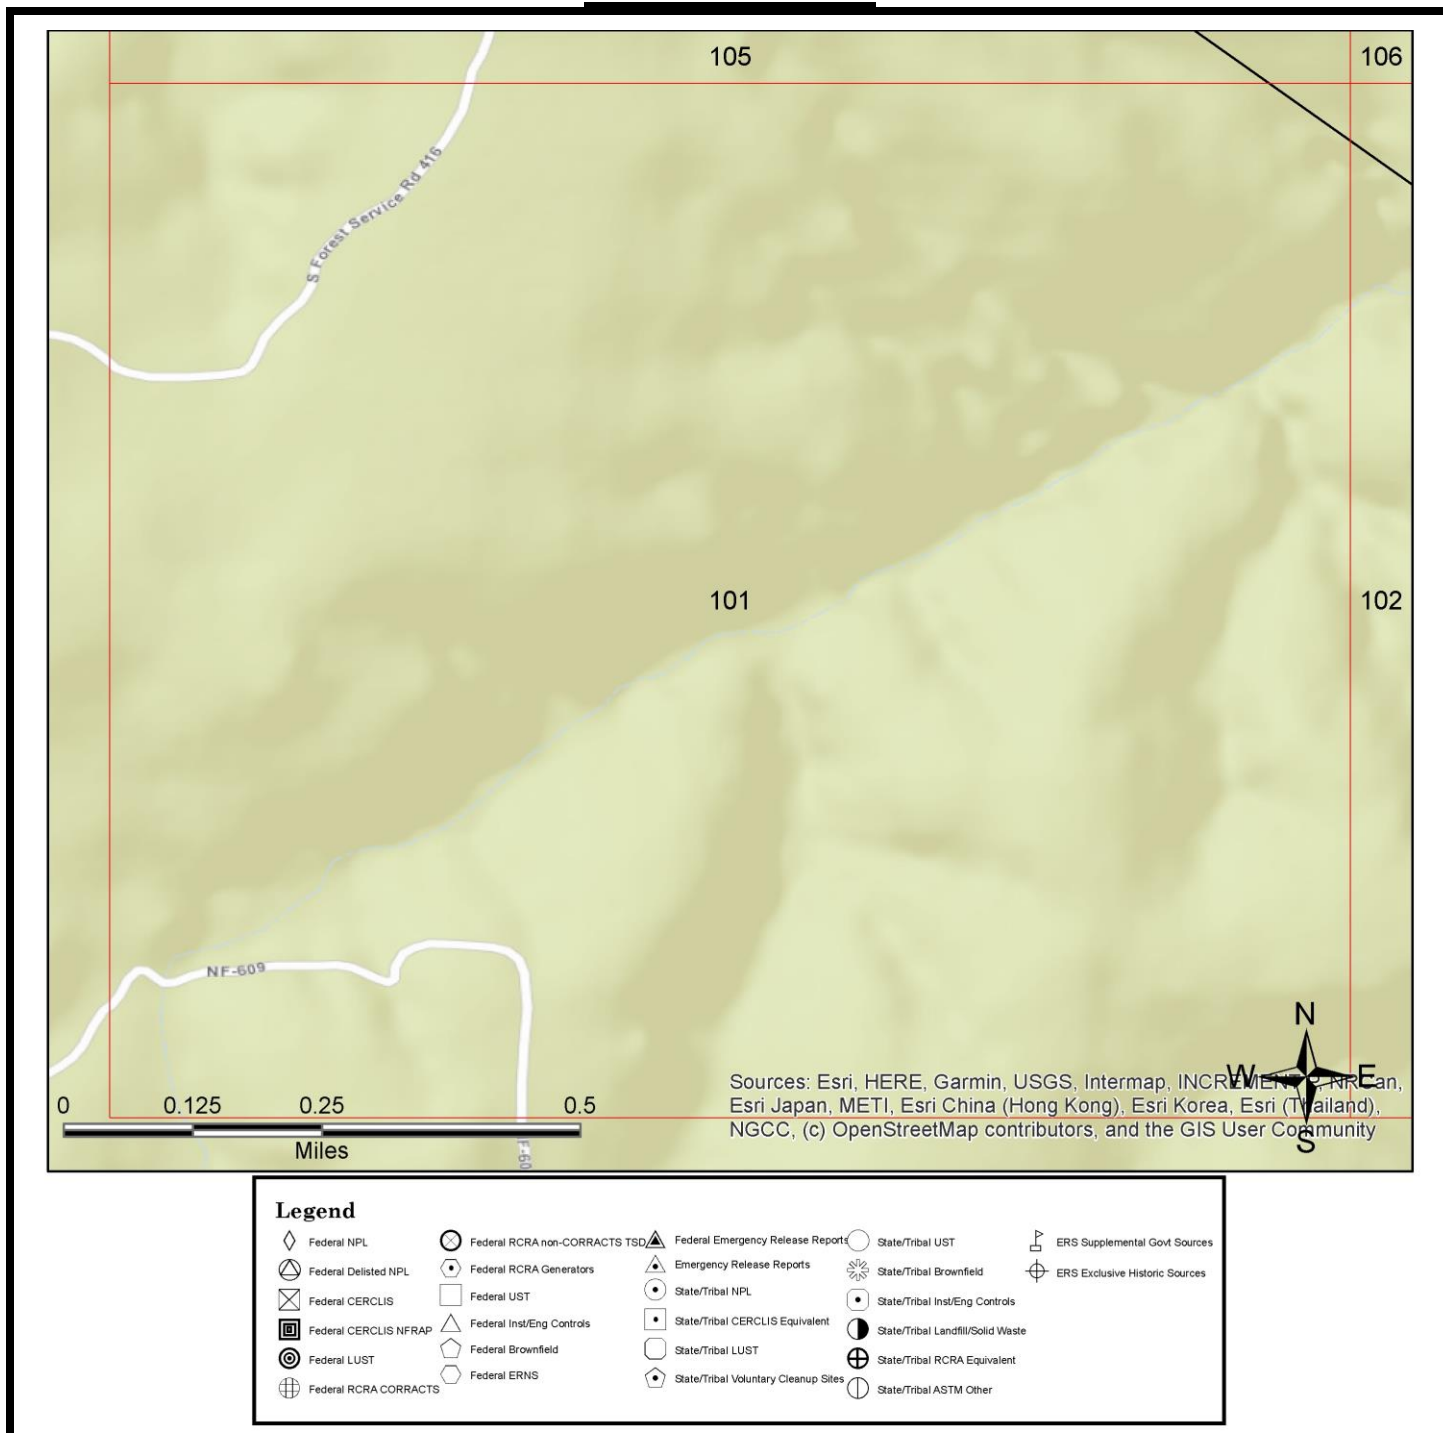

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID LAYOUT MAP KEY

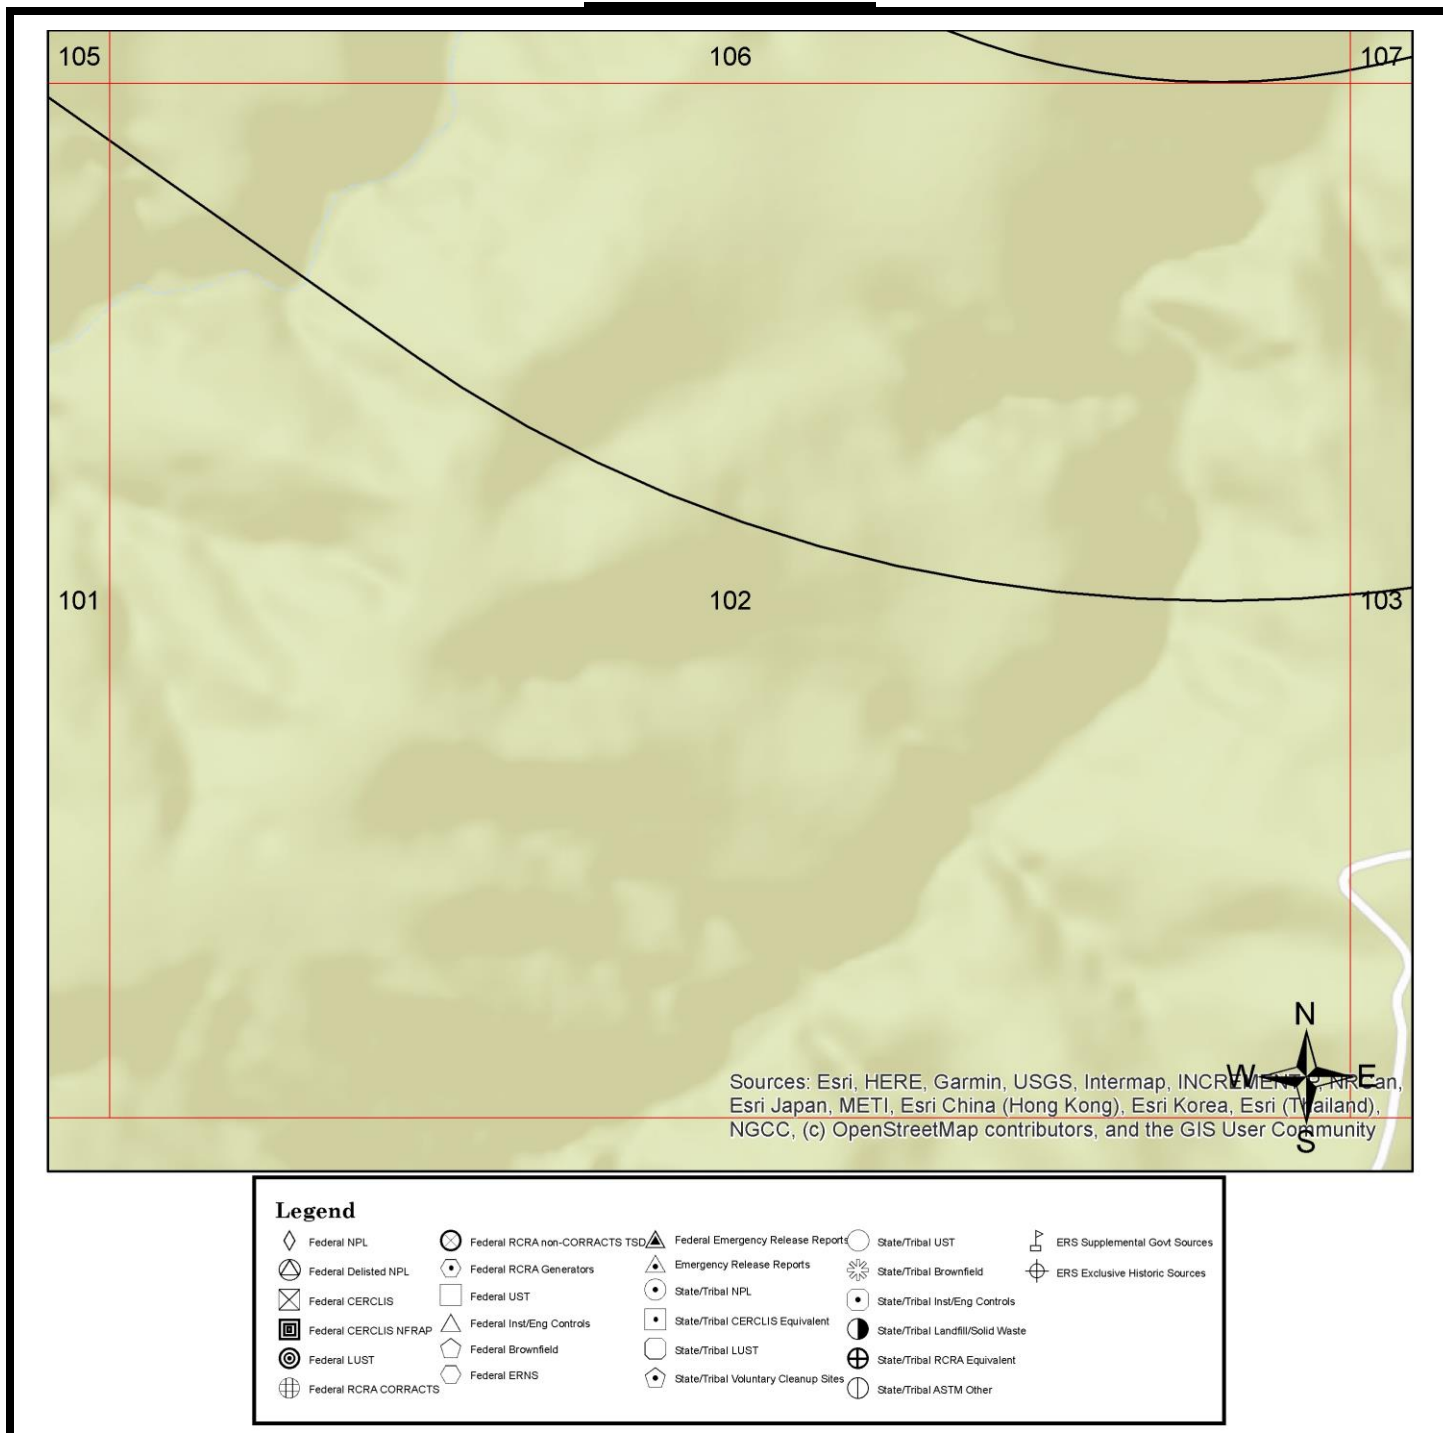

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 101

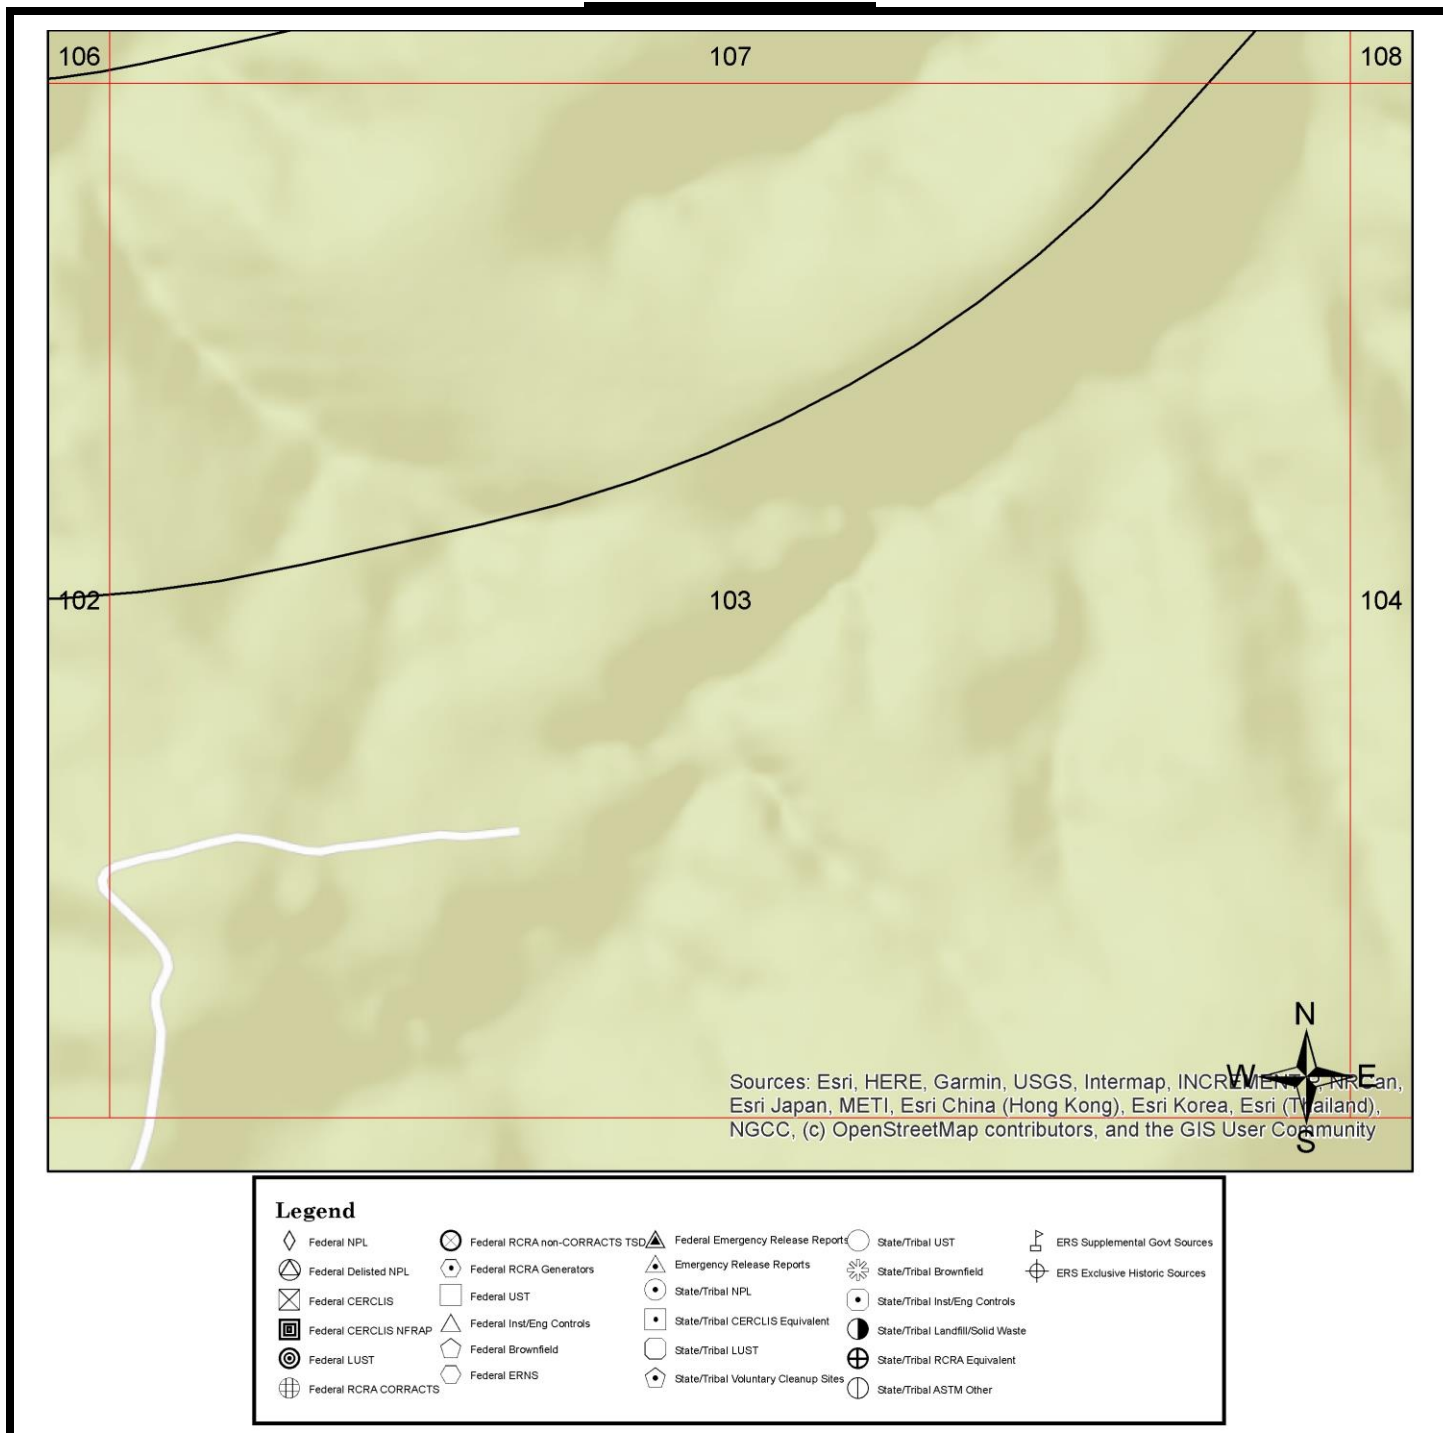

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 102

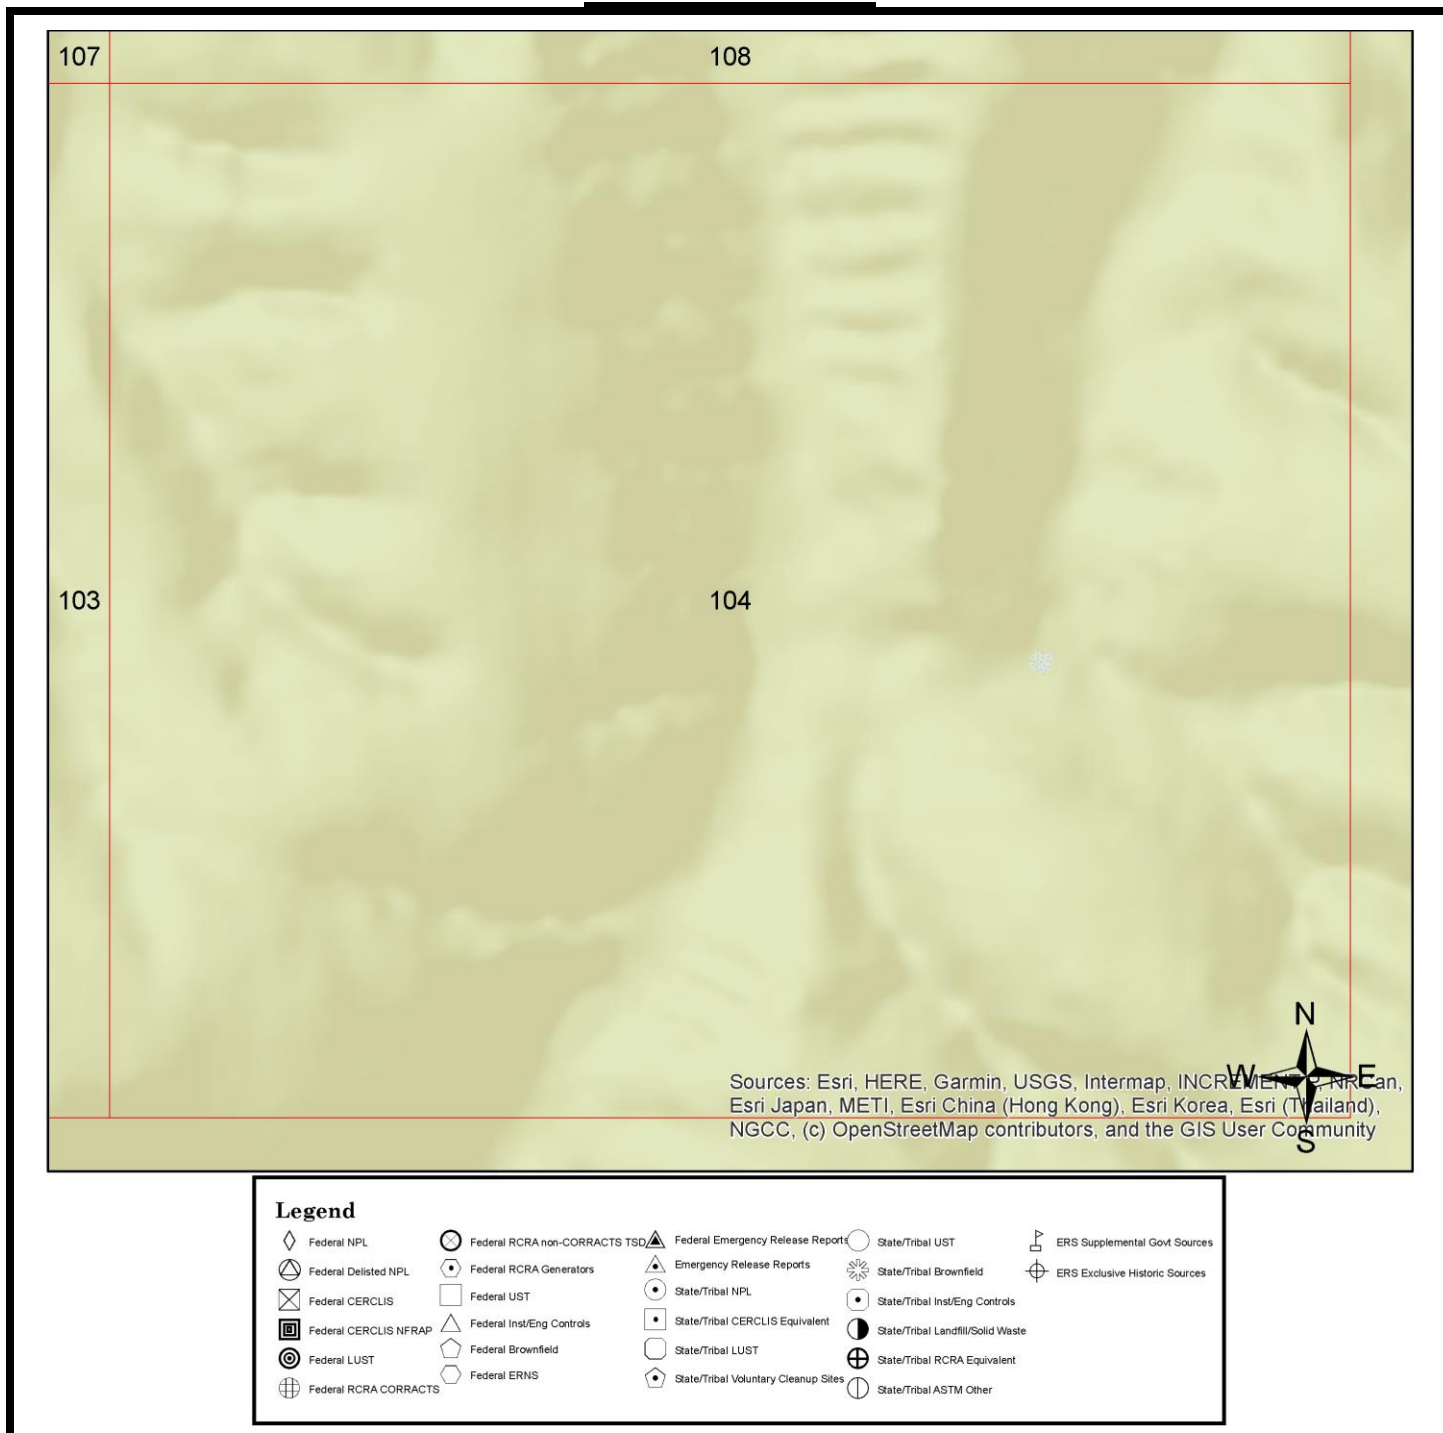

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 103

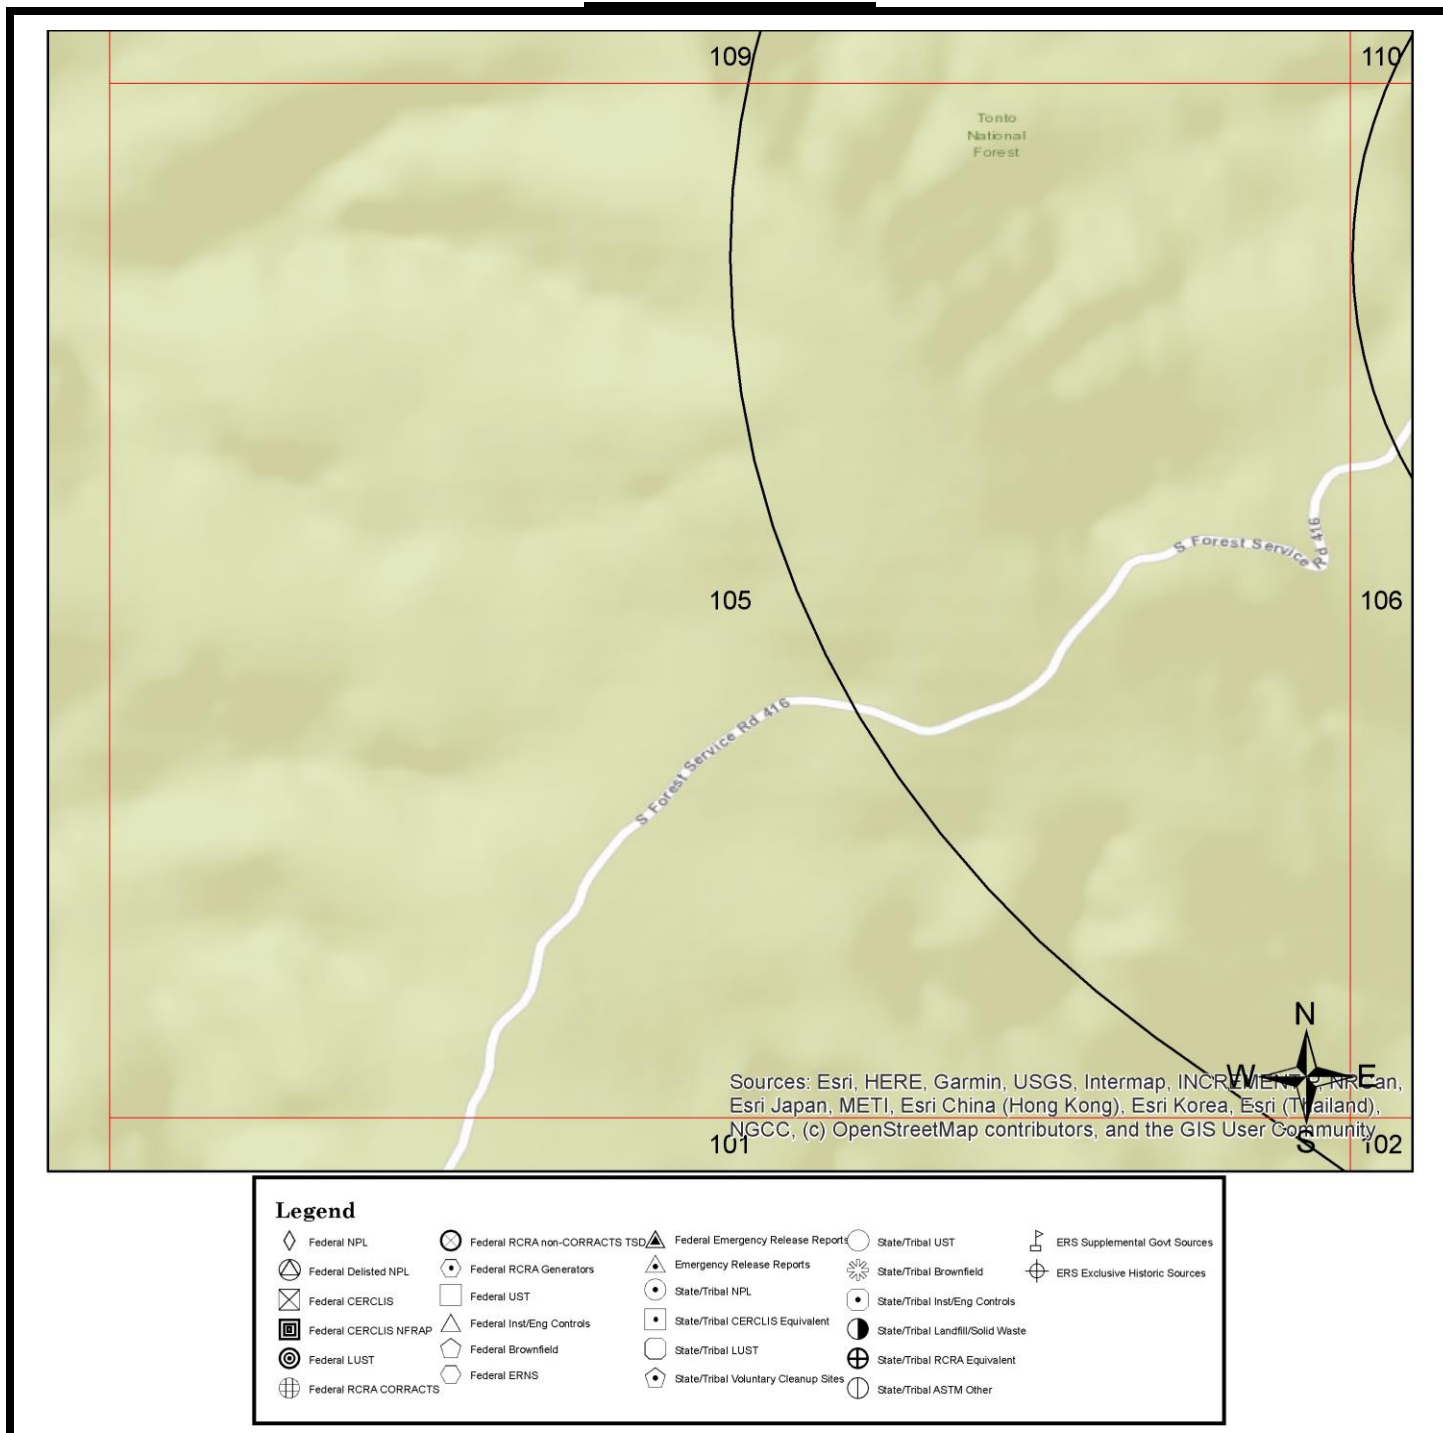

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 104

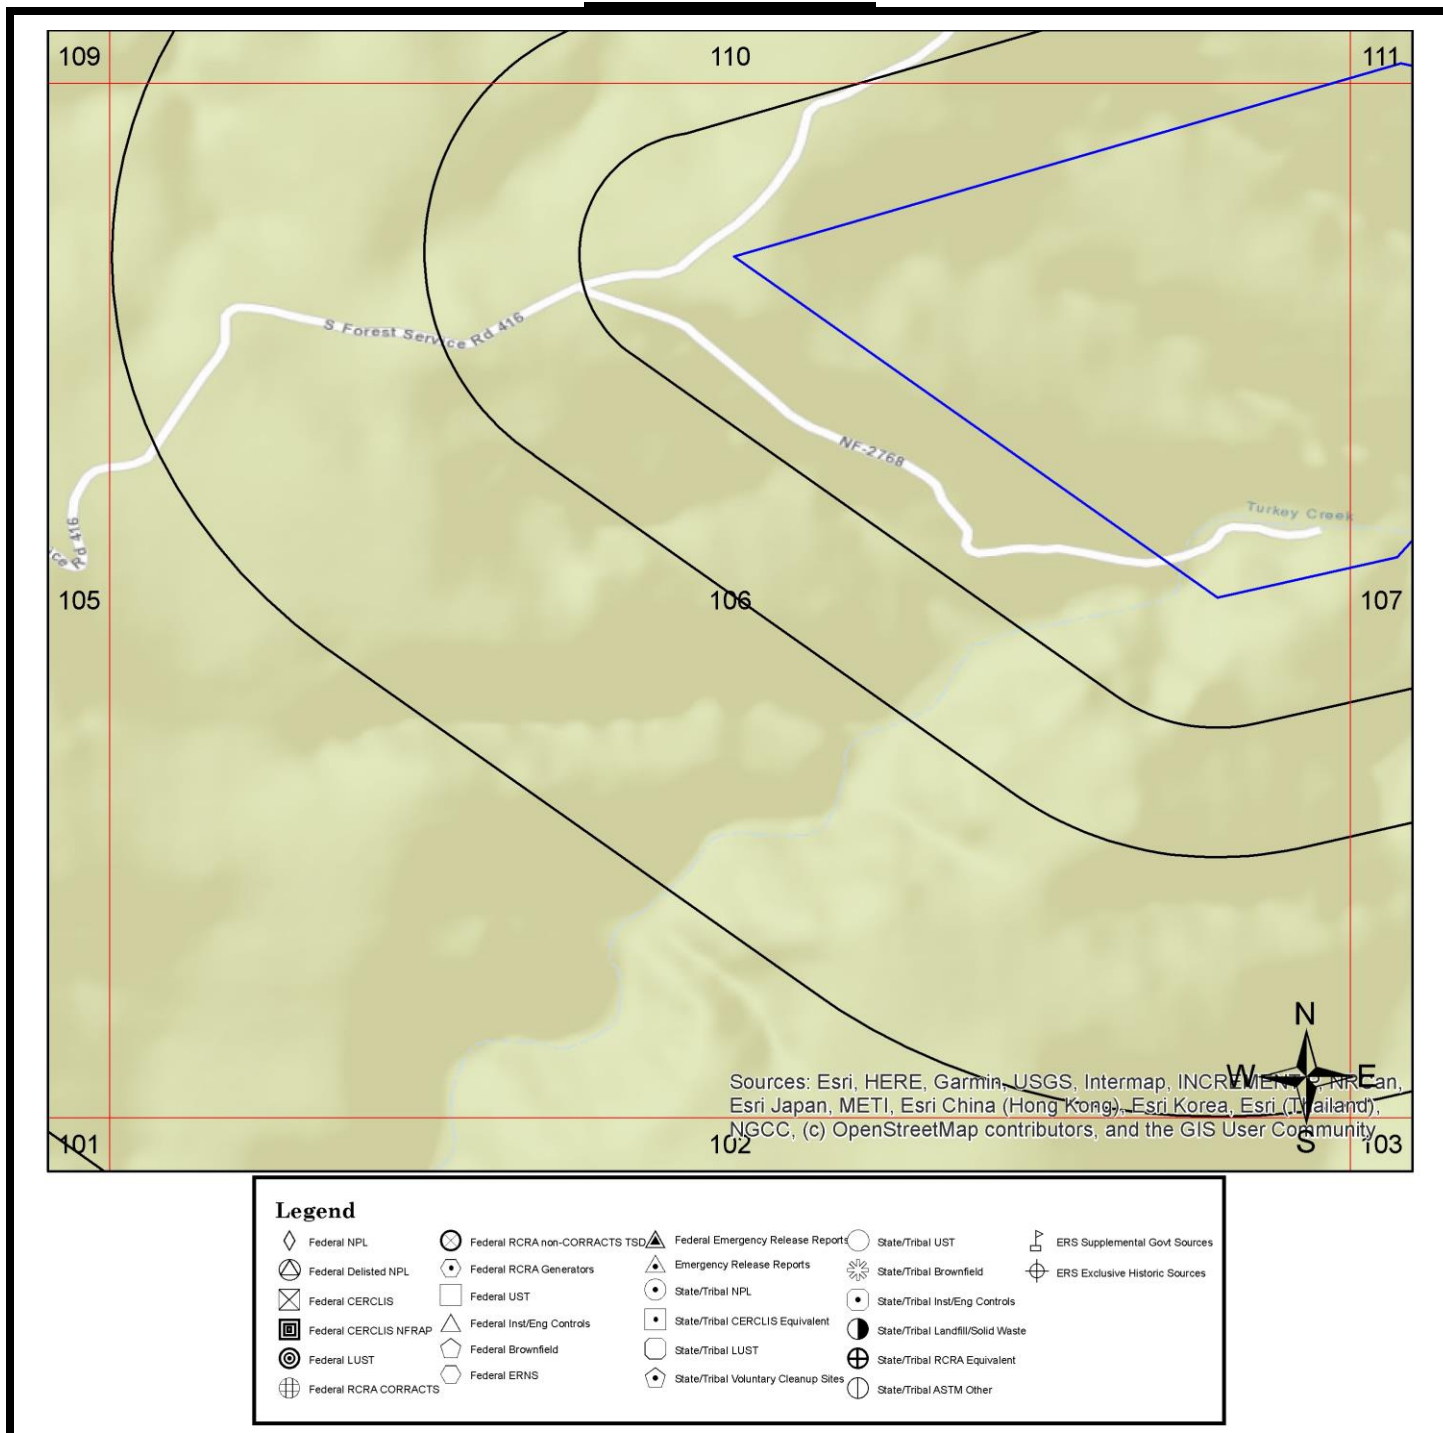

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 105

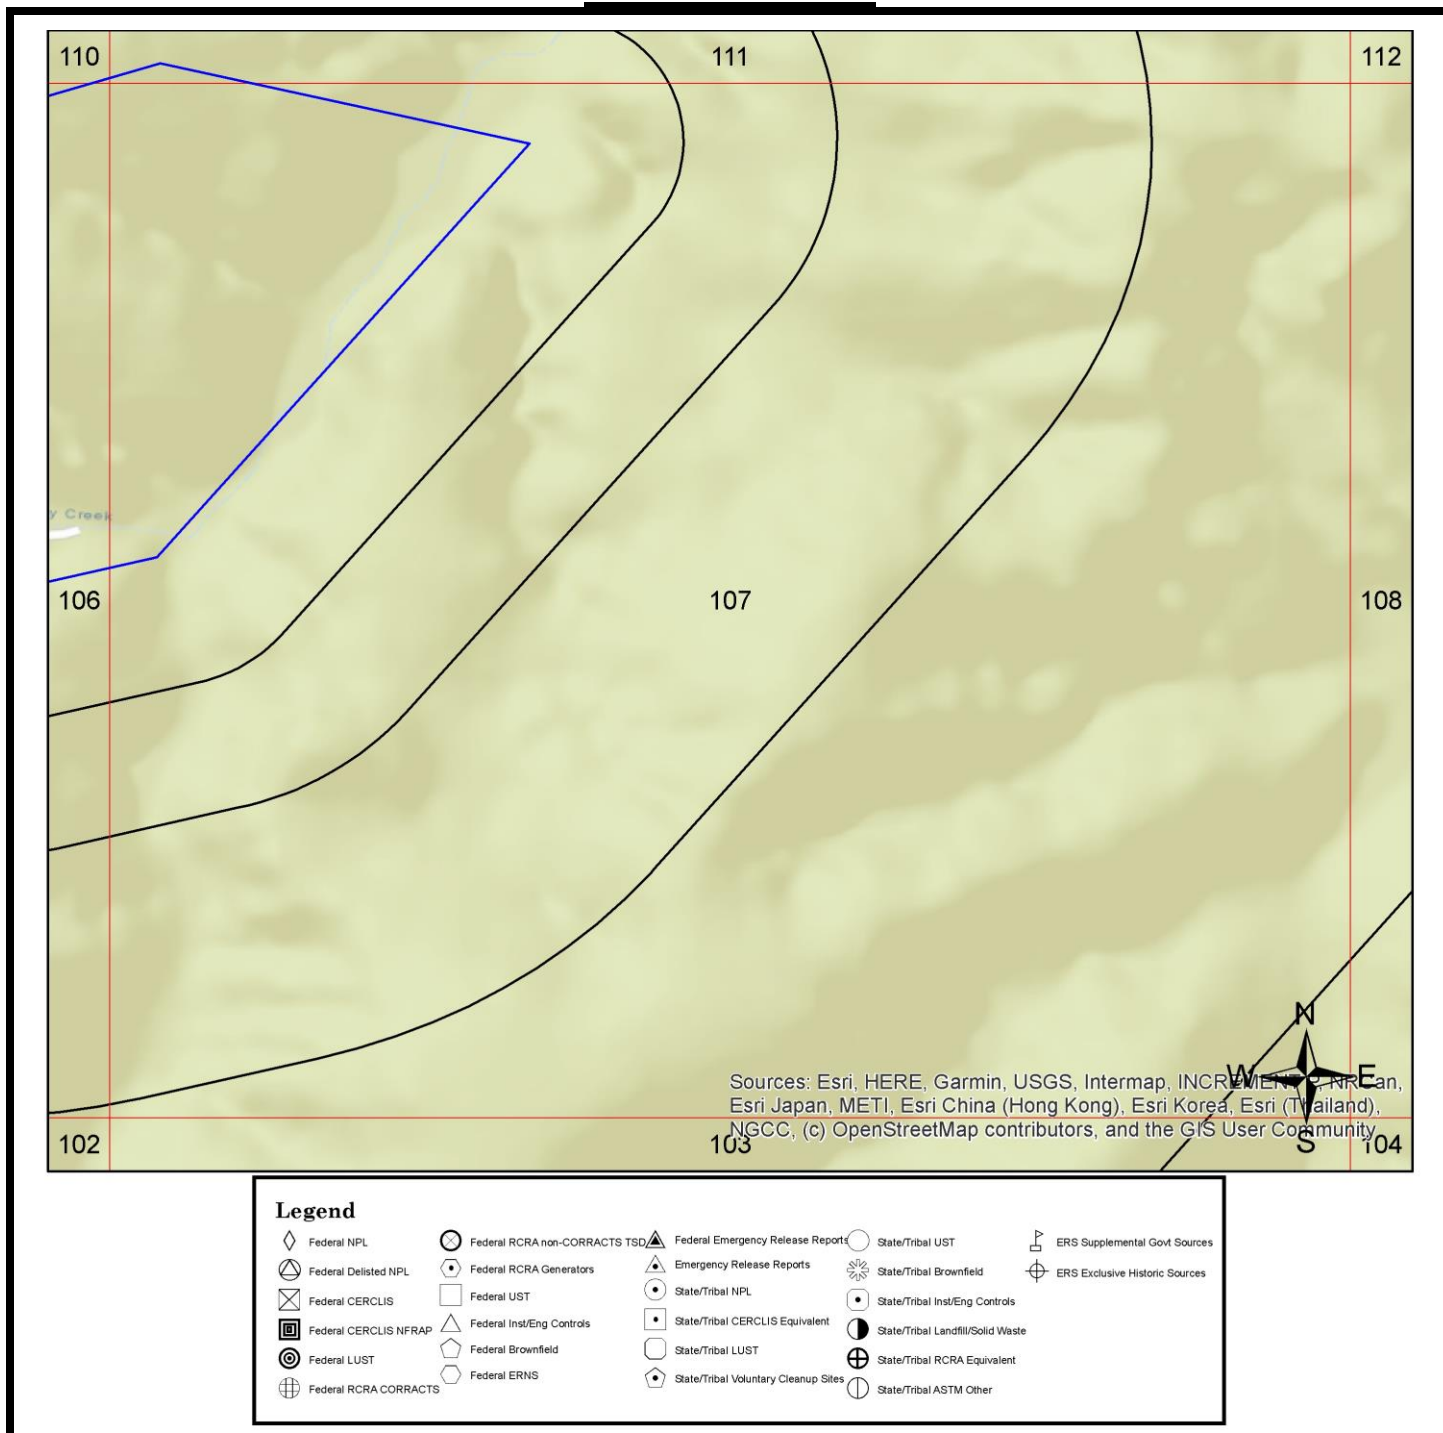

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 106

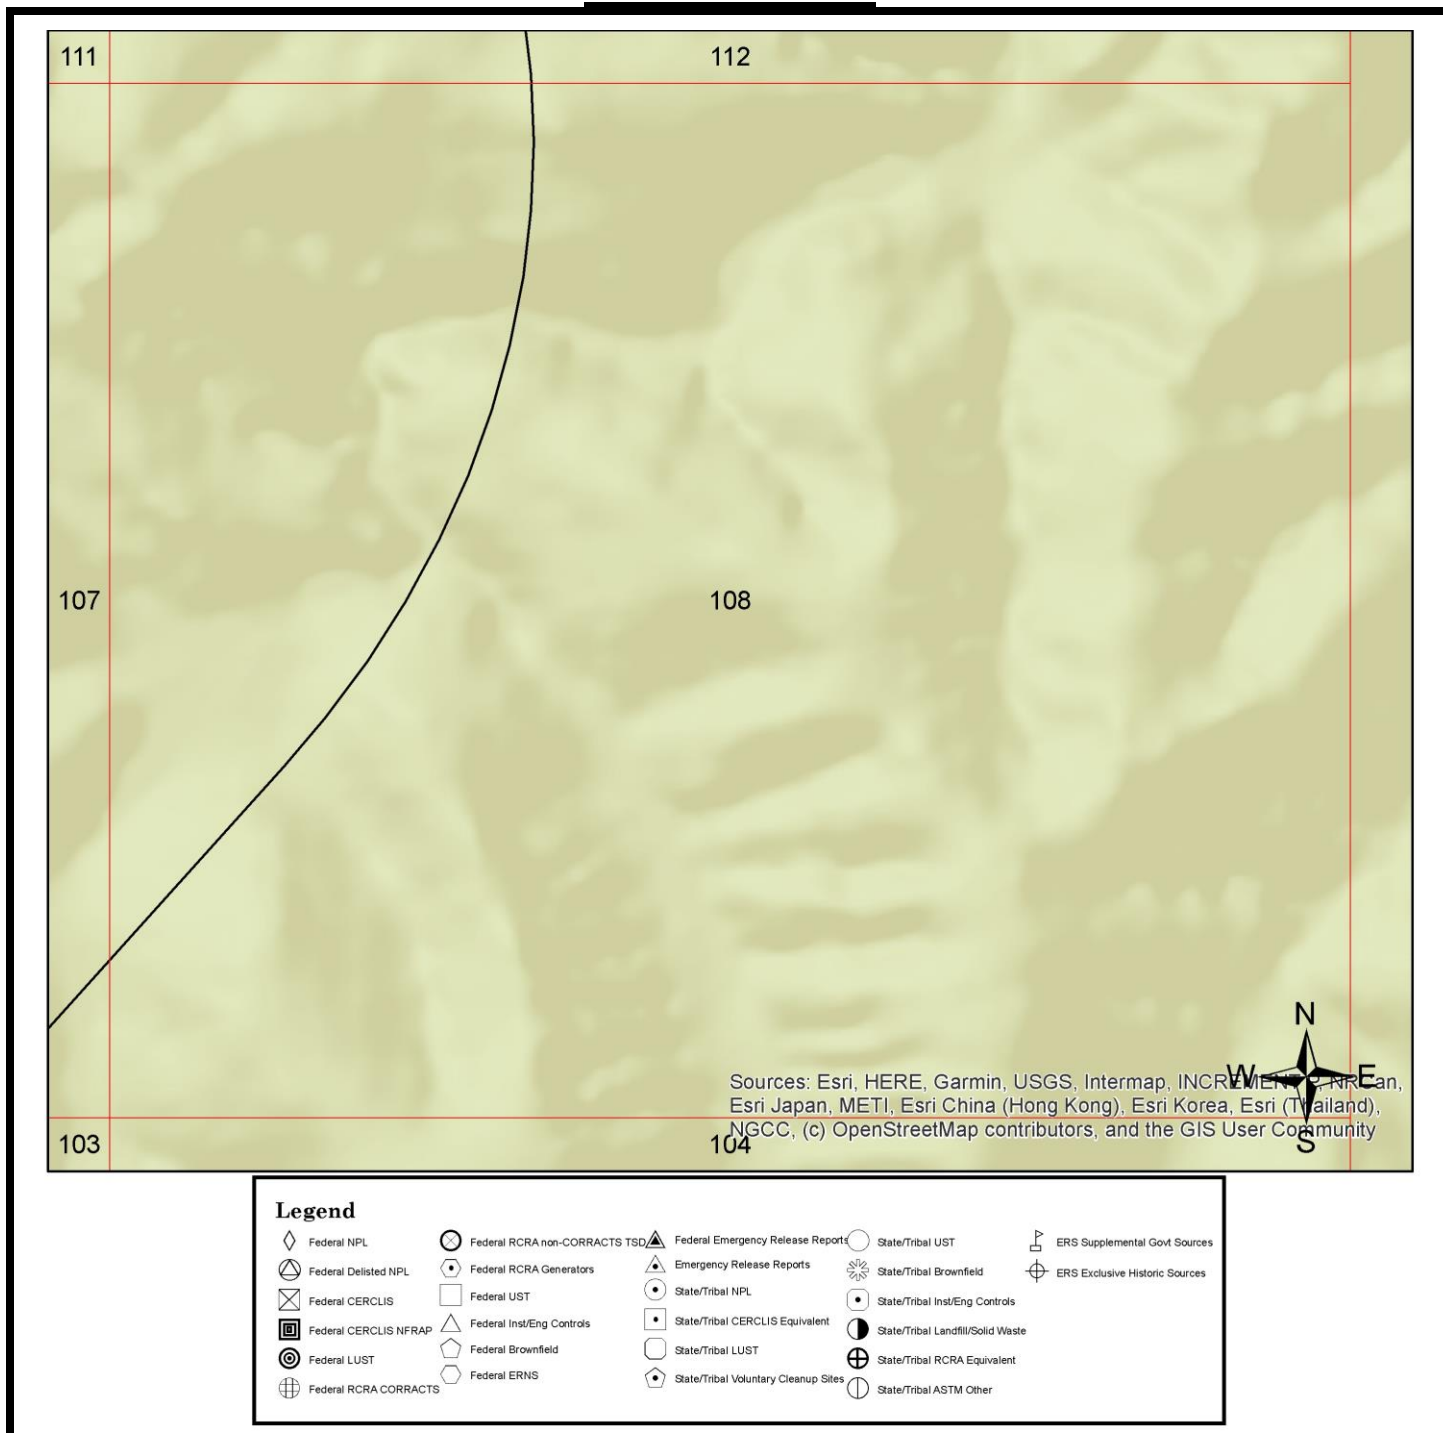

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 107

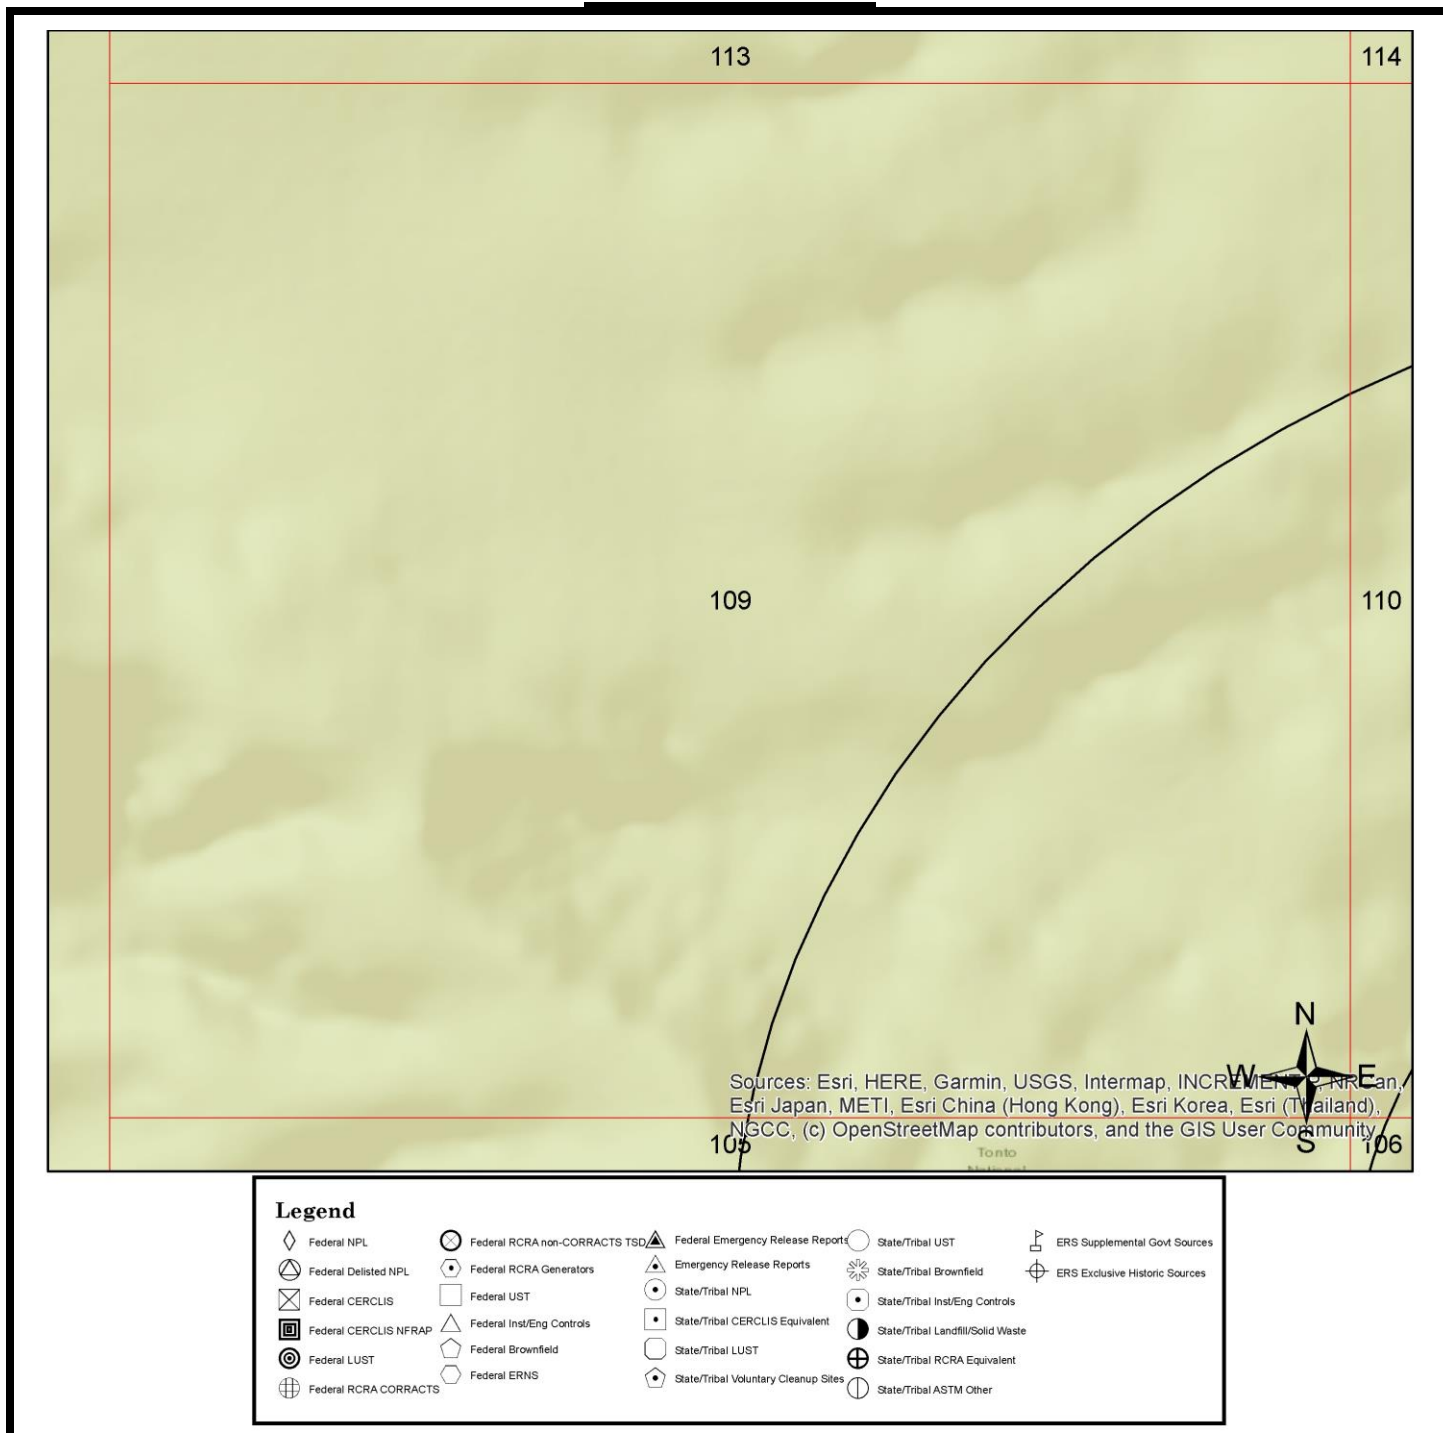

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 108

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 109

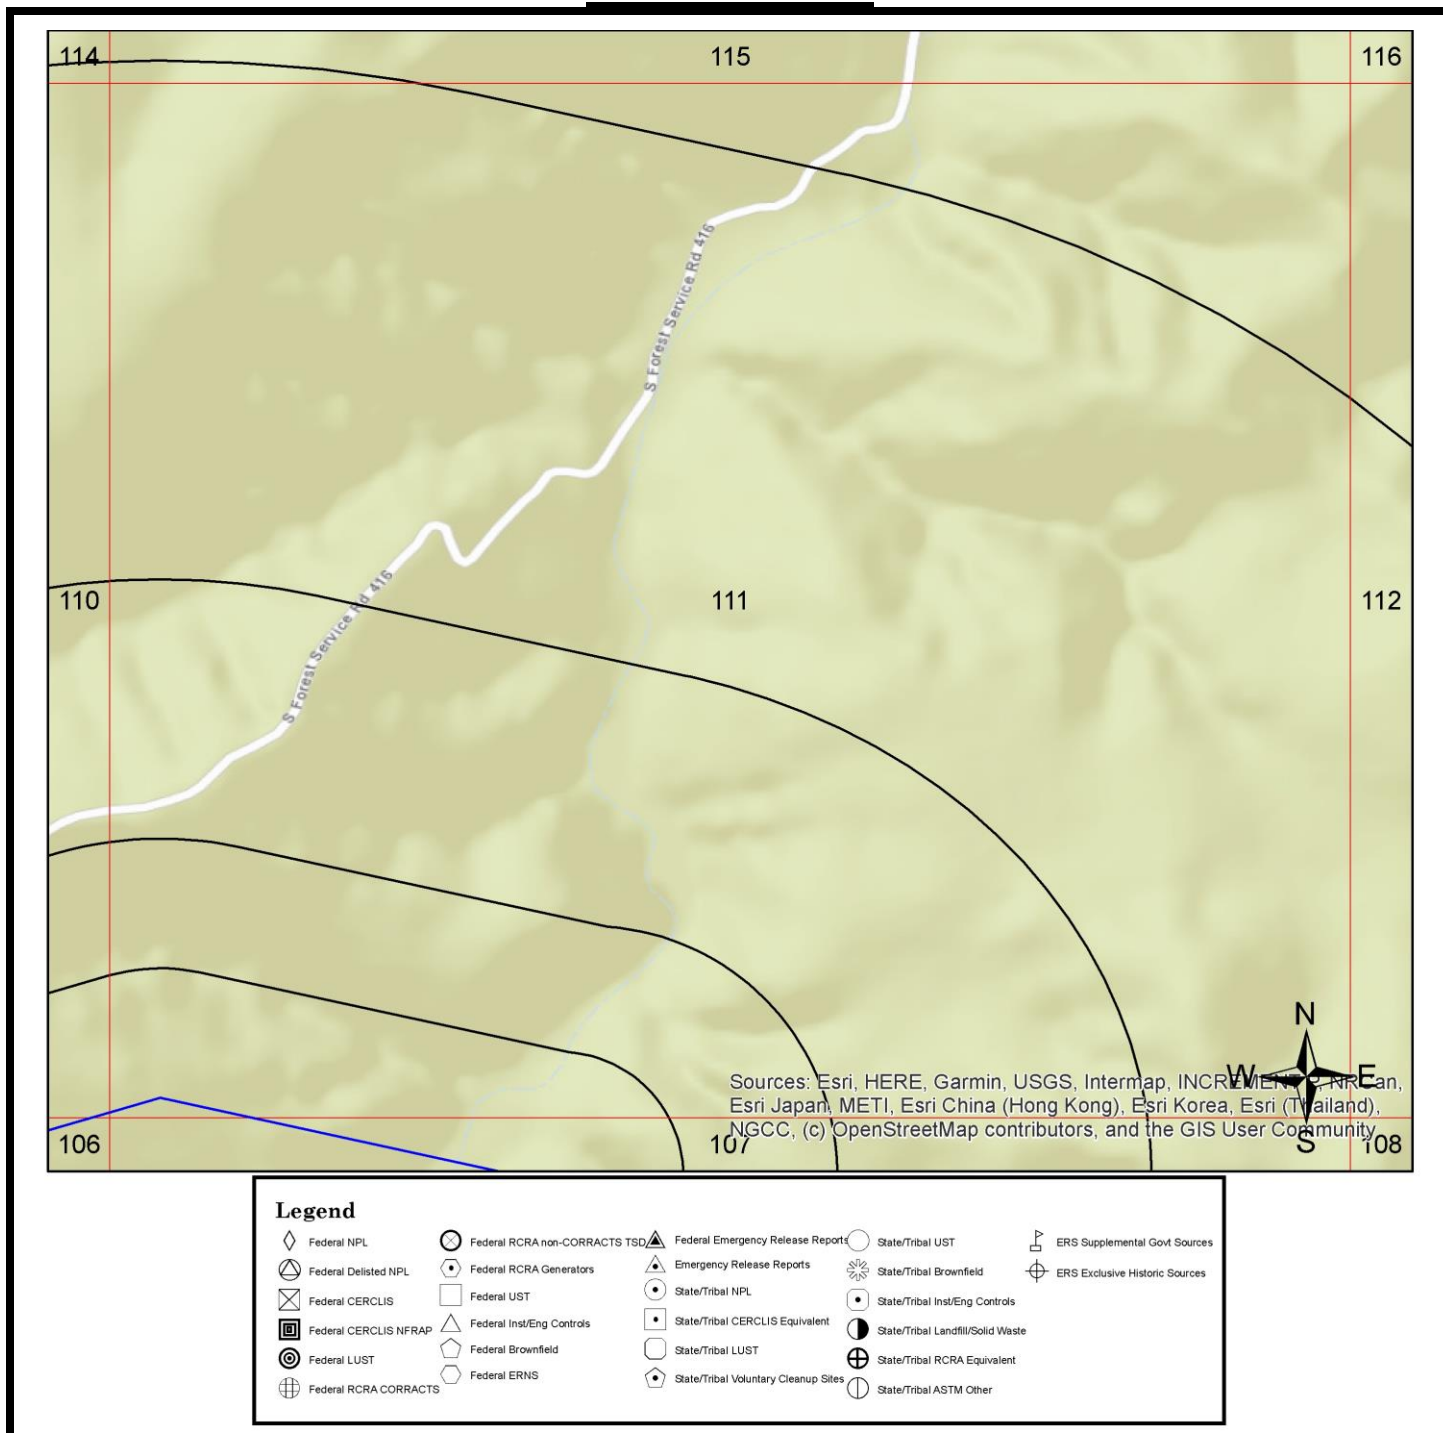

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 110

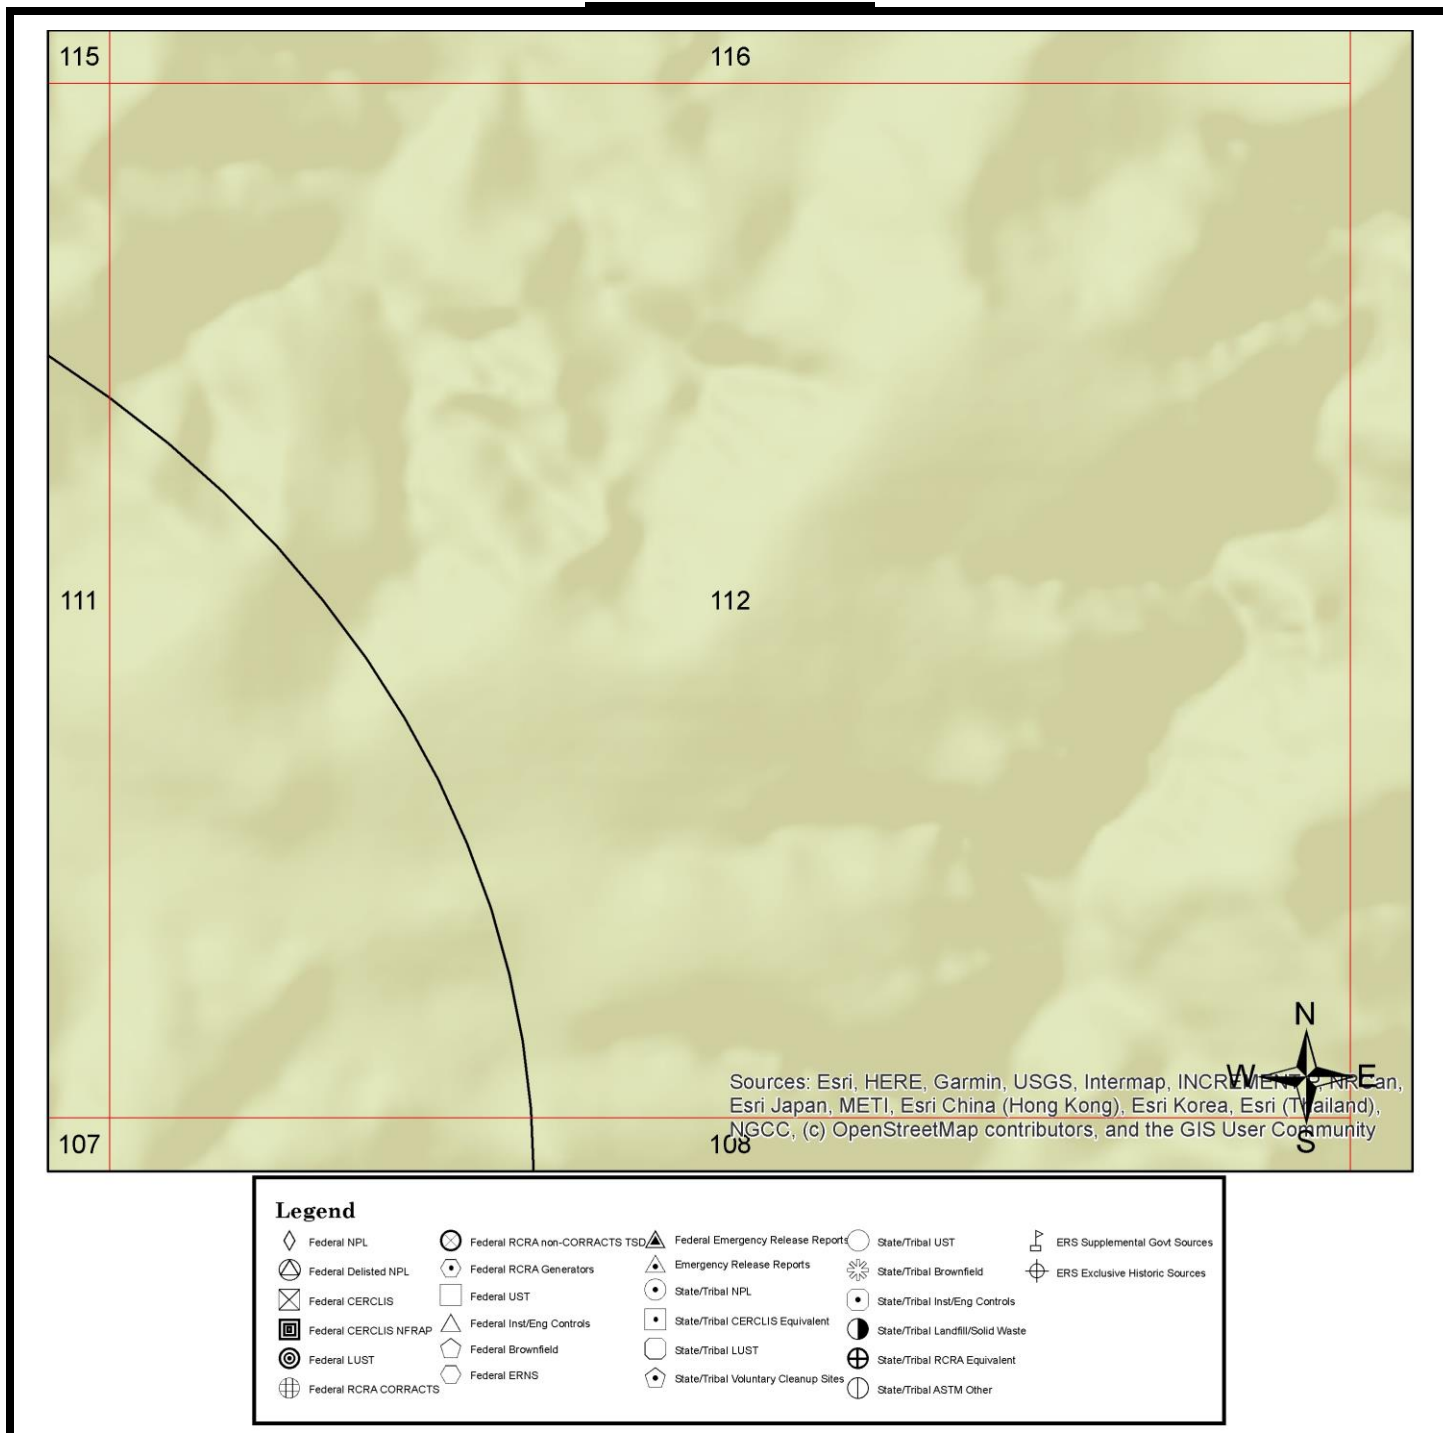

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 111

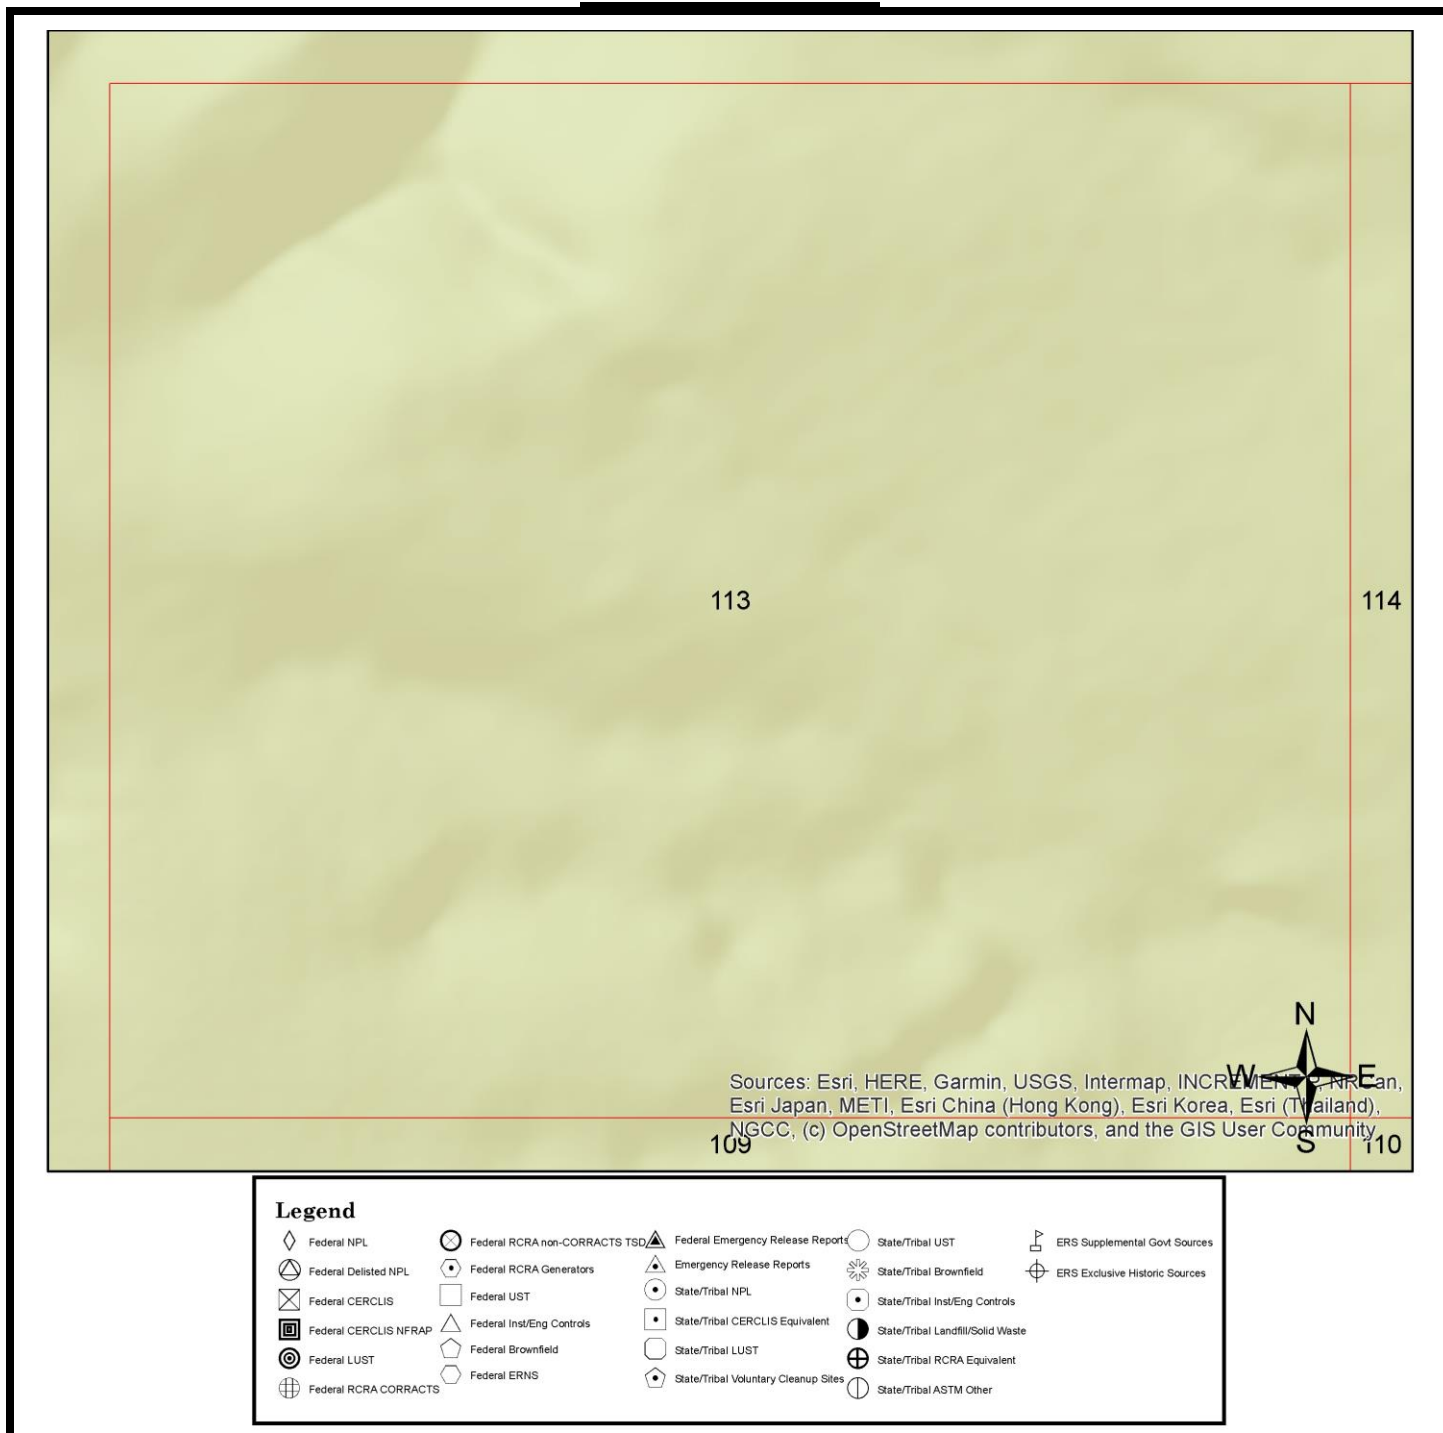

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 112

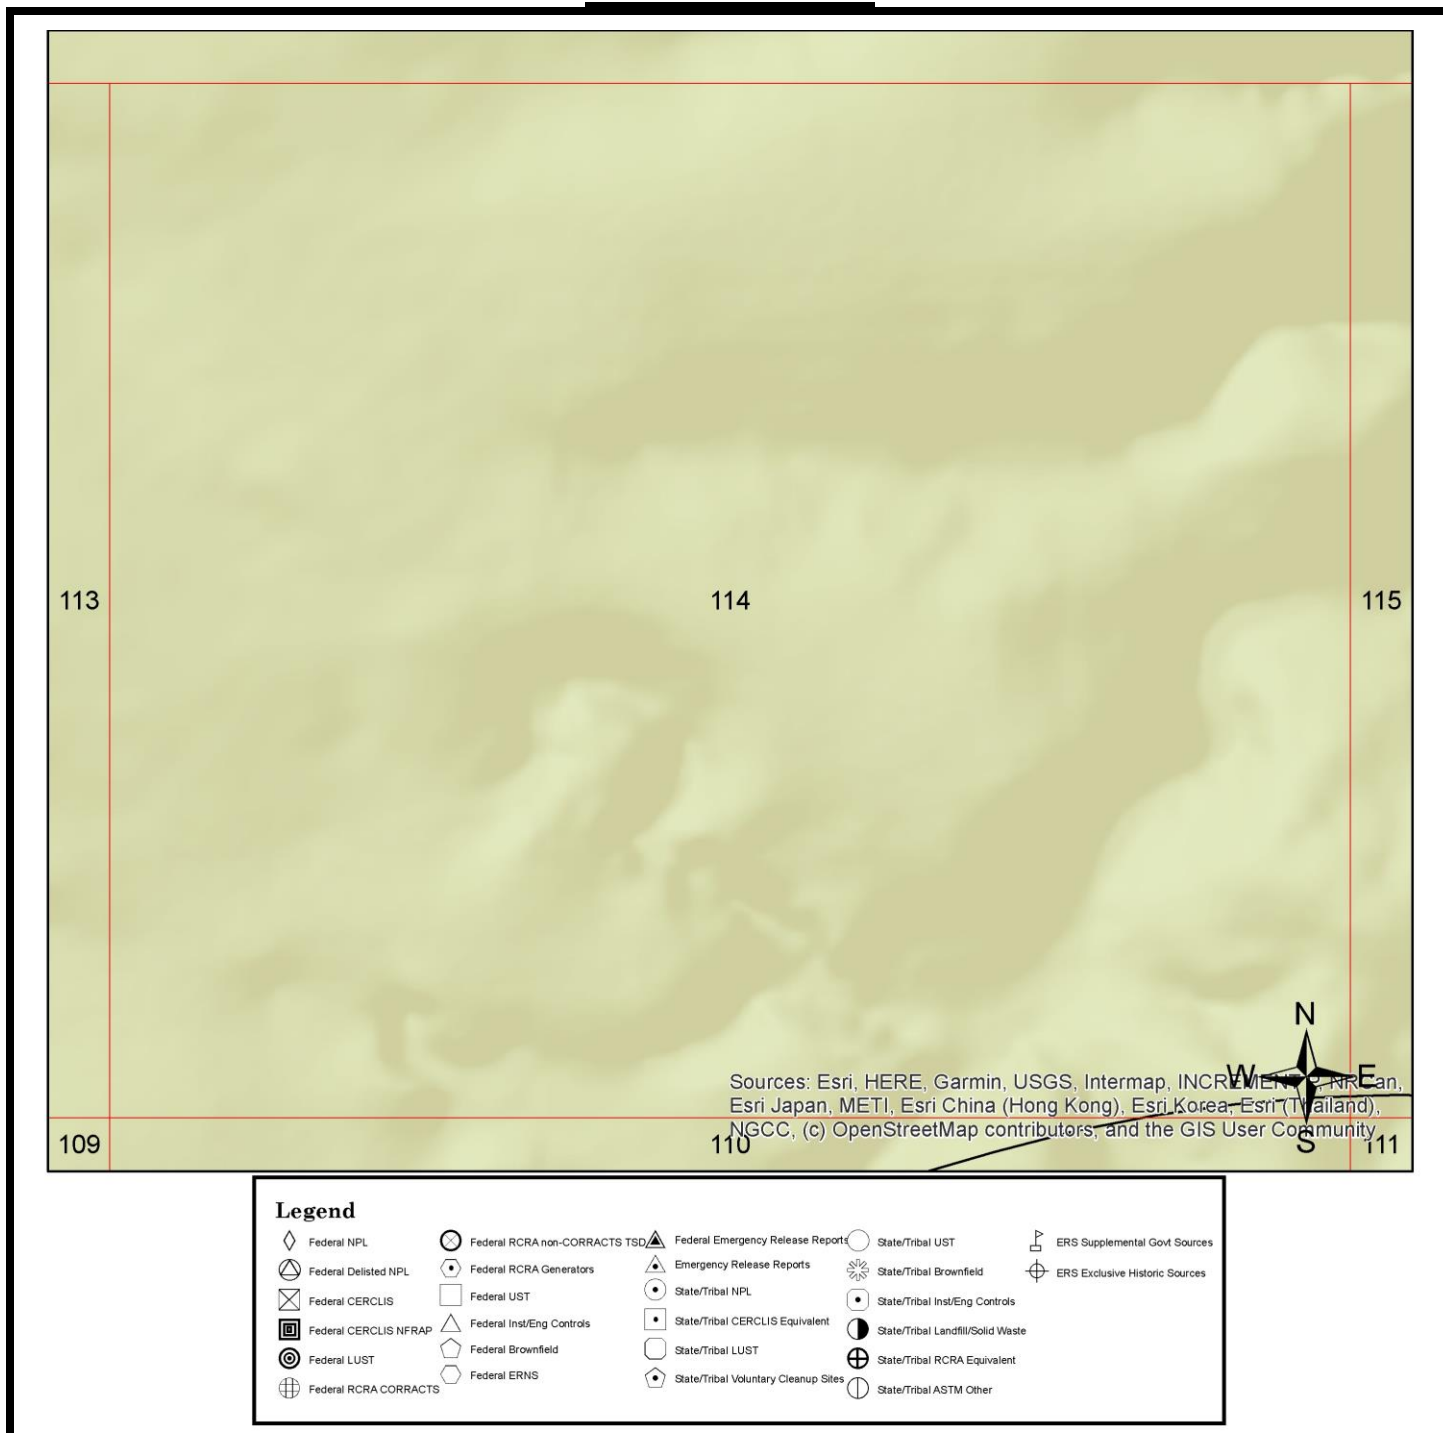

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 113

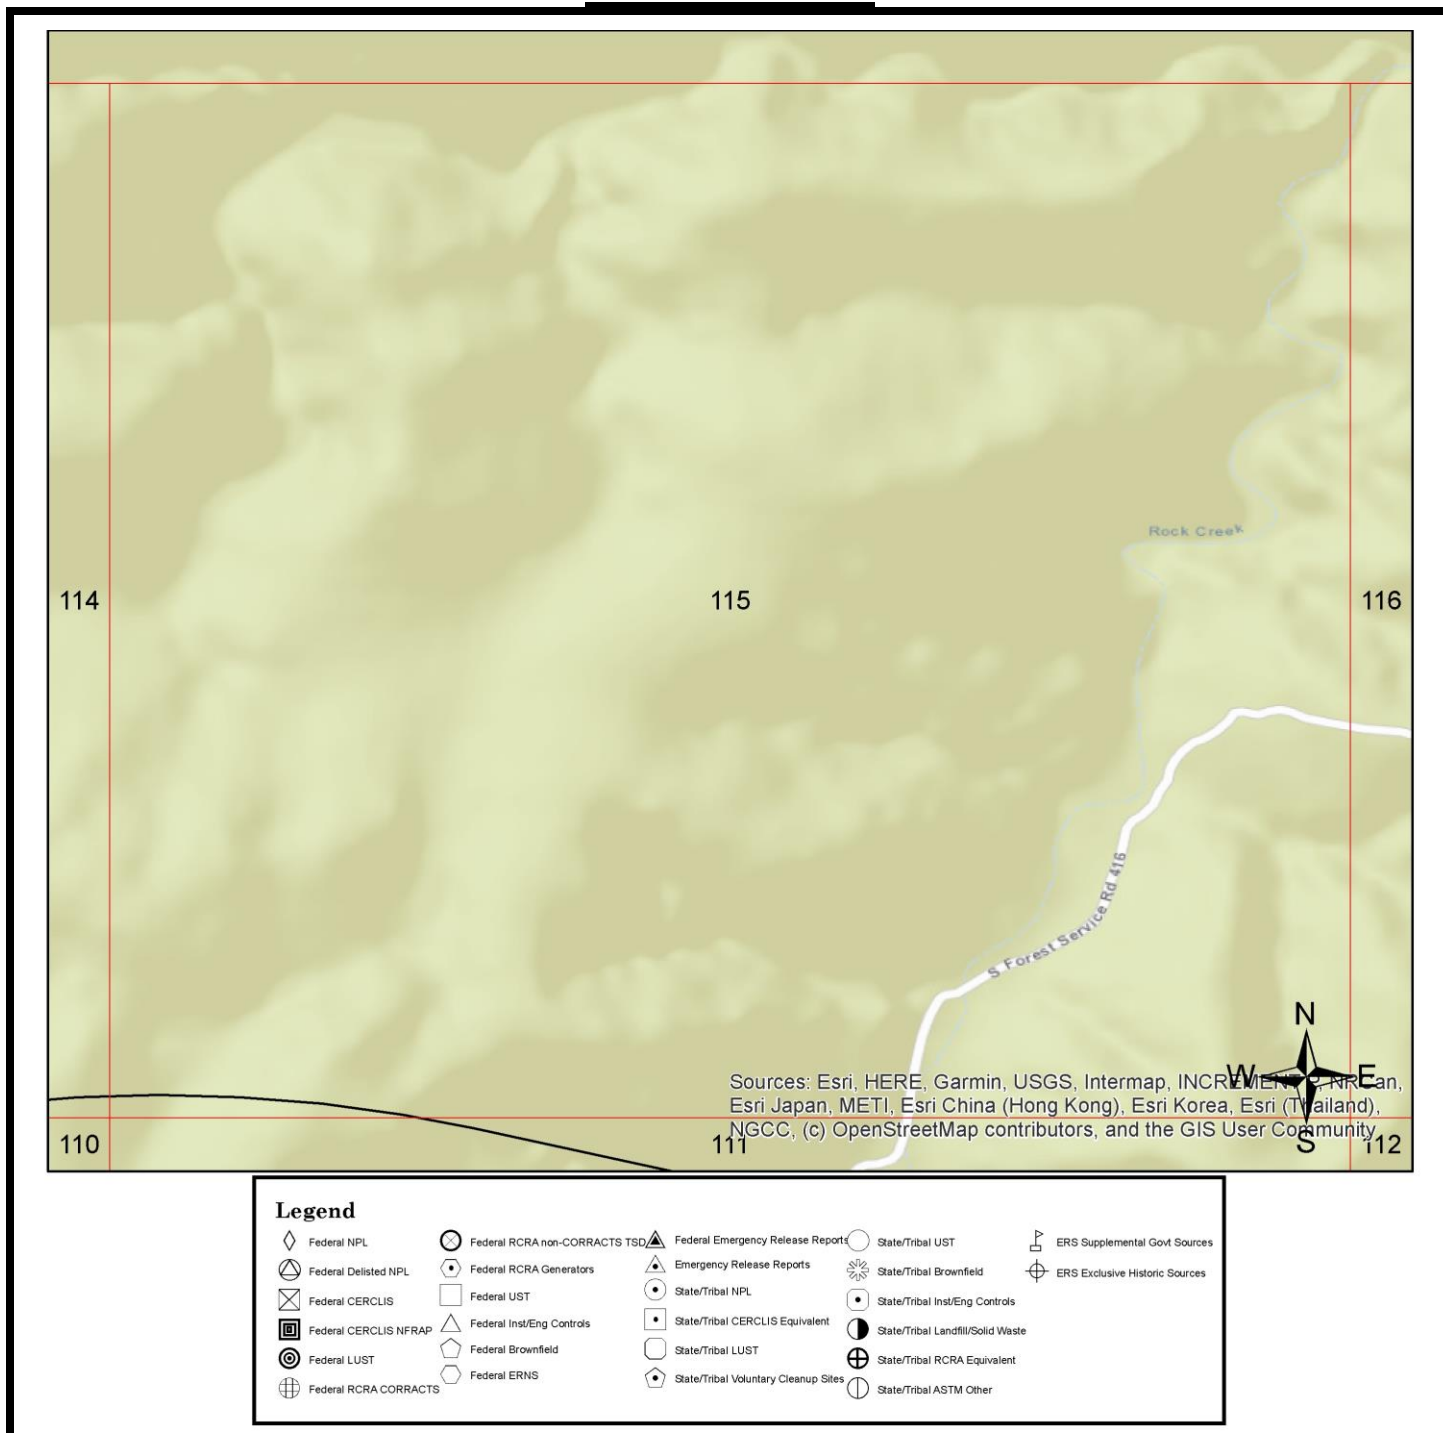

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 114

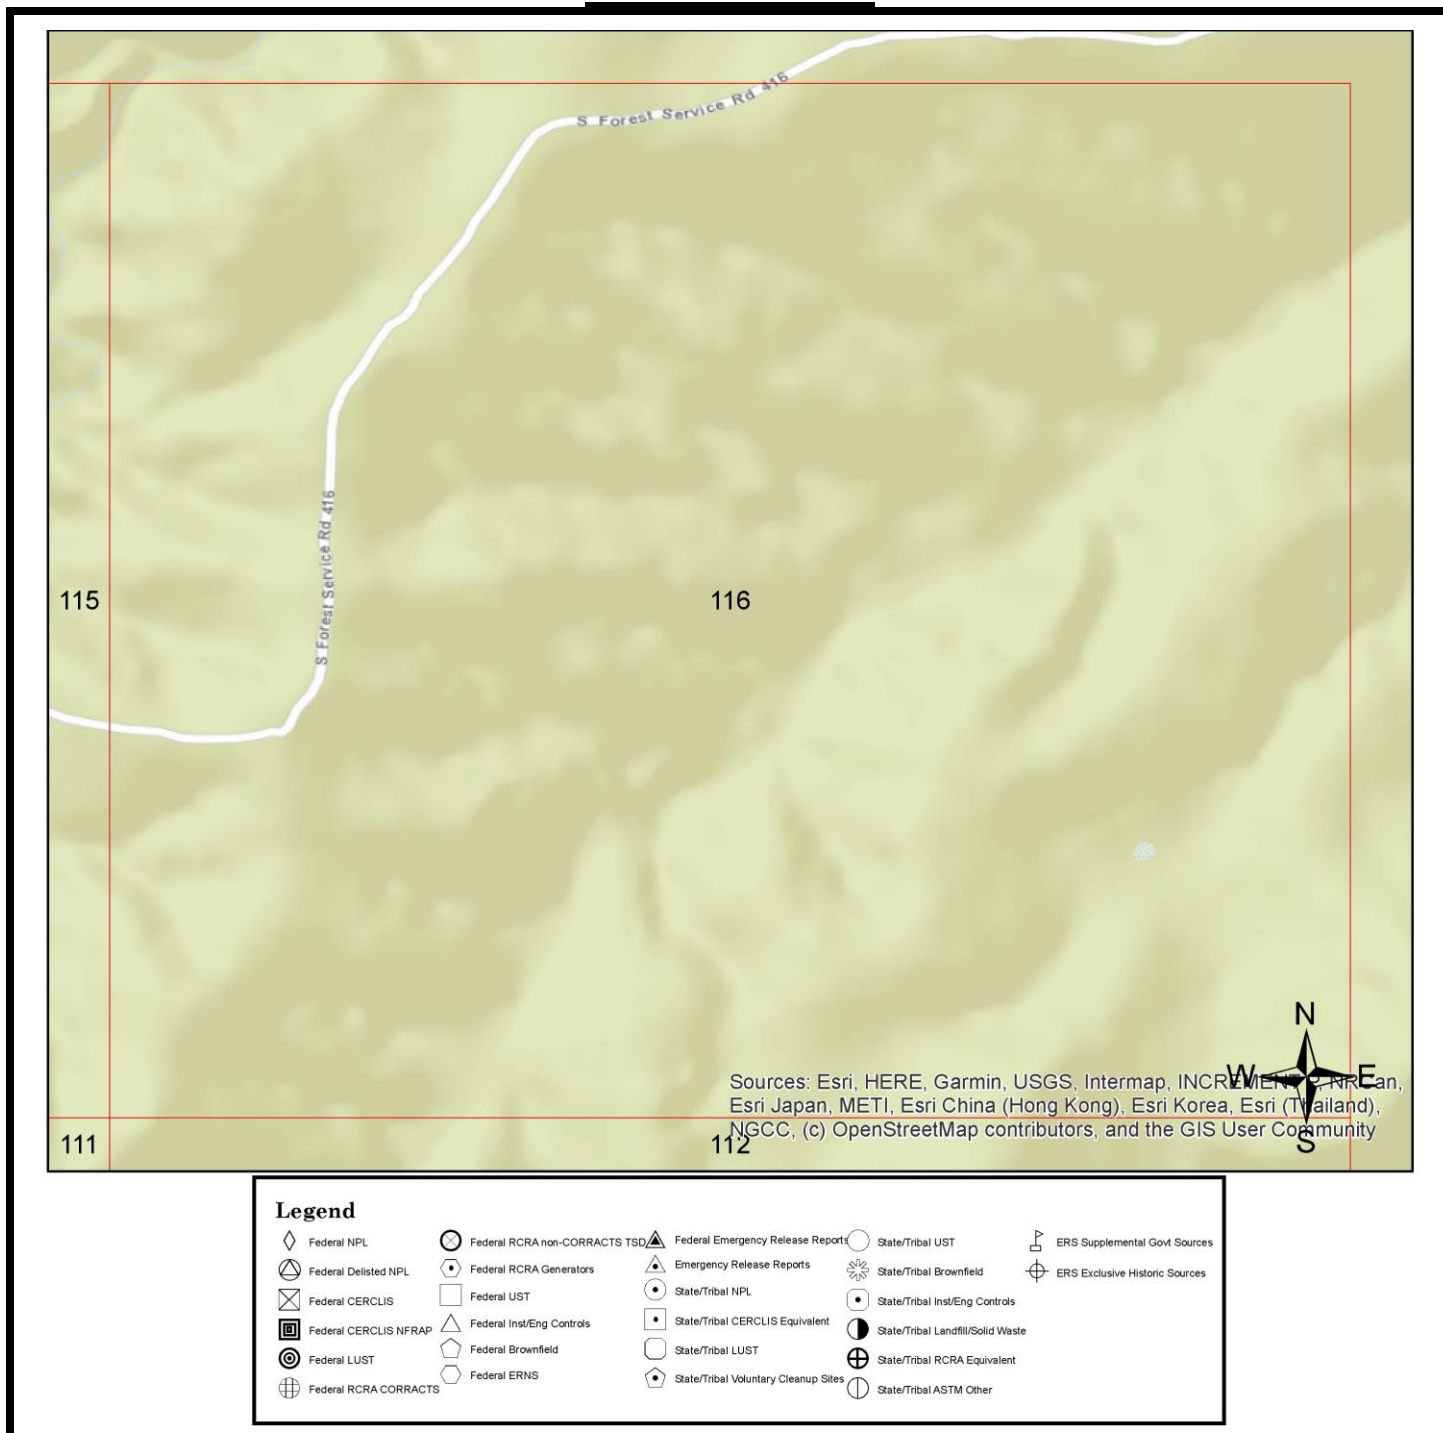

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 115

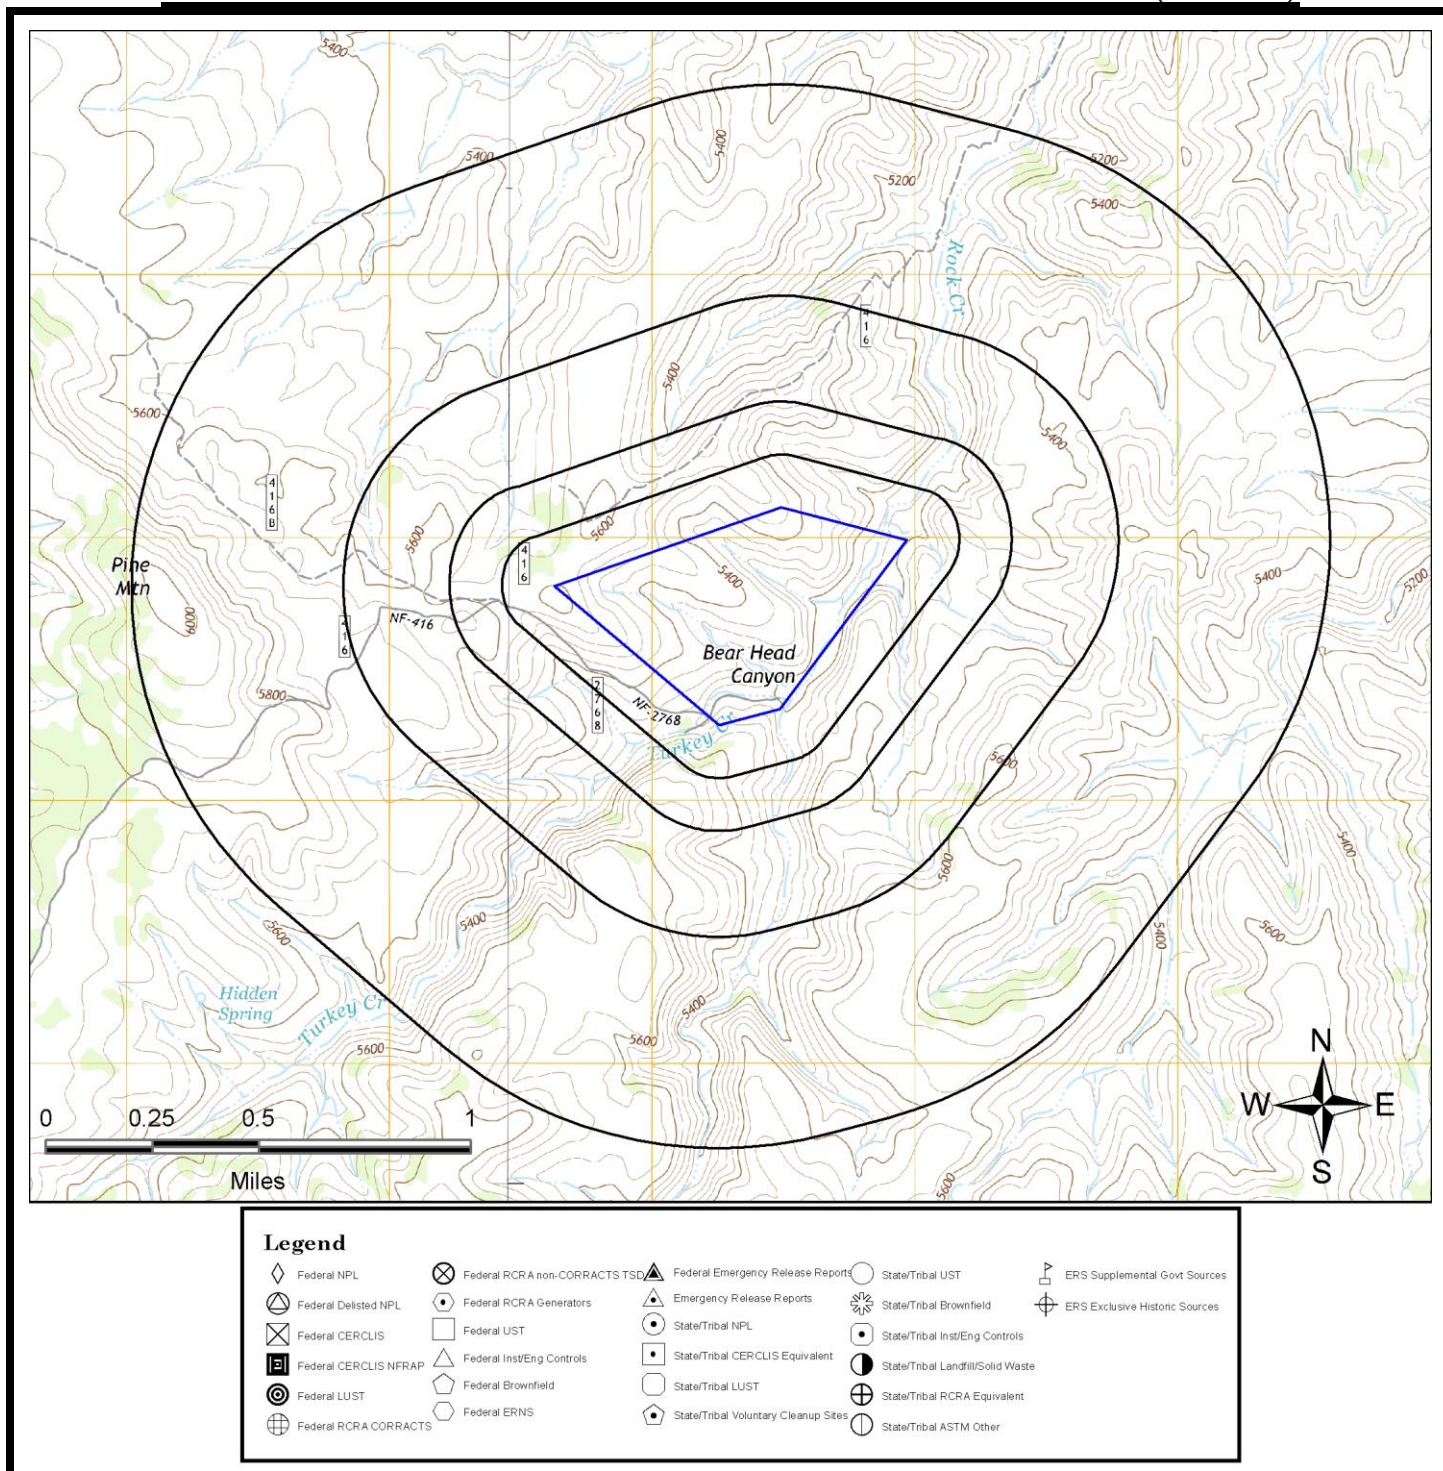

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

GRID MAP 116

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

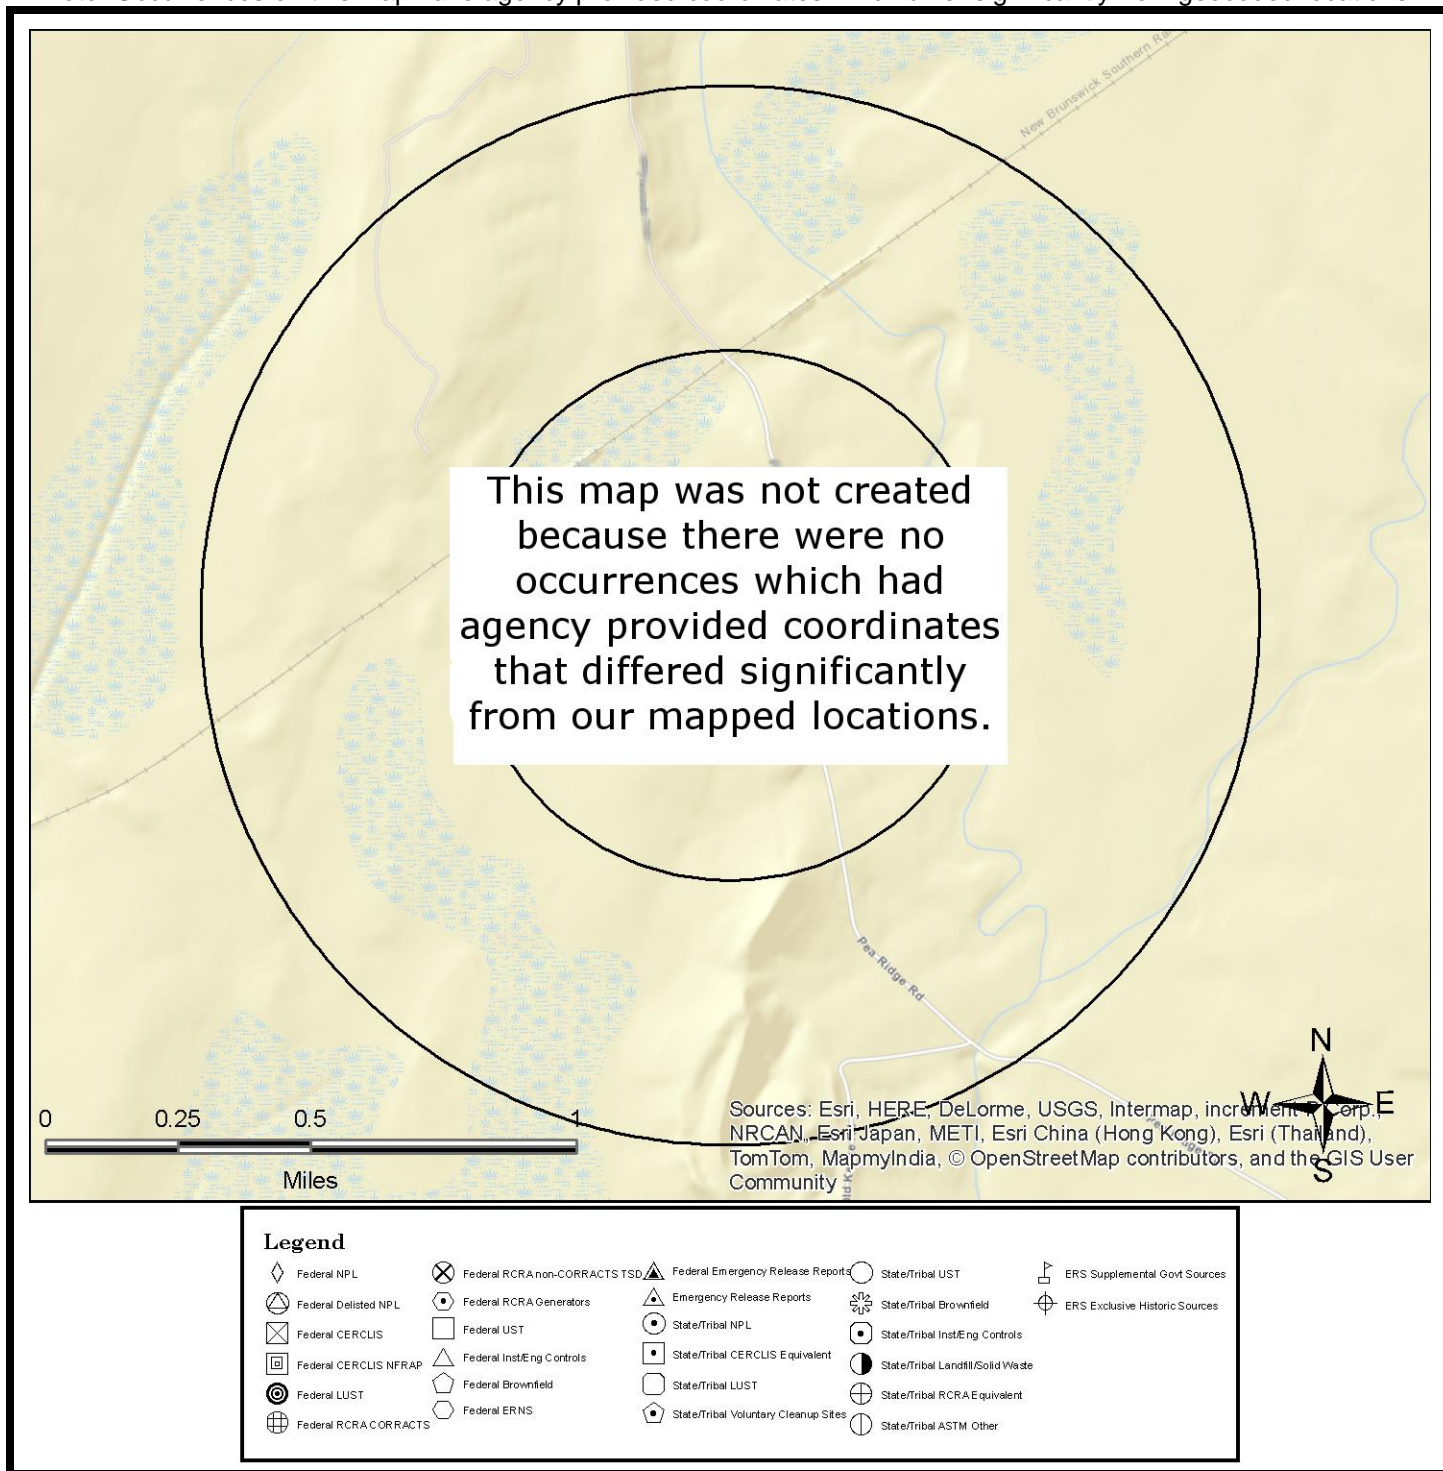

1-MILE TOPOGRAPHIC MAP W/OCCURRENCES (MAP4)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

AGENCY DIFFERENCES IN MAPPED LOCATIONS (MAP5)

Note: Occurrences on this map have agency provided coordinates which differ significantly from geocoded locations.

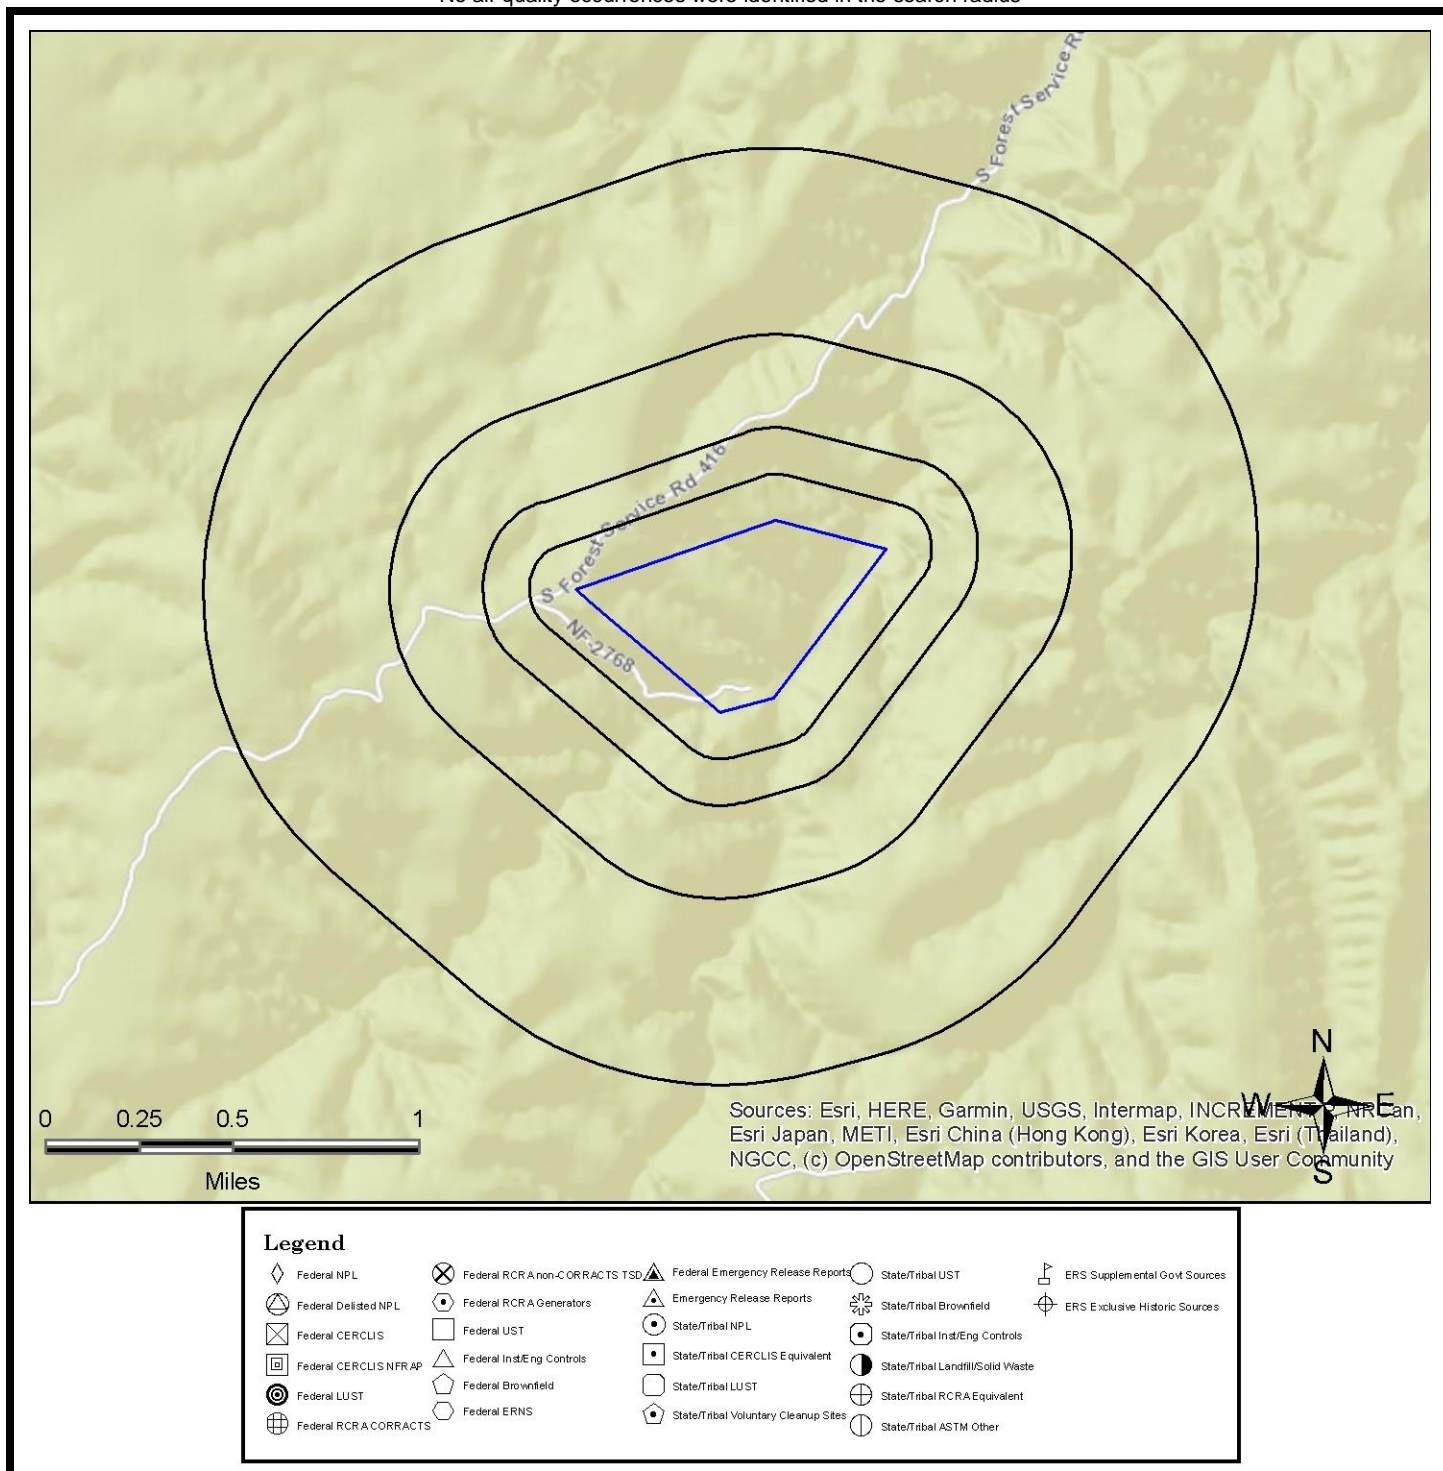

This "AGENCY DIFFERENCES IN MAPPED LOCATIONS (MAP 4)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

SUMMARY OF AGENCY DIFFERENCES

MAP ID	ID / SITE NAME	ADDRESS / DATABASE	AGENCY COORDINATES	DISTANCE (MILES)	DIRECTION
N/A	No occurrences were identified where the agency provided coordinates that differed significantly from our mapped locations.				

MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP6)

Note: Occurrences on this map are reported in Air Quality databases. Potential air plumes are drawn in the direction of the prevailing wind.
No air quality occurrences were identified in the search radius

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminants may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

This "MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP 6)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

UN-MAPPABLE OCCURRENCES

The following occurrences were not mapped primarily due to incomplete or inaccurate address information. All of the following occurrences were determined to share the same zip code as the area searched. General status information is given with each occurrence along with any address information entered by the agency responsible for the list.

ID	Facility Name	Address	Database	Status
No "un-mapped" sites requested.				

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. **Environmental Record Search (ERS)** cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by **ERS** is assumed to be caused by others and **ERS** cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. **ERS** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by **ERS**. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. **ERS** does ensure that the data is accurately reproduced from the original source. **ERS** backs the reporting of the data with \$3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

The **ERS** logo, name, report design, presentation, maps, tables, etc., are the exclusive property of **ERS** and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from **ERS**. United States and international copyright laws protect any and all reports produced by **ERS**.

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.

Environmental Record Search (ERS) and their respective products/reports (i.e. RecCheck, LenderCheck, Environmental Screen, etc.) as well as their respective business operations, are **NOT** associated in any way with nor related to, First American Commercial Real Estate, Inc. (FACRES) and/or the First American Family of Companies.

- California #44219, 1989
- Nevada #09281, 1991
- New Mexico #14546, 1999

Professional Affiliations:

- Board Member – Citizen’s Water Advisory Committee to the City of Tucson
- Finance Subcommittee Member – Citizen’s Water Advisory Committee to the City of Tucson

Background:

Mark Taylor is an engineering Principal and one of WestLand’s founders. He has over 30 years of experience in water resources and wastewater systems engineering, including the design of water and wastewater systems for large, multi-disciplinary public works projects, master-planned communities, private water company master planning/energy efficiency evaluation, and the mining industry. Mark is responsible for the development of water system master plans; water policy, energy efficiency studies, well, reservoir, booster station, and transmission main design; water treatment design; and the assessment of rates and development impact fees for private and municipal clients. He is also experienced with wastewater master plan preparation, energy efficiency and feasibility studies, system modeling and simulation, and capacity analyses. Mark has

provided training and presentations on water and wastewater system and energy efficiency topics in numerous forums. Mark acts as the Environmental Professional in overseeing and certifying Phase I Environmental Site Assessments (ESAs) for WestLand. He meets the education, training, and experience requirements as set forth in the All Appropriate Inquiry Rule (40 CFR §312.10(b)).

Mr. Taylor has conducted and certified numerous Phase I Environmental Site Assessments at various locations in Arizona for the past 12 years. Sites have included rural ranchlands, neighborhood areas, health centers, automotive and other commercial sites, transportation corridors, and industrial and mine properties. Experience includes site reconnaissance and characterization, environmental record sources review, personal interviews, identification of potential contaminate migration, and historical review in determination of potential recognized environmental conditions. Mr. Taylor has acted as the principal reviewer for technical reports.

Selected Experience:

Sahuarita Water Arsenic Treatment. *Principle in Charge* of the design and project coordination to construct an arsenic treatment facility for Sahuarita Water Company. The new 2,000 gpm adsorption arsenic treatment facility utilized a newly manufactured regenerable adsorptive media which meets both NSF and ADEQ requirements. Extensive coordination was required with many design professionals, water company staff, vendors, contractors, and regulators to accomplish this task. This facility will be the first adsorptive plant to implement the regenerable media and pilot testing was conducted to verify the overall performance against existing disposable media. Deliverables included a treatment system option evaluation, design report, an opinion of probable construction cost, and final plans and specifications. The facility was designed to be expandable for future needs. WestLand also provided construction bidding services for this project.

Las Quintas Serenas Water Company Arsenic Treatment and Well Site Upgrades; Green Valley, Arizona; Las Quintas Serenas Water Company. *Principal in Charge* of the design of arsenic treatment and water plant upgrades for Well Nos. 6 and 7. These included an iron media adsorption arsenic treatment system, a 400,000-gallon storage tank, and a 1,250-gpm variable-frequency-drive (VFD) transfer booster station. A new 2,500-lineal foot, 8-inch dedicated transmission water main was designed to connect Well No. 7 to the Well No. 6 site. Raw water from either or both wells is treated through the arsenic system at the Well No. 6 site, sent to fill the new tank, and pumped via the transfer booster station into the distribution system. Services provided by WestLand included site layout and grading; site piping and valving layout and sizing; preparation of booster pump and motor design specifications; and hydropneumatic tank design and associated equipment. WestLand prepared the design report, final plans and specifications, and engineer's opinion of probable construction cost.

Town of Oro Valley Potable Water Master Plan; Oro Valley, Arizona; Town of Oro Valley Water Utility. *Principal in Charge* of the development of a water system master plan whose scope was divided into four tasks. Task 1 consisted of public outreach and coordination with the Town, during which WestLand maintained a complete file of all correspondence, agendas, meeting minutes, memoranda, and data throughout the duration of the project. Task 2 involved the development of a project scope and approach, including the definition of key issues such as the geographic boundaries of the service area, the planning horizon, and the long-term goals of the water utility. Task 3 was the synthesis of the regulatory requirements and restraints, and the incorporation of these regulatory components into the design approach for the master plan. Task 4 consisted of the identification of the infrastructure required to correct existing system deficiencies and a determination of the future infrastructure required to support development within the ultimate Town service area.

City of Nogales Arsenic Treatment City of Nogales Utilities Department. *Principal in Charge* of the development of design criteria for arsenic treatment at the Meadow Hills Wells Nos. 1 and 3 and Coronado Well No. 1. The Meadow Hills wells pump directly into the water distribution system and fill the existing City of Nogales North Zone storage tank, while the Coronado well pumps to the existing High School storage tank located in the City of Nogales Downtown Pressure Zone. All three wells required arsenic treatment in order to meet the new EPA arsenic standard. Arsenic treatment consisted of a dual-vessel iron-media adsorption system located at each well site.

Northwest CAP Delivery System Preliminary Route Evaluation and Analysis; Northwestern Pima County; Northwest Water Providers. *Principal in Charge*. For over a decade, the Flowing Wells Irrigation District, Metropolitan Domestic Water Improvement District, Town of Marana, and Town of Oro Valley have worked collaboratively to develop a sustainable water supply for their customers. This effort has evolved over time to focus on the establishment of a water delivery system to deliver Central Arizona Project water to northwestern Pima County. As part of this effort, Mr. Taylor served as Principal-in-Charge of the development of a route analysis for the delivery system that would allow for the direct use of CAP water by each partner. The project consisted of three planning/engineering tasks: Task 1 – preliminary route evaluation, screening, and route evaluation matrix preparation; Task 2 – technical evaluation of alternative routes; and Task 3 – final route evaluation. Five potentially feasible routes were reviewed during the preliminary evaluation and screening process, two of which were identified for more detailed study.

Community Water Wells Nos. 10 and 11 Reservoir, Arsenic Treatment, Booster Station, and Transmission Main; Green Valley, Arizona; Community Water of Green Valley. *Principal in Charge* of the design of Community Water Well Nos. 10 and 11 sites, including arsenic treatment facilities, new 300,000-gallon forebay reservoirs, and booster pump stations. The new wells were designed to pump through a Layne Christensen coagulation filtration arsenic treatment process into onsite forebay reservoir. The reservoirs provide treated source water to booster stations that pump through dedicated well transmission mains to fill the Community Water Reservoirs No. 2 and No. 3. WestLand prepared the design report, final plans and specifications, and engineer's opinion of probable construction cost. Services provided by WestLand included site layout and grading; site piping and valving layout and sizing; preparation of well pump, column, and motor design specifications; and hydropneumatic tank design and associated equipment. In addition, several miles of 16-inch water main were designed to transport treated potable water to the Community Water reservoirs.

Red Rock Water Plant No. 1 Nitrate Treatment Plant; Pinal County, Arizona; Red Rock Utilities, LLC. *Principal in Charge* of the design of a nitrate treatment facility to mitigate the tested nitrate concentration of 10 to 12 parts per million at Water Plant No. 1. (The current primary maximum nitrate concentration limit is 10 ppm.) The treatment facility was installed at the discharge of the existing wellhead to treat half the full flow of 800 gpm to an approximate final mixed (half treated, half bypassed) nitrate concentration of 8 ppm. The facility consists of four steel filtration vessels that contain a chloride form of anion exchange resin media. Nitrate ions are exchanged onto the media releasing chloride ions resulting in a reduced nitrate concentration in the treated water. The media is then backwashed with a sodium chloride brine solution to remove the nitrate ions and replace them with fresh chloride ions. The spent brine backwash water is sent to a holding tank for continuous low-flow disposal to the public sewer system. The treated water is sent to an existing onsite forebay reservoir.

Freeport-McMoRan Sierrita, Groundwater Mitigation Project. *Principal in Charge.* WestLand prepared design plans and specifications for a groundwater mitigation project to intercept groundwater from the mine site and deliver it back to the plant site to implement best environmental management practices. The project consisted of the site and equipping design for 19 new groundwater wells, a 350,000-gallon open-top welded steel reservoir, a 10,500 gpm booster station, and 13.2 miles of 8- to 36-inch HDPE pipeline. The project also included medium voltage transmission, distribution, and switchgear design, instrumentation and control for wells and booster station sites, Operation and Maintenance Manual, surge analysis, detailed cost estimates, and environmental permitting. WestLand is providing bidding assistance and construction period services for shop drawing reviews.

Freeport-McMoRan Sierrita – SXEW Facility Filtration Plant. *Principal in Charge* of the design and project coordination to construct a filtration facility for the Freeport McMoran (FMI) solvent extraction and electro winning (SXEW) processing plant. The new filtration system consisted of two 10,000 gallon stainless steel filters to remove organics from the SXEW process effluent prior to further processing at the crystal plant. The process included a 290 gallons per minute (gpm) variable frequency drive (VFD) pump station pumping the pregnant liquor through the filtration plant to remove the organics from the system and backwash the organics to waste. The project included design of the pumping system, piping, valving, backwash system, control system, air-blower/scour system and structural design of slab and tanks.

Freeport-McMoRan Sierrita. Potable Water Wells, Booster Station, Reservoir and Arsenic Treatment Systems. *Principal in Charge* for scope of services included preparation of design documents and bidding and construction period services for the design of two new water plant sites, each of which included a new 2,500 gpm variable frequency drive, potable water wells, a coagulation-filtration arsenic treatment plant, 300,000-gallon forebay reservoir, and 2,500 gpm booster station. This project also included two miles of 16-inch transmission pipeline, including borings for interstate and wash crossings. WestLand also provided cultural resource surveys, native plant and environmental surveys, and mitigation.

Tonopah Desert Recharge Project – Recovery Wellfield and Treatment Plant. *Principal in Charge.* The Tonopah Desert Recharge Project (TDRP) is a facility owned by the Central Arizona Project (CAP) to recharge and bank Colorado River water into the west Salt River Valley Groundwater Basin. WestLand developed conceptual designs for a recovery

wellfield and arsenic/fluoride treatment plant to recover banked water from the aquifer and return it to the CAP canal. The project included the design of 9 wells with 2,750 gpm of flow each, which are to be constructed in 3 phases over 20 years as the project's recovery requirements increase. The arsenic/fluoride treatment plant is also designed to ramp up its treatment capacity in phases as both the volume of water treated and the concentration of contaminants increase. Ultimately the wellfield is designed to recover 480,000 acre-feet of water over the life of the project. These designs, as well as capital costs and operations and maintenance costs, were presented in a report prepared for CAP. This project was completed in cooperation with CAP and Montgomery and Associates.

Red Rock Nitrate Treatment. *Principal in Charge* of the design and project coordination to construct an 800 gpm nitrate treatment plant. The nitrate treatment facility consists of steel filtration vessels which contain a chloride form of anion exchange resin media. The system is designed so that only enough of the stream is treated to meet the 8 mg/l nitrate goal by continuously testing the nitrate level in the blended water. The treated water is sent to an existing storage reservoir for distribution. Extensive coordination was required with many design professionals, water company staff, vendors, contractors, and regulators to accomplish this task.

University of Arizona Tech Park - Independent Audit of Drinking Water System 20-567. *Principal in Charge.* WestLand provided an audit/evaluation of the drinking water sampling plan and locations currently used by the Project. Recommendations for testing were made and new locations were suggested for some of the current sampling I.D. points to prevent any false readings or sampling of water that is outside of the responsibility of the Project facilities management.

Red Rock Utilities 208 Plan Amendment; Pinal County, Arizona; Red Rock Utilities, LLC. *Principal in Charge* of the development of a 208 Plan Amendment that addresses the sanitary sewage collection, treatment, and disposal needs of a 1,300-acre residential, commercial, and industrial-use project in southern Pinal County. The plan amendment describes the 20-year needs of the development, including existing water reclamation facilities and planned expansions and improvements; the types of permits needed, including NPDES, APP, and reuse; construction priorities and schedules for completion; implementability; financing measures; and public participation. Total buildout capacity for the planning area is estimated to be 7.35 million gpd, and to meet the growing needs of the development, a 1.5-million-gpd expansion is required to the current sequencing batch reactor water reclamation facility, followed by an additional 1.5-million-gpd expansion and the construction of at least one additional water reclamation facility. Generally, onsite gravity sewers will collect the sanitary sewage and convey that flow to an existing or proposed wastewater reclamation facility, although sewage lift stations and force mains may be necessary.

Town of Patagonia Wastewater Treatment Facility; Patagonia, Arizona; Town of Patagonia. *Principal in Charge* of assisting the Town of Patagonia in the replacement of its aging wastewater treatment plant with an extended aeration plant with a capacity of 120,000 gpd. The replacement plant was designed to handle anticipated growth within the service area and was constructed to treat an average of 110,000 gpd of effluent. Other facilities constructed as part of the design included an anoxic basin, two aeration basins, a new blower, a belt press for sludge processing, a new sewer lift station, and a new headworks with flow meter and screenings removal.

CHRISTOPHER E. RIFE, MS

Phase 1 ESA Specialist

Experience: 12+ Years

Education:

- MS, Environmental Policy and Management/University of Denver
- BA, Philosophy/Humboldt State University
- Additional Coursework in Hazardous Materials Management and Wetlands Science

BACKGROUND:

Mr. Rife is a Senior Project Manager in the Environmental Services Group. He specializes in regulatory compliance for environmental and engineering projects at industrial, commercial, residential, and transportation sites. His areas of expertise include water resources permitting, environmental resources plans and studies, and environmental site assessments. He has over 20 years of experience in federal and state environmental regulatory programs covering a broad range of business sectors. His Phase I Environmental Site Assessment (ESA) experience includes underground storage tank (UST) investigations, solid and hazardous waste, and health and safety audit services. He has over 12 years of experience conducting ESAs and has been responsible for ESA projects for more than 350 broad-ranging sites, including public, private, and industrial properties; solid waste facilities; mines; and he has conducted pilot-scale testing of remedial systems.

SELECTED EXPERIENCE:

Resolution Copper Mine Site; Superior, Arizona. Task Manager. Mr. Rife conducted Environmental Site Assessments and Ecological Overview studies for a set of private properties contemplated for purchase by the client in anticipation of a land exchange for targeted public lands. He visited the remote, rural sites to assess potential for environmental liabilities, compiled environmental setting information to combine with biological data from technical specialists, and authored reports. The land exchange was recently approved, and Mr. Rife provided technical review of updates to the original reports.

Vigneto Development; Benson, Arizona. Senior Technical Reviewer. Mr. Rife participated in site visits and provided senior technical review of a Phase I Environmental Site Assessment of 12,500 acres proposed for residential development in southern Arizona. The property is largely undeveloped, although portions are used for cattle ranching and it is crossed by electrical transmission lines and a buried natural gas pipeline, a highway, and an abandoned railroad line. No recognized environmental conditions were identified during the assessment.

Miami Mine; Miami, Arizona. Project Manager. Mr. Rife has completed several projects at this legacy copper mine in southern Arizona. He recently managed Phase I Environmental Site Assessments for two properties owned by the client and intended for divestment. One of the properties had been used by the Arizona National Guard as an armory administrative center, whereas the other was a company recreation site, including a drive-in movie theater. No recognized environmental conditions were identified at either property.

Hazardous Waste Sites; Confidential Client, United States. Task Manager. Mr. Rife was the principal internal reviewer of Phase I Environmental Site Assessment reports for 60 hazardous waste collection sites, transfer facilities, incinerators, and landfills on behalf of client bidding to purchase portfolio. The work included fast-track mobilization of field investigators from offices across the country; coordination of document review, reporting, and responding to client inquiries; and strict confidentiality protocols. (Services provided at previous firm.)

Christopher E. Rife, page -2-

Newmire Smelter Site; Telluride, Colorado. Project Manager. Mr. Rife managed a permitting project for site remediation activities required under an agreement with the State of Colorado. Technical work included a biological evaluation, archaeological studies, jurisdictional delineation, and site revegetation design after closure. Mr. Rife was instrumental in redesigning engineering plans for the remediation effort to avoid impacts to Waters of the United States, thereby avoiding a requirement for authorization under the Clean Water Act Section 404 program.

Former Satralloy Site; Steubenville, Ohio. Project Manager. Mr. Rife is currently serving as permitting manager for a team conducting interim actions for a remedial investigation/feasibility study (RI/FS) of an abandoned chromium smelter site in eastern Ohio. Assignments have included environmental permitting support in regard to state and federal wetlands and waterways programs, and engineering support for infrastructure improvements to facilitate transportation to the site. Mr. Rife was responsible for environmental support activities, including compliance with the federal Clean Water Act Section 404 program and state isolated wetlands permit program. Federal- and state-jurisdictional wetlands and waterbodies are present and may be filled by future project actions. A preconstruction notification under the Section 404 Nationwide Permit 38, Cleanup of Toxic and Hazardous Waste, has been prepared and submitted to the U.S. Army Corps of Engineers to authorize placement of fill in waters of the United States for the remedial actions. The documentation included a jurisdictional delineation, biological evaluation, and cultural resources review. Mr. Rife's work has also supported an Ecological Risk Assessment conducted by others on the project team. Mr. Rife also oversaw transportation-engineering assignments, including railroad and bridge design, to allow heavy equipment and materials to be transported to and from the site for the RI/FS. (Transportation services provided at previous firm.)

Industrial Site Expansion; Cochise County, Arizona. Project Manager. Mr. Rife was responsible for preparing an Environmental and Social Impact Assessment for a substantive expansion of an industrial site in southeastern Arizona. The document allowed project reviewers—corporate decision-makers and financiers—to understand the potential impacts to environmental and social resources that may result from the project. The assessment was modeled after a National Environmental Policy Act Environmental Assessment, but was for internal use only. It relied upon existing environmental permitting and planning documents, supplemented by WestLand's research and site-specific studies of resources not previously addressed, such as traffic and visual impacts. Mr. Rife was responsible for scoping the assessment, conducting the existing report review, researching additional information, and writing the report.

DIANA L. SANDOVAL, MA

Senior Environmental Project Manager

Experience: 12+ Years

Education:

- MA, Land Use and Community Planning/Northern Arizona University - With Distinction
- BSc, Regional Development/University of Arizona - Cum Laude
- ATSM Phase I and Phase II Environmental Site Assessments for Commercial Real Estate Workshop

Registration / Certification:

- Mine Safety and Health Administration Certification
- 90-hour Real Estate Pre-licensing

BACKGROUND:

Diana Sandoval is a senior environmental project manager with a master's degree in land use and community planning and 12 years of regulatory compliance and permitting services related to land use and transportation planning, distribution/ transmission power planning, renewable energy projects, mining expansions, and residential and commercial development. She offers clients coordinated and collaborative project leadership required to address multiple stakeholders. She has experience with both small- and large-scale projects involving federal, state and local requirements. Her expertise is in Phase I Environmental Site Assessments, Clean Water Act Permitting, Endangered Species Act compliance, National Environmental Policy Act documentation, Arizona State Land Department authorization and local riparian and zoning processes.

Ms. Sandoval has prepared numerous Phase I Environmental Site Assessments (ESAs) for various property types pursuant to American Society for Testing and Materials (ASTM) standards E1527-05, 1527-13 and E2247-08. She has also completed Preliminary Initial Site Assessments (PISAs) for public roadway projects prepared in accordance with Arizona Department of Transportation/Federal Highway Administration requirements and Environmental Assessment and Mitigation Reports (EAMRs). Ms. Sandoval has completed ASTM technical and professional training for Phase I and II ESAs.

SELECTED EXPERIENCE:

Environmental Compliance for University of Arizona Science and Technology Park (UA Tech Park), Pima County, Arizona. Provides on-call services for UA Tech Park addressing federal, state and local development project environmental clearances and risk reduction. Ms. Sandoval has documented compliance with CWA Section 404 under preliminary JD; obtained concurrence from the Corps of no-jurisdictional waters for the UA Tech Park property; oversaw cultural resource survey and data recovery in accordance with current archaeological standards in a manner that would conform to National Historic Preservation Act (NHPA) standards; completed biological evaluations, including surveys for listed plant species and surveys for the western burrowing owl; and prepared Phase I ESAs for prospective tenants within the Solar Zone. Ms. Sandoval has also assisted with development of formal environmental planning protocols and guidance for the UA Tech Park Master Plan. She has provided environmental documentation to support demonstration of NEPA project readiness for Department of Transportation grant applications.

UA Tech Park at Rita Road Phase I ESA. Conducted a Phase I ESA for approximately 780 acres including a former industrial manufacturing facility and recently a multi-tenant commercial office and limited production technology research facility, office spaces, laboratory spaces, undeveloped open space, and recreational facilities. Assessment included review of prior complex prior site assessments, tank farms, chemical storage and distribution areas, railroad spur, closed industrial wastewater system and monitoring wells.

Pinal Central Substation to the Tortolita Substation Transmission Line Project, Tucson Electric Power (TEP), Pinal County, Arizona. Project Manager. Managed environmental regulatory compliance for TEP transmission line project, which runs approximately 41 linear miles in Pinal County. Assisted TEP in addressing NEPA, National Historic Preservation Act, CWA, Endangered Species Act (ESA), migratory bird protection, Arizona Pollutant Discharge Elimination System, State Native Plant Preservation and more. Coordinated with various federal entities and land management agencies to obtain all agreements, required permits and compliance documentation; the transmission line will cross privately-owned lands, lands owned by the State of Arizona and managed by the Arizona State Land Department, federally owned lands managed by the Bureau of Reclamation and the San Carlos Irrigation Project, an agency of the Bureau of Indian Affairs. Ms. Sandoval obtained an Approved JD from the Corps regarding the absence of jurisdictional waters for the project, documented that project was not likely to not adversely impact federally protected species, coordinated with AGFD to conduct surveys for candidate species in anticipation of potential federal listing, addressed plant salvage considerations for protected native species including vegetation clearing projections, and addressed state and federal archeological clearance requirements. Presented methods and results at the Society for Ecological Restoration November 2014 annual conference for a project study that used remote sensing and predicted growth rates to assess saguaro conflict with the transmission lines over the next 20 years.

ADDITIONAL EXPERIENCE:

- Completed Phase I ESA for Pima County Community Development and Neighborhood Conservation Department for the Copper Vista I and II subdivisions to support compliance with the U.S. Department of Housing and Urban Development (HUD) Neighborhood Stabilization Program 2 requirements. Numerous environmental records were assessed pursuant to the findings of the government database records review including the Tucson International Airport Area (TIAA) superfund site.
- Prepared numerous Phase I ESA reports for the Pima County Department of Environmental Quality also considering non-scope items, classified as outside the standard practice including: potential asbestos-containing building materials, potential lead-based paint, health and safety concerns, high-voltage power lines, and ecological resources.
- Completed Phase I ESAs for linear transportation projects involving potential real estate transactions including the Town of Marana's project replacing the Ina Road bridge crossing over the Santa Cruz River and the Pima County's Department of Transportation's roadway improvement project along Tanque Verde Road between Catalina Highway and Houghton Road.
- Completed several PISAs in anticipation of ADOT funding including the Town of Marana's project to improve Tangerine Road between Interstate-10 and La Canada, a project crossing into multiple jurisdictions including Pima County and the Town of Oro Valley; and the Town of Sahuarita's project replacing the Pima Mine Road bridge crossing over the Santa Cruz River.
- Prepared Environmental Information Documentation (EID) and facilitated Environmental Protection Agency (EPA) review in accordance with Environmental Review Guide for Special Appropriations Grants for Pomerene Domestic Water Improvement District Drinking Water Quality Improvement Project.

Education:

- MS, Environmental Engineering, University of Arizona
- BS, Civil Engineering, University of Arizona

Registration / Certification:

- Arizona #66736, 2018

Special Expertise:

- Water System Hydraulic Modeling
- Water Pumping Facility Design and Permitting
- Well Design and Permitting
- Water and Wastewater Treatment
- Hazardous Wastes
- Preliminary Engineering Report & Grant Application Preparation
- Phase I Environmental Site Assessments (ESAs)
- Bentley WaterCAD
- AutoCAD Civil 3D

Background:

Mr. Patrick Mette is a Civil and Environmental Engineer with experience in water system design, research, water treatment, construction inspections, Phase I ESAs, and non-profit engineering in developing communities. Mr. Mette performed as a field inspector for the Arizona Department of Transportation on several construction projects as an intern. He also worked as an undergraduate and graduate researcher at the University of Arizona for three years working on reverse osmosis, ion exchange, and solar membrane distillation projects in the lab and in the field, providing operation, analysis, design, and construction services. Mr. Mette spent nearly a year in the Andes Mountains of Bolivia working on rural water projects and providing training to Bolivian engineers on surveying, AutoCAD, and hydraulic modeling. While in school, Mr. Mette's coursework included water treatment, wastewater treatment, and hazardous waste management.

Since joining WestLand, Mr. Mette has worked on numerous projects designing booster stations and wells, analyzing water systems, developing hydraulic models, preparing preliminary engineering reports (PER), and developing cost estimates. He has also prepared technical memorandums on subjects ranging from "sewer pipe product comparisons" to "water system project prioritization". Mr. Mette has been working on Phase I ESAs with WestLand since 2016.

Selected Experience:

Phase I Environmental Site Assessment's in Cochise County; El Dorado Benson, LLC. *Engineering Technician.* WestLand assessed 4 properties and prepared 3 Phase I Environmental Site Assessments (ESA's) for El Dorado Benson, LLC.

Phase I Environmental Site Assessment for Montanas del Sol Property; Freeport McMoRan Sierrita Inc. *Engineering Technician.* WestLand assessed and prepared a Phase I Environmental Site Assessment (ESA) for FMI.

Phase I Environmental Site Assessment for Superior Airport Contiguous Parcels; Resolution Copper. *Engineering Technician.* WestLand assessed and prepared a Phase I Environmental Site Assessment (ESA) for Resolution Copper for a series of properties in Superior, Arizona.

Phase I Environmental Site Assessment for the Fairview Cemetery; Resolution Copper. *Engineering Technician.* WestLand assessed and prepared a Phase I Environmental Site Assessment (ESA) for Resolution Copper for a cemetery property in Superior, Arizona.

New Well and Water Main, BECC Funded Project; Whetstone Water Improvement District. *Project Manager.* WestLand is working with the Whetstone Water Improvement District (WWID) and the Border Environment Cooperation Commission (BECC) to fund four projects within the WWID water system that WestLand designed in order to address problems of insufficient system redundancy, declining well capacity, and aging infrastructure. WestLand coordinated with BECC to obtain funding for the design of the previously mentioned projects and is now working to obtain funding for their construction.

SAMANTHA BLONDER, MS

Environmental Specialist

Experience: 4 Years

Education:

- MS, Environmental Science/Florida Gulf Coast University
- BS, Biology/University of South Florida

Registration /Certification:

- MSHA Certification

BACKGROUND:

Samantha Blonder is an Environmental Specialist with 4 years of experience gained while serving as a Research Assistant on projects for the Coastal Watershed Institute in Fort Myers, Florida, as an Argo Research Scientist for Heliae in Phoenix, Arizona, and as a Research Assistant-Team Lead while employed at Arizona State University. In 2016, Ms. Blonder served as a volunteer for Lead Adventures South America Galapagos Islands where she assisted in invasive species removal, cultural and environmental education outreach, and sustainable farming. In her role as an Environmental Specialist at WestLand, Ms. Blonder supports the environmental team working a wide variety of water focused projects with special expertise in: Endangered Species Act (ESA); National Environmental Policy Act (NEPA); Clean Water Act (CWA); Conservation Plans; Field Work; Data Collection and Data Entry; and Water Quality Collection and Analysis.

SELECTED EXPERIENCE:

Harquahala Valley Water Project Environmental Assessment. Environmental Specialist. WestLand Resources was hired by HVWP Management LLC to prepare an Environmental Assessment (EA) for the Harquahala Valley Water Project. The HVWP proposes to develop infrastructure required to pump groundwater from the Harquahala Irrigation Non-Expansion Area and to convey the pumped groundwater to the Central Arizona Project (CAP Canal). This project includes public scoping, an administrative draft of the EA, a draft EA for public comment, and a final EA.

Oro Valley Water Utility Northwest Recharge, Recovery and Delivery System (NWRDSD) Design. Environmental Specialist. The WestLand Resources and Carollo Engineering team was hired by the Town of Oro Valley for the design of the NWRDSD project. The team is providing design services for approximately 6-miles of transmission pipeline. Additionally, the team is designing the distribution main connections downstream of the proposed booster at Shannon into existing Oro Valley Water Utility distribution mains at Naranja and Tangerine Road.

Resolution Copper, LEX Phase I ESA Updates. Environmental Specialist. WestLand was contracted to conduct Phase I Environmental Site Assessments (ESAs) for a set of properties considered in the Resolution Project Land Exchange between Resolution Copper and two federal land management agencies. Work on this project includes environmental agency records review, interviews with persons familiar with the sites, site reconnaissance, and report preparation.
