EXECUTIVE SUMMARY

WestLand Resources, Inc. (WestLand) was contracted by Resolution Copper Mining LLC (the “User”) to perform a Phase I Environmental Site Assessment (ESA) for approximately 640 acres referred to as East Clear Creek (“the Property”). The Property comprises the entirety of Section 9 in Township 14 North, Range 12 East relative to the Gila and Salt River Baseline and Meridian, in Coconino County, Arizona (Figure 1). The Coconino County Assessor Parcel Number (APN) for the Property is 403-13-006E. An aerial photograph showing the boundary of the Property is included as Figure 2. Representative ground photographs depicting the site and vicinity are provided in Appendix A.

This Phase I ESA has been completed in accordance with the guidelines provided in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property (ASTM E 2247-08). The purpose of this work was to identify the presence or potential presence of recognized environmental conditions (RECs) resulting from past or present activities. According to ASTM guidelines, a REC is defined as “…the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.”

FINDINGS

Environmental Liens/Activity and Use Limitations. WestLand engaged Environmental Record Search (ERS) to conduct a search of available land title records for environmental liens and activity and use limitations (AULs) at the Property. A search for environmental liens and AULs was completed for Coconino County APN 403-13-006E; no records of environmental liens or AULs associated with the Property were identified.

Records Review.

Environmental Records. WestLand contracted with ERS to conduct an electronic search of regulatory agency databases for references to the Property and surrounding lands. The database search included standard and additional federal, tribal, state, local, and supplemental database records, as well as ERS proprietary database records. The regulatory agency databases were queried by conducting a search from the boundaries of the Property to the minimum search distance recommended by the ASTM standard. The Property did not appear on any of the databases searched. One database record occurs within the ASTM-recommended distance from the Property boundary: a U.S. Bureau of Reclamation oil and gas well site that is less than 0.1 miles from the Property. This site is reported in the OGW-AZ database (Arizona Oil and Gas Wells identified by the Arizona Geological Survey). The records provided for this site indicate that a permit was obtained to drill a well reportedly used for stratigraphic
testing in May 1966 (geologic exploration in connection to potential oil and gas development). The lease number associated with this site is “01 Mack’s Crossing” which refers to the name of a river crossing west of the west boundary of the Property. This record does not suggest this well is associated with monitoring or testing for releases of hazardous materials or petroleum products. It is possible that lubricants and fuel could have been spilled on adjoining land when this well was drilled but any releases would likely be of a *de minimis* nature.

**Prior Environmental Report.** A prior Phase I ESA was conducted by Golder Associates Inc. (Golder), in May 2005 (Golder 2005). The results of the 2005 Phase I ESA indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. Specific records of timber harvesting (logging) are not readily available, but anecdotal information refers to timber harvesting on the Property in the past. The only potential environmental concerns identified by Golder were: (1) the unlikely possibility that upstream activities might introduce contaminants in East Clear Creek. The site owner would not be liable for this potential contamination, though the Property could be adversely affected; and (2) lubricants and fuel could have been spilled on the Property during the years in which active logging occurred. Golder concluded that, these releases, if extant, were and continue to be of a *de minimis* nature. WestLand agrees with this assessment.

**Physical Setting.** The Property is located along the canyon floor and adjacent upland areas of East Clear Creek approximately 30 miles north of Payson and 38 miles southwest of Winslow in Coconino County. The Property consists of approximately 640 acres (259-ha). The Property lies in the East Clear Creek-Clear Creek sub-basin within the Little Colorado River watershed. The Property is located within the Little Colorado River sub-basin of the Little Colorado River Plateau groundwater basin, which covers a large swath of land in Coconino, Navajo, and Apache counties. Groundwater flow direction is from south to north in this portion of the basin.

Through and within the vicinity of the Property, East Clear Creek has carved a canyon approximately 600 feet deep through Precambrian sedimentary rocks of the plateau. Numerous named and unnamed tributaries both on- and off-site display similar landform characteristics. The Property elevation ranges from about 6,195 feet above mean seal level (amsl) in the streambed as it exits the Property near the northeastern corner to about 6,820 feet amsl in the uplands near both the southwestern and the northwestern corners.

The Arizona Department of Water Resources (ADWR) Well Registry spatial database was queried to review any data for wells within the boundaries of the Property. There are no registered wells at the Property. Numerous wells are registered with the ADWR in the adjacent section to the northwest (Section 5), which contains a portion of the Starlight Pines subdivision. Most of these wells are between 600 feet and 800 feet deep, with water levels typically ranging between 500 feet and 650 feet below ground surface (bgs).
The ADWR Well Registry indicates there are no water wells including quality monitoring wells at the Property or in the immediate vicinity of the Property. The nearest wells serve the residential community northwest of the Property. In 2015, a water quality monitoring station was observed by WestLand during a separate site visit for the Property, in Section 8, on adjoining land near the northwestern corner of the Property. This is presumed to be a water monitoring station referred to in the prior Phase I ESA near Mack’s Crossing (Golder 2005) and appears to be a surface water capture sampling station on adjoining land.

Analytical results from water quality sampling in 1976 suggest that all chemical constituents in East Clear Creek are within acceptable water quality standards for the support of cold water fisheries habitat (Golder 2005). More recent data from the EPA suggests that water quality in East Clear Creek is fully supportive of agricultural use; fish, shellfish, and wildlife protection and propagation; and primary contact recreation (Golder 2005).

**Historical Use.** WestLand identified a Bureau of Land Management (BLM) record maintained by the General Land Office (GLO) for a Record of Patent (BLM 1955) for the Property (and extensive other tracts of land) to the Santa Fe Pacific Railroad Company pursuant to the Act of July 27, 1866, for the purpose of constructing a railroad and telegraph line from Missouri and Arkansas to the Pacific Coast. There is no evidence the Property was developed in connection with the railroad or that railroad facilities occur on adjoining Property or immediately upstream of the Property. According to the ownership history records provided by the Coconino County Assessor’s Office, the parcel was split from APN 403-13-006C. Phelps Dodge Company owned the Property from at least 1970 until 2001, when it was sold to Blue Ridge 800 LLC and on the same day Canyon Point LLC (Coconino County 2015). Clear Creek 640 LLC acquired the Property in 2002 and sold it to the Trust for Public Land in 2005, and on the same day the Trust for Public Land sold the Property to Swift Current Land & Cattle LLC (a subsidiary of Resolution Copper Mining LLC). Available information suggests that none of these latter owners used the Property for any active purpose. It is likely that after divestment by the railroad company the Property was held for water rights or investment purposes, but has been used informally by the public (e.g., trespassers) for the recreational purposes.

WestLand reviewed a recent cultural resource inventory report available for the Property that includes archaeological research and results of prior record searches (WestLand 2016). The historical map review for the cultural resource inventory report revealed no cultural resources within the Property with the exception of native archaeological culture sites, although one historical feature was identified just outside the Property. The GLO plat surveyed in 1893 depicts a “Log House” in the southwest quarter of the southwest quarter of Section 4, Township 14 North, Range 12 East, just north of the Property (Drummond 1895). Recent development has not occurred at the Property. Dirt roads are the only developed, formal use. Survey reports completed since the 1970s for the Property and vicinity provide some indication of planned use of land in the area. The Coconino National Forest and
Non-Federal Parcel – East Clear Creek  
Coconino County, Arizona  
Phase I Environmental Assessment

Museum of Northern Arizona site files were reviewed to identify previous surveys and previously recorded sites in the vicinity of the Property. Previous surveys in the vicinity (within one mile from the Property) have been conducted by the Coconino National Forest, Arizona State University, and SEC, Inc., and Environmental Consultants. Two of the surveys were associated with timber sales in the area. Two were USFS projects involving “Planning Units” and “Treatment Areas,” although the USFS reports do not further elaborate on the descriptions of the projects. These previous projects appear to be linear surveys associated with land at the southeast portion of the Property and may have been associated with road construction or maintenance. Two of the previous surveys were conducted in preparation for road maintenance or the obliteration of existing roads. One prior survey was for the construction of stock tanks associated with grazing allotments on adjoining land.

WestLand reviewed publications available from the USFS regarding the Property and immediate vicinity to determine past land use. As part of the National Forest System, the Coconino National Forest is managed for multiple uses, ranging from recreation to resource procurement (such as logging). Logging has historically been conducted in the vicinity of the Property, with the most recent timber sale (identified as the Holder sale, along FR 137 south of the Property) in the late 1980s (USFS 1987). A project to reduce fuel loads in the 64,000 acres (26,000 hectares) comprising the watersheds upstream of the C. C. Cragin dam was planned for late 2015 (USFS 2015a). The Coconino National Forest is included in the Four Forest Restoration Initiative (4FRI), a comprehensive plan to create landscape-scale restoration approaches that will provide for fuels reduction, forest health, and wildlife and plant diversity (USFS 2015b). None of the publications available from the USFS reviewed by WestLand indicate use of hazardous materials or petroleum products at the Property.

The Property is mostly surrounded by federal lands managed as open space by the USFS as part of the Coconino National Forest, with privately held parcels (sections) to the northwest and southeast (Figure 1). Starlight Pines, a low-density residential subdivision, occupies the section of land adjoining the Property to the northwest. The section of land to the southeast appears to be open space; the only improvement appears to be dirt roads.

There is no evidence of an established town historically in the immediate vicinity or of homesteading or other residential use of the Property. The Property has likely been subject to logging, grazing, and dispersed recreational use overtime (hiking, fishing, and camping). A stock tank near the southern Property boundary indicates that the Property has been used for grazing; it is also within the Bar T Bar grazing allotment (AGFD 2015) but has not been used for grazing for at least 10 years (Dan Mead, pers. comm.). WestLand obtained the property tax maps and parcel detail reports for the Property from the Coconino County Assessor. This information indicates the Property does not have any issued building permits. It is possible that lubricants and fuel could have been spilled on the Property during the years in which active logging occurred. However, we concur with prior assessments that these releases, if they occurred, would likely be of a de minimis nature. Additionally, cattle grazing likely
occurred in the past at the Property; however, there was no indication that a ranch headquarters was located at the Property where spills of hazardous materials or petroleum products would be likely. Additionally, there was no evidence of corrals or dipping vats to suggest the use of parasitic prevention or treatment application to cattle at the Property. Any releases of hazardous material or petroleum products in connection to recreational activities at the Property and in the immediate vicinity of the Property (overland vehicle use, hiking, fishing and camping) if they occurred, would likely be of a de minimis nature not suspected to have resulted in a REC.

Site Reconnaissance. WestLand environmental specialists Diana Sandoval and Sarah Richman conducted field reconnaissance of the Property on June 8 and June 9, 2016, to observe current site conditions and existing environmental conditions for the Property. Access to the Property is only provided by lengthy primitive dirt roads or overland hiking across rugged terrain. Anthropogenic improvements on the Property were not observed with the exception of roads and informal fire pits. Very limited quantities debris were found in scattered areas north of the Property. However, these items were either comprised of inert materials (e.g., aluminum cans and glass) or present in small quantities (i.e., a single spray paint can). Field observations were consistent with the findings of WestLand's historical review of the Property and surrounding properties.

Interviews. Interviews were conducted with the report User and owner and the local fire department. Mr. Dan Mead, a land specialist who is familiar with the Property, was not interviewed for this Phase I ESA but information provided by him for other reports on the Property was incorporated as appropriate. Based on the knowledge of, and experience related to, the Property, none of the interviewees were aware of indicators that point to the likely presence of contamination on the Property. None of the interviews revealed information that indicated the likely presence of contamination on the Property.

The report User is also the land owner. Swift Current Land and Cattle LLC is the land owner and a subsidiary of Resolution Copper Mining LLC. Ms. Casey McKeon completed the User questionnaire and provided responses to a separate owner questionnaire, as representative of Resolution Copper Mining LLC. Ms. McKeon indicated that to her knowledge, the Property has been vacant and not used for development other than historical use for recreation and logging. There has been no evidence to suggest, or any knowledge that hazardous materials or petroleum products were stored or used at the Property. The User notes that there is a possibility that small quantities of hydrocarbons were stored or used on site during past logging; however, no evidence of any storage or use of these product at the Property has been identified. The User noted it is possible that small incidental releases associated with the potential use of hydrocarbons may have occurred, though there is no evidence of any such releases was observed. No other commonly known or reasonably ascertainable information relevant to potential RECs was provided by the User.
The report User provided copies of title information in connection to the Property including an ALTA Standard Owners 1992 policy of insurance, dated April 15, 2005, and amended May 17, 2005. The title documents include a list of Schedule B requirements and exceptions which typically list known land encumbrances (i.e., taxes, deed restrictions, easements, liens) and may provide an indication of the potential for contamination at the Property. Based on WestLand’s review of the listed standard and specific encumbrances, none readily indicate the release or threat of a release of a hazardous material or petroleum product at the Property.

WestLand also conducted an interview with a local government official: Ms. Cat Sobel of the Blue Ridge Fire District. The fire district was contacted to inquire about any responses to the Property or adjoining properties with regard to fuel/chemical spills or if they were aware of any chemical or petroleum product storage at the Property. On April 22, 2016, Cat Sobel (Blue Ridge Fire District, info@brfdaz.org) reported that they have no knowledge of spills or storage at the Property or on land in the immediate vicinity.

**Recognized Environmental Conditions**

WestLand has performed this Phase I ESA in conformance with the scope and limitation of ASTM E 2247-08 for the Property. This assessment has revealed no evidence of RECs in connection with the Property.
I. INTRODUCTION

WestLand Resources, Inc. (WestLand) was contracted by Resolution Copper Mining, LLC (the “User”) to perform a Phase I Environmental Site Assessment (ESA) for approximately 640 acres referred to East Clear Creek (“the Property”). The Property comprises the entirety of Section 9 in Township 14 North, Range 12 East, relative to the Gila and Salt River Baseline and Meridian, in Coconino County, Arizona (Figure 1). The Coconino County Assessor Parcel Numbers (APN) for the Property is 403-13-006E.

I.1. PURPOSE

The purpose of this investigation was to conduct an assessment of the Property and surrounding areas to identify Recognized Environmental Conditions (RECs) potentially resulting in environmental impacts to the Property. According to the American Society for Testing and Materials (ASTM) E 2247-08 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property, a recognized environmental condition is defined as: “…the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.” This term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The results of an investigation may be utilized as part of the due diligence investigation for prospective property owners promulgated pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a. Superfund), the Superfund Amendments and Reauthorization Act of 1986 (SARA), and the Small Business Liability Relief and Brownfield’s Revitalization Act of 2002 (the Brownfield Amendments). This ESA is intended to assist the User in satisfying the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations of CERCLA. The Property owner has continuing obligations, if applicable, to receive liability protections in addition to the All Appropriate Inquiry (40 CFR Part 312). The continuing obligations include: 1) compliance with land use restrictions; 2) not impeding the effectiveness or integrity of institutional controls; 3) taking reasonable steps to prevent releases; 4) providing assistance and access to the U.S. Environmental Protection Agency (EPA), state, or other parties conducting response or restoration actions; 5) complying with CERCLA information requests and subpoenas; and 6) providing legally required notices.
1.2. **SCOPE OF SERVICES**

This ESA has been completed in accordance with the guidelines provided in the ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property* (ASTM E 2247-08). This standard satisfies the requirements of the EPA *All Appropriate Inquiry* provisions, which became effective November 1, 2006 (40 CFR Part 312). This protocol requires the review of readily available environmental records, historical and current land use, interviews with persons knowledgeable about the Property, and a field reconnaissance to observe on-site conditions and adjoining properties.

The User of this report has responsibilities for addressing some of the mandatory provisions of the standard. ASTM E 2247-08 Section 6 (User Responsibilities) describes tasks that will help identify the possibility of RECs in connection with the Property that do not require the expertise of an environmental professional, including checking title records for environmental liens and activity and use limitations (AULs). The User provided certain title records to WestLand. WestLand also commissioned a search for environmental liens and AULs by a title professional on behalf of the User; see Section 3.

This ESA does not assess ASTM non-scope considerations, including asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality (including vapor intrusion), biological agents, mold, or other nuisances.

1.3. **LIMITATIONS AND EXCEPTIONS**

This Phase I ESA evaluates potential sources of hazardous substances or petroleum products that could be considered a REC and a liability due to their presence in significant concentrations, or the potential for contamination migration through exposure pathways. Unless otherwise noted, this assessment did not include any testing or sampling of materials. Hazardous substances occurring naturally are not typically considered. This report is intended to provide further recommendations regarding potential RECs related to the Property; conclusive identification of hazardous substances and petroleum products can be accomplished only through sampling and laboratory analysis.

Field reconnaissance does not provide information regarding potential sources of contamination below the ground surface. However, in cases of subsurface contamination, aboveground indicators such as obvious stress to plant life or staining are noted. All findings are based on observations and information collected at one point in time and is based on conditions during the site visit. A change of those conditions may alter the findings and conclusions of this report.
A Phase I ESA cannot, within its scope of assessment, wholly eliminate uncertainty regarding the potential presence of RECs. WestLand believes that the information in this report is reliable; however, WestLand cannot guarantee that the information provided by all the sources contained in this report is complete and accurate. This report is intended to decrease, but not eliminate, uncertainty regarding the potential for RECs in connection with a property given reasonable limits of cost and time, and in a manner consistent with the customary practices of the environmental consulting industry, under similar circumstances at the time services were performed and in similar localities. It should be noted that the conditions at the Property could change as a result of natural processes or be altered by human activities at the Property and/or nearby sites.

1.4. **SPECIAL TERMS AND CONDITIONS**

No special terms or conditions are associated with this report.

1.5. **USER RELIANCE**

This Phase I ESA has been prepared for use by Resolution Copper Mining LLC. This ESA may not be relied upon by any other person or entity without the written consent of WestLand.

1.6. **CONTINUED VIABILITY**

Due to the nature of Phase I ESA inquiries, their useful life is limited. ASTM E 2247-08 guidelines require that certain components of a Phase I ESA be completed less than 180 days prior to the date of acquisition or (if no acquisition is involved) the intended transaction. The following components of the Phase I ESA are presumed valid only within 180 days prior to the date of acquisition or other intended transaction:

- Interviews
- Searches for environmental liens
- Government records review
- Site reconnaissance
- Declaration by the environmental professional

• Interviews
• Searches for environmental liens
• Government records review
• Site reconnaissance
• Declaration by the environmental professional

Other components of the Phase I ESA are valid for one year. The above-listed components can be separately updated in order to eliminate redundant environmental due diligence efforts within one year. After one year has passed, all Phase I ESA components should be redone. The prior ESA report may be used as a reference during completion of the new investigation and analysis.
2. SITE DESCRIPTION

This section describes the location, general characteristics, and current uses of the Property. The current uses of adjoining properties are also described. Photographs depicting the Property and vicinity are provided in Appendix A. A recent aerial photograph depicting the Property and near vicinity is provided as Figure 2. The approximate locations of the ground photographs with GPS locations shown in Appendix A are provided on Figure 3.

2.1. LOCATION AND LEGAL DESCRIPTION

The Property is located along the canyon floor and adjacent upland areas of East Clear Creek approximately 30 miles north of Payson and 38 miles southwest of Winslow in Coconino County. The Property is located in Section 9 of Township 14 North, Range 12 East, relative to the Gila and Salt River Baseline and Meridian, Coconino County, Arizona (Figure 1). The Coconino County APN for the Property is 403-13-006E.

2.2. SITE AND VICINITY GENERAL CHARACTERISTICS

The Property consists of approximately 640 acres including a 2.3-mile perennial reach of East Clear Creek in a narrow canyon. The Property also includes additional minor tributaries that are likely ephemeral to intermittent. The Property is surrounded by Coconino National Forest lands. There is no evidence of an established town in the immediate vicinity or of homesteading or other residential use of the Property. The Property has been subject to logging, grazing, and dispersed recreational (hunting, fishing, camping) use.

2.3. CURRENT USE OF THE PROPERTY

Currently, the Property is used as open-space, with no formal developed use. There are indications of recreational use such as camping, hiking and overland vehicle at the Property. A stock tank near the southern Property boundary indicates that the Property has been used for grazing; it is also within the Bar T Bar grazing allotment (AGFD 2015) but has not been used for grazing for at least 10 years (Dan Mead, pers. comm.).

2.4. DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

Developed features at the Property are limited. Access to the Property is only provided by primitive dirt roads or overland hiking across rugged terrain. Developed features include dirt roads and camp fire pits.
2.5. **CURRENT USES OF ADJOINING PROPERTIES**

Adjoining properties are mostly comprised of federal lands managed as open space by the USFS as part of the Coconino National Forest. Starlight Pines, a low-density residential subdivision, occupies a section of land adjoining the Property to the northwest. A privately held section also occurs to the southeast (Figure 1).
3. USER PROVIDED INFORMATION

The report User is Resolution Copper Mining LLC who provided relevant information about the Property. Swift Current Land and Cattle LLC is the land owner and a subsidiary of Resolution Copper Mining LLC. The User contact is Ms. Casey McKeon. A copy of the User Questionnaire and a copy of an owner questionnaire is provided as Appendix B.

3.1. TITLE RECORDS

The report User provided copies of title information in connection to the Property including an ALTA Standard Owners 1992 policy of insurance, dated April 15, 2005 and amended May 17, 2005 (Appendix C). This policy appears to have been issued for the land transaction between Swift Current Land & Cattle LLC from Clear Creek 640, LLC. The title documents include a list of Schedule B requirements and exceptions which typically list known land encumbrances (i.e., taxes, deed restrictions, easements, liens) and may provide an indication of the potential for contamination at the Property. Based on WestLand’s review of the listed standard and specific encumbrances, none readily indicate the release or threat of a release of a hazardous material or petroleum product at the Property.

WestLand reviewed the current deed for the Property. The Warranty Deed for the Property was executed October 12, 2005, and recorded the same month, conveying ownership from the Trust for Public Land to Swift Current Land & Cattle LLC. A copy of the deed is included with Appendix D.

WestLand identified a Bureau of Land Management (BLM) record maintained by the General Land Office for a Record of Patent (BLM 1955) for the Property (and extensive other tracts of land) to the Santa Fe Pacific Railroad Company pursuant to the Act of July 27, 1866, for the purpose of constructing a railroad and telegraph line from Missouri and Arkansas to the Pacific Coast. There is no evidence the Property was developed in connection with the railroad or that railroad facilities occur on adjoining Property or immediately.

According to the ownership history records provided by the Coconino County Assessor’s Office, the parcel was split from APN 403-13-006C. Phelps Dodge Company owned the Property from at least 1970 until 2001, when it was sold to Blue Ridge 800 LLC and on the same day Canyon Point LLC (Coconino County 2015). Clear Creek 640 LLC acquired the Property in 2002 and sold it to the Trust for Public Land in 2005, and on the same day the Trust for Public Land sold the Property to Swift Current Land & Cattle LLC (a subsidiary of Resolution Copper Mining, LLC). Available information suggests that none of these latter owners used the Property for any active purpose. It is likely that after divestment by the railroad company the Property was held for water rights or investment purposes, but has been used informally by the public (e.g., trespassers) for the recreational purposes.
3.2. **Environmental Liens or Activity and Use Limitations**

The User is not aware of any environmental liens or activity and use limitations (AULs) for the Property. On April 29, 2016, WestLand engaged Environmental Record Search (ERS), to conduct a search of available land title records for environmental liens and AULs at the Property. A search for environmental liens and AULs was completed for Coconino County APN 403-13-006E; no records of environmental liens or AULs associated with the Property were identified (Appendix D).

3.3. **Specialized Knowledge**

The User indicated they do not have personal or institutional knowledge of environmental concerns at the Property.

3.4. **Commonly Known or Reasonably Ascertainable Information**

The User reported recreational use and logging are historic uses thought to have occurred at the Property. There has been no evidence to suggest, or any knowledge that hazardous materials or petroleum products were stored or used at the Property. The User notes that there is a possibility that small quantities of hydrocarbons were stored or used on site during past logging; however, no evidence of any storage or use of these products at the Property has been identified. The User also noted that it is possible that small incidental releases associated with the potential use of hydrocarbons may have occurred, though no evidence of any such releases is known. No other commonly known or reasonably ascertainable information relevant to potential RECs was provided by the User.

3.5. **Valuation Reduction for Environmental Issues**

The User reports there is no information indicating that the value of the property had been reduced as a result of environmental issues.

3.6. **Reason for Performing Phase I**

The Phase I is being performed to identify recognized environmental conditions requiring additional investigation relating to a land exchange property transaction.

3.7. **Other**

Based on the User’s knowledge of, and experience related to the Property, no obvious indicators point to the presence or likely presence of contamination on the Property of which the User is aware. No other information relevant to potential RECs was provided by the User.
4. RECORDS REVIEW

WestLand reviewed a variety of regulatory records to determine if any past uses of the Property or uses within adjoining areas may have led to RECs on the Property.

4.1. ENVIRONMENTAL RECORD SOURCES

WestLand contracted with ERS to conduct an electronic search of regulatory agency databases for references to the Property and surrounding lands. The database search (Rec Check Area Report Results) was conducted on April 15, 2016, and included standard and additional federal, tribal, state, local, and supplemental database records, as well as ERS proprietary database records. The regulatory agency databases were queried by conducting a search from the boundaries of the Property to the minimum search distance recommended by the ASTM standard. A copy of the ERS environmental reports that describes the databases searched, search distances, record details for the search results, and the dates the databases were last updated are provided in Appendix E.

The Property did not appear on any of the databases searched. One database record occurs within the ASTM-recommended distance from the Property boundary: a U.S. Bureau of Reclamation oil and gas well site that is less than 0.1 miles from the Property. This site is reported in the OGW-AZ database (Arizona Oil and Gas Wells identified by the Arizona Geological Survey). The records provided for this site indicate that a permit was obtained to drill a well reportedly used for stratigraphic testing in May 1966 (geologic exploration in connection to potential oil and gas development). The lease number associated with this site is “01 Mack’s Crossing” which refers to the name of a river crossing west of the west boundary of the Property.

4.2. PRIOR ENVIRONMENTAL REPORTS

A prior Phase I ESAs was conducted by Golder Associates Inc. in May 2005 (Golder 2005). The results of the 2005 Phase I ESA indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. The only potential environmental concerns identified by Golder were:

1. The unlikely possibility that upstream activities might introduce contaminants in East Clear Creek. The site owner would not be liable for this potential contamination, though the Property could be adversely affected.

2. Lubricants and fuel could have been spilled on the Property during the years in which active logging occurred. These releases, if extant, would be of a de minimis nature.
4.3. Physical Setting

The Property’s physical setting was reviewed by WestLand to gain a comprehensive understanding of the Property’s geophysical characteristics. These geophysical characteristics, including surface topography, soils, geology, hydrology, and hydrogeology would inform the potential for migration of hazardous substances and petroleum products.

The Property is situated within the Colorado Plateau physiographic province north of the Mogollon Rim in central Arizona. Through and within the vicinity of the Property, East Clear Creek has carved a canyon approximately 600 feet deep through Precambrian sedimentary rocks of the plateau. Numerous named and unnamed tributaries both on- and off-site display similar landform characteristics. The Property elevation ranges from about 6,195 feet above mean sea level (f.eet amsl) in the streambed as it exits the Property near the northeastern corner to about 6,820 feet amsl in the uplands near both the southwestern and the northwestern corners.

The East Clear Creek watershed between C. C. Cragin Dam and the Property encompasses about 37.7 square miles. The highest elevations within the upper reaches of this watershed are Moqui Ridge (7,435 feet) and an unnamed point on the Mogollon Rim above the headwaters of Yeager Canyon (7,905 feet), both southwest of the Property. The main upstream tributaries are streams in Moqui Draw, Yeager Canyon, Barbershop Canyon, Dick Hart Draw, Houston Draw, Bear Canyon, General Springs Canyon, and Miller Canyon. Downstream tributaries are streams in Leonard Canyon and Wilkins Canyon, as well as Willow Creek.

Similar to most streams in this area of the Colorado Plateau, East Clear Creek follows a meandering path in a generally northeasterly direction toward the Little Colorado River. The Little Colorado River drains the Holbrook Basin, a large geologic feature tilted slightly to the northwest. At the landscape-scale the Colorado Plateau surface in this area is flat to gently rolling, but is locally incised by small-to medium-sized streams. The stream canyons are up to 600 feet deep and, depending upon geologic substrate, canyon walls may be steeply sloped up to and including vertical cliff faces.

Through the Property, East Clear Creek displays characteristics similar to its up- and downstream segments. The channel displays a high degree of sinuosity, 2.24, as it travels approximately 12,150 feet over a straight-line distance of 5,400 feet. The channel bed of Cave Creek within the Property is relatively level (0.005 percent gradient), dropping only about 65 feet in that distance. The elevation of East Clear Creek channel as it enters the western, upstream portion of the Property is about 6,260 feet. As it leaves the eastern, lowest portion of the Property, the elevation is 6,195 feet.
4.3.1. Soils

Soil data provided by the National Cooperative Soil Survey through Web Soil Survey (Soil Survey Staff 2015) indicate that the Property is located within six soil complexes, including Wildcat soils and the Jack-Tortugas complex. The soil complexes occur on high mountainous areas of the Coconino and Colorado plateaus. Limestone and sandstone rock comprise (Ls) 80 percent of the Property’s acreage.

Wildcat soils (WcB) formed in residuum weathered from Coconino sandstone or Kaibab formation. Wildcat soils are on upland exposures of sandstone with slopes that range from 1 to 15 percent. They are gravelly fine sandy loam and somewhat poorly drained, with slow to very slow permeability.

The Jacks-Tortugas complex (JtE) is well drained with moderate to low permeability. Jacks soils comprise 30 percent and Tortugas soils approximately 25 percent of this complex. The Jacks series consists of deep, well-drained soils on uplands. Slopes are dominantly 0 to 15 percent and range from 0 to 45 percent. Permeability is slow. The Tortugas series consists of very shallow and shallow, well-drained, moderately rapid permeability soils formed from limestone, calcareous sandstone, and shale on gently rolling ridges to very steep hills. Slopes are 0 to 75 percent.

The other soil complexes each comprise less than 2 percent of the Property’s acreage (Soil Survey Staff 2015).

4.3.2. Geology

The geology of East Clear Creek within the Leonard Canyon 7.5-minute quadrangle has not been mapped in detail. Darton was the first to map the region, and named many of the major geologic units (Darton 1910). At the regional level, Darton mapped the reach of East Clear Creek that encompasses the Property as Permian-age Kaibab limestone. This unit covers a broad swath of the Colorado Plateau in an arc through the southwestern portion of the Holbrook Basin. Quaternary and Tertiary volcanic rocks lie farther to the west and southwest, defining the western edge of the basin. Later mapping identified the Kaibab unit extending throughout the southwestern U.S., ranging from northern Arizona into southern Utah, eastern-central Nevada, and southeastern California.

The surface geology underlying the Property is mapped as Permian sedimentary rocks (270-280 Ma) (AZGS 2011). Permian sedimentary rocks consist of gray to tan, cherty limestone of Kaibab and Toroweap Formations, and underlying white to tan, fine-grained Coconino Sandstone. Limestone was deposited in a shallow sea and sandstone was deposited in near-shore dunes and beach settings (Richard et al 2000).

No faults have been mapped by the Arizona Geological Survey on or near the Property. As described above, East Clear Creek follows a sinuous path for much of its length, including through the Property, and likely does not follow a fault line.
4.3.3. Hydrology

The Property lies in the East Clear Creek-Clear Creek sub-basin within the Little Colorado River watershed. The watershed occupies much of the northeastern portion of Arizona (ADWR 2016). The Little Colorado River is the main drainage for the basin.

The East Clear Creek channel within the Property is identified as a substantial perennial tributary of the Little Colorado River located approximately 71 river miles downstream (generally northeast) of the Property. The Property also includes additional minor tributaries that are likely ephemeral to intermittent. Water was flowing through the entire length of East Clear Creek that lies within the Property during field visits completed by WestLand in 2015 and 2016. A U.S. Geological Survey (USGS) stream flow gauge on East Clear Creek below the confluence with Willow Creek, some 9.5 miles downstream of the Property and within a 317-square mile watershed, indicates wide monthly variations in flow over the course of the year (USGS 2015). Peak flows at the station occur in February and March; the lowest flows occur in June and July. Notably, low flows in these and other months can be zero, indicating that whatever base flow is released from the C. C. Cragin Dam is lost over the distance from the dam to the gauge. Peak flows are likely due to snowmelt in higher elevation portions of the basin, flowing through numerous tributaries to East Clear Creek. It appears that the main stem of East Clear Creek itself does not contribute substantively to the peak flows, as the dam intercepts snowmelt from upstream of that location and apparently does not typically overtop.

The USGS stream gauge in East Clear Creek at Willow Creek, well downstream from the Property, records a more variable stream flow at that location than expected here. It is possible that natural conditions present broadly through the 317-square mile watershed that reports to that gauge outweigh the effects of the C. C. Cragin Dam on the 109-square mile watershed that reports to the Property.

The National Wetlands Inventory Map identifies approximately 14.15 acres of wetlands within the Property (USFWS 2015).

The Property is mapped by FEMA as Zone X, an area of minimal flood hazard (FEMA 2010).

4.3.4. Hydrogeology

The Property is located within the Little Colorado River sub-basin within the Little Colorado River Plateau groundwater basin, which covers a large swath of land in Coconino, Navajo, and Apache counties. Groundwater flow direction is from south to north in this portion of the basin. There are three regional aquifers within the watershed including D-, N-, and C-aquifers. The Property is located within the regional C-aquifer. This aquifer is located in sedimentary formation of sandstone and limestone that are stacked and separated by impermeable shales and siltstones. Recharge to the aquifer occurs primarily along mountain fronts along the southern periphery of the basin (ADWR 2016). The
C-aquifer is considered in hydrostatic equilibrium (steady-state); however, local groundwater sinks or cones of depression are developing in areas of heavy pumpage (ADWR 2016).

The Arizona Department of Water Resources (ADWR) Well Registry spatial database was queried to review any data for wells within the boundaries of the Property. There are no registered wells at the Property. The search area was expanded to 1-mi (1.6-km) and 47 wells were identified (ADWR 2016). Water level records for these wells generally range between 500 and 700 ft bgs. The average depth to water is 582 ft. The median well yield from large wells (greater than 10-inch is 500 gpm for the entire basin.

Numerous wells are registered with the ADWR in the adjacent section to the northwest (Section 5), which contains a portion of the Starlight Pines subdivision, described above. These wells presumably produce water to support the residences in the subdivision. Most of these wells are between 600 feet and 800 feet deep, with water levels typically ranging between 500 feet and 650 feet bgs.

No water quality data was available for the Property. The ADWR Well Registry indicates there are no water quality monitoring wells at the Property or in the immediate vicinity of the Property. However, in 2015, a water quality monitoring station was observed by WestLand during other site visits completed for the Property, on adjoining land in Section 8, near the northwestern corner of the Property. The ADWR online Well Registry (ADWR 2015) does not identify any wells within Section 8. Analytical results from water quality sampling in 1976 suggest that all chemical constituents in Clear Creek are within acceptable water quality standards for the support of cold water fisheries habitat (Golder 2005). More recent data from the EPA suggests that water quality in East Clear Creek is fully supportive of agricultural use; fish, shellfish, and wildlife protection and propagation; and primary contact recreation (Golder 2005).

4.4. **Historical Use Information on the Property and Adjoining Properties**

The purpose of reviewing historical sources is to develop a history of the previous uses of a property and surrounding area in order to help identify past uses that may have led to RECs in connection with the Property. According to the ASTM standard, obvious uses of a property shall be identified from the present back to the property’s first developed use, or back to 1940, whichever is earlier. This requires reviewing only as many standard historical sources as are reasonably ascertainable and likely to be useful.

4.4.1. **Historical Topographic Maps**

WestLand reviewed USGS topographic maps of the Property and its vicinity dated 1965, 1998, and 2014 (Appendix F). USGS topographic map coverage for the Property is provided on the Leonard Canyon 7.5-minute quadrangles at a 1:24,000 scale. Topographic maps depict both natural and
developed features, including wells, structures, and other indications of historical use. The summary below presents WestLand’s review of the identified mapped features on or near the Property in chronological sequence.

The 1965 Leonard Canyon 7.5-minute quadrangle (1:24,000 scale) depicts the Property and surrounding area to the east, south, and north. The Property is depicted as undeveloped land other than an unimproved road that enters the Property from the south and travels northeast onsite into the southern portion of the Property. Various other unimproved roadways and trails are shown in the area surrounding the Property to the east, south, and west. The only developed feature depicted on this map is Morgan Tank, located approximately one mile south of the Property. Mack’s Crossing is identified on adjoining land to the west of the Property, along Clear Creek. This appears to identify the location of a trail crossing along an old pack trail, which extends to the south without entering the Property.

The 1998 Leonard Canyon 7.5-minute quadrangle (1:24,000 scale) depicts the Property in the same conditions as the 1965 quadrangle. Additional roads and trails can be seen in the surrounding area, including the subdivision to the northwest of the Property. Two additional water tanks are present on the surrounding open space (Middle Tank and Fork Tank). The trail across Mack’s Crossing is now identified as an unimproved road.

The 2014 Leonard Canyon 7.5-minute quadrangle (1:24,000 scale) depicts the Property in the same conditions as the 1965 and 1998 quadrangles.

Figure 1 also provides a topographic map of the Property and is dated 1965, but provides additional coverage to the north. Several water tanks are depicted on land north of the Property (Sinkhole Tank and Aztoc Tank). A borrow pit is shown almost one mile east of the highway along an unimproved roadway. The Starlight Pines subdivision was not yet developed at the time the 1965 map was developed.

4.4.2. Historical Aerial Photographs

Development at the Property visible in the aerial photography is extremely limited. None of the aerial photographs definitively display developed features at the Property other than unpaved roads. There
is no evidence on these maps that suggest use of logging or any other intensive anthropological use from at least 1953.

In the 1953 aerial photograph does not readily show any developed feature at the Property. The only developed features on surrounding land include a water tank south of the Property and an unimproved road that is now AZ-260/AZ-87 N, and a small roadway from that road to East Clear Creek at Mack’s Crossing.

The 1968 aerial photograph resembles the 1953 aerial photograph but the dirt road to the Property and along the south-central portion of the Property is apparent. There are no cleared areas adjacent to this road.

Between 1980 and 2014, the condition of the Property appears to be the same. Additional roadways and residential development land west and northwest of the Property is the only subsequent change that is evident on these aerial photographs.

4.4.3. Property Tax Files

WestLand obtained the property tax maps for the Property (APN 403-13-006E) and adjoining areas from the Coconino County assessor using their electronic parcel viewer. The results of the parcel search and relevant property tax information are included as Appendix G. These records indicate the Property is undeveloped land, owned by Swift Current Land & Cattle LLC since 2005. The Property had agricultural tax status in the past. There are no permits noted for the Property from Coconino County.

4.4.4. Local Street Directories

Based on the lack of development in the immediate vicinity of the Property, WestLand did not conduct a city directory search.

4.4.5. Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps typically cover development in the first half of the 20th century. Considering the lack of development at the Property, WestLand did not commission a search for these maps. It is likely no coverage for the Property is available.

4.4.6. Other Historical Sources

WestLand reviewed a recent cultural resource inventory report available for the Property which includes archaeological research and results of prior records searches (WestLand 2016). The historical map review for the cultural resource inventory report revealed no cultural resources within the Property with the exception of native archaeological culture sites, although one historical feature was
identified just outside the Property. The GLO plat surveyed in 1893 depicts a “Log House” in the southwest quarter of the southwest quarter of Section 4, Township 14 North, Range 12 East, just north of the Property (Drummond 1895).

With the exception of the single dirt road noted above, recent development has not occurred at the Property. Survey reports completed since the 1970s for the Property and vicinity provide some indication of planned use of land in the area. The Coconino National Forest and Museum of Northern Arizona site files were reviewed to identify previous surveys and previously recorded sites in the vicinity of the Property. Previous surveys in the vicinity (within one mile from the Property) have been conducted by the Coconino National Forest, Arizona State University, SEC, Inc., and Environmental Consultants. Two of the surveys were associated with timber sales in the area. Two were USFS projects involving “Planning Units” and “Treatment Areas,” although the USFS reports do not further elaborate on the descriptions of the projects. These previous projects appear to be linear surveys associated with land at the southeast portion of the Property and may have been associated with road construction or maintenance. Two of the previous surveys were conducted in preparation for road maintenance or the obliteration of existing roads. One prior survey was for the construction of stock tanks associated with grazing allotments on adjoining land.

WestLand reviewed publications available from the USFS regarding the Property and immediate vicinity to determine past land use. The USFS administers the Coconino National Forest that surrounds the Property with the exception of privately held parcels to the northwest and southeast. As part of the National Forest System, the Coconino National Forest is managed for multiple uses, ranging from recreation to resource procurement (such as logging). Logging has historically been conducted in the vicinity of the Property, with the most recent timber sale (identified as the Holder sale, along FR 137 south of the Property) in the late 1980s (USFS 1987). A project to reduce fuel loads in the 64,000 acres (26,000 hectares) comprising the watersheds upstream of the C. C. Cragin dam was planned for late 2015 (USFS 2015a); it is not known if this effort was completed. The Coconino National Forest is included in the Four Forest Restoration Initiative (4FRI), a comprehensive plan to create landscape-scale restoration approaches that will provide for fuels reduction, forest health, and wildlife and plant diversity (USFS 2015b). None of the publications available from the USFS reviewed by WestLand indicate use of hazardous materials or petroleum products at the Property.
5. SITE RECONNAISSANCE

WestLand environmental specialists Diana Sandoval and Sarah Richman conducted field reconnaissance of the Property on June 8 and June 9, 2016, to observe current site conditions and existing environmental conditions for the Property. Photographs documenting pertinent features are provided in Appendix A.

5.1. Methodology and Limiting Conditions

Prior to conducting the site reconnaissance, WestLand reviewed current and historical aerial photographs and topographic maps, as described in Section 4, to identify the location of any suspect areas, including roadways, cleared areas, disturbed soils, and structures. Areas of known concentrated human activity or with known access routes were assessed in more detail because these areas presented the greatest potential for impacts by hazardous materials and petroleum products.

During the site reconnaissance, WestLand evaluated the suspect areas of site disturbance through vehicle and pedestrian surveys. WestLand’s reconnaissance included the Property, as well as observations of the adjoining properties from publicly accessible areas. Field observations were consistent with the findings of WestLand’s historical review of the Property and surrounding properties.

The Property is accessible from Arizona State Route 87. The Coconino National Forest road network accesses the Property from the south, with Forest Road (FR) 137G entering the Property near the midpoint of the southern boundary. FR 137G appears to be used by high clearance vehicles and off-highway vehicles (OHVs) to access the southern portion of the Property for recreationists’ camping and hunting. FR 319 leads from State Route 87 into the Starlight Pines subdivision, and two informal roads from Elk Lane in the subdivision enter the northern portion of the Property along the ridge above the canyon. An informal extension of the trail continues from Mack’s Crossing into the Property for about 0.25 mile (0.4 km) along the canyon floor on terraces on the north side of the stream. This extension is a two-track trail used by OHV riders. Additional very primitive trails, likely game trails also used by hikers, continue east through the Property along the floodplains and terraces of East Clear Creek, crossing the stream as necessary to avoid cliffs that descend directly to the stream.

Field reconnaissance does not provide information regarding potential sources of contamination below the ground surface. However, in cases of subsurface contamination, aboveground indicators such as obvious stress to plant life or staining are noted. All findings are based on observations and information collected at one point in time and is based on conditions during the site visit. A change of those conditions may alter the findings and conclusions of this report.
5.2. **Indications of Past Uses of the Property**

A stock tank near the southern Property boundary indicates that the parcel has been used for grazing; the parcel is within the Bar T Bar grazing allotment (AGFD 2015) but has not been used for grazing for at least 10 years (Dan Mead pers. comm.) and the tank was not observed during the site reconnaissance in June 2016. Specific records of timber harvesting (logging) are not readily available, but anecdotal information refers to timber harvesting in the past (Golder 2005).

5.3. **Exterior Observations**

5.3.1. **Hazardous Substances and Petroleum Product Containers in Connection with Identified Uses**

No hazardous substances and petroleum product containers in connection with identified uses were observed at the Property or on land immediately adjoining the Property.

5.3.2. **Hazardous Substance and Petroleum Product Containers Not in Connection with Identified Uses**

No hazardous substances and petroleum product containers not in connection with identified uses were observed at the Property or on land immediately adjoining the Property.

5.3.3. **Storage Tanks (Aboveground and Underground)**

No indications of above- or underground storage tanks potentially used for hazardous substances or petroleum products were observed on the Property or on adjoining properties.

5.3.4. **Unidentified Substance Containers**

No unidentified substance containers were observed on the Property or on adjoining properties during the site reconnaissance.

5.3.5. **Drums**

No drums were observed at the Property or on adjoining land visible along public roadways.

5.3.6. **Odors**

No strong, pungent, or noxious odors were detected on the Property or on adjoining properties during the site reconnaissance.
5.3.7. Pools of Liquid, Pits, Ponds, or Lagoons

No pools of liquid, pits, ponds, or lagoons were observed on the Property or on adjoining properties. Furthermore, no such features were observed in connection with waste disposal or treatment.

5.3.8. Wastewater

No features associated with wastewater storage and disposal were observed during the site reconnaissance.

5.3.9. Septic Systems

There is no indication that septic systems are present on the Property.

5.3.10. Wells

No wells were observed at the Property. However, in 2015, a surface water quality monitoring station was observed by WestLand during a separate site visit for the Property, in Section 8, near the northwestern corner of the Property on adjoining land. The ADWR Well Registry does not identify any wells at this location (or within Section 8).

5.3.11. Stained Soil or Pavement

No stained soil or pavement was noted.

5.3.12. Stressed Vegetation

Vegetation across the Property appeared to be in good health. There was no indication of stressed vegetation on the Property or adjoining properties likely attributed to hazardous substances, or petroleum products.

5.3.13. Solid Waste Disposal

The Resource Conservation Recovery Act (RCRA) was enacted by Congress in 1976 and amended in 1984. RCRA’s primary goal is to protect human health and the environment from the potential hazards of waste disposal. Unauthorized solid waste disposal provides the potential for hazardous and regulated substances to impact a property in the absence of waste-generating activities.

The Property appears to be generally clean of solid waste. Very limited quantities of debris were found in scattered areas north of the Property (Appendix A, Photo 4 and Photo 5). However, these items were either comprised of inert materials (e.g., aluminum cans and glass) or present in small quantities (i.e., a single spray paint can)
5.3.14. PCB Equipment

Concern over the toxicity and persistence in the environment of polychlorinated biphenyls (PCBs) led Congress in 1976 to enact §6(e) of the Toxic Substances Control Act (TSCA), which included prohibitions on the manufacture, processing, and distribution in commerce of PCBs. Historically, electrical transformers contained a cooling liquid that had PCBs. If present, electrical transformers or hydraulic equipment could provide the potential for release of PCBs onto the Property. In 1984, manufacturers began producing non-PCB transformers that contain less than 50 parts per million of PCBs.

No equipment likely containing polychlorinated biphenyls (PCBs) (such as coolant or hydraulic fluid) was observed at the Property (e.g., electrical transformers, hydraulic equipment)

5.4. Interior Observations

Not applicable.
6. INTERVIEWS

6.1. INTERVIEW WITH OWNER

The Property is currently owned by Swift Current Land & Cattle LLC; Swift Current Land and Cattle LLC is a subsidiary of Resolution Copper Mining LLC. The report User is Resolution Copper Mining LLC who provided relevant information about the Property. On May 12, 2015, Ms. Casey McKeon of Resolution Copper Mining LLC completed the User questionnaire and a project-specific owner questionnaire generated by WestLand. Ms. McKeon indicated that to her knowledge, the Property has been vacant and not used for development other than historical use for recreation and logging. She is not aware of any information potentially pointing to a REC for the Property. Ms. McKeon indicated that possible small incidental hydrocarbon releases during historic logging maintenance may have occurred, although none have been observed by Resolution or known to have been observed by others. Responses to specific inquiries are included in Appendix B.

6.2. INTERVIEWS WITH OCCUPANTS

Not applicable.

6.3. INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

WestLand contacted the Blue Ridge Fire District to inquire about any responses to the Property or adjoining properties with regard to fuel/chemical spills or if they were aware of any chemical or petroleum product storage at the Property. On April 22, 2016, Cat Sobel (Blue Ridge Fire District, info@brfdaz.org) reported that they have no knowledge of spills or storage at the Property or on land in the immediate vicinity.

6.4. INTERVIEWS WITH OTHERS

No other individuals were interviewed as part of this investigation. Mr. Dan Mead, a land specialist who is familiar with the Property, was not interviewed for this Phase I ESA but information provided by him for other reports on the Property was incorporated as appropriate. Specifically, Mr. Mead previously reported that a stock tank near the southern Property boundary indicates that the Property has been used for grazing; it is also within the Bar T Bar grazing allotment (AGFD 2015a) but has not been used for grazing for at least 10 years (Dan Mead, pers. comm.).
7. FINDINGS AND OPINIONS

Based on the findings of the environmental records search, historical review, physical setting of the Property, field reconnaissance of the Property, prior reports, and interviews, WestLand provides the following findings and opinions pertaining to the Property:

- A search for environmental liens and AULs was completed for Coconino County APN 403-13-006E; no records of environmental liens or AULs associated with the Property were identified.

- ERS conducted an electronic search of regulatory agency databases for references to the Property and surrounding lands. The Property did not appear on any of the databases searched in accordance with the ASTM standard. One database record occurs within the ASTM-recommended distance from the Property boundary: a U.S. Bureau of Reclamation oil and gas well site that is less than 0.1 mile from the Property. This site is reported in the OGW-AZ database (Arizona Oil and Gas Wells identified by the Arizona Geological Survey). The records provided for this site indicate that a permit was obtained to drill a well reportedly used for stratigraphic testing in May 1966 (geologic exploration in connection to potential oil and gas development). The lease number associated with this site is “01 Mack’s Crossing” which refers to the name of a river crossing west of the west boundary of the Property. This record does not suggest this well is associated with monitoring or testing for releases of hazardous materials or petroleum products. It is possible that lubricants and fuel could have been spilled on adjoining land when this well was drilled but any releases would likely be of a de minimis nature.

- A prior Phase I ESAs was conducted by Golder Associates Inc. in May 2005 (Golder 2005). The results of the 2005 Phase I ESA indicated that there was a low environmental risk associated with the Property and that no further investigation or remedial action were warranted at that time. Specific records of timber harvesting (logging) are not readily available, but anecdotal information refers to timber harvesting in the past. The only potential environmental concerns identified by Golder were: (1) the unlikely possibility that upstream activities might introduce contaminants in East Clear Creek. The site owner would not be liable for this potential contamination, though the Property could be adversely affected; and (2) lubricants and fuel could have been spilled on the Property during the years in which active logging occurred. Golder concluded that, these releases, if extant, were and continue to be of a de minimis nature. WestLand agrees with this assessment.
• The Arizona Department of Water Resources (ADWR) Well Registry spatial database was queried to review any data for wells within the boundaries of the Property. There are no registered wells at the Property. However, in 2015, a USFS water quality monitoring station was observed by WestLand during a separate site visit for the Property, in Section 8, near the northwestern corner on adjoining land. The ADWR Well Registry does not identify any wells within Section 8. Analytical results from water quality sampling in 1976 suggest that all chemical constituents in East Clear Creek are within acceptable water quality standards for the support of cold water fisheries habitat (Golder 2005). More recent data from the EPA suggests that water quality in East Clear Creek is fully supportive of agricultural use; fish, shellfish, and wildlife protection and propagation; and primary contact recreation (Golder 2005). There are no records indicating wells associated with the disposal or treatment of waste water and no monitoring wells associated with contaminated properties in the vicinity. Furthermore, available water quality information for East Clear Creek indicate there is no REC associated with surface and groundwater at the Property.

• WestLand environmental specialists Diana Sandoval and Sarah Richman conducted field reconnaissance of the Property on June 8 and June 9, 2016 to observe current site conditions and existing environmental conditions for the Property. Access to the Property is only provided by primitive dirt roads or overland hiking across rugged terrain. Anthropogenic improvements on the Property were not observed with the exception of roads and informal fire pits. Very limited quantities debris were found in scattered areas north of the Property. However, these items were either comprised of inert materials (e.g., aluminum cans and glass) or present in small quantities (i.e., a single spray paint can). Field observations were consistent with the findings of WestLand’s historical and ecological reviews of the Property and surrounding properties. No REC or indications of use to suggest potential REC were readily observed during the site visit.

• Interviews were conducted with the report User and owner and the local fire department. The representative for Resolution Copper Mining LLC indicated that to her knowledge, the Property has been vacant and not used for development other than historical use for recreation and logging. There has been no evidence to suggest, or any knowledge that hazardous materials or petroleum products were stored or used at the Property. The User notes that there is a possibility that small quantities of hydrocarbons were stored or used on site during past logging; however, no evidence of any storage or use of these product at the Property has been identified. The User noted it is possible that small incidental releases associated with the potential use of hydrocarbons may have occurred, though there is no evidence of any such releases was observed. No other commonly known or reasonably ascertainable information relevant to potential RECs was provided by the User.
• The report user provided copies of title information in connection to the property including an ALTA Standard Owners 1992 policy of insurance, dated April 15, 2005 and amended May 17, 2005. The title documents include a list of schedule B requirements and exceptions which typically list known land encumbrances (i.e., taxes, deed restrictions, easements, liens) and may provide an indication of the potential for contamination at the property. Based on WestLand’s review of the listed standard and specific encumbrances, none readily indicate the release or threat of a release of a hazardous material or petroleum product at the property.

• WestLand also conducted an interview with a local government official: Ms. Cat Sobel of the Blue Ridge Fire District. The fire district was contacted to inquire about any responses to the property or adjoining properties with regard to fuel/chemical spills or if they were aware of any chemical or petroleum product storage at the property. She reported that they have no knowledge of spills or storage at the property or on land in the immediate vicinity.

• The property is surrounded by Coconino National Forest lands with the exception of Starlight Pines, a low-density residential subdivision, which occupies a section of land adjoining the property to the northwest and a privately held section to the southeast with dirt roadways. There is no evidence of an established town in the immediate vicinity or of homesteading or other residential use of the property. Vacant land and residential use does not readily indicate uses indicative of a REC.

• The property is used as open-space, with no formal developed use. The property has likely been subject to logging, grazing, and dispersed recreational (hiking, fishing, camping) use over time. Specific records of timber harvesting (logging) are not readily available but indicated by several sources. It is possible that lubricants and fuel could have been spilled on the property during the years in which active logging occurred. However, we concur with prior assessments that these releases, if they occurred, would likely be of a de minimis nature. Additionally, cattle grazing likely occurred in the past at the property; however there was no indication that a ranch headquarters was located at the property where spills of hazardous materials or petroleum products would be likely. Additionally, there was no evidence of corrals or dipping vats to suggest the use of parasitic prevention or treatment application to cattle at the property. Any releases of hazardous material or petroleum products in connection to recreational activities at the property and in the immediate vicinity of the property (overland vehicle use, hiking, fishing and camping) if they occurred, would likely be of a de minimis nature not suspected to have resulted in a REC.
8. CONCLUSION

WestLand has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 2247-08 for the Property (Figure 1). Any exceptions to, or deletions from, this practice are described in Section 9 of this report.

WestLand’s assessment has revealed no evidence of a potential REC in connection with the Property. WestLand also did not identify any historical recognized environmental conditions, controlled recognized environmental conditions, or de minimis conditions for the Property.
9. DEVIATIONS

The purpose of reviewing historical sources is to develop a history of the previous uses of a property and surrounding area in order to help identify past uses that may have led to RECs in connection with the Property. According to the ASTM standard, obvious uses of a property shall be identified from the present back to the property’s first developed use, or back to 1940, whichever is earlier. This requires reviewing only as many standard historical sources as are reasonably ascertainable and likely to be useful.

Considering that developed use of the Property is limited to open space and minimal recreational uses and that there is no other documented or suspected use of the Property potentially indicating a REC, WestLand did not conduct a city directory search, Sanborn fire insurance map search, building department record search or other typically urban searches. Considering the rural nature of the Property and the available information for the Property, there were no data failures or limitations potentially affecting conclusions regarding the identification of RECs for the Property (site access limitations, physical obstructions to observations, outstanding information requests, historical data failure, etc.). Considering the known history of the site and results of our site reconnaissance and other completed research, this assessment is considered complete.
10. ADDITIONAL SERVICES

No additional services beyond the standard ASTM scope were considered as part of this assessment.
11. QUALIFICATIONS AND SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

Mr. Mark F. Taylor, P.E. believes that, to the best of his professional knowledge, he meets the definition of “environmental professional” as defined in §312.10 of 40 CFR 312. Mr. Taylor possesses the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Property. He has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Taylor is the leading environmental professional assigned to perform project oversight for this ESA. Diana Sandoval and Sarah Richman conducted the site reconnaissance under the direction of Mr. Taylor. Ms. Sandoval and Ms. Richman conducted the interviews, regulatory inquiries, and historical research. Mr. Christopher Rife reviewed the findings in this report. Their work was conducted under the supervision of the above-named environmental professional. Mr. Taylor reviewed, interpreted, and declared the information included in this report as complete. Résumés for the key individuals participating in the preparation of this report are provided in Appendix H.

User Questionnaire
In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that “all appropriate inquiry” is not complete.

(1). Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? NO

(2). Activity and land use limitations that are in place on the Property or that have been filed or recorded against the property (40 CFR 312.26).
Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? NO

(3). Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? YES

(4). Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price/lease being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? No information indicating that the value of the property had been reduced as a result of environmental issues.

(5). Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:

(a.) Do you know the past uses of the property? Recreation and logging are the only known historical uses for the Property.

(b.) Do you know of specific chemicals that are present or once were present at the property? No evidence or knowledge of hazardous chemicals being stored on site. Likely that small amounts of hydrocarbons were stored or used on site during logging activities, although no evidence of any storage was identified.

(c.) Do you know of spills or other chemical releases that have taken place at the property? No evidence or knowledge of spills or releases of chemicals on the Property. Possible small incidental hydrocarbon releases during historic logging maintenance, although none were observed.

(d.) Do you know of any environmental cleanups that have taken place at the property? No knowledge or evidence of cleanups being conducted on the Property.
(6). The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? No evidence of contamination on the Property.

In addition, certain information should be collected, if available, and provided to the environmental professional selected to conduct the Phase I. This information is intended to assist the environmental professional but is not necessarily required to qualify for one of the LLPs. The information includes:

(a) The reason why the Phase I is required. Support of the land exchange between the US and Resolution Copper Mining

(b) The type of property and type of property transaction, for example, sale, purchase, exchange, etc. Exchange

(c) The complete and correct address for the property (a map or other documentation showing property location and boundaries is helpful). Not needed for this questionnaire; already provided.

(d) The scope of services desired for the Phase I (including whether any parties to the property transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527/2247 are to be considered). Standard only.

(e) Identification of all parties who will rely on the Phase I report. Resolution Copper Mining.

(f) Identification of the site contact and how the contact can be reached. - Are there previous site contacts that should be interviewed? N/A

(g) Any special terms and conditions which must be agreed upon by the environmental professional. N/A

(h) Any other knowledge or experience with the property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition). N/A

USER NAME & FIRM: Ms. Casey McKeon, Resolution Copper Mining

EMAIL: casey.mckeon@resolutioncopper.com

DATE: May 12, 2016
The objective of interviews with Past and Present Owners and Occupant is to obtain information indicating recognized environmental conditions in connection with the Property. Past and present owners, operators and occupants shall be interviewed who are likely to have material information regarding the potential for contamination at the property, provided such persons have been identified and the information is not likely to be duplicative of information already obtained from different sources.

Property Location/Address: East Clear Creek - the entirety of Section 9 in Township 14 North, Range 12 East in Coconino County, Arizona

Date: May 12, 2016

Interview Medium (underline one): in person, by telephone, in writing

Interviewee Relationship to the property (underline one): past owner, present owner, operator/manager, tenant, occupant, other.

Please respond to the questions provided below and expand your responses as appropriate:

1. Please describe the current uses of the property, if known. 
   Vacant

2. Please describe the past/historic use(s) of the property, if known. 
   No current uses, maybe some recreational access. Recreation and logging are the only known historical uses for the property.

3. Name the current and any past owners or occupants of the property, if known. 
   Current owner Swift Land and Cattle, LLC. Past is Clear Creek 640 LLC

4. Please describe the past and/or current uses of adjoining properties, if known. unknown

5. Please describe the general past and/or current uses of the surrounding area, if known. (i.e. residential, commercial, agricultural, industrial etc.) logging, recreational

6. Are you aware of any chemicals/petroleum products in individual containers greater than 5-gallons that are present or once were present at the property (including used automotive/industrial batteries, pesticides, paints, solvents acids, bases, antifreeze, gasoline, diesel, fuel oil, kerosene, lubricating oil, benzene, etc)? This includes industrial drums (typically 55-gallons).
   Yes_____  No_____  Unknown  x  

7. Do you know of spills or other chemical releases that have taken place at the property?
   Yes_____  No_____  Unknown  x  

8. Do you know of any environmental cleanups that have taken place at the property?
   Yes_____  No_____  Unknown  x  

9. Are you aware of any environmental cleanup liens against the property?
   Yes_____  No  x  Unknown_____
(10). Are you aware of any engineering controls (capping, slurry walls or water treatment), land use restrictions or institutional controls (deed restriction, restrictive covenants, easements or zoning) intended to reduce exposure of a hazardous substance or petroleum product at the property?

Yes_____ No_____ Unknown__x___

(11). Are there any above ground storage tanks, underground storage tanks, vent pipes or access ways indicating storage tanks at the property?

Yes_____ No__x___ Unknown____

(12). Are there any PCBs (transformers, hydraulic equipment) at the property?

Yes____ No____x_____ Unknown_____ 

(13). Have you observed stained soil/pavement, corrosion, or stressed vegetation that may indicate a petroleum or chemical spill at the property?

Yes_____ No____x_____ Unknown_____ 

(14). Have you observed pits, ponds, or lagoons associated with wastewater treatment/disposal at the property?

Yes_____ No____x_____ Unknown_____ 

(15). Are you aware of any wastewater/stormwater facilities at the property (drains, sumps, ditches, washes)?

Yes_____ No____x_____ Unknown_____ 

(16). Are you aware of any wells located at the property (dry, irrigation, injection, or abandoned)?

Yes_____ No____x_____ Unknown_____ 

(17). Are you aware of any septic systems at the property?

Yes_____ No____x_____ Unknown_____ 

(18). Has the property been used for landfill, dump, battery storage, junkyard, or other disposal purposes?

Yes_____ No____x_____ Unknown_____ 

(19). Has dirt fill been brought to the property that originated from a site of unknown origin or from a contaminated site?

Yes_____ No____ Unknown__x___ 

(20). Are there or has there ever been any flooring, drains, or walls located within the facility that are stained by substances other than water or emitting odors?

Yes_____ No____x_____ Unknown_____ 

(21). Are you aware of any other information that may be pertinent to identifying past and present environmental conditions at the property or copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition?

Yes _x___ No_____ Unknown____ Golder Phase 1 ESA 2005
APPENDIX C

Title Records
December 8, 2005

Swift Current Land & Cattle LLC
2525 East Arizona Biltmore Cir Suite C-135
Phoenix, Arizona 85016

YOUR REF: 01491899
OUR NO.: 01491899

Attached is your ALTA Standard Owners 1992 policy of title insurance, per your instructions.
Transnation Title Insurance Company, an Arizona Corporation herein called the Company, for a valuable consideration, hereby commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the proposed insured named in Schedule A, as owner or mortgagee of the estate or interest covered hereby in the land described or referred to in Schedule A, upon payment of the premiums and charges therefor; all subject to the exceptions and conditions and stipulations shown herein, the Exclusions from Coverage, the Schedule B exceptions, and the conditions and stipulations of the policy or policies requested. (See back cover for printed Exclusions from Coverage and Schedule B exceptions contained in various policy forms.)

This Commitment shall be effective only when the identity of the proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A hereof by the Company, either at the time of the issuance of this Commitment or by subsequent endorsements and is subject to the Conditions and Stipulations on the back cover.

This Commitment is preliminary to the issuance of such policy or policies of title insurance and all liability and obligations hereunder shall cease and terminate six months after the effective date hereof or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue such policy or policies is not the fault of the Company.

IN WITNESS WHEREOF, Transnation Title Insurance Company has caused its corporate name and seal to be hereunto affixed by its duly authorized officers on the date shown in Schedule A.

Attest:

Secretary

President
Good Funds Law
Arizona Revised Statutes Section 6-843 regulates the disbursement of escrow funds by an escrow agent. The law requires that funds be deposited in the escrow agent's escrow account and available for withdrawal prior to disbursement. Funds deposited with the Company by wire transfer may be disbursed upon receipt. Funds deposited with the Company in the form of cashier's checks, certified checks or teller's checks, or checks which are made by an affiliate of a state or federally regulated depository institution when the check is drawn on that institution, may be disbursed the same day as deposited. If funds are deposited with the Company by other methods, recording and/or disbursement may be delayed.

We collect nonpublic personal information about you from information you provide on forms and documents and from other people such as your lender, real estate agent, attorney, escrow, etc. We do not disclose any nonpublic personal information about our customers or former customers to anyone, except as permitted by law. We restrict access to nonpublic personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

PURCHASER DWELLING ACTIONS NOTICE
Pursuant to Arizona Revised Statutes Section 12-1363.N, notice is hereby provided to the purchaser of a dwelling of the provisions of Arizona Revised Statutes Sections 12-1361, 1362 and 1363. These statutory sections set forth the requirements to be met by a purchaser prior to bringing an action against the seller of a dwelling arising out of or related to the design, construction, condition or sale of the dwelling. “Dwelling” means a single or multifamily unit designed for residential use and common areas and improvements owned or maintained by an association or its members. “Seller” means any person, firm, partnership, corporation, association or other organization engaged in the business of designing, constructing or selling dwellings. The complete statutory sections can be viewed on the Arizona State Legislature’s web site: www.azleg.state.az.us/ars/ars.htm.

NOTICE:
Pursuant to Arizona Revised Statutes 11-480, effective January 1, 1991, the County Recorder may not accept documents for recording that do not comply with the following:

a Print must be ten-point type (pica) or larger.

b Margins of at least one-half inch along the left and right sides one-half inch across the bottom and at least two inches on top for recording and return address information.

c Each instrument shall be no larger than 8 1/2 inches in width and 14 inches in length.
COMMITMENT FOR TITLE INSURANCE
Issued by
Transnation Title Insurance Company
SCHEDULE A

1. Effective Date: April 15, 2005 at 7:30 a.m.

2. Policy or Policies to be issued: ALTA Standard Owners 1992
   Proposed Insured: Swift Current Land & Cattle LLC, an Arizona limited liability company
   Liability: $TO COME
   Policy or Policies to be issued: None
   Policy or Policies to be issued: None

3. The estate or interest in the land described or referred to in the Commitment and covered herein is A FEE.

4. Title to the said estate or interest in said land is at the effective date hereof vested in:
   Clear Creek 640, LLC, an Arizona limited liability company

5. The land referred to in this Commitment is situated in the County of Coconino, State of ARIZONA, and is described as follows:
   As fully set forth on "Exhibit A" attached hereto and by this reference incorporated herein.
EXHIBIT "A"

All of Section 9, Township 14 North, Range 12 East of the Gila and Salt River Base and Meridian, Coconino County, Arizona.

Including all oil, gas and other minerals in, on or under or which may be produced from said land.
SCHEDULE B – SECTION I
REQUIREMENTS

The following are the requirements to be complied with prior to the issuance of said policy or policies. Any other instrument recorded subsequent to the date hereof may appear as an exception under Schedule B of the policy to be issued. Unless otherwise noted, all documents must be recorded in the office of the Recorder of the County in which said property is located.

1. PAYMENT OF any and all assessments.

2. FURNISH copy of filed Articles of organization of the limited liability company named below which states whether said limited liability company is member managed or manager managed:

   Clear Creek 640, LLC, an Arizona limited liability company

3. SUBMIT fully executed copy of the Operating Agreement (and all amendments) of the limited liability company named below for examination. The right is reserved to make additional requirements upon said examination.

   Clear Creek 640, LLC, an Arizona limited liability company

4. RECORD Deed from Clear Creek 640, LLC, an Arizona limited liability company to Trust for the Public Land.

NOTE: ARS 11:1133 may require the completion and filing of an Affidavit of Value.

END OF SCHEDULE B – SECTION I
SCHEDULE B – SECTION II
EXCEPTIONS

Schedule B of policy or policies to be issued will contain exceptions to the following matters unless the same are disposed of to the satisfaction of the Company:

A. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the effective date hereof but prior to the date the proposed Insured acquires for value of record the estate or interest or mortgage thereon covered by this commitment.

1. OBLIGATIONS imposed upon said land by its inclusion within any district formed pursuant to Title 48, Arizona Revised Statutes, excluding however Municipal or County Improvement Districts.

2. TAXES AND ASSESSMENTS collectible by the County Treasurer, a lien not yet due and payable for the following year:

   2005

3. THE RIGHTS of the United States of America the State of Arizona and/or other parties to any portion of the within property lying within the bed, or former bed, of any water course, as that term is defined under Arizona law.

4. ANY TERMS, CONDITIONS, RULES OR RESTRICTIONS imposed, upon the right of access to the land described in Schedule A, by the United States of America acting by and through the Forest Service, Department of Agriculture.

END OF SCHEDULE B – SECTION II
commitment conditions and stipulations

1. The term mortgage, when used herein, shall include deed of trust, deed, or other security instrument.

2. If the proposed insured has or acquires actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage therein covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act or omission hereon to the extent the Company is prepared by failure to so disclose such knowledge. If the proposed insured shall disclose such knowledge to the Company, or the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage therein covered by this Commitment in any manner other than as provided in Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions and Stipulations.

3. Liability of the Company under this Commitment shall be only to the extent proposed insured and such parties included under the definition of insured in the form of policy or policies committed for and for only actual loss incurred in reliance heron in undertaking good faith, (a) to comply with the requirements hereof, or (b) to eliminate circumstances shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage herein covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions, the Conditions and Stipulations, and the Exclusions from Coverage and the terms of any prior policy or policies committed for in favor of the proposed insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.

4. Any action or actions or rights of action that the proposed insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage therein covered by this Commitment must be based on and are subject to the provisions of this Commitment.

american land title association loan policy (10-17-92)

with additional endorsement form 1 coverage

and

american land title association leasehold owner's policy (10-17-92)

with additional endorsement form 1 coverage

exclusions from coverage

the following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorney's fees or expenses which arise by reason of:

1. (a) any violation of any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land, (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part, or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from such violation is included in the records on date of policy.

2. Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

3. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at date of policy, but not excluding from coverage any taking which has occurred prior to date of policy which would be binding on the rights of a purchaser for value without knowledge.

4. Exceptions from coverage

the above policy forms may be issued to afford either standard coverage or extended coverage. In addition to the above exclusions from coverage, the exceptions from coverage in a standard coverage policy will also include the following general exceptions.

exceptions from coverage

this policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.

3. Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

4. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at date of policy, but not excluding from coverage any taking which has occurred prior to date of policy which would be binding on the rights of a purchaser for value without knowledge.

5. Unpatented mining claims; (b) any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

6. Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

7. Any claim which arises out of the transaction creating the interest of the mortgagee-insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditor's rights laws, that is based on:

(a) the transaction creating the interest of the mortgagee-insured being deemed a fraudulent conveyance or fraudulent transfer, or

(b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination,

(c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:

(i) to timely record the instrument of transfer, or

(ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

the above policy forms may be issued to afford either standard coverage or extended coverage. In addition to the above exclusions from coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following general exceptions.

exceptions from coverage

this policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.

3. Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

4. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at date of policy, but not excluding from coverage any taking which has occurred prior to date of policy which would be binding on the rights of a purchaser for value without knowledge.

5. Unpatented mining claims; (b) any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

6. Any governmental policy power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from such violation or alleged violation affecting the land has been recorded in the public records at date of policy.

7. Any claim which arises out of the transaction creating the interest of the mortgagee-insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditor's rights laws, that is based on:

(a) the transaction creating the interest of the mortgagee-insured being deemed a fraudulent conveyance or fraudulent transfer, or

(b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination,

(c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:

(i) to timely record the instrument of transfer, or

(ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

the above policy forms may be issued to afford either standard coverage or extended coverage. In addition to the above exclusions from coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following general exceptions.
In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the Land
   e. land division
   f. environmental protection

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.

   This exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.

3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy date and is binding on You if You bought the Land without knowing of the taking.

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.

4. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy date and is binding on You if You bought the Land without knowing of the taking.

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.

5. Failure to pay value for Your Title.
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch your land.

   This exclusion does not limit the coverage described in Covered Risk 11 or 18.

6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch your land.

   This exclusion does not limit the coverage described in Covered Risk 11 or 18.
OWNED'S POLICY OF TITLE INSURANCE

Issued by Transnation Title Insurance Company

Transnation Title Insurance Company is a member of the LandAmerica family of title insurance underwriters.

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE EXCEPTIONS FROM COVERAGE CONTAINED IN SCHEDULE B AND THE CONDITIONS AND STIPULATIONS, TRANSNATION TITLE INSURANCE COMPANY, an Arizona corporation, hereby called the Company, insures, as of Date of Policy shown in Schedule A, against loss or damage, not exceeding the Amount of Insurance stated in Schedule A, sustained or incurred by the insured by reason of:

1. Title to the estate or interest described in Schedule A being vested other than as stated therein;
2. Any defect in or lien or encumbrance on the title;
3. Unmarketability of the title;
4. Lack of a right of access to and from the land.

The Company will also pay the costs, attorneys' fees and expenses incurred in defense of the title, as insured, but only to the extent provided in the Conditions and Stipulations.

IN WITNESS WHEREOF, TRANSNATION TITLE INSURANCE COMPANY has caused its corporate name and seal to be hereunto affixed by its duly authorized officers, the Policy to become valid when countersigned by an authorized officer or agent of the Company.

TRANSNATION TITLE INSURANCE COMPANY

Attest: 

By: 

President

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

4. Any claim, which arises out of the transaction vesting in the Insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (a) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (b) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
      (i) to timely record the instrument of transfer; or
      (ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.
1. DEFINITION OF TERMS.

The following terms when used in this policy mean:

(a) "insured": the insured named in Schedule A, and, subject to any rights or defenses the Company may have had against the named insured, those who succeed to the interest of the named insured by operation of law as distinguished from purchasers including, but not limited to, heirs, executors, administrators, personal representatives, next of kin, or corporate or fiduciary successors.

(b) "insured claimant": an insured claiming loss or damage.

(c) "knowledge" or "known": actual knowledge, not constructive knowledge or notice which may be imputed to an insured by reason of the knowledge or notice which may be imputed to the insured by reason of the

(d) "land": the land described or referred to in Schedule A, and includes any easement in abutting streets, roads, avenues, alleys, lanes, ways or watercourses which, whether in gross or appurtenant, whether granted or retained, and whether by deed, contract or otherwise, with or without condition, and whether by use, occupation and enjoyment, whether by statute, common or constructive notice of matters affecting the land.

(e) "mortgage": mortgage, deed of trust, deed, or other security instrument.

(f) "public records": records established under state statutes at the Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge. With respect to Section 1(a) (vi) of the Exclusions From Coverage, "public records" shall also include environmental protection liens filed in the records of the clerk of the United States district court for the district in which the land is located.

(g) "unmarketability of the title": an alleged or apparent matter affecting the title to the land, not excluded or excepted from coverage, which would entitle a purchaser of the estate or interest described in Schedule A to be released from the obligation to purchase by virtue of a contractual condition requiring the delivery of marketable title.

2. CONTINUATION OF INSURANCE AFTER CONVEYANCE OF TITLE.

The coverage of this policy shall continue in force as of Date of Policy so long as the insured or his or her heirs, distributees, devisees, survivors, personal representatives, next of kin, or corporate or fiduciary successors, as the case may be, shall hold, or hold an interest in the land, or holds an indebtedness secured by a purchase money mortgage given by a purchaser from the insured, or only so long as the insured shall have liability by reason of any transfer or conveyance of the estate or interest held by the insured, or the title thereto, or the interest therein shall modify or limit the extent to which a right of access to and from the land is insured by this policy.

3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT.

The insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in Section 4(a) below, (ii) in case of any legal proceeding or legal action which would entitle a purchaser of the estate or interest described in Schedule A to be released from the obligation to purchase by virtue of a contractual condition requiring the delivery of marketable title, and (iii) in any other matter insured against by this policy which constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

4. DEFENSE AND PROSECUTION OF ACTIONS; DUTY OF INSURED CLAIMANT TO COOPERATE.

(a) Upon written request by the insured and subject to the options contained in Section 6 of these Conditions and Stipulations, the Company, at its own cost and without unreasonable delay, shall provide for the defense of an insured in litigation in which any third party asserts a claim adverse to the title or interest as insured, and which might cause loss or damage for which the Company may be liable by virtue of this policy, if (i) the estate or interest, as insured, is not unmarketable. If prompt notice shall not be given to the Company, then as to the insured all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall not prejudice the rights of any insured under this policy unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

(b) If the Company shall have the right, at its own cost, to institute and prosecute any action or proceeding or for any other action in its opinion may be necessary or desirable to establish the title to the estate or interest, as insured, or to prevent or reduce loss or damage to the insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this policy. If the Company shall exercise its rights under this paragraph, it shall do so diligently.

(c) Whenever the Company shall have brought an action or interposed a defense as required or permitted by the provisions of this policy, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from any adverse judgment or order.

5. PROOF OF LOSS OR DAMAGE.

In addition to and after the notices required under Section 3 of these Conditions and Stipulations have been provided the Company, a proof of loss or damage signed and sworn to by an insured claimant shall be furnished to the Company within 90 days after the insured claimant shall ascertain the facts giving rise to the loss or damage. The proof of loss or damage shall describe the defect in, or lien or encumbrance on the title, or other matter insured against by this policy which constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

6. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS: TERMINATION OF LIABILITY.

In case of a claim under this policy, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Insurance.

(i) To pay or tender payment of the amount of insurance under this policy, in case of a claim under this policy together with any costs, attorneys' fees and expenses incurred by the insured claimant, which were authorized by the Company, up to the time of payment or tender of payment and which the Company is obligated to pay. Upon the exercise of this option, all liability and obligations to the insured under this policy, other than to make the payment required, shall terminate. Including any liability or obligation to defend, prosecute, or continue any litigation, and the policy shall be surrendered to the Company for cancellation.

(ii) To Pay or Otherwise Settle With Parties Other than the Insured or With the Insured Claimant.

(i) To pay or otherwise settle with other parties for or in the name of an insured claimant any claim insured against under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

(ii) To pay or otherwise settle with the insured claimant the insured claimant's loss or damage provided for under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in paragraphs (i) or (ii) above, the parties as required in this paragraph shall terminate any liability of the Company under this policy as to that claim.
7. DETERMINATION, EXTENT OF LIABILITY AND COINSURANCE.

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the insured claimant who has suffered loss or damage by reason of matters insured against by this policy and only to the extent herein described.

(a) The liability of the Company under this policy shall not exceed the least of:

(i) the Amount of Insurance stated in Schedule A; or,

(ii) the difference between the value of the insured estate or interest as insured and the value of the insured estate or interest subject to the defect, lien or encumbrance insured against by this policy.

(b) In the event the Amount of Insurance stated in Schedule A at the Date of Policy is less than 80 percent of the value of the insured estate or interest or the full consideration paid for the land, whichever is less, or if subsequent to the Date of Policy an improvement is erected on the land which increases the value of the insured estate or interest by at least 20 percent over the Amount of Insurance stated in Schedule A, then this Policy is subject to the following:

(i) where no subsequent improvement has been made, as to any partial loss, the Company shall only pay the loss pro rata in the proportion that the amount of insurance at Date of Policy bears to the total value of the insured estate or interest at Date of Policy, or

(ii) where a subsequent improvement has been made, as to any partial loss, the Company shall only pay the loss pro rata in the proportion that 120 percent of the Amount of Insurance stated in Schedule A bears to the sum of the Amount of Insurance stated in Schedule A and the amount expended for the improvement.

8. APPOINTMENT.

If the land described in Schedule A consists of two or more parcels which are not used as a single site and a loss is established affecting one or more of the parcels but not all, the loss shall be computed and settled on a pro rata basis as if the amount of insurance under this policy was divided pro rata as to the value on Date of Policy of each separate parcel to the whole, exclusive of any improvements made subsequent to Date of Policy, unless a liability or value has otherwise been agreed upon as to each parcel by the Company and the insured at the time of the issuance of this policy and shown by an express statement or by an endorsement attached to this policy.

9. LIMITATION OF LIABILITY.

(a) If the Company establishes the title, or removes the alleged defect, lien or encumbrance, or cures the lack of a right of access to or from the land, or cures the claim of unmarketability of title, all as insured, in a reasonably diligent manner by any method, including litigation and the completion of any applicable requirement, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.

(b) In the event of an action in litigation, including litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom, adverse to the title as insured.

(c) The Company shall not be liable for loss or damage to any insured for liability voluntarily assumed by the insured in settling any claim or suit without the prior written consent of the Company.

10. REDUCTION OF INSURANCE; REDUCTION OR TERMINATION OF LIABILITY.

All payments under this policy, except payments made for costs, attorneys' fees and expenses, shall reduce the amount of the insurance pro tanto.

11. LIABILITY NONCUMULATIVE.

It is expressly understood that the amount of insurance under this policy shall be reduced by any amount the Company may pay under any policy insuring a mortgage to which exception is taken in Schedule B or to which the insured has agreed, assumed, or taken subject, or which is hereafter executed by an insured and which is a charge or lien on the estate or interest described or referred to in Schedule A, and the amount so paid shall be deemed a payment under this policy to the insured owner.

12. PAYMENT OF LOSS.

(a) No payment shall be made without producing this policy for endorsement of the payment unless the policy has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.

(b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions and Stipulations, the loss or damage shall be payable within 30 days thereafter.

13. SUBROGATION UPON PAYMENT OR SETTLEMENT.

(a) The Company's Right of Subrogation.

Whenever the Company shall have settled and paid a claim under this policy, all right of subrogation shall vest in the Company unaffected by any act of the insured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the insured claimant would have had against any person or property in respect to the claim had this policy not been issued. If requested by the Company, the insured claimant shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The insured claimant shall permit the Company to sue, compromise or settle in the name of the insured claimant and to use the name of the insured claimant in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the insured claimant, the Company shall be subrogated to these rights and remedies in the proportion which the Company's payment bears to the whole amount of the loss.

If loss should result from any act of the insured claimant, as stated above, that act shall not void this policy, but the Company, in that event, shall be required to pay only that part of any losses insured against by this policy which shall exceed the amount, if any, lost to the Company by reason of the impairment by the insured claimant of the Company's right of subrogation.

(b) The Company's Rights Against Non-insured Obligors.

The Company's right of subrogation against non-insured obligors shall exist and shall include, without limitation, the rights of the insured to indemnities, guaranties, other policies of insurance or bonds, notwithstanding any terms or conditions contained in those instruments which provide for subrogation rights by reason of this policy.

14. ARBITRATION.

Unless prohibited by applicable law, either the Company or the insured may demand arbitration pursuant to the Title Insurance Arbitration Rules of the American Arbitration Association. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. All arbitrable matters when the Amount of Insurance is $1,000,000 or less shall be arbitrated at the option of either the Company or the insured. All arbitrable matters when the Amount of Insurance is in excess of $1,000,000 shall be arbitrated only when agreed to by both the Company and the insured. Arbitration pursuant to this policy and under the Rules in effect on the date the demand for arbitration is made or, at the option of the insured, the Rules in effect at Date of Policy shall be binding upon the amount of the loss. The award may include attorneys' fees only if the laws of the state in which the land is located permit a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.

A copy of the Rules may be obtained from the Company upon request.

15. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT.

(a) This policy together with all endorsements, if any, attached hereto by the Company is the entire policy and contract between the insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.

(b) Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the title to the estate or interest covered hereby or by any action asserting such claim shall be restricted to this policy.

(c) No amendment of or endorsement to this policy can be made except by a writing endorsed 'hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

16. SEVERABILITY.

In the event any provision of the policy is held invalid or unenforceable under applicable law, the policy shall be deemed not to include that provision and all other provisions shall remain in full force and effect.

17. NOTICES, WHERE SENT.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this policy and shall be addressed to: Consumer Affairs Department, P.O. Box 27567, Richmond, Virginia 23261-7567.
POLICY OF TITLE INSURANCE
Issued by
Transnation Title Insurance Company

SCHEDULE A

Amount of Insurance: $3,400,000.00

Name of Insured:

Swift Current Land & Cattle LLC, an Arizona Limited Liability Company

1. The estate or interest referred to herein is at the Date of Policy vested in:

   Swift Current Land & Cattle LLC, an Arizona Limited Liability Company

2. The estate or interest in the land described herein and which is covered by this policy is:

   A FEE

3. The land referred to in this policy is situated in the County of Coconino, State of ARIZONA, and is more particularly described in Exhibit "A" attached hereto and made a part hereof.

Countersigned:

Authorized Officer or Agent
EXHIBIT “A”

All of Section 9, Township 14 North, Range 12 East of the Gila and Salt River Base and Meridian, Coconino County, Arizona.

Including all oil, gas and other minerals in, on or under or which may be produced from said land.
SCHEDULE B
EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, nor against costs, attorneys fees or expenses, any or all of which arise by reason of the following:

PART I

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices or such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.

4. Discrepancies, conflicts in boundary lines, shortages in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, and agreements, covenants, conditions or rights incident thereto, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
SCHEDULE B
EXCEPTIONS FROM COVERAGE

PART II

THIS POLICY DOES NOT INSURE AGAINST LOSS OR DAMAGE BY REASON OF THE FOLLOWING:

1. OBLIGATIONS imposed upon said land by its inclusion within any district formed pursuant to Title 48, Arizona Revised Statutes, excluding however Municipal or County Improvement Districts.

2. THE RIGHTS of the United States of America, the State of Arizona and/or other parties to any portion of the within property lying within the bed, or former bed, of any water course, as that term is defined under Arizona law.

3. ANY TERMS, CONDITIONS, RULES OR RESTRICTIONS imposed, upon the right of access to the land described in Schedule A, by the United States of America acting by and through the Forest Service, Department of Agriculture.

4. TAXES AND ASSESSMENTS collectible by the County Treasurer, a lien payable but not yet due for the following year:

The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:
- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders’ office, registries of deed, county clerks’ offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

Thank you for your business
Please contact NETR at 480-967-6752 with any questions or comments

SWIFT CURRENT LAND & CATTLE LLC
Attn: F.D. Hegner, Chief Operating Officer
2525 E. Arizona Biltmore Circle, Suite C-135
Phoenix, Arizona 85016

WARRANTY DEED

THIS WARRANTY DEED is made this 12th day of October, 2005, between THE
TRUST FOR PUBLIC LAND, a nonprofit California public benefit corporation, authorized to
do business in the State of Arizona as TPL-Arizona Inc., hereinafter called GRANTOR, and
SWIFT CURRENT LAND & CATTLE, LLC, an Arizona limited liability company, whose
address is 2525 E. Arizona Biltmore Circle, Suite C-135, Phoenix, Arizona 85016, hereinafter
called GRANTEE.

WITNESSETH: That the said Grantor, for and in consideration of the sum of TEN DOLLARS
and other good and valuable consideration, to the Grantor in hand paid by the Grantee, the
receipt of which is hereby acknowledged, does by these presents convey and warrant the title
against all persons whomsoever unto the said Grantee, and its assigns, forever, all that certain lot,
piece, or parcel of land situate, lying, and being in the County of Coconino, State of Arizona, as
more particularly described as follows, to-wit:

All of Section 9, Township 14 North, Range 12 East of the Gila and Salt River
Base and Meridian, Coconino County, Arizona.

Including all oil, gas and other minerals in, on or under or which may be produced
from said land.

Containing 640 acres, more or less.

together with any improvements and fixtures thereon, and any and all rights and appurtenances
pertaining to the property, including any development rights, easements appurtenant, and any
right, title and interest of Seller in and to timber, minerals, mineral rights and royalty interests,
water rights, adjacent streets, alleys, and rights of way related to the Property.

SUBJECT TO:

1. OBLIGATIONS imposed upon said land by its inclusion within any district formed
   pursuant to Title 48, Arizona Revised Statutes, excluding however Municipal or
   County Improvement Districts.

2. TAXES AND ASSESSMENTS collectible by the County Treasurer for the year 2005
   and thereafter, a lien not yet due and payable.
3. THE RIGHTS of the United States of America the State of Arizona and/or other parties to any portion of the within property lying within the bed, or former bed, of any water course, as that term is defined under Arizona law.

4. ANY TERMS, CONDITIONS, RULES OR RESTRICTIONS imposed, upon the right of access to the land described in Schedule A, by the United States of America acting by and through the Forest Service, Department of Agriculture.

5. EASEMENTS, liens or encumbrances, or claims thereof, which are not shown by the public records.

6. DISCREPANCIES, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

IN WITNESS WHEREOF, the said Grantor has hereunto set its hand and seal the day and year first above written.

THE TRUST FOR PUBLIC LAND,
a California nonprofit public benefit corporation authorized to do business in Arizona as TPL-Arizona, Inc.

By: [Signature]
Sarac T. Leuckel
Regional Counsel

ACKNOWLEDGMENT

State of New Mexico  
County of Santa Fe

The foregoing instrument was acknowledged before me this October 12, 2005 (date) by Sarac T. Leuckel as Regional Counsel of The Trust for Public Land, a nonprofit California public benefit corporation, on behalf of the corporation.

1-MILE RADIUS STREET MAP W/OCCURRENCES (MAP1)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a “case closed” or “no further action” status and therefore, do not likely present an environmental risk.

GRID MAP 113

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminants may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminant, amount released, and other variables, the distance from the source the contaminant may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, data, and potential air dispersion plumes.

**EPA-Watch-List-US**
**EPA Watch List**
**Category:** ERS Supplemental Govt Sources
**Description:** This database contains facilities listed on the Clean Air Act, Clean Water Act, and RCRA Watch List. These reports are now considered archived and will no longer be updated. Being on the Watch List may not mean that the facility has actually violated the law only that an evaluation or investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. The Watch List does not identify which alleged violations of environmental laws may pose the greatest risk to public health or the environment. It is an automated report based on data from the Air Facility System (AFS), which is used by federal, state and local agencies to track environmental enforcement and compliance information.

**Agency:** Environmental Protection Agency
**Phone Number:** 2025661667
**Date last updated:** Historical Database
**Date last checked:** N/A

FUDS-US
Formerly Used Defense Sites
Category: ERS Supplemental Govt Sources
Description: The Department of Defense (DoD) is responsible for environmental restoration of properties that were formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense. Such properties are known as Formerly Used Defense Sites (FUDS). The Army is the executive agent for the program and the U.S. Army Corps of Engineers manages and directs the program's administration. The scope and magnitude of the FUDS program are significant, with more than 9,900 properties identified for potential inclusion in the program. Information about the origin and extent of contamination, land transfer issues, past and present property ownership, and program policies must be evaluated before DoD considers a property eligible for Defense Environment Restoration Account (DERA) funding under the FUDS program. Environmental cleanup procedures at FUDS are similar to those at active DoD installations.

Hist-Agriculture
Ranches/Farms, Livestock/Agriculture

Category: ERS Exclusive Historic Sources

Description: ERS has compiled proprietary lists of MILLIONS of records dating back to the 1800’s that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products. This listing includes sites such as: Ranches, Farms, Livestock, and/or Agriculture. This classification covers establishments primarily engaged in the production or feeding of beef cattle, except feedlots. Establishments also included are engaged in the production of cows' milk and other dairy products and in raising dairy heifer replacements. Such farms may process and bottle milk on the farm and sell at wholesale or retail. This category also includes establishments primarily engaged in the production of animal specialties, not elsewhere classified, such as pets, bees, worms, and laboratory animals. Furthermore, this industry includes establishments primarily engaged in the production of cash grains, not elsewhere classified. Primary cash grains in this classification include dry field and seed peas and beans, safflowers, sunflowers, and popcorn.

Hist-Chemical Manufacturing
Manufacturing and Distribution of Chemicals, Gases, and/or Solids
Category: ERS Exclusive Historic Sources
Description: ERS has compiled proprietary lists of MILLIONS of records dating back to the 1800's that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products. This listing includes sites such as: Manufacturing and Distribution of Chemicals, Gases, and/or Solids. This industry classification includes establishments engaged in manufacturing alkalies and chlorine. Examples of products include compressed or liquefied chlorine, sodium or potassium hydroxide, sodium bicarbonate, and soda ash (not produced at mines). Manufacturing of industrial gases (organic as well as inorganic) that may be sold in compressed, liquid, or solid form. Industrial gases include acetylene, argon, carbon dioxide, helium, hydrogen, neon, nitrogen, nitrous oxide, and oxygen. Also, manufacturing industrial inorganic chemicals not elsewhere classified. A few examples are alum, ammonium compounds (except for fertilizer), industrial bleaches (sodium or calcium hypochlorite), chemical catalysts, hydrazine, hydrochloric acid, hydrogen peroxide, inorganic sodium compounds, and sulfuric acid. Other chemicals, not elsewhere classified, such as, fatty acids, essential oils, gelatin (except vegetable), sizes, bluing, laundry sours, writing and stamp pad ink, industrial compounds, such as boiler and heat insulating compounds, metal, oil, and water treating compounds, waterproofing compounds, and chemical supplies for foundries. This category also includes manufacturing various resins and plastics for sale to other industries that create plastic sheets, rods, films, and other products. The category also includes synthetic rubber, soap and detergents, rayon and acetate fibers. Furthermore, this category includes industrial and household adhesives, glues, caulking compounds, sealants, and linoleum, tile, rubber cements from vegetable, hardwood and softwood distillation products, natural dyes, tanning materials, and related products.

RCRA-COR-US
Resource Conservation and Recovery Act - Corrective Actions

Category: Federal RCRA CORRACTS

Description: The primary goals of RCRA are to: Protect human health and the environment from the potential hazards of waste disposal. Conserve energy and natural resources. Reduce the amount of waste generated. Ensure that wastes are managed in an environmentally sound manner.

EPA estimates that between 50 and 70 percent of all TSDFs have some degree of environmental contamination requiring detailed investigation and perhaps cleanup. Under a program entitled Corrective Action, EPA has the statutory authority to require permitted and interim status TSDFs to clean up hazardous waste contamination. This database contains a listing of sites that have had corrective action.

ROD-US

Records of Decision
Category: ERS Supplemental Govt Sources
Description: The Record of Decision (ROD) is a public document that explains which cleanup alternatives will be used to clean up a Superfund site. The ROD for sites listed on the NPL (NPL Site Listing Process) is created from information generated during the Remedial Investigation/Feasibility Study (RI/FS). A ROD contains site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, scope and role of response action and the remedy selected for cleanup. This database contains a listing of sites with RODs.
Agency: Environmental Protection Agency

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. Environmental Record Search (ERS) cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ERS is assumed to be caused by others and ERS cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ERS makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS’s Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by ERS. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA’s 40 CFR Part 312, All Appropriate Inquiries. ERS does ensure that the data is accurately reproduced from the original source. ERS backs the reporting of the data with $3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

The ERS logo, name, report design, presentation, maps, tables, etc., are the exclusive property of ERS and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from ERS. United States and international copyright laws protect any and all reports produced by ERS.

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.

Environmental Record Search (ERS) and Phase One, Inc. (POI) and their respective products/reports (i.e. RecCheck, LenderCheck, Environmental Screen, etc.) as well as their respective business operations, are NOT associated in any way with nor related to, First American Commercial Real Estate, Inc. (FACRES) and/or the First American Family of Companies.

7/02 2003 APPEAL - FCV REDUCED BASED ON AG STATUS. JAF 12/19/05 NOPC ISSUED FOR 2006. REMOVED AG STATUS. PARCEL SOLD. NO LONGER QUALIFIES. BJC 1/10/07, MG, PER ADDRESS CORRECTION FORM FROM TREAS. OFFICE, 11/10/06, REQUESTED BY DAN MEAD 9/10 PER TYLER CONVERSION CHG USE CODE FROM 0004 TO 0014 FOR 2011-SS.
**Project Role and Responsibilities:**
WestLand Resources, Inc., Principal QA/QC

**Special Expertise:**
- Large Water System Master Planning
- Well Design and Permitting
- Environmental Site Assessments
- Reservoir Design and Analysis
- Arsenic Treatment and Analysis
- Water System Modeling and Pipe Network Analysis
- Water Pumping Facility Design and Permitting
- Sewer Basin Studies
- Potable/Reclaimed Water Main Extensions
- Water and Wastewater Treatment Design
- Infrastructure Route Studies
- Potable Reclaimed Water System Planning
- Sewer and Reclaimed Water System Master Planning

**Education:**
- M.B.A., University of Arizona
- B.S., Civil Engineering, University of Arizona

**Civil Engineering Registration:**
- Arizona #22999, 1989
- California #44219, 1989
- Nevada #09281, 1991
- New Mexico #14546, 1999

**Memberships:**
- Board Member - Citizen’s Water Advisory Committee to the City of Tucson
- Finance Subcommittee Member - Citizen’s Water Advisory Committee to the City of Tucson

**Background:**
Mr. Taylor has over 25 years of experience in water resources wastewater engineering, and remediation systems including the design of systems for public works projects, master-planned communities, large commercial and retail centers, and the mining industry. He is responsible for the development of water system master plans; well, reservoir, booster station, and transmission main design; water treatment and arsenic treatment design; and the assessment of rates and development impact fees as well as wastewater master plan preparation, feasibility studies, system modeling and simulation, and capacity analyses; the design of wastewater treatment plants/disposal facilities, sewer infrastructure, lift stations and force mains, septic systems, and wetlands; and permit application, including aquifer protection permits, reclaimed water reuse permits, Arizona Pollutant Discharge Elimination System permits, recharge basin permits, and 208 plan amendments for private and municipal clients.

During the last 12 years, Mr. Taylor has served as Principal-in-Charge for WestLand’s multi-disciplinary water and wastewater infrastructure projects, providing project management, design and technical supervision, project scheduling, and budget oversight. His plans and contract documents are technically accurate, buildable, and operationally efficient, leading to few, if any, change orders during construction.

**Selected project experience includes:**

Various Phase I Environmental Site Assessments. Performed and managed multiple Phase I Environmental Site Assessments at various locations in Arizona and acted as principal reviewer for technical reports. Experience includes site reconnaissance and characterization, environmental record sources review, personal interviews, and aerial photograph and topographical map interpretations. Elective sites generally exhibit little evidence of environmental liabilities with some wildcat dumping and numerous housekeeping issues of de minimis importance.

Tucson Water Dove Mountain 3.0-MG C-Zone Reservoir and D-Zone and E-Zone Booster Stations; Pima County, Arizona; Cottonwood Properties. As part of Tucson Water’s regional planning efforts, Mr. Taylor served as Project Manager for the design of water infrastructure in support of the Dove Mountain development and other properties located at the intersection of Tangerine and Thornydale Roads. Consulting services for the 3.0-MG cast-in-place, hopper-bottom, reinforced-concrete, in-ground reservoir and two onsite booster stations included project management and coordination; surveying services; geotechnical investigation; corrosion monitoring design; structural engineering; civil engineering, site, and pipeline design; and landscape services. The new reservoir provides floating storage to the Tucson Water C-Zone and forebay storage capacity to both the onsite D- and E-Zone booster stations.
booster stations. Civil engineering services included plans, specifications, and construction drawings for the booster station design, booster station piping layout, hydropneumatic tank and air compressor, reservoir piping, and valve vault equipment layout. The project was constructed per Tucson Water standards.

**Dove Mountain Reclaimed Water Master Plan; Pima County, Arizona; Cottonwood Properties;** Principal-in-Charge of the preparation of the Dove Mountain Reclaimed Water Master Plan, an update to the Reclaimed Water Master Plan for the Tortolita Mountain Properties Basin that had been prepared for approximately 1,800 acres within the Dove Mountain community and included two golf courses. WestLand’s revised master plan incorporated the entire 5,600-acre community with provisions for up to five 18-hole golf courses. The Dove Mountain project is served by Tucson Water’s Thornydale reclaimed water reservoir and booster station. In accordance with Tucson Water’s pressure and velocity requirements, WestLand performed hydraulic modeling for each of the various phasing scenarios to determine the best phasing of construction for the proposed reclaimed water system infrastructure buildout.

**Sahuarita Water Company Arsenic Treatment Design; Sahuarita, Arizona; Sahuarita Water Company.** Principal-in-Charge of water system planning and design for the Sahuarita Water Company’s centralized arsenic treatment facility and transmission system. WestLand coordinated with Layne Christensen in the preparation of the design drawings for a new 2,000-gpm Layne Christensen Adsorption Arsenic Treatment facility, providing specifications for the facility, electrical and instrumentation systems, and piping layout and sizing. Deliverables included a treatment system option evaluation, design report, an opinion of probable construction cost, and final plans and specifications. The facility was designed to be expandable for future needs. WestLand also provided construction bidding services for this project.

**Las Quintas Serenas Water Company Arsenic Treatment and Well Site Upgrades; Green Valley, Arizona; Las Quintas Serenas Water Company.** Principal-in-Charge of the design of arsenic treatment and water plant upgrades for Well Nos. 6 and 7. These included an iron media adsorption arsenic treatment system, a 400,000-gallon storage tank, and a 1,250-gpm variable-frequency-drive (VFD) transfer booster station. A new 2,500-lineal foot, 8-inch dedicated transmission water main was designed to connect Well No. 7 to the Well No. 6 site. Raw water from either or both wells is treated through the arsenic system at the Well No. 6 site, sent to fill the new tank, and pumped via the transfer booster station into the distribution system. Services provided by WestLand included site layout and grading; site piping and valving layout and sizing; preparation of booster pump and motor design specifications; and hydropneumatic tank design and associated equipment. WestLand prepared the design report, final plans and specifications, and engineer’s opinion of probable construction cost.

**City of Nogales Arsenic Treatment; Nogales, Arizona; City of Nogales Utilities Department.** Principal-in-Charge of the development of design criteria for arsenic treatment at the Meadow Hills Wells Nos. 1 and 3 and Coronado Well No. 1. The Meadow Hills wells pump directly into the water distribution system and fill the existing City of Nogales North Zone storage tank, while the Coronado well pumps to the existing High School storage tank located in the City of Nogales Downtown Pressure Zone. All three wells required arsenic treatment in order to meet the new EPA arsenic standard. Arsenic treatment consisted of a dual-vessel iron-media adsorption system located at each well site.

**Northwest CAP Delivery System Preliminary Route Evaluation and Analysis; Northwestern Pima County; Northwest Water Providers.** For over a decade, the Flowing Wells Irrigation District, Metropolitan Domestic Water Improvement District, Town of Marana, and Town of Oro Valley have worked collaboratively to develop a sustainable water supply for their customers. This effort has evolved over time to focus on the establishment of a water delivery system to deliver Central Arizona Project water to northwestern Pima County. As part of this effort, Mr. Taylor served as Principal-in-Charge of the
development of a route analysis for the delivery system that would allow for the direct use of CAP water by each partner. The project consisted of three planning/engineering tasks: Task 1 – preliminary route evaluation, screening, and route evaluation matrix preparation; Task 2 – technical evaluation of alternative routes; and Task 3 – final route evaluation. Five potentially feasible routes were reviewed during the preliminary evaluation and screening process, two of which were identified for more detailed study.

Community Water Wells Nos. 10 and 11 Reservoir, Arsenic Treatment, Booster Station, and Transmission Main; Green Valley, Arizona; Community Water of Green Valley. Principal-in-Charge of the design of Community Water Well Nos. 10 and 11 sites, including arsenic treatment facilities, new 300,000-gallon forebay reservoirs, and booster pump stations. The new wells were designed to pump through a Layne Christensen coagulation filtration arsenic treatment process into onsite forebay reservoir. The reservoirs provide treated source water to booster stations that pump through dedicated well transmission mains to fill the Community Water Reservoirs No. 2 and No. 3. WestLand prepared the design report, final plans and specifications, and engineer's opinion of probable construction cost. Services provided by WestLand included site layout and grading; site piping and valving layout and sizing; preparation of well pump, column, and motor design specifications; and hydropneumatic tank design and associated equipment. In addition, several miles of 16-inch water main were designed to transport treated potable water to the Community Water reservoirs.

Oak Creek Water Company No. 1 Water System Master Plan; Sedona, Arizona; Oak Creek Water Company No. 1. Principal-in-Charge of the development of a master plan to address existing system deficiencies and future infrastructure requirements in support of a hook-up fee application with the Arizona Corporation Commission. As part of the preparation of the master plan, WestLand examined water source capacity and quality requirements, storage requirements, pressure requirements, fire flow requirements, water main requirements, land and easement requirements, and required system upgrades to serve proposed future development. WestLand prepared a master plan report and engineer's opinion of probable construction cost.

Red Rock Water Plant No. 1 Nitrate Treatment Plant; Pinal County, Arizona; Red Rock Utilities, LLC. Principal-in-Charge of the design of a nitrate treatment facility to mitigate the tested nitrate concentration of 10 to 12 parts per million at Water Plant No. 1. (The current primary maximum nitrate concentration limit is 10 ppm.) The treatment facility was installed at the discharge of the existing wellhead to treat half the full flow of 800 gpm to an approximate final mixed (half treated, half bypassed) nitrate concentration of 8 ppm. It consists of four steel filtration vessels that contain a chloride form of anion exchange resin media. Nitrate ions are exchanged onto the media releasing chloride ions resulting in a reduced concentration of nitrate in the treated water. The media is then backwashed with a sodium chloride brine solution to remove the nitrate ions and replace them with fresh chloride ions. The spent brine backwash water is sent to a holding tank for continuous low-flow disposal to the public sewer system. The treated water is sent to an existing onsite forebay reservoir.
Diana Shiel Sandoval, MA

Project Role and Responsibilities:
Environmental Planner/Project Manager

Special Expertise:
- National Environmental Policy Act, Administrative Record
- Phase I and II Environmental Site Assessments, Preliminary Initial Site Assessments
- Clean Water Act
- Endangered Species Act
- Public Disclosure/Public Reports

Education/Training:
- MA, Land Use & Community Planning, with distinction, Northern Arizona University
- BSc, Regional Development, Cum Laude, University of Arizona
- ASTM Phase I and Phase II Environmental Site Assessments for Commercial Real Estate Workshop
- National Environmental Policy Act Compliance Workshop (EA/EIS)
- Mine Safety and Health Administration Certification
- 90-hour Real Estate Pre-licensing

Professional Affiliations:
- American Planning Association
- ASTM Committee E50 on Environmental Assessment, Risk Management and Corrective Action
- International Right of Way Association

Background:
Ms. Sandoval's experience with environmental law began in her coursework studies including Natural Resources History and Policy, Water Resources Policy and Law, Land Development Processes, and Field Studies in Environmental Geography. Prior to joining Westland, Ms. Sandoval gained experience working as an intern for the Arizona Department of Water Resources and then spent three years with a national homebuilder where she was responsible for assisting in due diligence research and land acquisitions and entitlement for master planned communities in southern Arizona. Since joining WestLand in 2007, she has provided regulatory compliance and permitting services related to land use and transportation planning, renewable energy, mining, and residential and commercial development.

Ms. Sandoval has assisted in the completion of numerous Phase I Environmental Site Assessments (ESAs) for various property types pursuant to ASTM standards E1527-05, E1527-13 and E2247-08. She has also completed Preliminary Initial Site Assessments (PISAs) for public roadway projects prepared in accordance with Arizona Department of Transportation/ Federal Highway Administration requirements and Environmental Assessment and Mitigation Reports (EAMRs). Ms. Sandoval has completed ASTM technical and professional training for Phase I and II ESAs. WestLand's ESA team routinely receives compliments from clients and regulators regarding our professionalism and the consistent quality of our work product. Upon request, ESAs address non-scope items classified as outside the standard practice, including potential asbestos-containing building materials, potential lead-based paint, health and safety concerns, and ecological resources.

Her experience with National Environmental Policy Act (NEPA) process and other federal environmental planning requirements includes resource studies, community development assessment, scoping and public participation, alternatives analyses, and keeping the administrative record. Ms. Sandoval has completed ASTM technical and professional training for Phase I and II ESAs. WestLand's ESA team routinely receives compliments from clients and regulators regarding our professionalism and the consistent quality of our work product. Upon request, ESAs address non-scope items classified as outside the standard practice, including potential asbestos-containing building materials, potential lead-based paint, health and safety concerns, and ecological resources.

She has obtained CWA Section 404 and 401 permit authorizations including residential and commercial property development; linear transportation projects for railroad, roadway, and utility extensions; bank stabilization projects; mine expansions; emergency discharges; and hazardous and toxic waste cleanup. She has completed jurisdictional delineations (JDs), and secured regional general permits (RGPs), nationwide permits (NWPs), and individual permits (IPs) from the U.S. Army Corps of Engineers.

Ms. Sandoval has assisted developers in meeting the requirements pertaining to City of Tucson environmental resource policies including floodplain, W.A.S.H. and E.R.Z. standards. She has worked with the City of Tucson Office of Conservation and Sustainable Development and managed the process for obtaining development standard modification requests, overlay zoning, and Stormwater Advisory Committee approvals.

She has provided environmental support for special zoning, including Conditional Use Permits for solar developments in Pima County inclusive of coordination with local environmental groups and the preparation of biological impact analyses, species surveys, and mitigation reports for impacts to protected species and habitat.
Selected Experience:

- Prepared numerous Phase I ESA reports for the Pima County Department of Environmental Quality also considering non-scope items, classified as outside the standard practice including: potential asbestos-containing building materials, potential lead-based paint, health and safety concerns, high-voltage power lines, and ecological resources.

- Completed several PISAs in anticipation of ADOT funding including the Town of Marana’s project to improve Tangerine Road between Interstate-10 and La Canada, a project crossing into multiple jurisdictions including Pima County and the Town of Oro Valley; and the Town of Sahuarita’s project replacing the Pima Mine Road bridge crossing over the Santa Cruz River.

- Completed Phase I Environmental Site Assessment and provided housekeeping recommendations including Spill Prevention, Control and Countermeasure (SPCC) Plan for confidential car-dealership and auto body repair shop in Tucson, Arizona.

- Managed environmental regulatory compliance for Tucson Electric Power transmission line project which will run approximately 41 linear miles in Pinal County (Pinal Central Substation to the Tortolita Substation). Assisted Tucson Electric Power in addressing National Environmental Policy Act, National Historic Preservation Act, Clean Water Act, Endangered Species Act, migratory bird protection, Arizona Pollutant Discharge Elimination System, State Native Plant Preservation and more. Coordinated with various federal entities and land management agencies to obtain all agreements, required permits and compliance documentation; the transmission line will cross privately-owned lands, lands owned by the State of Arizona and managed by the Arizona State Land Department (ASLD), federally owned lands managed by the Bureau of Reclamation (BOR) and the San Carlos Irrigation Project (SCIP), an agency of the Bureau of Indian Affairs (BIA). Ms. Shiel obtained an Approved Jurisdictional Determination from Army Corps of Engineers regarding the absence of jurisdictional waters for the project, documented that project was not likely to not adversely impact federally protected species, coordinated with Arizona Game and Fish Department to conduct surveys for candidate species in anticipation of potential federal listing, addressed plant salvage considerations for protected native species including vegetation clearing projections, and addressed state and federal archeological clearance requirements.

- Conducted special status species evaluation for confidential mining client encompassing approximately 100,000 acres (156 square miles) in Pima County. This evaluation considered species listed by the U.S. Fish and Wildlife Service under the Endangered Species Act and approximately 100 other species with potential to be listed in the future including species listed as Sensitive by the Bureau of Land Management (BLM), State of Arizona Species of Special Concern, Priority Vulnerable Species identified in the Sonoran Desert Conservation Plan website, and species identified by the International Union for Conservation of Nature and Natural Resources (IUCN) on the Red List of Threatened Species.

- Acted as Federal Emergency Management Agency’s (FEMA) agent to consult with US Fish and Wildlife Service regarding potential impacts to lesser long-nosed bat for private development which needed a conditional letter of map revision (CLOMAR). Prepared biological evaluation, addressed US Fish and Wildlife Service comments, and managed federal agency’s review of applicable records to obtain required clearances within the project’s required development schedule.

- Acted as third party contractor to the Tonto National Forest maintaining the Resolution Pre-feasibility Activities Plan of Operations project file and prepared the administrative record. Managed Microsoft Access databases and indices of all project files; coordinated closely with interdisciplinary team to collect appropriate documentation for project decisions; identified records for redaction; and assisted in providing timely public comment and Freedom of Information Act (FOIA) responses.

- Assisted in obtaining Individual Section 404 permit authorization for Pima County Regional Flood Control District’s bank stabilization project along the Pantano Wash between Speedway Boulevard and Tanque Verde Road. Work included preparation of the 404 and 401 applications, draft public notice, and 404(b)(1) Alternatives Analysis.

- Prepared Biological Impact Reports for Pima County Office of Sustainability & Conservation, addressed compliance with Maeveen Marie Behan Conservation Land System (MMB-CLS) and Regulated Riparian Habitat by preparing for on and offsite mitigation-conservation plans in collaboration with local, state, and federal agencies.
Christopher E. Rife

Project Role and Responsibilities:
Senior Project Manager

Special Expertise:
- Mining
- Water Resources
- Solid and Hazardous Wastes
- Environmental Site Assessments
- Manufacturing
- Oil and Gas
- Power
- Health and Safety

Education:
- M.A., Environmental Policy and Management, University of Denver, Colorado, 1995
- B.A., Philosophy, Humboldt State University, California, 1980

Affiliations:
- Environmental Auditing Roundtable
- Southern Arizona Environmental Management Society
- Society of Mining Engineers, Tucson Chapter

Background:
Mr. Rife is a Senior Project Manager in the Environmental Services Group. He specializes in regulatory compliance for environmental and engineering projects. Other areas of his expertise include water resources, mining, agriculture, environmental site assessment (ESA), underground storage tank (UST) investigations, solid and hazardous waste, and health and safety audit services. He has over 20 years of experience conducting ESAs and has been responsible for ESA projects for more than 350 broad-ranging sites, including public, private, and industrial properties; solid waste facilities; mines; and he has conducted pilot-scale testing of remedial systems. He has worked on environmental projects in the western United States and Mexico.

Selected Project Experience:

Confidential Site, Arizona. Conducted Phase I ESA of 3,500-acre site along a river bed in central Arizona. The work was conducted on behalf of a mining client in anticipation of a potential land exchange with federal agencies. The site included significant stands of undisturbed mesquite bosque and mesoriparian plants, with little evidence of environmental liabilities from limited agricultural activities historically performed on part of the property. Some wildcat dumping and numerous abandoned automobiles were observed; these were considered housekeeping issues of de minimis importance.

Confidential Residential Development Site; Tucson, Arizona. Managed biological assessment of 17-acre site southeast of the Tucson metropolitan area. Previous consultants had not advised the developer of permitting and biological assessment regulatory requirements, resulting in violations of the federal Clean Water Act (CWA) and Endangered Species Act, as well as the Pima County Native Plant Preservation Ordinance. WestLand is currently completing the biological assessment and will assist the client in negotiating with regulatory agencies, especially in ESA Section 7 consultation.

Road Improvement and Park Development Site; Marana, Arizona. Task manager for CWA Section 404 permitting of road widening, drainage improvement, riverbank stabilization, and district park development for a community northwest of Tucson. Conducted a CWA Nationwide Permit applicability assessment and is currently performing an alternatives analysis. Future work will include public notification and preparation of the environmental assessment.

Prospective Municipal Solid Waste Landfill Site; Arizona. Project Manager for site investigation of a location in central Arizona for potential development as a municipal solid waste facility. The project included an engineering suitability evaluation, jurisdictional delineation of waters of the United States, and a biological evaluation of special-status species.

Silverbell UST/Leaking UST Site; Marana, Arizona. Managed closure project at site with 11 USTs. Three leaking USTs were identified during the tank removal activities. Appropriate reports were submitted to ADEQ and scoping of site characterization activities for the leaking UST sites was performed.

Confidential Hazardous Waste Site; United States. Principal internal reviewer of Phase I ESA reports for 60 hazardous waste collection sites, transfer facilities, incinerators, and landfills on behalf of client bidding to purchase portfolio. Included fast-track mobilization of field investigators from offices across the country; coordination of document review, reporting, and responding to client inquires; and strict confidentiality protocols.
Project Role and Responsibilities:
Environmental Specialist

Training and Special Expertise:
- Environmental Planning and Assessment
- Mine Safety and Health Administration Certifications
- Regulatory and Planning Research

Education:
- B.A., Environmental Studies and Business Economics, University of California, Santa Barbara
- Master of Environmental Science and Management (MESM), University of California, Santa Barbara

Background:
Ms. Richman holds a Master of Environmental Science and Management specializing in pollution prevention and remediation and corporate management from the University of California, Santa Barbara. Ms. Richman’s environmental consulting expertise includes permitting, technical studies, and environmental analyses for both private and public land development projects. During her tenure at WestLand Resources, Inc. (WestLand), Ms. Richman has worked on permitting for exploration drilling projects, biological resource reports, and Phase I Environmental Site Assessments (ESAs). She is proficient in project and task management and effectively communicates science and policy to a broad range of audiences.

She has assisted in the completion of several Phase I ESAs for various property types pursuant to E1527-13 and E2247-08. She has also assisted in the completion of Preliminary Initial Site Assessments (PISAs) for roadway projects. WestLand’s ESA team routinely receives compliments from clients and regulators regarding our professionalism and the consistent quality of our work produce. Upon request, ESAs address non-scope items classified as outside the standard practice, including potential asbestos-containing building materials, potential lead-based paint, health and safety concerns, and ecological resources.

Ms. Richman has experience with both National Environmental Policy Act (NEPA) and California Environmental Quality Act (CEQA) processes and documentation. She has completed multiple Health Risk Assessments (HRAs) to analyze impacts of mobile and stationary sources of pollution on sensitive human populations. She has also completed technical studies, scoping and public participation, and noticing for multiple projects.

Past Experience:

- Coordination and support provided for confidential mine client including permitting support, biological resource documentation, and field coordination.

- Worked on the team completing the air quality and greenhouse gas emissions analysis for one segment of the California High Speed Rail CEQA/NEPA documentation.

- Provided project management and support services for noise, aesthetics, and air quality studies, as well as the Initial Study for commercial and residential development at a proposed Specific Plan site in Southern California.

- Completed multiple EAs for the City of Mesa’s projects developing parks and low-income housing.

- Coordinated noticing, including newspaper publication, for multiple projects throughout California.

- Participated in numerous courses focused on remediation of pollution in the environment while earning Master’s degree.
